Navigating Healthcare System Updates for Adolescents

Spotlight on Resources to Build Adolescent Health Literacy During Times of Social Distancing

PARENTS & GUARDIANS: *Are you going to have a mountain of medical appointments to re-schedule for your family once the COVID-19 pandemic ends?*

While you're sheltering in place, **use our lesson plans** to teach the teens in your life to know how to interact with health care providers -including scheduling medical appointments.

TEACHERS: *Are you looking for easy-to-use technology to present health content to your teens?*

While you're teaching remotely, **use the digital version of our participant workbook.** You assign one or more activities to your students and they complete and return them - all in one platform.
