

OKLAHOMA DRINKING WATER

# LEAD TESTING

IN PUBLIC SCHOOLS & CHILD CARE FACILITIES

District: C.A.R.D. Head Starts

School: Bartlesville East I Head Start

Sampling Date: 9/18/2024

Status: Complete

## RESULTS

Below are the results from the first round of testing of drinking water for lead that was conducted at C.A.R.D. Head Starts - Bartlesville East I Head Start on September 18, 2024. Overall, four (4) outlets were tested resulting in a total of eight (8) samples being sent to the lab.

- Eight (8) samples had no detectable level of lead.
- Zero (0) samples had a low detection of lead between 1.0 and 14.9 µg/L.
- Zero (0) samples had a high detection of lead equal to or above 15.0 µg/L.

The table below shows all sample results. Sample results are in micrograms per liter, shown as µg/L. For more information on how to read this report, please see our **Results Interpretation Fact Sheet**.

| Sample ID              | Comments                                       | First Draw<br>(µg/L) | Flush<br>(µg/L) | Remedial Action |
|------------------------|--|----------------------|-----------------|-----------------|
|                        |  | Initial Sampling     |                 |                 |
| Non-Detect (<1.0 µg/L) |  |                      |                 |                 |
| 1-1-KIT-KF1            | Kitchen faucet in facility kitchen; left side  | <1.0                 | <1.0            | N/A             |
| 1-1-KIT -KF1           | Kitchen faucet in facility kitchen; right side | <1.0                 | <1.0            | N/A             |
| 1-1-MAIN-CF1           | Classroom faucet in main classroom; left side  | <1.0                 | <1.0            | N/A             |
| 1-1-MAIN-CF2           | Classroom faucet in main classroom; right side | <1.0                 | <1.0            | N/A             |
