Re: Changes to the Protocol Approval Process

Dear Agency Directors and Medical Directors:

Over the last few months, the Department has been working to streamline the protocol approval process.

The protocol submission process has been modified in order to empower your agency and medical director in the protocol approval process. The Department will be approving your protocol submissions based on the agencies' submitted attestations. Agency protocols will be reviewed and verified during inspections and investigations.

If your protocol is pending approval, the attestation is required. No other documentation is required with the updated application. We will join the submitted protocol(s) with the attestation.

Protocols will be reviewed for six specific items detailed on the application. When the application and protocol are approved, you will receive an approval letter allowing for implementation.

Submit all protocol changes to the Department, including the protocol application and attestation. Please note, the last protocol the Department has on file will be the protocol used during inspections and investigations.

If your agency has an approved protocol in place and you are not requesting a change, no action is needed.

Forms for submittal will be available on the Oklahoma State Department of Health web page for your convenience. Please contact Dale Adkerson if you have any questions. You may contact me at 405.426.8480 or by email at dalea@health.ok.gov or esystems@health.ok.gov.

Professionally,

Dale Adkerson

- Updated Protocol Application

63 O.S. 1-2506 – Performance of Medical Procedures.

Licensed and certified emergency medical personnel, while a duty to act is in effect, shall perform medical procedures to assist patients to the best of their abilities under the direction of a medical director or in accordance with written protocols, which may include standing orders, authorized and developed by the medical director and approved by the State Department of Health when not in conflict with standards approved by the State Board of Health, giving consideration to the recommendations of the Trauma and Emergency Response Advisory Council created in Section 44 of this act. Licensure, certification and authorization for emergency medical personnel to perform medical procedures must be consistent with provisions of this act, and rules adopted by the Board. Medical control and medical directors shall meet such requirements as prescribed through rules adopted by the Board.

310:641-3-10. License required (also in 11-2, 13-2, 15-2, and 15-3)

- (g) The application shall contain, but not be limited to the following:
- (7) a copy of patient care protocols and quality assurance plan or policy as required by the medical director and as prescribed by the Act and this chapter;
 - (A) The Department may require quality assurance documentation for review and shall protect the confidentiality of that information.
 - (B) The quality assurance documentation shall be maintained by the agency for three (3) years.
 - (C) The quality assurance policy shall include, but not be limited to:
 - (i) policy to review refusals,
 - (ii) policy to review air ambulance utilization,
 - (iii) policy to review airway management,
 - (iv) policy to review cardiac arrest interventions,
 - (v) policy to review time sensitive medical and trauma cases,
 - (vi) policy to review other selected patient care reports not specifically included, and
 - (vii) policy to provide internal and external feedback of findings determined through reviews. Documentation of the feedback will be maintained as part of the quality assurance documentation;

310:641-3-22. General provisions for ground transport vehicles (Also in 11-10)

- (j) Any patient care equipment and supplies that is/are carried on an ambulance that is/are not on the approved equipment list will need Department approval through the protocol approval process.

310:641-3-24. Medical control requirement (also in 11-13, 13-11, and 15-13)

- (g) The physician director shall:
- (1) be accessible, knowledgeable, and actively involved in quality assurance and the educational activities of the agency's personnel and supervise a quality assurance (QA) program. The appointment of a designee to assist in QA and educational activities does not absolve the medical director of their responsibility for providing oversight;
 - (2) provide a written statement to the Department, which includes:
 - (A) an agreement to provide medical direction and establish treatment protocols and the agency specific scope of practice for all certified and licensed agency personnel;

310:641-3-61. Transfer protocols (also in 11-21 and 13-20)

- (a) Department approved medical and trauma triage, transport, and transfer protocols shall adhere to the principle of delivering time-sensitive medical and trauma patients to appropriate facilities as outlined by the regional advisory boards and the Department approved protocols.
- (b) Specific triage, transport, and transfer protocols or destination protocols shall be developed by medical control for the region, area, and/or local service and submitted to the Department for approval.

310:641-3-63. Ambulance service files (also in 11-22, 13-21, and 15-22)

- (b) Each licensed ambulance service shall maintain electronic or paper records about the operation, maintenance, and such other required documents, at the business office. These files shall be available for review by the Department, during normal work hours. Files which shall be maintained include the following:

- (10) Copies of the ambulance service:
 - (B) medical protocols;

310:641-11-3. Issuance of a specialty care ambulance license

- (f) The specialty care license is limited to hospital to hospital transports of patients requiring care beyond the scope of practice of Paramedics, as identified in the application to include:
 - (1) medication formulary;
 - (2) patient care equipment;
 - (3) treatment protocol(s); and
 - (4) applicants will provide documentation that the medication, equipment, and treatment protocols are specific to the type or types of patients identified in the application.

310:641-13-10. Air ambulance equipment

- (a) Medical control shall determine the patient's needs and level of care required when deciding what equipment shall be aboard each flight and the type of aircraft required for transport. Equipment kits, cases and/or packs which are carried on any given flight shall be available for the following categories: trauma, cardiac, burn, toxicologic, pediatric, neonatal, and obstetrics.

310:641-13-8. Air ambulance medical staffing

- (b) Aeromedical crew members are required to participate in continuing education training for, but not limited to, the following: altitude physiology, emergency medical services and aviation communications, use of patient care equipment, protocol and procedure review and legal aspects of air transportation.

310:641-15-21. Triage, transport, and transfer protocols

- (a) Certified emergency medical response agencies, as part of their protocols, will include:
 - (1) specific prioritization definitions for medical and trauma patients as defined in regional plans for statewide systems,
 - (2) A process for making appropriate transportation choices to include ground and air ambulance requests,
 - (3) a quality assurance plan or policy.
- (b) Emergency medical response agencies will utilize the regional medical and trauma plans for patient prioritization and implementation of transport decisions.
