

OKLAHOMA DRINKING WATER

LEAD TESTING

IN PUBLIC SCHOOLS & CHILD CARE FACILITIES

District: Home Child Care Center

School: Fowlkes, Daliqua

Sampling Dates: 2/27/2025, 7/10/2025

Status: Remediation

RESULTS

Below are the results from the first and second rounds of testing of drinking water for lead that was conducted at Home Child Care Center – Fowlkes, Daliqua. The initial sampling event occurred on February 27, 2025. The resampling event occurred on July 10, 2025.

In the initial sampling, two (2) outlets were tested resulting in a total of four (4) samples being sent to the lab.

- Three (3) samples had no detectable level of lead.
- One (1) sample had a low detection of lead between 1.0 and 14.9 µg/L.
- Zero (0) samples had a high detection of lead equal to or above 15.0 µg/L.

In the resampling, two (2) outlets were tested resulting in a total of four (4) samples being sent to the lab.

- Two (2) samples had no detectable level of lead.
- Two (2) samples had a low detection of lead between 1.0 and 14.9 µg/L.
- Zero (0) samples had a high detection of lead equal to or above 15.0 µg/L.

The table below shows all sample results. Sample results are in micrograms per liter, shown as µg/L. For more information on how to read this report, please see our **Results Interpretation Fact Sheet**.

Sample ID	Outlet Description	First Draw (µg/L)	Flush (µg/L)	Remedial Action	First Draw (µg/L)	Flush (µg/L)
		Initial Sampling			Resampling	
Low Detection (1.0 - 14.9 µg/L)						
1-1-KIT-KF1	Kitchen Faucet	<1.0	<1.0	N/A	<1.0	1.1
1-1-BR-BF1	Bathroom Faucet	1.1	<1.0		<1.0	9.4
