6/21/2021	No end date	Maternal and Child Health Service and Dr. Gold	To expand access to prenatal care for pregnant women in County Health Departments. To Provide a medical hybrid model of services to expand access to care.	Yes	6/21/2021	Title 63 O.S. §1-106.B.12
6/21/2021	6/30/2022	Take Charge! and Great Salt Plains Health Center	The purpose of this partnership is for the OSDH and Great Salt Plains Health Center to leverage both resources and information, while working together to promote BCCEDP initiatives. The success of these BCCEDP initiatives will be gauged by increasing screening and diagnostic service numbers in the counties that the Great Salt Plains Health Center facilities are located - Alfalfa, Blaine, Garfield, and Grant Counties. This geographic area will benefit from increased screening and diagnostic services especially Grant County, which has maintained the highest rate of breast cancer in the State for several years. Parties will collaborate to implement and complete an evidence-based intervention (EBI) plan and evaluate the success of the outcomes.			Title 63 O.S. §1-106.B.12

7/8/2020		Oklahoma State Department of Health and OMES	<p>The Sexual Health and Harm Reduction Service (SHHR) of the Oklahoma State Department of Health (OSDH) is required by the HIV/AIDS Bureau (HAB) of the Health Resources and Services Administration (HRSA) to conduct an HIV Unmet Needs Assessment for the state of Oklahoma. Oklahoma receives funding for HIV-related care through the CARE Act Part B.</p> <p>The purpose of the HIV Unmet Needs Assessment is to estimate the number of Oklahoma residents who have been diagnosed with HIV but are not receiving regular HIV-related health care, overall and stratified by demographics. Data to Care activities involve the analysis of HIV data to identify persons diagnosed with HIV who are not in care, followed by efforts to link those persons to essential services. In the wake of the Trump Administration's new Ending the HIV Epidemic initiative, which aims to reduce new HIV infections in the US by 75% by 2025 and by 90% by 2030, results of these analyses are extremely valuable to the OSDH SHHR. They allow for the identification of disparities in access to HIV care and inform the need for and design of public health strategies to address service gaps. The results are not used for research purposes. We intend to share</p>	45 CFR § 164.512(b); 63 O.S. § 1-502; OAC 310: 521-5-1
