

Every day in Oklahoma one person dies from a firearm injury—sometimes more.

*Many injuries happen in **predictable, preventable** ways.*

Keep firearms in a locked safe or cabinet and lock bullets in a separate place. Persons who are depressed or express intent to commit suicide should not have access to firearms.

Firearm Injuries in Oklahoma

- On average at least one person dies every day from a firearm injury in Oklahoma.
- Approximately 450 Oklahomans die each year from firearm-related injuries:
 - 300 suicides,
 - 130 homicides,
 - 10 deaths due to an unintentional injury from a firearm,
 - 10 deaths due to legal intervention or undetermined intent.
- 60% of all suicides and homicides are committed using a firearm.
- Firearm injuries are the third leading cause of injury death in Oklahoma behind motor vehicle crashes and unintentional poisoning.
- Firearms account for 1 out of every 6 injury deaths among Oklahomans.
- White people are about 2 times more likely to commit suicide using a firearm than Native American or black people.
 - Nearly 30% of suicide victims express their intent to commit suicide before they attempt it.
- Black people die 4 times more often due to a firearm-related homicide than Native Americans and 8 times more often than white people.
- Young males 5-24 years of age are at highest risk of dying due to an unintentional injury from a firearm.
- More than half of Oklahoma households own a functional firearm.
 - Studies indicate that having a firearm in the home increases the risk for firearm-related suicide and homicide in the home.
- Handguns are used in the majority of firearm deaths.

Prevention

- Firearms should be kept in a locked place and bullets locked up in a separate place from the firearms.
- Use trigger locks, load indicators, and other safety devices.
- All gun owners should take a firearm safety course.
- Assure that children and unauthorized persons cannot gain access to guns.
- If persons are depressed or have expressed their intent to commit suicide, remove firearms from the environment to restrict access to lethal means.
