

1 in 5 - U.S. children ages 3 to 17 has some form of chronic health condition: asthma, ADHD to autism spectrum disorders, diabetes, depression, anxiety, mental health issues, or some form of impairment with functional limitations. These conditions require ongoing care, which significantly affects their lives.

The Department of Health and Human Services

ANNIVERSARY

For 65 years, “Oklahaven” has had the joy of watching the most profoundly hurt children improve and progress.

The Chiropractic premise is more critical than ever before.

- Nearly all health conditions can be helped with Chiropractic, a good diet, time, and a drug free lifestyle.
- Symptoms are real, but... the body's recuperative power is stronger. The gentle chiropractic adjustment balances the body, honoring the intelligence within, as it begins to heal and restore, regain its power, and slowly, symptoms begin to disappear—physically, mentally, and emotionally.
- The children are spiritual beings in little bodies... carrying the future within them.
- Families tell us: “They wish they knew then what they know now.”

We invite you to help bring to life our shared aspiration of healthy, responsible children and education to the parents... your investment in a child's health is an investment in everyone's future.

Please, give the greatest gift of all, the gift of health to a child.

Love, Dr. Bobby

P.S. Oklahaven stands at another important moment in history. We are looking for two or three people to carry forward the Children's Chiropractic Center, a 501(c)(3) Charitable Organization. This is not simply about taking over a clinic or filling positions. This is about continuing a vision, a sacred responsibility to children and families.
