Scott Feely  
Intermountain Specialty Gases

Caldwell, ID 83605

Dear Mr. Feely:

This letter confirms that Intermountain Specialty Gases submitted the following model dry gas calibration device filled a fixed-concentration of ethanol-in-nitrogen was tested:

- **Model: 105S (50 ppm-550ppm)**

This calibrating unit previously conformed to the Model Specifications and is listed on the Conforming Products List of Alcohol Calibration Units. The device is being reevaluated because Intermountain Specialty Gases relocated to a new filling facility. The cylinder also has a new DOT rating that allows flammable gas. This is simply a rating change and involved no change to the cylinder.

The ethanol-in-nitrogen dry gas standards were evaluated by the Volpe National Transportation Systems Center and found to conform to the model specifications for calibrating units (CUs) for breath alcohol testers. These tanks will be included in the next update of the Conforming Products List for CUs. A copy of the evaluation report is provided for your information.

NHTSA has also reviewed the Quality Assurance Plan (QAP) for the **Intermountain Specialty Gases 105S** ethanol-in-nitrogen gas standards dated February 3, 2022, as required by 49 CFR Part 40, "Procedures for Transportation Drug and Alcohol Testing Program" (59 FR 7340). We are pleased to inform you that this submission has been approved.

We will place this QAP on file at NHTSA, together with a copy of this letter for interested agencies. A copy will also be provided to the U.S. Department of Transportation Office of Drug and Alcohol Policy and Compliance for their records.

Please be advised that this office is to be notified immediately of any revisions or modifications to the ethanol-in-nitrogen standards or this QAP.

If you require further assistance or have any questions regarding NHTSA's quality assurance program in relation to 49 CFR Part 40, please do not hesitate to contact me at [NHTSA.Alcohol@dot.gov](mailto:NHTSA.Alcohol@dot.gov).

\*VSL was deemed equivalent to the NIST in a memo issued July 1, 2022 (available upon request).

This certificate is to certify that the cylinders referenced have been tested and verified to meet the defined specifications. The tests were performed using gases and equipment that are traceable through the National Institute of Standards and Technology (NIST) to the International System of Units (SI). The basis of compliance stated is a comparison of the measurement parameters to the specified or required calibration process. The expanded uncertainties use a coverage factor of  $k=2$  to approximate the 95% confidence level of the measurement, unless otherwise noted. This certificate only applies to the components described and contained in this particular lot. This certificate shall not be reproduced except in full without written approval from Intermountain Specialty Gases (ISG). If not included, the uncertainty of calibrations/tests are available upon request. ISG is accredited to ISO/IEC 17025:2017 for testing and to ISO 17034:2016 for reference material and certified reference material production by PjLA, Accreditation No. 99338.
