Oklahoma State Innovation Model (OSIM)

OSIM/OHIP Health Efficiency & Effectiveness
Workgroup Meeting
Thursday, July 23, 2015

Chair, Becky Pasternik-Ikard
Project Manager, Valorie Owens

Agenda

Section			Presenter
Welcome & Introductions	10 min	1:00pm	Chair, Becky Pasternik-Ikard, OHCA Deputy State Medicaid Director
Updates on project activities: - HEE Pictorial Directory Update - OSIM Website Updates - Updated OSIM HEE Timeline	10 min	1:10pm	Valorie Owens, Project Manager
OSIM Update	10 min	1:20pm	Alex Miley, OSIM Project Director
Deliverable Review & Discussion: - Population Health Needs Assessment	20 min	1:30pm	Malinda Douglas, Chair, OSIM Evaluation & Performance Reporting Subcommittee
Deliverable Review & Discussion: - Public Health Driver Diagrams	15 min	1:50pm	Alex Miley, OSIM Project Director
Deliverable Review & Discussion: - Current Health Transformation Initiatives & Recommendations on Strategies & Interventions	25 min	2:05pm	Adam Gibson, OU E-TEAM Senior Research Associate & Project Lead
Deliverable Review & Discussion: - OK Healthcare Delivery Models Analysis	25 min	2:30pm	Isaac Lutz, Project Manager, OHIP/OSIM Health Finance Workgroup
Wrap-Up	5 min	2:55pm	Chair, Becky Pasternik-Ikard

Welcome New Workgroup Members!

Donna Dyer has been the Chief Executive Officer of East Central Oklahoma Family Health Center, Inc. (ECOFHC) since 2008. ECOFHC is located in Wetumka and Henryetta, and serves a medically underserved population and service area in rural Oklahoma.

Ms. Dyer received a bachelor degree in Human Services Counseling and a master's degree in Human Resources Administration from East Central University. She has 30+ years of experience in non-profit organizations. Ms. Dyer serves on the Oklahoma Primary Care Association Board of Directors, Hughes County Board of Health, East Central Workforce Investment Board, Hughes County Turning Point, Medical Reserve Corp., Region VI Medical Emergency Response Center, Wes Watkins Technical Center Surgical Tech Advisory Committee, and the Bio-Medical Advisory Committee. Ms. Dyer is also a member of the American College of Healthcare Executives.

Teresa Jackson is employed as the Senior Executive Officer of Choctaw Health Services. She has worked for the tribe since 1999. Beginning as Comptroller of the Talihina Hospital, she later worked as business office director in 2001 and was then promoted to Hospital

Administrator in 2006.

Ms. Jackson is a graduate of Southeastern Oklahoma State University with a Bachelor's Degree in Accounting. She serves as the Vice Chair on the Oklahoma Board of Regents for Eastern Oklahoma State College, the Kiamichi Vo-Tech Talihina Campus Advisory Committee and the Texoma Medical Women's Advisory Committee. She sits on the Oklahoma City Area Inter-Tribal Health Board and is the Vice-Chair of the Inter-Tribal Council Health Board.

Oklahoma State Innovation Model

[Oklahoma State Innovation Model Application - PDF](#)

The **State Innovation Model (SIM)** grant was awarded to Oklahoma in December 2014 and is to begin in February 2015. The goal of the Oklahoma SIM is to provide state-based solutions to Oklahoma's healthcare challenges. Oklahoma's plan aims to improve health, provide better care and reduce health expenditures for more than 1.2 million Oklahomans. Working through the **Oklahoma Health Improvement Plan (OHIP)** Coalition, a public-private partnership consisting of a broad spectrum of stakeholders across the state, the OSIM will design a comprehensive model that focuses on the improvement of statewide health outcomes through value-based payment and healthcare delivery system innovation and redesign, while integrating evidence-based population and clinical interventions.

The plan is divided into three phases of work; phase 1 seeks to achieve consensus among coalition stakeholders on the alignment of a socio-ecological model that includes clinical and population-based health measures for selected health topics: obesity, diabetes, hypertension and tobacco. In phase 2, stakeholders will assess and determine what multi-payer, value-based purchasing model realistically achieves common priorities and goals. Concurrently, in phase 3, stakeholders will identify strategies to increase adoption levels of Electronic Health Records (EHR) and attainment of Meaningful Use (MU) among providers; initiate planning for the development of a Value-Based Analytics Tool (VBA) for healthcare data analysis; determine benchmarks aimed at improving clinical

Overview of the State Innovation Model project

The mission of the State Innovation Model (SIM) project aligns to the CMS Triple Aim Strategy to improve care, population health, and costs.

The SIM project, launched by the CMS Center for Medicare and Medicaid Innovation (CMMI), tests the ability of state governments to use regulatory and policy levers to **accelerate health transformation**.

CMMI is providing financial and technical support to states for developing and testing **state-led, multi-payer health care payment and service delivery models** that will impact all residents of the participating states.

The **overall goals** of the SIM project are to:

- Achieve the Triple Aim: improve care, improve population health, and decrease total per capita health spending
- Establish public and private collaboration with multi-payer and multi-stakeholder engagement
- Transform health care payment and delivery systems

Current System	Future System
• Fee-for-service/encounter based • Poor coordination and management for chronic diseases • Lack of focus on the overall health of the population • Unsustainable costs • Fragmented delivery system with variable quality	• Patient-centered (mental, emotional, and physical well-being) • Focused on care management and chronic disease prevention • New focus on population-based quality and cost performance • Reduces costs by eliminating unnecessary or duplicative services • Incentivizes quality performance on defined measures

HEE Workgroup Meeting Objectives

Health Efficiency & Effectiveness

Topic	Description	Section Objectives
Population Health Needs Assessment	■ Research conducted by the OSIM Evaluation & Performance Reporting Subcommittee ■ Identify and describe statewide health problems, gaps and strengths in services, and interventions to improve the health of Oklahoma	■ Review and discuss the gaps in access to care and health status disparities to be addressed in the delivery system transformation
Current Health Initiatives & Recommendations on Strategies and Interventions	■ Research conducted by OU E-TEAM ■ Summarize current health initiatives in the state as well as potential strategies on key health metrics	■ Discuss strategies for addressing high priority areas and gaps as well as the integration of public health and health care delivery
Public Health Driver Diagrams	■ Research conducted by OSDH Chronic Disease Services, the Center for the Advancement of Wellness, and the Oklahoma Department of Mental Health and Substance Abuse Services ■ Identify the primary and secondary drivers associated with achieving the OHIP/OSIM goals for the core health metrics.	■ Review and discuss if the public health driver diagram for each core metric provides an overarching representation of the actions and the primary drivers they influence. ■ Discuss if the driver diagrams visually demonstrate how Oklahoma will transform its state's health care to achieve the "Triple Aim" goal.
Oklahoma Healthcare Delivery Models Analysis	■ Research conducted by Milliman ■ Identify existing delivery models in Oklahoma and new delivery models adopted in other states	■ Discuss the range of models, their goals, impacts, and advantages/disadvantages (e.g., ACOs, shared savings based on total cost of care, episodes of care, advanced primary care initiatives, health homes, etc.)

METRIC	OKLAHOMA	UNITED STATES	2020 STATE TARGET
Diabetes			
Adult Diabetes	11.0% (2013)	8.7% (2010)	9%
Hypertension			
Adult Hypertension	37.5%	31.4%	36%
Behavioral Health			
Untreated Mental Illness	86% treatment gap	n.a.	76% treatment gap
Addiction Disorders	8.81%	8.66%	7.8%
Adult Suicide Deaths	22.0 per 100,000	16.5 per 100,000	19.4 per 100,000
Children's Health			
Infant Mortality	6.8 per 1,000	6.0 per 1000	6.4 per 1,000 live births
Maternal Mortality	29.9 per 100,000 (2013)	17.8 per 100,000 (2011)	26.2 per 100,000 live births
Injury Deaths Among 0-17	14.4 per 100,000	7.4 per 100,000	13.9 per 100,000

Population Health Needs Assessment

Key Findings

- All groups experience adverse health outcomes due to chronic disease and health risk behaviors
- Greater socio-economic need and health impacts are found among certain groups and places in Oklahoma
- Limited access to care results in greater health impacts
- Rates of preventable hospitalizations are indicators of population-level access to primary care or community care

Oklahoma State Innovative Model Healthcare Delivery Models DRAFT

Presenters:

Timothy F. Harris, FSA, MAAA
Principal

Jared Rogers
Actuarial Assistant

PURPOSE AND SCOPE OF THIS STUDY

For the purposes of planning and establishing a value-based payment system that encourages outcome-driven healthcare by supporting patients and healthcare providers in making decisions that promote health by encouraging preventive and primary care and the appropriate use of acute care facilities, Milliman was contracted by the Oklahoma State Department of Health (OSDH) to analyze the current insurance market in Oklahoma using information provided by OSDH and other public sources of data.

The information presented in this report is to be used in the development of later deliverables to OSDH.

Accountable Care Organizations

Accountable Care Organizations (ACOs) have seen explosive growth since their entry into the healthcare industry. Initially introduced by the Affordable Care Act (ACA) and first established in January 2012, ACOs have grown to have a significant presence across the nation. In 2015, there are now 458 different ACOs established across the United States.

Oklahoma ACOs

Oklahoma contains three primary ACOs with varying numbers of participating providers and covered lives. Each of the three is considered a standard Medicare Shared Savings Program ACO. All three of Oklahoma's ACOs were created within the last two years, and none have reported a savings or loss.

Mercy ACO

Mercy ACO has participating providers in a Missouri, Oklahoma, Arkansas, and Kansas. In Oklahoma, the concentration of participating providers is centralized around Oklahoma City. Mercy ACO was established January 1, 2015 and is licensed by CMS to run through to December 31, 2017. Savings data will not be available until 2016.

St. Anthony ACO (SSMOK ACO)

St. Anthony ACO, also known as SSMOK ACO, is an Oklahoma specific ACO and it boasts the most provider participation in Oklahoma. St. Anthony ACO was established January 1, 2015 and is licensed by CMS to run through to December 31, 2017. Savings data will not be available until 2016.

St. John ACO (SJFI LLC)

St. John ACO, also known as SJFI LLC, is an Oklahoma specific ACO and its participating providers are centralized around Tulsa, Oklahoma. St. John ACO was established January 1, 2014 and is licensed by CMS to run through to December 31, 2016. 2014 Savings data has not yet been made public as of the writing of this report.

ACO HealthCare Provider and Physician Participation

Note: St. Anthony's ACOs are located only in the Oklahoma City metro area.

Medicare Advantage in Oklahoma

Medicare Advantage plans are a type of Medicare health plan offered by private insurance companies that contracts with Medicare to provide all Part A and Part B benefits. Medicare Advantage Plans include Health Maintenance Organizations, Preferred Provider Organizations, Private Fee-for-Service Plans, Special Needs Plans, and Medicare Medical Savings Account Plans.

Wyoming	3.0%

Includes local HMO, local PPO, PPO Demonstration (relevant through 2005), PFFS, Regional PPO, MSA, Cost, and other demonstration contracts. As of 2010, the penetration rate includes HCPP, PACE, Employer-only, and SNP-only plans. Penetration is the number of enrollees in Medicare Advantage divided by the number of Medicare beneficiaries.

Medicare Initiatives in Oklahoma

BPCI Model 2: Retrospective Acute & Post Acute Care

Episode BPCI Model 3: Retrospective Post Acute Care Only

BPCI Model 2: Retrospective Acute & Post Acute Care Episode

The Bundled Payments for Care Improvement initiative is comprised of four broadly defined models of care, which link payments for multiple services beneficiaries receive during an episode of care. Under the initiative, organizations enter into payment arrangements that include financial and performance accountability for episodes of care. These models may lead to higher quality and more coordinated care at a lower cost to Medicare.

In Model 2, the episode of care includes the inpatient stay in the acute care hospital and all related services during the episode. The episode ends either 30, 60, or 90 days after hospital discharge. Participants select up to 48 different clinical condition episodes.

Oklahoma has 18 facilities participating in BPCI Model 2 Initiative.

BPCI Model 3: Retrospective Post Acute Care Only

In Model 3, the episode of care is triggered by an acute care hospital stay and begins at initiation of post-acute care services with a participating skilled nursing facility, inpatient rehabilitation facility, long-term care hospital or home health agency. The post-acute care services included in the episode must begin within 30 days of discharge from the inpatient stay and end 30, 60, or 90 days after the initiation of the episode. Participants can select up to 48 different clinical condition episodes.

Oklahoma has 21 facilities participating in BPCI Model 3 Initiative.

Multi-Payer Healthcare Delivery Initiative

Oklahoma Comprehensive Primary Care Initiative- Tulsa Region

The Tulsa area is one of seven regions selected for the Comprehensive Primary Care Initiative (CPC), which is an effort by CMS to improve primary care in the country.

The Comprehensive Primary Care (CPC) initiative is a multi-payer initiative fostering collaboration between public and private health care payers to strengthen primary care.

Medicare will work with commercial and State health insurance plans and offer bonus payments to primary care doctors who better coordinate care for their patients.

Primary care practices that participate in this initiative will be given resources to better coordinate primary care for their Medicare patients.

Three Oklahoma payers are involved in this initiative: Blue Cross Blue Shield of Oklahoma, CommunityCare, and Oklahoma Health Care Authority (OHCA).

MyHealth Access Network, an extensive coalition of health care organizations throughout Oklahoma, is serving as the convener of the CPC initiative by supporting implementation and data management for the primary care practices selected to participate.

Health Workforce Redesign

Governor's Health Workforce Action Plan Strategy Session

September 2nd, 9:00am-3:00pm

- Action Plan contains high level goals and strategies to ensure Oklahoma's health workforce is able to support the transition to value-based care
- Session will be facilitated by National Governor's Association Consultants
- Attendees from each workgroup will be invited
- Outcomes will be included in an issue brief that will inform the newly created "*Health Workforce Subcommittee*" of the Governor's Council for Workforce and Economic Development

■ Outcomes:

- Input on the development of a health workforce plan which incorporates a care coordination model, encourages patient-centered care, and supports the needs of a value-based system
- Recommendations for descriptions and core competencies for "emerging health professions" in Oklahoma
- Recommendations that support "Team-Based Care for a Transformed System of Care" in Oklahoma

For more information, please contact Jana Castleberry at JanaC@health.ok.gov or at 405-271-9444 ext. 56520.
