Facility Name* Phone # () - Fax # () -
Address* City* State Zip*

Specimen Information

Collection Date (mm-dd-yyy)* / / Time (hour:minute) AM / PM By
Source/Type*(check one only)
Nasopharyngeal Swab Nasal Swab Nasal Mid-turbinate Swab Oropharyngeal Swab
Nasal wash Tracheal aspirate BAL Sputum Other (specify):

Symptoms and Associated Risk Factors

- Healthcare worker having close contact with a laboratory-confirmed COVID-19 patient or suspect COVID-19 patient with pending laboratory testing within last 14 days
Resident or staff in a congregate living facility (e.g., long-term care, prison/jail, homeless shelter)
Hospitalized individual seeking testing for discharge to a long-term care/nursing facility
Other Symptomatic individual with fever of 100.4°F or higher AND signs/symptoms of acute respiratory illness (e.g., cough, shortness of breath), chills, repeated shaking with chills, muscle pain, headache, sore throat, or new loss of taste and smell. Other symptomatic individuals must also meet at least one of the risk factors indicated below to qualify for testing:
≥ 65 years old
Immunocompromised or with chronic medical condition (e.g., diabetes, heart disease, on immunosuppressive medications, chronic lung disease, receiving dialysis, chronic kidney disease, etc.)
Close contact with a laboratory-confirmed COVID-19 patient or suspect COVID-19 patient with pending laboratory testing within 14 days of symptom onset

Close contact is defined as:

- Being within approximately 6 feet (2 meters) of a COVID-19 case for a prolonged period of time; close contact can occur while caring for, living with, visiting, or sharing a healthcare waiting area or room with a COVID-19 case OR
Having direct contact with infectious secretions of a COVID-19 case (e.g., being coughed on) while not wearing recommended PPE
