### **Custer County Health Department Celebrates Nurses National Nurses Week is May 6-12.**

The Custer County Health Department joins the Oklahoma State Department of Health (OSDH), health care professionals, patients and families, during National Nurses Week, May 6-12, in recognizing the important roles nurses have in providing direct personal health care for patients and families and providing leadership in forming public health policies to improve the quality of care and quality of life for Oklahomans of all ages.

The public health nurses in Custer County help improve the health for entire populations by providing services like child screenings, immunizations, WIC, maternal and child health services and more.

“We want to thank our very own public health nurses at the Custer County Health Department,” said Brandie Combs, Regional Health Director. “Their diligence and efforts in providing quality care to our communities are invaluable. They serve as role models, educators, leaders and advocates of public health.”

Nurses practice diverse roles such as clinicians, administrators, researchers, educators, care coordinators, and policymakers. They help patients secure resources, obtain comprehensive care across many service areas, and develop healthy lifestyle practices to prevent sickness and diseases. Increasingly, nurses with advanced degrees, such as nurse practitioners, are providing primary care services, managing chronic illnesses, and experiencing positive outcomes.

The nurses serving the Custer County Health Department are Holly Henderson, RN BSN; Abby Sheik-Parker, RN BSN; Delaney Johnson, RN BSN; Shanda Stratton, RN BSN; Jana Lacy, RN; Rena Evans, RN; and Ashley Higgins, APRN. Custer County also recognizes Nurse Assistant PCA Daniella Hernandez.
