MONTHLY INVESTMENT PERFORMANCE REPORT

MARCH 2009

SCOTT MEACHAM
OKLAHOMA STATE TREASURER

April 9, 2009

To the People of Oklahoma:

I am pleased to issue the March monthly investment performance report for the Office of the State Treasurer. I trust you will find it thorough and in keeping with my commitment to provide full and complete disclosure of all activities within my office. As always, my staff and I are available to answer any questions you might have.

Market Conditions

Yields on U.S. Treasury securities fell in March as investors became concerned about inflation, economic recovery and record unemployment. The yield on the benchmark 10-year note fell five basis points to 2.66%. The Treasury sold a record $438 billion of debt in the first quarter of 2009. The Federal Open Market Committee (FOMC) left the target fed funds rate unchanged at a range of 0 to 0.25% at its March meeting. "To provide greater support to mortgage lending and housing markets, the committee decided today to increase the size of the Federal Reserve's balance sheet further by purchasing up to an additional $750 billion of agency mortgage-backed securities," the FOMC said in its statement. "Moreover, to help improve conditions in private credit markets, the committee decided to purchase up to $300 billion of longer-term Treasury securities over the next six months." These measures are intended to stimulate economic activity by reducing borrowing costs and encouraging investors to move out of cash and government guaranteed debt and into asset classes with more risk. For the quarter the Dow Jones Industrial Average was down 13%, the Standard & Poor's 500-stock index lost 12% and the Nasdaq Composite Index was down 12%.

Economic Developments

The Institute for Supply Management reported that its index of manufacturing activity unexpectedly climbed to 35.8 in February from 35.6 the previous month. A reading of 50 is the dividing line between growth and contraction. The U.S. unemployment rate surged to its highest level since 1983 in February. The unemployment rate was 8.1%, up from 7.6% in January. The Labor Department reported producer prices rose 0.1% in February and were 1.3% lower than a year ago. The consumer price index (CPI) rose 0.4% in February after a 0.3% increase in January. The Commerce Department reported the U.S. trade deficit narrowed to $36 billion in January. Imports fell 6.7% to $160.9 billion and exports fell 5.7%. This was the sharpest contraction of the trade deficit since 2002. The Conference Board's consumer confidence index increased to 26 in March from a revised 25.3 in February. Job losses, falling home prices and market volatility have affected household attitudes about the economy. The Commerce Department reported its final revision to the fourth quarter GDP declined by 6.3% instead of 6.2% that was the previous estimate. Existing home sales unexpectedly increased by 5.1% in February. The supply of existing single-family homes marked a slight decline to 9.1 million from 9.2 million the prior month. Sales of new homes edged 4.7% higher in February.

Portfolio Commentary: Performance, Diversification, and Strategy

Yield on the Treasurer's portfolio was 3.57% in March and the weighted average maturity was 506 days. Funds were shifted out of liquidity investments and into U.S. government sponsored enterprises and Mortgage-backed securities. The year-to-date monthly average investable base fell by $32 million. Portfolio diversification continues to be sound. U.S. Treasuries represented 10% of holdings, and U.S. government sponsored enterprises accounted for approximately 44%. Mortgage-backed securities were 19%, Municipal Bonds were 2% and Certificates of Deposit represented 7% of assets. Money market mutual funds were 6% and 10% was maintained in overnight repurchase agreements. Link deposits (at less than 1%), State Bond Issues (at 2%) and foreign bonds (at less than 1%) made up the balance of funds invested. In keeping with the State's statutory investment objectives, the portfolio strategy continues to seek safety, liquidity, and return on investment, in that order. Based on market conditions, portfolio strategy will consist of a combination of laddered maturities and market observation for investment opportunities.

Collateralization

All funds under the control of this office requiring collateralization were so secured at rates ranging from 102% to 110%, depending on the type of investment.

Payments, Fees, and Commissions

All securities were purchased or sold on a net basis utilizing competitive bidding where practicable, with no additional fees or commissions known to the State Treasurer. Bank fees, mutual fund operating expenses and fees charged by JPMorgan Chase for the Tri-Party Repurchase Agreement Program are detailed in the attached pages, as is the earnings split between the Treasurer and the master custodian bank on securities lending income.

Sincerely,

SCOTT MEACHAM, STATE TREASURER

Explanation of Performance Comparison
March 31, 2009

The following page presents market rates of return on the Securities portion of the General Account and of the State's aggregated State Agency Accounts. The figures, which are dollar- and time-weighted, where appropriate, are calculated using the percentage change in market value (inclusive of accrued income) from the end of the prior month to the end of the reporting month. To ensure the integrity of the data, this information is provided by the Treasurer's custodian bank acting in its capacity as an external third party. As such, performance measurement is presently confined to those investments which are custodied at Northern Trust ("Northern").

The Treasurer's office is trying to develop a method to report rates of return on all investment instruments in the State's portfolio. This is in an effort to report return data in a manner recommended on September 15, 1994, by the Working Group of the Cash Management and Investment Oversight Commission. However, there are technical and conceptual challenges to expanding performance measurement to other portions of the portfolio. Attempting to apply market-base pricing calculations to instruments which do not trade, such as Certificates of Deposit, presents difficulty which is both conceptual and technical in nature.

Benchmark data is also provided on the following page.
