INSTRUCTIONS
Oklahoma State Department of Health
Communicable Disease Risk Exposure Report

This report form was developed to initiate a system of notification for risk exposures occurring outside of a health care facility to health care workers, emergency responders, and funeral workers as specified by the Oklahoma State Department of Health OAC 310:555. This report and all information entered on it are to be held in strictest confidence to conform with 63 O.S. Supp. 2001, Section 1-502.1 et. Seq.

Note: For questions regarding the handling of ODH Form 207, call 405/271-4636.

PART I: Exposed Worker Section

Questions 1-13 are to be completed by the exposed worker, immediately following the injury.

11: Describe exposure in detail. Include information regarding type of exposure, body part affected, type of body fluid involved, duration of exposure, etc.
13: List the facility where the source patient was taken. This will be the facility that is responsible for testing the source patient.

Questions 14-19 are to be completed by the Employer’s Designee, immediately following the injury.

Questions 20-22 are to be completed by a Licensed Health Care Professional (MD, DO, RN, PA).

Routing:
A. If the Licensed Health Care Professional determines that the exposure does not have the potential for transmission of a communicable disease, the form should be returned to the Employer’s Designee.
B. If the exposure does have the potential for transmission of a communicable disease, the Yellow copy should be mailed immediately to the OSDH HIV/STD Service (use gray, self-addressed, metered envelope).

The Pink copy, a gray metered envelop and instruction page are to be delivered immediately to the designated person (usually the Infection Control Practitioner) at the health care facility to which the source patient was transported; to the attending physician, if the source patient was being cared for outside of a health care facility; to the health care provider who last had responsibility for the deceased source patient; or to the medical examiner.

PART II: Source Patient Health Care Provider Section

Questions 23-38 are to be completed by the Health Care Provider who is responsible for testing the source patient.

32. Rapid HIV testing has become a valuable tool used to quickly determine the need for initiation and/or continuation of PEP meds for the exposed person. When a rapid HIV test is performed on the source patient, communication of these results should not be delayed. The results should be immediately communicated to the physician/provider who is providing post/exposure counseling and follow up and is listed on page 1, q. 17-19.

Please note that as other source results become available, these should be released to the Provider listed on page 1, q. 17-19.

Routing: The Health Care Provider should complete Part II and mail the completed pink form to the OSDH HIV/STD Service immediately using the gray, self-addressed, metered envelope.
