LTC COVID-19 Guidance Grids

December 11, 2020

COVID-19 Guidance Grids

The Oklahoma State Department of Health (OSDH), in conjunction with the trade associations, and other strategic partners developed three guidance grids, for Nursing Homes and non-nursing home facility types. The guidance grids include miscellaneous COVID-19 information, along with testing and visitation guidance.

Please note- The nursing home grids are intended to provide an outline and does not override or replace official CMS guidance in [QSO 20-39-NH Memo](#).

[Click here to locate the grids on our LTC COVID-19 Resource page](#). You will also find other valuable information from CMS, CDC and State of Oklahoma.

Our website has undergone a major renovation so if you have bookmarked a link, you will want to locate that information on the new webpage and update your bookmark.

Please let us know if you identify any issues or broken links as we are in the process of ensuring all links are working.

Have MDS, Quality Measure, or CMP questions? Call our new number at: 405.426.8160 or email us at MDShelp@health.ok.gov
