## Technical Notes

Total numbers only of marriages, absolute divorces and annulments are reported by county courts to the Oklahoma State Department of Health (OSDH). Marriage and divorce rates calculated are based on the total number of marriages, absolute divorces and annulments per 1,000 Oklahoma resident population. Data are tabulated on decrees issued in the state of Oklahoma, not by State of Residence. Therefore, marriages, divorces and annulments issued out of state to Oklahoma residents are not included while

The collection of detailed data on the total numbers and rates of marriages and divorces at the national and State levels by the National Center for Health Statistics (NCHS) was suspended beginning in January 1996 (See Federal Register Notice, Dec. 15, 1995). Limitations in the information collected by the States as well as budgetary considerations necessitated this action. The most recent comprehensive analyses of detailed marriage and divorce data are published in Advance Report of Final Marriage Statistics, 1989-90 and Advance Report of Final Divorce Statistics, 1989-90. NCHS continues to collect marital status in all of

Viewed at either the individual level or the population level, marital status is a key variable in health, demographic, and policy research. As a result, national data on current marital status and on change in marital status is collected through a variety of Federal surveys and data systems. Among these systems are health surveys conducted by NCHS, the Current Population Survey conducted by the U.S. Bureau of the Census, and the records-based vital registration system conducted as a cooperative venture (the VSCP) between NCHS and the States. Within the VSCP, current marital status data are collected from birth

NCHS data systems are continually being reviewed in light of resource constraints to assure that efforts are focused on the highest priority data needs. At a time when policy issues related to families are of great interest, NCHS has exercised caution to assure that data systems will be available to support monitoring and research interests in key priority areas. NCHS has systematically reviewed the availability and uses of detailed data on marriages and divorces. This review has led to the conclusion that the data most needed for setting policy (e.g., information on family formation, out- of-wedlock births, children living in single parent

The discontinuation of collection of detailed data from marriage and divorce certificates has resulted in a loss of data to researchers who relied on this data source for information on annual changes in the collective marriage and divorce behavior of the population, including trends and differentials in the propensity to marry, to divorce, and to remarry after divorce or widowhood. However, much of this information is available on a 5-year cycle from the June Marital History Supplement of the Current Population Survey.

Revisions to marriages, marriage rate, divorces, and divorce rate for 2017 for McClain, McCurtain, McIntosh, Major, Marshall, and Mayes counties were made in Spetember 2019.
