

Using CareerTech to Satisfy 3rd-Year Math on Core Graduation Requirements

S.B. 1370 (2018) allows for the acceptance and completion of one (1) year of a full-time, three-hour career and technology program *leading* to an industry credential/certificate (endorsed or aligned) to satisfy a third math to meet graduation requirements for students on the CORE curriculum.

Conditions for Using S.B. 1370 Regarding Math

1. For students under the age of 18, school districts shall require a parent or legal guardian of the student to meet with a designee of the school prior to enrollment in the **CORE** curriculum. All parties must sign off.
2. CareerTech programs cannot satisfy both CORE Math and a computer credit in the same year.

How to show on the transcript, from SDE:

Q: A student on the Core Diploma Pathway has opted to take one year of a full-time, three-hour career and technology program in place of a third mathematics credit. What subject code belongs on this student's transcript?

If a student is on the Core Diploma pathway and is taking a three-hour career and technology course in place of a third math credit, the subject code for the course they are taking is recorded on the transcript. Then, a comment may be added to the transcript stating that the third math requirement for graduation has been satisfied by [course name/code].

Example:

9707 Welding MN

3rd math credit has been satisfied by 9707 Welding MN

Additionally:

- S.B. 1370 is NOT the same as a student taking a pull-out math course at Career Tech.
- Students taking an SDE-coded math course at a technology center should have grades transcribed as if the course were taken at the student's local high school.
- Satisfying math may not meet college entrance requirements. Satisfying math does not meet the OK Promise requirements.
- *Although this is available for students, all students should be encouraged to take SDE or CT math courses when available. (Historically, 52% of our students attend college or university)*
