

VaccineFinder Checklist for Providers using the COVID Locating Health Provider Portal

Overview

VaccineFinder.org will launch in select states to help consumers find provider locations that carry COVID-19 vaccines and learn how to make an appointment. Initial locations will include:

- Active COVID-19 vaccinating providers in jurisdictions that have volunteered to be among the first to use the system
- Select pharmacy locations participating in the Federal Retail Pharmacy Program (FRPP)
- Other providers that have activated their locations to be visible on VaccineFinder.org.

The VaccineFinder platform also provides consumers with information on availability of non-COVID-19 vaccinations. To accommodate updates to the platform to support COVID-19 vaccine, VaccineFinder will temporarily take down flu and routine vaccination clinic information and only show COVID-19 vaccinating locations.

Reporting on-hand inventory quantities daily to CDC via VaccineFinder remains a requirement regardless of whether a site makes their location visible on VaccineFinder.org. Inventory quantities will not be made publicly visible.

All COVID-19 vaccination providers in VaccineFinder who have set their display field in the [COVID-19 Locating Health Portal](#) to 'display' will be publicly viewable when VaccineFinder launches. Please review and share these quick tips to ensure your sites have the information they need to update their Locating Health Portal administration data.

Provider Quick Tips for Public Display

Each location that is set to 'display' on <https://vaccinefinder.org> will show the administrative data entered by the provider: which vaccines are available, general website, phone number, hours, and a link that leads to an appointment scheduling system.

Updates to provider public display information are reflected on VaccineFinder.org within 24 hours.

- ☐ **Determine which site(s) to activate to display to the public on VaccineFinder.org**
 - ✓ Only activate locations that will receive vaccine deliveries to display.
 - ✓ All sites default to 'not display' to the public. Do not activate locations that are not open to the public.
- ☐ **Use the 'In Stock' field to update your site's availability of COVID-19 vaccines**
- ☐ **Include a Link for Action for your site(s) ('Pre Screen Web Address' field)**
 - ✓ Add a valid URL that points consumers to confirm eligibility to get a vaccine or make an appointment.
 - ✓ Some states and jurisdictions use a centralized screener and/or scheduler tool for all their providers and others rely on provider-specific tools. Include the appropriate link for each location.
 - ✓ **If this field is left blank (NOT populated)**, VaccineFinder will direct consumers to call the site for details about scheduling an appointment.
- ☐ **Ensure your site(s)' phone number(s) are listed correctly**
- ☐ **Include site hours of operation**
- ☐ **Use the 'Provider Notes' field to share important details about your site(s)**
 - ✓ E.g., appointments are required, no walk-ins, access from Courtland St., etc..

Helpful documents:

- ✓ Report inventory: [Quick Start Guide: Inventory Reporting File Upload](#) or [Quick Start Guide: Inventory Reporting Log Manually](#)
- ✓ Update public display fields: [Quick Start Guide for Public Display Information File Upload](#) or [Quick Start Guide for Public Display Information Log Manually](#)
- ✓ Additional resources: <https://vaccinefinder.org/covid-provider-resources>
