Oklahoma ARPA CPF Broadband Investment Grant Program
Questions and Responses

Please note: This FAQ is an evolving document. As such, information provided in earlier versions might be modified or eliminated in later iterations. Previous versions should be disregarded, and the latest version should be used exclusively.

This FAQ was developed as a broad public resource and is intended to be strictly informational. The answers contained in this FAQ will not include complete information as the questions posed do not provide complete information. This document may be consulted as a reference but should not be relied on for a complete assessment. The OBO encourages potential applicants to consult their legal counsel in finding answers to these questions.

Updated: 11:30 a.m. CT, November 12, 2025

1. Will an ISP be able to access its old application in the READY portal?

   No. The original application questions will be used, but the platform to submit the application will be different.

2. How many locations are available to be awarded in CPF Round 2?

   766 locations. They can be accessed here.

3. Will an ISP need to apply for all 766 locations, or can they choose which locations to serve?

   All applications will be required to serve all 766 locations.

4. How much money is available to be awarded and is there a limit on cost per passing?

   Proposals for this project must be everyone's best and final offer.

5. Is tribal support required for CPF round 2?

   Yes, all 766 locations are within Tribal boundaries.

6. Can applications be saved to finish at a later time?

   Yes, but the link must be used in the same browser. It is recommended that applicants answer questions on a Word document to ensure answers are not lost.

7. Can an ISP apply for the 766 locations using multiple technology types?

   Yes. The applicant would select "Other" under technology type in the application and identify the specific technology code for each location within the CPF 2.0 Location Template.

8. Can an applicant apply for less than 766 locations?

9. Will the expected completion date remain the same as CPF 1.0, or will there be an extension due to the circumstances?

   While the US Treasury has not granted an extension at this time, the OBO would be happy to assist ISPs in communicating with Treasury to request one.
