HIV Education Training

For Public Schools

Update.....

The Sexual Health and Harm Reduction Service (SHHR) is working to provide updated 'HIV Education Training' (HET) for persons providing mandated HIV education in the public schools, including an online training format.

As a result of previous trainings, we are making changes to improve the training, provide credible resources and provide a take away to be used by the educators/nurses in all Oklahoma public schools. We will continue to work with the Oklahoma Department of Education to provide unified information for ease of use.

We look forward to providing you this opportunity and if you have any questions, our contact information is available on the back.

TITLE 70-SECTION 11-103.3 OKLAHOMA STATE AIDS PREVENTION EDUCATION LAW FOR PUBLIC SCHOOLS STATES:

- A. Acquired Immune Deficiency Syndrome (AIDS) prevention education shall be taught in the public schools of this state. AIDS prevention education shall be limited to the discussion of the disease AIDS and its spread and prevention. Students shall receive such education:
1. **At the option of the local school district, a minimum of once during the period from grade five through grade six;**
 2. **A minimum of once during the period from grade seven through grade nine; and**
 3. **A minimum of once during the period from grade ten through grade twelve.**
- B. The State Department of Education shall develop curriculum and materials for AIDS prevention education in conjunction with the State Department of Health. A school district may also develop its own AIDS prevention education curriculum and materials. Any curriculum and materials developed for use in the public schools shall be approved for medical accuracy by the State Department of Health. A school district may use any curriculum and materials which have been developed and approved pursuant to this subsection.
- C. School districts shall make the curriculum and materials that will be used to teach AIDS prevention education available for inspection by the parents and guardians of the students that will be involved with the curriculum and materials. Furthermore, the curriculum must be limited in time frame to deal only with factual medical information for AIDS prevention. The school districts, at least one (1) month prior to teaching AIDS prevention education in any classroom, shall conduct for the parents and guardians of the students involved during weekend and evening hours at least one presentation concerning the curriculum and materials that will be used for such education. No student shall be required to participate in AIDS prevention education if a parent or guardian of the student objects in writing to such participation.
- D. AIDS prevention education shall specifically teach students that:
1. **Engaging in homosexual activity, promiscuous sexual activity, intravenous drug use or contact with contaminated blood products is now known to be primarily responsible for contact with the AIDS virus;**
 2. **Avoiding the activities specified in paragraph 1 of this subsection is the only method of preventing the spread of the virus;**
 3. **Sexual intercourse, with or without condoms, with any person testing positive for human immunodeficiency virus (HIV) antibodies, or any other person infected with HIV, places that individual in a high risk category for developing AIDS.**
- E. The program of AIDS prevention education shall teach that abstinence from sexual activity is the only certain means for the prevention of the spread or contraction of the AIDS virus through sexual contact. It shall also teach that artificial means of birth control are not a certain means of preventing the spread of the AIDS virus and reliance on such methods puts a person at risk for exposure to the disease.
- F. The State Department of Health and the State Department of Education shall update AIDS education curriculum material as newly discovered medical facts make it necessary.

NOTE: In School Law this is Section 410.
