### Total Population
- **1,789,758** people have received at least 1 dose of the vaccine (US – 55.1%)
- **1,789,595** people have received at least 1 dose of the vaccine (US – 64.4%)
- **1,535,149** people are fully vaccinated (US – 47.8%)
- **1,535,102** people are fully vaccinated (US – 56.6%)

### Population 12+
- **45.2%**
- **53.8%**
- **46.2%**

### Population 18+
- **57.3%**
- **57.3%**
- **49.5%**

### Population 65+
- **84.3%**
- **84.3%**
- **75.0%**

### Data Source
CDC COVID Data Tracker - COVID-19 Vaccinations in the United States. Posted: 7/7/21
Daily Reported Administered Vaccine Doses & 7-Day Rolling Average (as of 7/6/2021)

Total vaccines administered include doses does not include data administered by federal entities (Bureau of Prisons, Veterans Health, Indian Health Services, and Department of Defense).

Oklahoma State Department of Health | Covid-19 Provider Call
EUA Updates

**Pfizer** EUA, updated on June 25, 2021
- For healthcare providers
- For recipients and caregivers

**Moderna** EUA, updated on June 25, 2021
- For healthcare providers
- For recipients and caregivers
Janssen Expiration Date Extended

The U.S. Food & Drug Administration (FDA) has authorized an extension of the shelf life for the Johnson & Johnson (Janssen) single-shot COVID-19 vaccine from 3 months to 4.5 months.

• Janssen COVID-19 vaccine is stable for 4.5 months when refrigerated at temperatures of 36 – 46 degrees Fahrenheit (2 – 8 degrees Celsius).

• If you have J&J vaccines, providers should visit www.vaxcheck.jnj to confirm the latest expiration dates of our vaccine.

• OSIIS Team has already updated all expiration dates.

• Check expiration dates online before administering vaccines. If you see a wrong expiration date in OSIIS, please follow this Tip Sheet to adjust inventory in OSIIS inventory and in your systems if applicable.
Vaccine Expiration Dates

Important for all vaccines:
• Check the expiration dates upon receiving vaccines.
• Due to increased studies about stability data, check the expiration date again later (before administering vaccines and during weekly reconciliation).

How to check expiration dates?
• Scan QR code and it will take you to the website showing the expiration date
• Locate lot number on the package and type in the website
  • Janssen website
  • Modern website
• Pfizer: printed on the box
Vaccine Ordering and Distribution
New Process

• Providers must reconcile their COVID-19 vaccines inventory weekly in OSIIS – by Monday, noon.

• Providers must create orders in OSIIS on Thursday-Friday-Monday.

• Providers can order as much as they need. If they need less than min order quantity, they still must order min quantity in OSIIS and add a comment with the actual amount needed.
  • If a provider needs one vial, OSDH will deliver one vial!

• The cut-off to create orders in OSIIS – Monday, 5pm.
The cut off for providers to request any changes/cancellation to orders is Tuesday, 1pm.

- To request a change, a provider should email to OSDH VaccineHelp <VaccineHelp@health.ok.gov>
- If provider doesn’t receive a confirmation of changes/cancellation within 24h, provider must call the OSDH Immunization Service 405.426.8580 to ensure that the order has been cancelled.

All provider orders in OSIIS will be rejected on Tuesday with a note that County Health Department (CHD) will fulfill the order and will get in touch with them via email or phone.

- Example of the message: "Your order will be fulfilled by your County Health Department. Watch for e-mail communication about the process and phone calls to arrange vaccine transfer."

- CHDs will deliver vaccines to providers on the same or the following week. Delivered by CHD employees, national guard, or courier service.
Upon delivery of the vaccine by CHD, provider should:

- Sign a Bill of Lading and keep a copy
- Check that delivered vaccines are viable
- Immediately place them into a storage according to the guidelines and label appropriately indicating expiration or/and Beyond-use dates (BUDs)
- Accept transfer in OSIIS

Questions about orders:

- OSIIS: OSIISHELP@health.ok.gov;
- Vaccine ordering process: VaccineHelp@health.ok.gov;
- Order fulfillment/delivery: contact CHDs (contacts will be shared in the follow-up email)
Reconciliation – weekly

- Providers are required to reconcile and order covid vaccines only once during the ordering time frame: Thursday, Friday, or Monday.
- If a clinic doesn't reconcile COVID inventory for 14 days, it will not be able to create VFC & 317 vaccine orders.
- An informational video on COVID 19 vaccine reconciliation and ordering can be accessed at https://vimeo.com/528424790
- Inventory Reconciliation
Wastage

- Do not return unused, open, spoiled, or expired COVID-19 vaccines to manufacturers, distributors, Oklahoma State Department of Health, or local County Health Departments.
  - *If you have "soon to expired" vaccines and know you cannot use them, do not contact the OSDH with the transfer request. Wait until vaccines expire and waste them.*

- Store wasted vaccines separately from viable vaccines and label them accordingly. The label should say: “Wasted. DO NOT USE.”

- Open vials must be disposed of in the sharps container at the end of each day. Do not put open vials back into the fridge: adjust in OSIIS and discard at the end of the day.

- COVID-19 vaccine program requirements include reporting wastage (unused, open, spoiled, or expired) into OSIIS. Please follow [this tip sheet to report COVID-19 vaccine wastage](#).

- After the wastage is recorded in OSIIS, the provider must dispose in accordance with Oklahoma regulations and processes to dispose of regulated medical waste.
"How To" Guides

- How to Turn On User Default Order Notifications
- Inventory Reconciliation
- How to Place a Covid-19 Vaccine Order
- Immunizing a Patient for COVID
- How to add an extra dose
- Wastage
Vaccine Finder Update

• Vaccines.gov
  • If a site does not update their inventory within 72 hours, vaccine availability on Vaccines.gov will change from “In Stock” or “Out of Stock” to “Call to confirm.”
  • In addition, the last update information on Vaccines.gov (see pink circle below) indicates that last time that public display information was updated, not inventory.

Communication Resources for Families

- **Getting Your Child Ready for the COVID-19 Vaccine**
- **Ask the Pediatrician: When can children get the COVID-19 vaccine?**
- **Ask the Pediatrician: My children want to have birthday parties with their friends but can't get COVID-19 vaccines yet. Is it safe?**
- **5 Superpowers You Can Give Your Children**
- **The Science Behind the COVID-19 Vaccine: Parent FAQs**
- **COVID-19: What Families Need to Know**
- **#CallYourPediatrician Campaign Toolkit**
Resources to Make Strong Recommendation

- COVID-19 vaccines are safe and effective.
- Everyone aged 12 years and older is now eligible to get a COVID-19 vaccination.
- There are several places to find a COVID-19 vaccine.
- You may have side effects after vaccination, but these are normal.
- People who have been fully vaccinated can start to do some things that they had stopped doing because of the pandemic.
- CDC’s resources How to talk to your patients about COVID-19 vaccination and Answering Patients’ Questions have tips for talking to your patients about COVID-19 vaccines.
