

## Annual Business Meeting – July 14, 2020

### Public, Indigenous/Tribal and Coastal Committees

Chair: Kim Doane, Nova Scotia

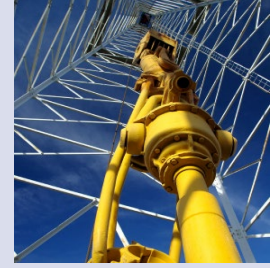

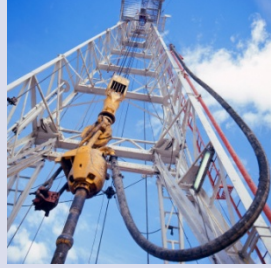

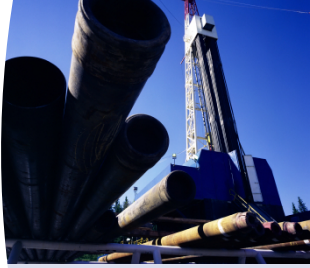

Vice Chair: Sara Longan

IOGCC: Amy Childers

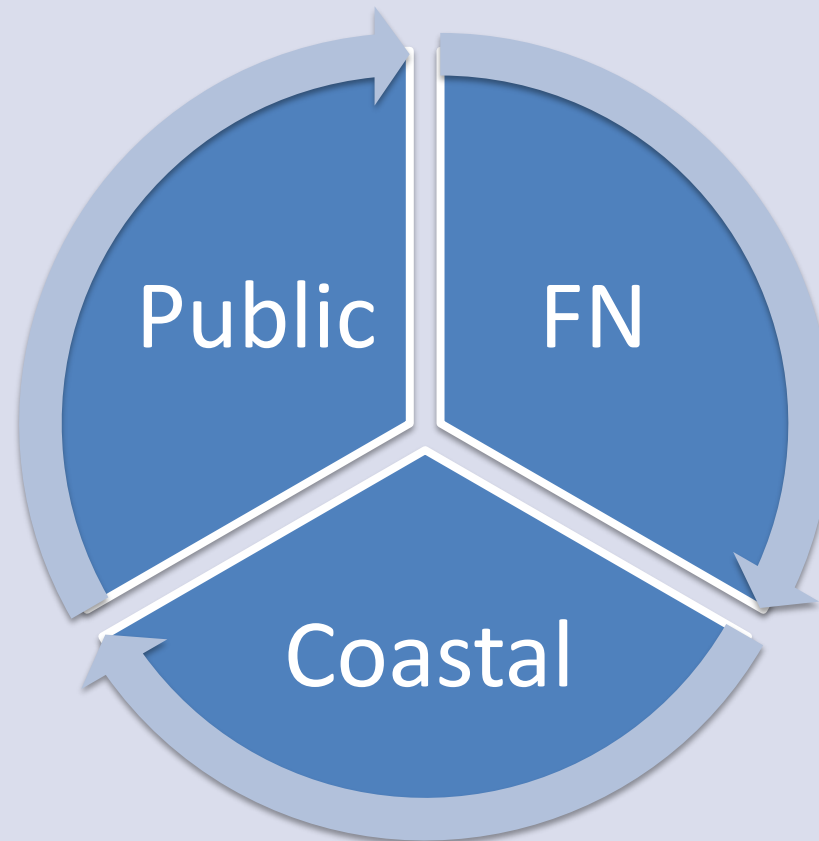

## Committee Mission Statement

- Concentrating on issues pertaining to public, tribal and coastal lands in IOGCC member states, this committee works to ensure regulatory efficiency between the states and the federal government by coordinating the requirements that govern petroleum exploration and development activities on public lands, while facilitating the discussion of significant issues related to the development of oil and gas resources in coastal and offshore regions. We will work to enhance communication and consultation between state and tribal governments with a focus on increasing awareness of both economic benefits and the environmental impacts from oil and gas development. The prudent stewardship of public funds and the elimination of duplication of regulatory efforts are hallmarks of the committee's function across all three primary aspects of its mandate.
