Topical Corticosteroids

Updates to Prior Authorization Tiers Take Effect August 6, 2013

- Tier 1 Products are available without prior authorization
- Tier 2 Approval Criteria
 1. Documented trials of all Tier 1 topical corticosteroids of similar potency in the past 30 days that did not yield adequate relief. If Tier 1 trials are completed and do not yield adequate relief, the prescriber must also document a clinical reason for requesting a Tier 2 in the same potency instead of trying a higher potency.
 2. When the same medication is available in Tier 1, a clinical reason must be documented for using a special dosage form of that medication in Tier 2 (foams, shampoos, kits, etc.)
- An updated tier list is included on the next page. Current drug tiers & prior authorization criteria for all therapeutic categories are available at www.okhca.org/providers/rx/PA.
