STATEWIDE COVID-19 VACCINE ADMINISTRATION (AS OF 5/31/2021)

1,384,818 people have received at least 1 dose* of the COVID-19 vaccine

1,145,128 people are fully vaccinated** with the COVID-19 vaccine

Across Oklahoma, a total of 2,450,275 COVID-19 vaccine doses have been administered since 12/14/2020

*Refers to individuals receiving Pfizer and Moderna COVID-19 vaccines and/or receiving single shot of J&J/Janssen Vaccine

**Refers to individuals fully vaccinated after receiving either Pfizer and/or Moderna COVID-19 vaccines (both doses) and/or receiving single shot of J&J/Janssen Vaccine

Note: Total vaccines administered does not include doses administered by federal entities (Bureau of Prisons, Veterans Health, Indian Health Services, or Department of Defense).

Data Source: COVID-19 Vaccination Reporting Specification (CVRS) Dataset - Oklahoma State Immunization Information System (OSIIS); Data reflected information entered as of 11:59PM 5/31/2021
COVID-19 VACCINATIONS IN OKLAHOMA – FEDERAL AND STATE (5/31/2021)

Total Vaccine Doses Delivered
- Delivered: 3,932,805
- Rate per Adult 100K: 130,887

Total Vaccine Doses Administered
- Administered: 2,960,989
- Rate per Adult 100K: 96,743

Total Population
- 1,646,316 people have received at least 1 dose of the vaccine (US – 50.8%)
- 1,336,335 people are fully vaccinated (US – 40.9%)

Population 18+
- 1,608,360 people have received at least 1 dose of the vaccine (US – 62.8%)
- 1,320,952 people are fully vaccinated (US – 51.7%)

Population 65+
- 519,015 people have received at least 1 dose of the vaccine (US – 85.9%)
- 445,359 people are fully vaccinated (US – 74.9%)

Updates for Pfizer, Janssen and Moderna

Oklahoma State Department of Health
Pfizer

- Approved for 12 years of age and older.
- Can be stored in the refrigerator for 31 days (2°C and 8°C (36°F and 46°F)).
- OSIIS Data Entry Tips sheet for 12-17 year old patients
- Pediatric Healthcare Professionals COVID-19 Vaccination Toolkit
Co-Administration of COVID-19 Vaccines

COVID-19 vaccines and other vaccines may now be administered without regard to timing. This includes *simultaneous administration of COVID-19 vaccines and other vaccines on the same day*, as well as coadministration within 14 days.

When deciding whether to co-administer another vaccine(s) with COVID-19 vaccine, providers should consider:

- Whether the patient is behind or at risk of becoming behind on recommended vaccines
- Their risk of vaccine-preventable diseases (e.g., during an outbreak or occupational exposures)
- The reactogenicity profile of the vaccines

**Different sites for coadministration:**

- If multiple vaccines are administered at a single visit, administer each injection in a different injection site.
- For adolescents and adults, the deltoid muscle can be used for more than one intramuscular injection.
- **Best practices** for multiple injections include:
  - Label each syringe to identify the vaccine it contains.
  - Separate injection sites by 1 inch or more, if possible.
  - Administer COVID-19 and vaccines that may be more likely to cause a local reaction (e.g., tetanus-toxoid-containing and adjuvanted vaccines) in different limbs, if possible.
Vaccine Expiration Dates

Important for all vaccines:
• Check the expiration dates upon receiving vaccines.
• Due to increased studies about stability data, check the expiration date again later.

How to check expiration dates?
• Scan QR code and it will take you to the website showing the expiration date
• Locate lot number on the package and type in the website
  • Janssen website
  • Modern website
• Pfizer: printed on the box
Vaccine Ordering and Distribution
New Process

- Providers must reconcile their COVID-19 vaccines inventory weekly in OSIIS – by Monday, noon (usual schedule).
- Providers must create orders in OSIIS on Thursday-Friday-Monday (usual schedule).
- Providers can order as much as they need. If they need less than min order quantity, they still must order min quantity in OSIIS and add a comment with the actual amount needed (new).
  - If a provider needs one vial, OSDH will deliver one vial!
- The cut-off to create orders in OSIIS – Monday, 5pm (usual schedule).
The cut off for providers to request any changes/cancellation to orders is Tuesday, 1pm (new).

- To request a change, a provider should email to OSDH VaccineHelp
  <VaccineHelp@health.ok.gov>

- If provider doesn’t receive a confirmation of changes/cancellation within 24h, provider must call the OSDH Immunization Service 405.426.8580 to ensure that the order has been cancelled (new).

All provider orders in OSIIS will be rejected on Tuesday with a note that County Health Department (CHD) will fulfill the order and will get in touch with them via email or phone (new).

- Example of the message: "Your order will be fulfilled by your County Health Department. Watch for e-mail communication about the process and phone calls to arrange vaccine transfer."

- CHDs will deliver vaccines to providers on the same or the following week. Delivered by CHD employees, national guard, or courier service (new).
• Upon delivery of the vaccine by CHD, provider should (new):
  • Sign a Bill of Lading and keep a copy
  • Check that delivered vaccines are viable
  • Immediately place them into a storage according to the guidelines and label appropriately indicating expiration or/and Beyond-use dates (BUDs)
  • Accept transfer in OSIIS

• Questions about orders:
  • OSIIS: OSIISHELP@health.ok.gov;
  • Vaccine ordering process: VaccineHelp@health.ok.gov;
  • Order fulfillment/delivery: contact CHDs (contacts will be shared in the follow-up email) (new)
Reconciliation

• Providers are required to reconcile and order covid vaccines only once during the ordering time frame: Thursday, Friday, or Monday.

• An informational video on COVID 19 vaccine reconciliation and ordering can be accessed at https://vimeo.com/528424790

• Inventory Reconciliation
• Do not return unused, open, spoiled, or expired COVID-19 vaccines to manufacturers, distributors, Oklahoma State Department of Health, or local County Health Departments.
  
  • If you have "soon to expired" vaccines and know you cannot use them, do not contact the OSDH with the transfer request. Wait until vaccines expire and waste them.

☐ Store wasted vaccines separately from viable vaccines and label them accordingly. The label should say: “Wasted. DO NOT USE.”

☐ Open vials must be disposed of in the sharps container at the end of each day. Do not put open vials back into the fridge: adjust in OSIIS and discard at the end of the day.

☐ COVID-19 vaccine program requirements include reporting wastage (unused, open, spoiled, or expired) into OSIIS. Please follow [this tip sheet to report COVID-19 vaccine wastage](#).

☐ After the wastage is recorded in OSIIS, the provider must dispose in accordance with Oklahoma regulations and processes to dispose of regulated medical waste.

Resources to Make Strong Recommendation

- COVID-19 vaccines are [safe and effective](#).
- Everyone aged 12 years and older is now eligible to [get a COVID-19 vaccination](#).
- There are several places to [find a COVID-19 vaccine](#).
- You may have [side effects](#) after vaccination, but these are normal.
- People [who have been fully vaccinated](#) can start to do some things that they had stopped doing because of the pandemic.
- CDC’s resources [How to talk to your patients about COVID-19 vaccination](#) and [Answering Patients’ Questions](#) have tips for talking to your patients about COVID-19 vaccines.
Uber offers Free Rides for COVID-19 Vaccine

- Uber is giving riders four one-way rides up to $25 off each. Each of these two round trips must be three weeks apart between May 24 and July 4
- Follow these steps when you’re ready to ride to and from a vaccination center:
  - Open the app and tap **Vaccine**.
  - Tap **Get your free ride**.
  - Find your vaccination location.
  - Select your ride and go.
- The free rides are offered between 6 a.m. and 8 p.m.
