Host Agency:	Creek County Sheriff's Office
Class Info POC:	800-347-1200 Option Training products.training@defense-technology.com
Closest Airport:	Tulsa International

2 Days Tuition \$575.00

Your best less lethal close quarters option

This 2-day, highly dynamic instructor-level course provides the student with useful defensive skills in all 3 zones of defense, especially for close quarter battles (CQB). It relies heavily on practical hands-on applications and is intended for first responders who want instruction in the proper uses of Control Device/PR-24 baton (expandable or rigid) batons used for self-defense and subject-control for escort and handcuffing.

Course Overview

Using a comprehensive learning and dynamic hands-on curriculum, first-responders will learn how to utilize a PR-24® (or the generic term "side-handle") baton, which is one of the most useful and field-tested less lethal technologies on the duty belt, in direct and/or transitional ways for overcoming subject resistance through strikes, jabs, chops or blocks and establish practical anatomical subject-control over them for the purposes of escort and/or handcuffing. Baton strikes are taught but not emphasized.

The effectiveness you have overcoming a subject using a Control Device/PR-24 baton (or explaining why it was necessary to use that use of force tool) is based in large measure on the practical knowledge and skills you are taught by a highly experienced instructor who uses well-documented courseware like those in this Defense Technology Training Academy course.

This program is taught by leading experts who have real-world experience in both psychomotor skill programs and field applications for those skills. The class will provide the student with necessary information to return to his/her agency and, as that agency's instructor, develop and conduct a specialized program designed around the agency's exact operational needs in the area of Control Device/PR-24 baton tactics for sworn personnel.

This Course provides Instructor Development for In-Service Training, Including Reviews of Policy Development and Civil/Criminal Liabilities
