### At Least One Dose

- **2,788,680 people total** (US – 76.9%)
  - **70.5%**
- **2,788,384 people 5+** (US – 81.7%)
  - **75.3%**
- **2,714,798 people 12+** (US – 86.6%)
  - **81.6%**
- **2,541,717 people 18+** (US – 88.3%)
  - **84.6%**
- **675,411 people 65+** (US – 95.0%)
  - **95.0%**

### Fully Vaccinated

- **2,237,304 people total** (US – 65.5%)
  - **56.5%**
- **2,237,253 people 5+** (US – 69.6%)
  - **60.4%**
- **2,179,410 people 12+** (US – 73.9%)
  - **65.5%**
- **2,036,613 people 18+** (US – 75.4%)
  - **67.8%**
- **544,675 people 65+** (US – 89.0%)
  - **85.8%**

**Data Source:** CDC COVID Data Tracker – COVID-19 Vaccinations in the United States. Posted: 3/29/2022
**Statewide COVID-19 Vaccine Administration (as of 3/29/2022)**

- **2,206,492 people** have received at least 1 dose* of the COVID-19 vaccine
- **1,866,538 people** are fully vaccinated** with the COVID-19 vaccine
- **760,706 people** have received either a 3rd dose^ or booster dose^^ of the COVID-19 vaccine

Across Oklahoma, a total of **4,706,265 COVID-19 vaccine doses** have been administered since 12/14/2020

---

*Refers to eligible individuals (ages 5 years+) receiving Pfizer and Moderna COVID-19 vaccines and/or receiving single shot of J&J/Janssen Vaccine; **Refers to eligible individuals (ages 5 years+) fully vaccinated after receiving either Pfizer and/or Moderna COVID-19 vaccines (both doses) and/or receiving single shot of J&J/Janssen Vaccine; ^3rd dose (Pfizer or Moderna) for individuals moderately to severely immunocompromised to be received at least 28 days after a second dose; ^^Booster dose for individuals 65+ or certain other adults at high risk of severe COVID-19 to be received at least six months after completion of the primary mRNA vaccine series or two months after receiving single dose of J&J/Janssen vaccine.

Note: Total vaccines administered does not include doses administered by federal entities (Bureau of Prisons, Veterans Health, Indian Health Service, or Department of Defense).

Not for public distribution, data intended for internal planning purposes.

Data Source: COVID-19 Vaccination Reporting Specification (CVRS) Dataset - Oklahoma State Immunization Information System (OSIIS); Data reflect information entered as of 11:59PM 3/29/2022
Among the 760,706 people who received either a 3rd dose or booster dose, the majority are female.

Among the 760,706 people who received either a 3rd dose or booster dose, the ages ranged between 12-103 years.

Primary Race:
- White: 73.7%
- Black: 5.6%
- Asian/Pacific Islander: 3.6%
- American Indian: 5.5%
- Other: 4.2%
- Unknown: 7.4%

Ethnicity:
- Hispanic/Latino: 6.8%
- Not Hispanic/Latino: 80.9%
- Unknown: 12.2%
COVID Vaccine Administration Guidance

Anna Anthony, RN, BSN
Immunization Service, Public Health Nurse
Pfizer (Adult and Adolescent)

• **Primary Series**
  - **Not Immunocompromised Adults**: Two doses (0.3 mL) 3 weeks apart for 12 years of age and older.
  - **Not Immunocompromised Kids**: Two doses (0.2 mL) 3 weeks apart for 5 to 11 years of age.
  - **Immunocompromised Individuals**: Three doses.
    - Third dose of primary series (0.3 mL) **at least** 28 days following the second dose for 12 years of age and older who have undergone solid organ transplantation, or who are diagnosed with conditions that are considered to have an equivalent level of immunocompromise.
    - Third dose (0.2 mL) **at least** 28 days following the second dose for 5-11 years of age who have undergone solid organ transplantation, or who are diagnosed with conditions that are considered to have an equivalent level of immunocompromise.

• **Booster Doses**
  - A single Pfizer-BioNTech COVID-19 Vaccine booster dose (0.3 mL) may be administered intramuscularly at least 5 months after completing the primary series to individuals 12 years of age and older.
  - A second single Pfizer-BioNTech COVID-19 Vaccine booster dose (0.3 mL) at least 4 months after the first booster dose for adults age 50 years and older **OR** immunocompromised individuals 12 years of age.

- *See [Guidance for COVID-19 vaccination for people who are moderately or severely immunocompromised](#) for schedule for people who are moderately or severely immunocompromised.

- †An 8-week interval may be optimal for some people ages 12 years and older, especially for males ages 12 to 39 years. A shorter interval (3 weeks for Pfizer-BioNTech; 4 weeks for Moderna) between the first and second doses remains the recommended interval for people who are moderately or severely immunocompromised; adults ages 65 years and older; and in situations in which there is increased concern about [COVID-19 community levels](#) or an individual’s higher risk for severe disease.

- ‡ A booster dose is not currently authorized for people ages 5–11 years. For people ages 12–17 years, only Pfizer-BioNTech can be used. An mRNA COVID-19 vaccine is preferred over the Janssen COVID-19 Vaccine for booster vaccination of people ages 18 years and older.

- § People ages 18–49 years who received Janssen COVID-19 Vaccine as both their primary series dose and booster dose may receive an mRNA COVID-19 booster dose at least 4 months after the Janssen booster dose. People ages 50 years and older may choose to receive a second booster dose if it has been at least 4 months after the first booster dose.
Pfizer Packaging and Dosage

• Three vaccine presentations are in circulation with different preparation and storage guidelines: Purple Cap, Gray Cap, and Orange Cap.

• Providers are encouraged to administer any Purple Cap vaccine in their inventory before Gray Cap.

• Children ages 5 through 11 years old should only be vaccinated with the Dilute Before Use Orange Cap vaccine formula (“Age 5y to <12y” on vial label).
  • It is critical to ensure children 5 through 11 years old only receive the Orange Cap vaccine in order to avoid potential age-related adverse events including product preparation issues, incorrect dose administered, and underdosage.

• All Pfizer vaccines are given based on age.
  • For example, patients who turn 12 between dose 1 and 2 will get 12+ formulation.

• See link provided for detailed information: Home | CVDvaccine-US.com

Modernas

• Primary Series
  • **Not Immunocompromised** Adults: **Two** doses (0.5 mL each) 3-8 weeks apart.
  • **Immunocompromised** Adults: **Three** doses (0.5 mL each).
    • To be administered at least **28 days** following the second dose is authorized for 18 years of age and older who have undergone solid organ transplantation, or who are diagnosed with conditions that are considered to have an equivalent level of immunocompromise.

• Booster Doses
  • Single dose (0.25 mL) **at least 5** months after completing the primary series for anyone 18+ years.
  • Additional Single dose (0.25 ml) **at least 4** months after the previous booster for adults 50+ years OR immunocompromised individuals 18+ years.
Primary Series
• One dose (0.5 mL each).

Booster Doses
• Recommend that people receive an mRNA booster at 2 months after initial dose.
• A second booster dose may be administered to those 50yrs and older OR immunocompromised individuals 18yrs+ at least 4 months after their booster.

Changes to the J&J/Janssen EUA (as of January 2022)
• https://www.fda.gov/media/146304/download
• Pages 4-5, 13: Immune Thrombocytopenia

We are no longer receiving federal allocation of Janssen. All Janssen orders will be fulfilled by local County Health Departments.
• Providers need to remain aware of expiry date of vaccines in their inventory.
• The expiration date can be obtained by entering the lot number from the carton or vial using the website www.vaxcheck.jnj
The Food & Drug Administration announced the approval of a shelf-life extension for the Johnson & Johnson’s Janssen COVID-19 vaccine for an additional three months.

- The shelf-life of this vaccine has been updated from 6 months to 9 months.
- This shelf-life extension applies to all inventory dated to expire on March 7, 2022 or later.
  - Vaccine dated prior to March 7, 2022, should be disposed of according to state and local regulation and reported as waste based on your COVID-19 provider agreement.

Vaccine providers should visit the Janssen COVID-19 Vaccine Expiry Checker webpage to confirm expiration dates. This shelf-life extension applies to refrigerated vials of J&J/Janssen COVID-19 vaccine that have been held in accordance with the manufacturer’s storage conditions.

*non-mRNA can be used to booster in special circumstances, please consult Primary Care Physician
Co-Administration

• You may administer COVID-19 and Influenza vaccines without regard to timing (both live, attenuated and non-live influenza vaccines).

• This includes administration of COVID-19 and Influenza vaccines on the same day, as well as co-administration at any time interval.

• Administer the COVID-19 vaccines and vaccines that may be more likely to cause a local reaction (i.e., adjuvanted influenza vaccines) in different limbs, if possible.

• When deciding whether to co-administer other vaccine(s) with COVID-19 vaccine, consider:
  • Whether the patient is behind or at risk of becoming behind on recommended vaccines
  • The patient's risk of vaccine-preventable disease
  • The reactogenicity profile of the vaccines
  • The likelihood of avoiding a missed opportunity to vaccinate
Vaccine Updates

- **SPIKEVAX**
  - Trade name for MODERNA COVID-19 Vaccine
  - Biological Licensing Agreement (BLA) approved
  - Approved for 18+
  - Same Formulation as the EUA Moderna COVID-19 Vaccine
  - Interchangeable with EUA MODERNA COVID-19 Vaccine
    - Primary series of two doses, one month apart
    - Third Dose for Immunocompromised 18+
    - Booster for 18+

- **NOVAVAX**
  - Still in Phase 3 and Phase 4 trials in US
  - *Protein Based* Vaccine (not mRNA)
  - 90% effective
  - Israel has signed contract with NOVAVAX to produce 5 million doses
  - Future Plans:
    - FDA approval
      - Multi-Use Vials first rollout
    - Single Dose Vials in future rollouts
    - COVID-19/Flu Combo Vaccine
Vaccine Storage and Handling

Kaitlin Hixson, Immunization Field Consultant
Updated Pfizer Data Logger: Controlant SAGA Logger

- Pfizer vaccine shippers are transitioning to an updated data logger from Controlant called "SAGA Logger."
- The SAGA Logger will provide improved performance for monitoring and reporting during shipment.
- The interactive LCD tracker display shows current temperatures and the minimum and maximum temperatures of the shipper contents during transit.
- The new SAGA Logger is slightly larger in size, and, as with the previous logger, requires return shipping in the packaging materials provided with your order.
- Key improvements to this device include:
  - Enhanced location accuracy with Wi-Fi.
  - Utilization of the 4G cellular network.
  - Interactive LCD display with an improved user interface.
  - 150 days of backup storage when no cloud is available.
  - Longer battery life.
  - Improved data transmission capability.
Important for all vaccines:
• Check the expiration dates upon receiving vaccines.
• Due to increased studies about stability data, check the expiration date again later (before administering vaccines and during weekly reconciliation).
• Please note that Moderna expiration extensions only apply to vaccines that have not been thawed or refrigerated.
• Reminder: Janssen should never be stored in the freezer or ultracold.
• How to check expiration dates?
  • Scan QR code and it will take you to the website showing the expiration date.
  • Locate lot number on the package and type into the website.
    • Janssen website
    • Moderna website
  • Pfizer: printed on the box.
Vaccine Inventory Adjustment: On-Hand Expired Vaccines

- When reconciling inventory, check that your facility has no expired inventory on hand.
- Navigate to the Vaccine Inventory On-Hand screen by selecting:
  - Inventory > Vaccines > On-Hand from the left-hand menu.
- Change the Status from On-Hand to Depleted/Expired
- Locate the vaccine inventory item requiring an inventory adjustment.
- Click the corresponding Action button and select Adjustment.
- Complete the following required fields:
  - Date (enter the actual date on which the inventory was wasted)
  - Reason (select Vtrcks Other)
  - Modification (if a value does not default, select Add or Subtract to make the corresponding adjustment)
  - Doses Adjusted (enter the number of doses wasted for the selected reason)
  - Comments (Expired)
- Click the Create button.
- Click the On-Hand menu item to return to the Vaccine Inventory On-Hand screen where you can verify the inventory was adjusted correctly.
- See attached video on Resources/Tools (Slide #40)
Best Practice for Inventory Management

• What to do when a large amount of vaccine is nearing expiration.

• CDC Code Management Service
  • [Vaccine Lot Number and Expiration Date Webpage](#)
  • Click the "Register" button in the upper right-hand corner to complete the registration form to request access.

• Vaccine Expiration Date and Lookup & Reference Information:
  • [Expiry Information for Pfizer COVID-19 Vaccines](#)
  • [Moderna Vial Expiration Data Look Up Tool](#)
  • [J&J Expiration Date Look Up Tool](#)
Failure to maintain an updated inventory may impact vaccine orders.

- Will be listed by vaccine name and age designation.
  - Not by cap color.

- Training Videos and Guides:
  - [https://www.vaccines.gov/covid-provider-resources/](https://www.vaccines.gov/covid-provider-resources/)

- Step By Step Instructions:

- For assistance in updating Vaccine Finder or OSIIS please call Immunization Services at (405) 426-8580.
[@Kaitlin Hixson] see note below
Margaret Archer, 3/3/2022
Pfizer Vaccine Expiration Extension

- The date printed on Orange Cap and Gray Cap Pfizer vaccine vials indicate the manufacture date and NOT the expiration date.
  - The original expiration date was 6 months from the manufacturer date.
  - The expiration date has now been extended to 9 months from the date of manufacture (while held at ULT frozen).

- The OSIIS homepage displays a table displaying the current manufacturing dates with the 9-month extension.

- If you have this vaccine in your inventory and it has been stored frozen (ULT), you will need to update the expiration date in OSIIS by selecting the Action button next to the vaccine in inventory > selecting Edit > and entering the new expiration date > and selecting Update.

- Check the expiration date before administering or discarding the vaccine. If you see a wrong expiration date in OSIIS, please update it in OSIIS inventory and in your systems.
• Regardless of storage condition, Orange cap and gray cap vaccine vials should not be used after 9 months from the date of manufacture printed on the vial and cartons.
• The purple cap vaccine vials with an expiry date of September 2021-February 2022 (printed on the label) may remain in use for 3 months beyond the printed date if vials are maintained in approved storage conditions (-90°C to -60°C, -130°F to -76°F).

Wastage

Do not return unused, open, spoiled, or expired COVID19 vaccines to manufacturers, distributors, OSDH, or CHD. Store wasted vaccines separately from viable vaccines and label them accordingly. The label should say: “Wasted. DO NOT USE.”

Open vials must be disposed of in the sharps container at the end of each day. Do not put open vials back into the fridge: adjust in OSIIS and discard at the end of the day.

COVID-19 vaccine program requirements include reporting wastage (unused, open, spoiled, or expired) into OSIIS. Please follow the Wastage tip sheet to report COVID-19 vaccine wastage.

After recording, the vaccine must be disposed in accordance with Oklahoma regulations and processes to dispose of regulated medical waste.
Vaccine Ordering and Distribution

Sai Teja Paruchuri, Vaccine Specialist
Reconciliation – weekly

- Providers are required to reconcile and order covid vaccines during the ordering time frame: Tuesday through Monday.
- If a clinic doesn't reconcile COVID inventory for 14 days, they will not be able to create VFC & 317 vaccine orders.
- An informational video on COVID 19 vaccine reconciliation and ordering can be accessed at https://vimeo.com/528424790
- Inventory Reconciliation
Ordering Process: starting Aug 17
Minor change in delivery of orders with min quantities

- Providers **must reconcile their COVID-19 vaccines inventory weekly in OSIIS**
- Providers must create orders in OSIIS during the ordering timeframe which is **Tuesday through Monday**.
- If an order is placed in OSIIS sometime between Tuesday April 5th – Monday, April 11th, it will be processed and sent for fulfillment on Tuesday, April 12th.
- Providers can order as much as they need. If less than the minimum quantity is required, you still need to order the minimum quantity and add a comment in the Clinic Comments text area indicating the number of doses needed.
- For example, if you place an order for Pfizer 5-11 and Pfizer 12+ in the same order, and you wish to receive the minimum order quantity for Pfizer 12+ (100 doses) but only need 4 vials of Pfizer 5-11, please be sure to specify this information in the clinic comments.
Ordering Process

- The cut-off to create orders in OSIIS – Monday, 5pm.
- To make any changes or cancellations to orders after the deadline, providers must reach out ASAP.
  - To request a change, a provider should email to OSDH VaccineHelp <VaccineHelp@health.ok.gov>
  - If provider doesn’t receive a confirmation of changes/cancellation within 24h, provider must call the OSDH Immunization Service 405.426.8580 to ensure that the order has been cancelled.

- Orders with at least min quantity, will be approved in OSIIS and directly shipped to providers – subjected to CHANGE depending on the available weekly threshold amounts.

- Orders with less than min quantity will be rejected in OSIIS with a note that County Health Department (CHD) will fulfill the order and will get in touch with provider via email or phone.
  - Example of the message: "Your order will be fulfilled by your County Health Department. Watch for e-mail communication about the process and phone calls to arrange vaccine transfer."
  - CHDs will deliver vaccines to providers on the same or the following week. Delivered by CHD employees, national guard, or courier service.
Ordering Process

• Upon delivery of the vaccine by CHD, provider should:
  1. Sign a Bill of Lading and keep a copy.
  2. Check that delivered vaccines are viable.
  3. Immediately place them into a storage according to the guidelines and label appropriately indicating expiration or/and Beyond-use dates (BUDs).
  4. Accept transfer in OSIIS.

• Questions about orders:
  • OSIIS: OSIISHELP@health.ok.gov
  • Vaccine ordering process: VaccineHelp@health.ok.gov
  • Order fulfillment/delivery: Contact CHDs (contacts will be shared in the follow-up email).

Oklahoma State Department of Health | COVID-19 Vaccine Provider Call
Pediatric Pfizer
Updating Passwords in OSIIS
• OSIIS has a public portal that can be found at the below link:
  • [https://osiis.health.ok.gov/osiis_public/Application/PublicPortal](https://osiis.health.ok.gov/osiis_public/Application/PublicPortal)
  • DISCLAIMER: Not all shots are recorded in OSIIS as reporting private vaccine is not required.

• Patients can search and download a copy of their shot record for just covid shots or their complete immunization history through the portal.

• The public portal uses **patient name, date-of-birth, email, and phone number** for verification purposes (all have to be on the shot record in OSIIS or patients cannot pull their shot record).

• Currently OSIIS has a high amount of missing emails/phone numbers.

• Providers need to make sure to document email and phone number for the patient **and add/send it to OSIIS** with the shot record in order to increase the likelihood of a records match in the portal.
"How To" Guides
