

## **2022 PCMH Redesign Q&A** **Behavioral Health Screening & Mock Audit Opportunity**

### **WEBINAR #1 – May 12, 2022:**

#### **1. Is this guidance for all mental health patient screening?**

This information contains best practices for medical home providers to meet the patient-centered medical home behavioral health screening requirement of screening all members assigned to the panel that are age 5 and older.

#### **2. Do you need to already be a medical home provider?**

Yes, in order to qualify for the behavioral health screening incentive or to participate in a mock audit, the provider must have a SoonerCare Choice patient-centered medical home contract.

#### **3. Will there be a list of what you will be looking for when auditing?**

Audits of the behavioral health screening requirement will be looking for an approved and completed screening tool with results contained within the medical record with a date that corresponds to the billing of 96160.

### **WEBINAR #2 – May 19, 2022:**

#### **1. Do behavioral health screenings need to be billed using modifiers?**

PCMH providers billing 96160 with an E/M code are required to append modifier 25 to the E/M code. Please see [National Correct Coding Initiative \(oklahoma.gov\)](https://www.oklahoma.gov/nccci) for more guidance on NCCI.

#### **2. Where can we listen to the recorded webinar?**

The recorded webinar is available on the [provider training page](#) under the Previous Webinars section of the page.
