# Logic Model

**Office of the Tribal Liaison (OTL)**

## Inputs
- OTL Customer Input (tribal nations, OSDH & tribal serving entities)
- Community Development & OSDH leadership support
- OSDH Human Resources
- Funding
- Evaluation
- Strong Relationships and Partnerships
- Best Practices and Evidence-Based Models
- Assessment & Surveillance Data

## Activities
- Seek government-to-government consultation with Tribal Nations on issues that impact AI people
- Foster relationships & strategic collaborations among OTL customers
- Strengthen cultural competency & diversity within OSDH workforce
- Implement culturally appropriate & effective communication
- Appropriately disseminate & translate AI public health findings into meaningful knowledge

## Short-term Outcomes
- Increased mutual understanding among Tribal Nations & OSDH to inform AI health decisions
- Increased collaborations among OTL customers to jointly make decisions & to support OHIP & OSDH strategic map
- Increased cultural competency knowledge & skills within OSDH workforce
- Increased awareness, knowledge, & utilization of the OTL & OSDH as trusted resources
- Increased practical knowledge of effective AI intervention approaches & lessons learned

## Intermediate Outcomes
- Enhanced OSDH public health policies, infrastructures, & systems that impact AI people
- Increased trust, reciprocity, connectivity, & interaction among OTL customers
- Increased OSDH's programs & services that are culturally appropriate for AI people
- Increased proportion of qualified AI OSDH employees
- Increased usage of AI health data in decision making

## Long-term Outcomes
- Enhanced AI people's access to culturally appropriate public health programs & services
- Increased sustainable partnerships among OTL customers to address AI people’s health disparities
- Increased demand & application for AI programs

## Vision
- Achieving tribal-state synergy for optimal holistic health

## Evaluation and Continuous Quality Improvement

### Assumptions
- Seeking consultation from Tribal Nations to provide guidance before developing & implementing policies, procedures, and/or protocols that impact AI people will better inform OSDH decision making & strengthen government-to-government collaborations.
- Increased opportunities to interact with Tribal Nations to enhance cultural competency of OSDH workforce will improve programming to serve AI people.
- Collaboration can bridge the gaps in health data for AI people.

### Rationales
- AI Tribal Nations have an inalienable & inherent right to self-governance in which the sovereign powers are exercised over their members, citizens, territory, & lands.
- Tribal Nations’ participation in the decision making process needs to be respected as a government-to-government relationship.
- Strengthening collaboration & leveraging resources between Tribal Nations, OSDH, & tribal serving entities may yield greater impact in creating a healthier & safer community for AI people.
