REQUEST FOR PUBLIC COMMENT ON A PROPOSED MODIFICATION TO OKLAHOMA'S WATER QUALITY MANAGEMENT PLAN FOR THE MADILL PUBLIC WORKS AUTHORITY (PWA)

Public Comment Period Begins: September 17, 2026

Public Comment Period Ends: November 2, 2026

Permittee: Madill PWA, 201 East Overton Street, Madill, OK 73446. [Facility Legal Description: SE $\frac{1}{4}$, SW $\frac{1}{4}$, SW $\frac{1}{4}$, Section 22, Township 5 South, Range 5 East, I.M.]

Receiving waters and location: Glasses Creek (OK310800010020_00) (Latitude: 34° 06' 2.338" North; Longitude: 96° 46' 18.628" West)

The Madill PWA has requested a modification to its Water Quality Management Plan (WQMP or 208 Plan) to increase the facility's design flow from 0.75 MGD to 1.5 MGD. Based on an uncalibrated seasonal QUAL2K model, proposed Wasteload Allocation (WLA) limits have been developed to ensure that discharge limits are

sufficiently stringent to maintain Dissolved Oxygen (DO) standards under critical conditions. This WLA is intended solely to address oxygen demanding substances in the discharge.

Glasses Creek (OK310800010020_00) is listed in Appendix A of the Oklahoma Water Quality Standards (OAC 252:730). Its beneficial uses include Aesthetics, Agriculture, Fish and Wildlife Propagation - Warm Water Aquatic Community (WWAC), Fish Consumption (FC), Primary Body Contact Recreation (PBCR), and Public and Private Water Supply (PPWS). This segment has been assessed as insufficient information for WWAC and therefore is not considered impaired for the WWAC beneficial use.

The proposed discharge limits for the Madill PWA are as follows:

Madill PWA

Proposed Design Flow: 1.5 MGD

WLA limits:

Summer (Jun–Oct): 7 mg/L CBOD₅, 15 mg/L TSS, 1.5 mg/L NH₃-N, 5 mg/L DO

Spring (Apr – May): 9 mg/L CBOD₅, 15 mg/L TSS, 1.8 mg/L NH₃-N, 6 mg/L DO

Winter (Nov-Mar): 20 mg/L CBOD₅, 30 mg/L TSS, 7 mg/L NH₃-N, 6 mg/L DO

These limitations are minimum requirements. If a Total Maximum Daily Load (TMDL) is approved for the stream, any more stringent limitations contained in the TMDL will apply. The comment period will be open for 45 days. If you have any concerns regarding these proposed limits, please submit your comments in writing by the end of the workday on **November 2, 2026**, to:

You may also request a public meeting in writing. If there is a significant degree of public interest, DEQ will schedule a public meeting. After evaluating comments received and making any necessary changes, the WLA will be submitted to the U.S. Environmental Protection Agency (EPA) for final approval.

You are receiving this notice because you are either on DEQ's list to receive all public notices about proposed Waste Load Allocations or you are located downstream in an affected watershed. If you are receiving this notice in error, are getting multiple notices, or do not want to receive future notices, please let us know. In addition to notices about new or changes in 208 Plans for facilities, DEQ's Modeling, TMDL, 208 & 303(d) Section sends out public notices about proposed changes in the Integrated Report, proposed TMDLs, 404 projects, 401 Certification requests, and proposed changes in the CPP.

If you would like to receive any or all of these public notices via e-mail, please send your e-mail address to Water.Comments@deq.ok.gov. Also, please let us know if you want to receive notices for the entire State or just for your [watershed](#). **By receiving PDF public notices via e-mail, you will help save money and the environment by reducing the amount of paper we use to mail them.** In addition to helping the environment, you will be able to click on helpful FYI hyperlinks.
