The metrics CDC use for percentage calculations are from the Census Bureau Annual Estimates of the Resident Population for the United States and Puerto Rico, 2019

Percent of population vaccinated represents the percent of people receiving at least one dose and the percent of people who are fully vaccinated. The total population, population of those ages 5 years and older, population of those ages 18 years and older, and population of those ages 65 years and older are used as denominators to calculate the percent of the total population, the percent of the population ages 5 years and older, the percent of the population ages 18 years and older, and the percent of the population ages 65 years and older who have received at least 1 dose or who are fully vaccinated. CDC has capped the percent of population coverage metrics at 95.0%. These metrics could be greater than 95.0% for multiple reasons, including census denominator data not including all individuals that currently reside in the jurisdiction (e.g., part time residents) or potential data reporting errors.
