EXECUTIVE SUMMARY

The Oklahoma Department of Aerospace & Aeronautics (Department) assists with the development of a statewide system of airports, encourages aeronautical safety and development, and coordinates activities with the Federal Aviation Administration (FAA) to develop a national system of civil aviation.

The Oklahoma Airport System Plan (OASP) was initially approved by the Department in 1999 and is the long-term planning document used to identify the network of airports needed to serve the state. The OASP identifies airports by functional classification, service level, and design standard.

The Department's Airport Construction Program (ACP) programs federal and state funds regarding airport development that is consistent with the goals of the OASP. The ACP allows the Department, FAA, and airport sponsors to anticipate airport funding needs and accommodate changes in project scope, cost, and schedule based on multi-year planning. **Inclusion of a project in the ACP is an indication to the sponsor that the project is under consideration for future funding; however, it is NOT a commitment for future funding.**

Justification is required for projects in the ACP and must be consistent with FAA and Department regulations, policies and procedures. Some projects listed in this document may not be implemented due to funding restrictions or lack of justification.

The ACP is based on anticipated funding levels that were determined from historic state and federal allocations for airport development in the State of Oklahoma. Once the actual funding levels are established, project implementation and funding will be adjusted.

The Department welcomes your comments on this document and our ACP process. Please contact the Department at the following address:

Preface

The Department's recent administrative rule changes have changed the name of this document from Capital Improvement Program (CIP) to Airport Construction Program (ACP) and extended the program from three years to five.

Annually, the Department prepares and adopts a five-year ACP. The ACP programs federal and state funds for airport development consistent with the Oklahoma Airport System Plan (OASP). The challenge of strategic programming is the identification and sequencing of the big rock projects and the selection of smaller projects that can be funded in the same fiscal year. Big rock projects are typically very expensive and require federal state apportionment, federal discretionary, federal non-primary entitlement, and state funding.

Oklahoma Airport System Plan

The goal of the OASP is to identify a system of aviation facilities that will meet national and state needs (safety, capacity and geographic access). The OASP also identifies the basic amenities for each airport classification that will enable each airport in the system to perform its system role. The OASP includes 108 publicly owned airports with 99 of these airports included in the National Plan of Integrated Airport Systems (NPIAS).

Definition of "Big Rock Projects"

A big rock project is a project that results in a significant upgrade to the capability of a system airport, is a high cost project that is needed to sustain the capability of a regional business airport, or is a new airport. Examples of big rock projects are a runway extension, construction of parallel taxiway, runway reconstruction or overlay, acquisition of land for a runway extension or runway safety area, installation of approach lighting systems, installation of a localizer or a glide slope, or other projects typically requiring multi-year and multi-source financing such as the Bartlesville Butler Creek relocation project, the Tulsa Riverside storm water project and the Stillwater runway extension project. Due to cost, only two or three big rock projects can be underway at any one time.

Sequencing of Big Rock Projects

The sequencing of the big rock projects is critical to the continued orderly development of the Oklahoma airport system. In the programming process, the big rock projects are selected first and other less costly projects are selected second. Obviously, some balance between big rock and less costly projects must be achieved.

Project Selection Criteria

- Complete projects currently identified in Department's five-year ACP
- Pavement Management Program (visual inspection converted into a numerical pavement condition index value - PCI)
- Oklahoma Airport System Plan and Department Strategic Plan and Goals
- Emphasis on regional business airport development
- Provide standard airport geometry and amenities as per functional classification
- Provide improved approaches to allow all-weather access
- Aesthetic, business friendly Airport Terminal buildings
- FAA National Priority System (numerical rating system)
- Biased towards based aircraft and operations
- Does not consider economic impact
- Does not consider geographical coverage

Note: This document is based on anticipated funding levels that were determined from historic state and federal allocations for airport development in the State of Oklahoma. Once the actual funding levels are established, project implementation and funding will be adjusted.

Acronyms and Funding Definitions

The Department's five-year Airport Construction Program (ACP) can be a very technical document. In order to help define some of the technical items and acronyms for the general public and the aviation community at large we have created the following guide:

Acronyms:

- ACP: Airport Construction Program
- AIP: Airport Improvement Program
- AWOS: Automated Weather Observation System
- APMS: Airport Pavement Management System
- FAA: Federal Aviation Administration
- FOD: Foreign Object Debris
- IAP: Instrument Approach Procedure
- ILS: Instrument Landing System
- L/T/D: Longitudinal/Transverse/Diagonal
- MALSR: Medium-intensity Approach Light System with RAIL
- MIRL/MITL: Medium Intensity Runway or Taxiway Lights
- NPE: Non-Primary Entitlement
- NPIAS: National Plan of Integrated Airport Systems
- NPS: National Priority System
- ODAA: Oklahoma Department of Aerospace and Aeronautics
- OASP: Oklahoma Airport System Plan
- ODALS: Omni-directional Approach Light System
- ODO: Overall Development Objective
- PAPI: Precision Approach Path Indicator
- PCI: Pavement Condition Index
- PCL: Pilot Controlled Lighting
- PER: Preliminary Engineering Report
- RAIL: Runway Alignment Indicator Lights
- REIL: Runway End Identifier Lights
- RWY: Runway
- TWY: Taxiway

FAA NPE Funding Structure

An airport in the NPIAS that is classified in the most recent FAA ASSET study is eligible to receive up to \$150,000 of NPE each year. This funding can be banked for up to four years to accumulate \$600,000 with which an airport can do a much larger project. If the airport does not use the funding after they have banked it for four years, the oldest year of funding will expire and be sent back to Washington DC for reallocation unless it is transferred to another airport who can use it in the year it would expire.

FAA State Apportionment and Discretionary Funding Structure

NPIAS airports in Oklahoma are eligible to receive funding from FAA above and beyond their typical NPE funding stream through two sources. The other two sources of federal funding are FAA state apportionment which is a set amount every year determined by a formula based on land mass and population and FAA discretionary funding which can vary year to year based upon the ability of Oklahoma to put forth high priority projects that will compete for funding within the Southwest Region. ODAA directs these additional sources of federal funding through the five-year ACP. FAA and ODAA policy is that an airport's available NPE funds must be used towards the project in the year state apportionment or discretionary funding is received. It is common practice for an airport to use NPE funds to design a project the year before a construction project takes place for which state apportionment or discretionary funding is utilized.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to rehabilitate runway 18/36 with an asphalt overlay. Additionally, improvements will be made on runway 36 Safety Area.

CY 2021: Preliminary Engineering Report

CY 2023: NPE Funded design only

CY 2024: Construct ODO

Project Justification

The Department's pavement management program forecasts a PCI rating of less than 70 for runway 18/36. It is more cost effective to rehabilitate the pavement with an asphalt overlay than to let it continue to deteriorate to a condition that will require full depth reconstruction. Runway 36 Safety Area will be improved to meet FAA/ODAA standards.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to construct new taxiways for south hangar development area.

CY 2027: Design & Construct ODO

Project Justification

The statewide pavement management program forecasts a PCI rating of less than 65 for the T-hangar taxiways. Due to the amount of deterioration of the pavement, a reconstruction will be required. The City will look to reconstruct a new taxiway in support of moving the T-hangars to the south and opening up the prime location for potential future business tenants.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to construct T-Hangars in conjunction with an FAA-funded project to develop the south hangar area.

CY 2027: Design & Construct ODO

Project Justification

This project consists of constructing 2 new T-hangars. This is in support of a statewide effort to increase revenue-generating aircraft storage facilities at airports across the state.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to install two fuel systems - one for 100LL and one for Jet A.

CY 2024: Design ODO

CY 2025: Construct ODO

Project Justification

The objecting of this project is to install two fuel system: one for each 100LL and Jet A Fuels. The current system has become outdated requiring frequent maintenance. Due to the unique location and traffic mix, both types are imperative for the success of the airport.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to rehabilitate (overlay) the parallel taxiway system and install taxiway lights.

CY 2020: Preliminary Engineering Report

CY 2023: NPE Funded Design Only

CY 2024: Construct ODO

Project Justification

The existing taxiway pavement will be deteriorated to a point where it needs to be rehabilitated in 2024. Observed distresses include environmental deteriorations such as raveling and longitudinal/transverse cracking. While the parallel taxiway is closed it would be cost effective to install new LED taxiway lights in a can and conduit system that will ensure the airport has 24/7 functionality and increase situational awareness during taxi operations.

Project Justification

The existing runway pavement was recently exhibiting seasonal environmental distresses such as weathering, raveling, and longitudinal/transverse cracking. The pavement recently underwent basic maintenance with a crack seal & seal coat. The pavement is anticipated to be at a PCI value where the life-cycle of the pavement will be addressed most cost effectively with an overlay project rather than wait until a point where reconstruction is required.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is Phase II of taxiway construction to provide a full parallel taxiway for RWY 13/31.

CY 2027: NPE funded Design Only.

CY 2028: Construct ODO.

Project Justification

This project aims to provide a full parallel taxiway for Runway 13/31 which is the primary runway at ADM. This will be Phase II of the project and will extend TWY E from TWY B to the NW to connect to the existing section of TWY E. The project will enhance safety and fulfill the recommendation of having a parallel taxiway for runways that have straight-in instrument approaches.

Atoka Municipal (AQR)

General Airport

Project Description

The Overall Development Objective (ODO) of the proposed project is to complete environmental and preliminary design for a new airport location. This will be Phase II of the planning study..

CY 2022: Planning Study - Phase I

CY 2024: Planning Study - Phase II

Project Justification

The current location of the airport faces many safety and standards issues, severely land-constrained and cannot support current and anticipated demand aircraft. Phase II of the planning study will determine environmental impacts and establish a preliminary design for the new airport location to support the longer runway and facilities needed in order to serve the demand aircraft in the area.

Broken Bow Municipal (90F)

Community Airport

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to rehabilitate Runway 17/35 and construct hangar taxilane and apron.

CY 2024: Design and Construct ODO.

Project Justification

The pavement for Runway 17/35 is exhibiting medium and low severity longitudinal and transverse cracks, alligator cracking, and swelling. According to recent inspection data, the PCI for the runway is currently 62. It is more cost effective to rehabilitate the pavement than to let it continue to deteriorate to a condition that will require full depth reconstruction.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to replace the lighting system for Runway 17/35.

CY 2027: Design and Construct ODO.

Project Justification

The lighting system for Runway 17/35 is intermittent due to deterioration of the direct-bury cables and does not function after rain. The lights have reached the end of their useful life and are beginning to fail regularly. Installing new LED runway lights in a can and conduit system will ensure the airport has 24/7 functionality and increase situational awareness for pilots during inclement weather.

Carlton Landing Field (91F)

Community Airport

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to install a perimeter fence.

CY 2025: Construct ODO.

Project Justification

This project consists of constructing additional perimeter fencing along the west side of the airport in an effort to mitigate wildlife hazards to pilots on the airfield by diverting them away from the central portion of the runway. There is currently a partial fence near the terminal area with plans to extend to the south as far as practical.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to extend runway 18/36 and rehabilitate the existing runway.

CY 2026: Construct ODO

Project Justification

The existing runway pavement is exhibiting distresses that affect aircraft maneuverability and will require rehabilitation. The pavement is at a point where it is more cost effective to rehabilitate than to let it deteriorate until reconstruction is required.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to construct a new 75' x 75' box hangar as part of the 2024 Statewide Hangar Program.

CY 2024: Design and Construct ODO

Project Justification

This project consists of constructing a new 50' x 75' box hangar to house based aircraft at the facility. Proposed Project

The Overall Development Objective (ODO) of the proposed project is to expand the terminal apron.

CY 2025: Preliminary Engineering Report.

CY 2026: NPE Funded Design Only.

CY 2027: Construct ODO.

Project Justification

The apron becomes completely full to aircraft several times throughout the year. The existing apron pavement is too small for the transient traffic demand at the airport. The issue has been consistently documented by airport staff. The sponsor is currently working through a master planning study and intends to provide documented aircraft demand that satisfies FAA's aviation demand criteria for the apron expansion due to increase in both local and transient traffic.

El Reno Regional (RQO)

Regional Business Airport

Businesses Utilizing the Airport:

- Escott Aerial Spraying • Eagle Med • Interior by Dene
- Aero Spray Inc.

Project Description

The Overall Development Objective of the proposed project is to construct a new terminal building.

CY 2025: Design and Construct terminal building.

Funding: The Department will participate in 50 percent of the project cost. However, the Department share will not exceed the Department's funding policy for terminal buildings (\$1,000,000).

Project Justification

The terminal building is actually part of an old WWII roundtop hangar. The building has become outdated and is in constant need of repair/maintenance. The existing building does not provide sufficient room and facilities to accommodate the mix between waiting passengers, pilots, and others visiting the airport. The improvements will provide passengers and users of the terminal the facilities and amenities they would expect to receive at a Regional Business Airport. With the airport's proximity to the OKC Metro area, the increase in business jet type traffic has been noticeable and the terminal's inability to handle these passengers could have a negative impact on the "front door" to the community of El Reno.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to construct taxilanes for the City's new hangar development.

CY 2026: Design & Construct ODO.

Project Justification

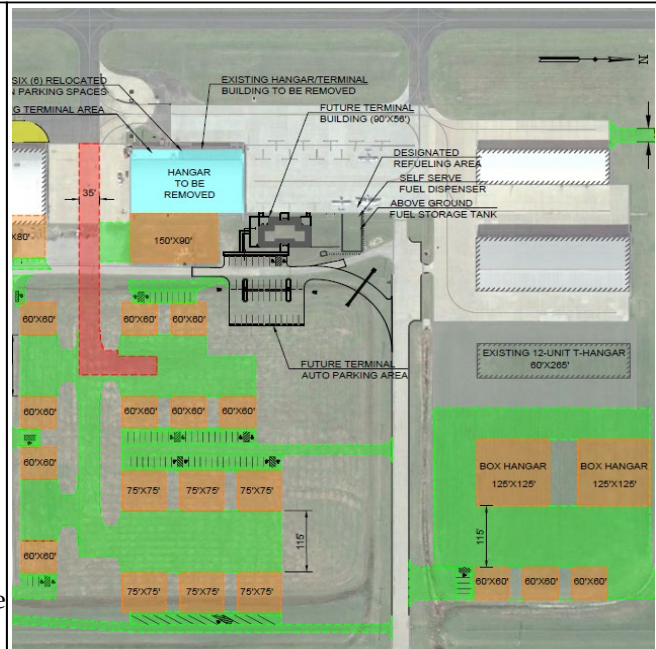

The objective of the proposed project is to design and construct a new taxilane that will facilitate the airport's new hangar and terminal layout. As part of a master plan conducted several years ago, the airport identified a need to realign the terminal area and future hangar locations as well as the need to replace their 4 large existing hangar structures. These taxilanes will go to improve the terminal area (terminal building is in the Department's ACP for FY22) and ensure successful future development for years to come.

Proposed Project

The Overall Development Objective (ODO) is to design and install Medium Intensity Taxiway Lights (MITL), rehabilitate the Runway End Identifier Lights (REIL), and install Runway Guidance Signs.

CY 2027: Design & Construct ODO.

Project Justification

The airport is growing to the point that new visual lighting aids would significantly benefit the increasing IFR traffic. These visual aids include installing MITL and Runway Guidance Signs as none of these lighting improvements currently exist. The current PAPIs were installed in the early 1990s and are subject to frequent malfunctions and repairs and need to be replaced. CY 2020: Preliminary Engineering Report.

CY 2023: NPE funded Design Only.

CY 2024: Construct ODO.

Project Justification

The airport continues to see increased traffic due to the recent runway widening and extension. With this increased traffic some aircraft have been required to wait on the apron while landing/departing aircraft back taxi on the runway.

Therefore, construction of a parallel taxiway system will improve the safety for the flying public that utilize this airport. This parallel taxiway will be a multiple phase project. Phase II will construct the parallel taxiway from the apron to the end of runway 17.

National Business Airport

Businesses Utilizing the Airport:

- Lazy E • Oak Tree Golf and Country Club • Crabtree Aviation
- Bloss Enterprises • Cobb Engineering • Spiritwing Aviation

Project Description

The Overall Development Objective (ODO) of the proposed project is to realign the south portion parallel taxiway and reconfigure the apron.

CY 2021: Preliminary Engineering Report.

CY 2023: NPE funded Design Only.

CY 2025: Construct ODO.

Project Justification

This project consists of relocating the parallel taxiway in order to meet FAA runway/taxiway separation standards. The pavement is coming to the end of its life cycle and it will be time to reconstruct the taxiway pavement in the proper location. This is in support of the increase of larger aircraft utilizing the airport and to ensure complete operational capability for decades to come. This project will also support apron reconfiguration in coordination with the new taxiway location.

Project Description

The Overall Development Objective (ODO) of the proposed project is to construct a new terminal building.

CY 2027: Design and Construct terminal building.

Funding: The Department will participate in 50 percent of the project cost. However, the Department share will not exceed the Department's funding policy for terminal buildings (\$1,000,000).

Project Justification

The current building has become outdated and is in need of repair/maintenance and updating. The existing building does not provide sufficient room and facilities to accommodate the mix between waiting passengers, pilots, and others visiting the airport. The improvements will provide passengers and users of the terminal the facilities and amenities they would expect to receive at a Regional Business Airport.

Madill Municipal (1F4)

General Airport

Project Description

The Overall Development Objective (ODO) of the proposed project is to construct a new 4,000 ft. x 75 ft. runway approximately 240 ft. east of the existing runway.

CY 2025: Preliminary Engineering Report.

CY 2027: NPE Funded Design Only.

CY 2028: Construct ODO.

Project Justification

This project consists of constructing a new runway approximately 240 ft. east of the existing runway. Based on the airport's recently completed planning study, the existing runway does not meet standards due to its proximity to the hangar and terminal area. In addition there is rising terrain towards the hangar and terminal area which would inhibit the ability to construct a parallel taxiway that meets standards. The planning study also identified traffic demand to support the airport's reference code changing from B-I to B-II.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to rehabilitate the taxiway and replace the taxiway lighting system and REILs.

CY 2025: Design & ODO

Project Justification

The lights have reached the end of their useful life and are beginning to fail regularly. Installing new LED taxiway lights in a can and conduit system will ensure the airport has 24/7 functionality and increase situational awareness for pilots during inclement weather. Department funds will be partnered with an FAA State Apportionment project to rehabilitate the taxiway at the same time in order to minimize closures and prolong the life of the pavement.

Mid-America Industrial (Pryor - H71)

Regional Business Airport

Businesses Utilizing the Airport:

- GRDA •Unarco •Southland Metals •Johnson's Elevator
- Hem/Saw •National Gypsum •Love's Travel Stops

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to extend and strengthen Runway 18/36 and extend parallel taxiway.

CY 2025: Preliminary Engineering Report

CY 2028: NPE funded design only

CY 2029: Construct ODO

Project Justification

With the current runway length of 5,000', the airport is not able to meet the demand of larger corporate jet traffic. The sponsor intends to provide documented aircraft demand that satisfies FAA's aviation demand criteria for the runway and taxiway extension due to the traffic driven by the Mid-America Industrial Park. The extension of the runway and taxiway will be approximately 1,000' to the south to achieve a total length of 6,000'. In addition, the runway pavement does not support the full weight of the demand aircraft. It will be more cost effective to strengthen the runway pavement at the same time as the extension.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to rehabilitate Runway 13/31.

CY 2025: NPE funded Design Only.

CY 2026: Construct ODO.

Project Justification

The existing runway pavement is exhibiting seasonal environmental distresses such as weathering, raveling, and longitudinal/transverse cracking. Community Airport

Project Description

The Overall Development Objective (ODO) of the proposed project is to construct two new hangars as part of the 2022 Statewide Hangar Grant Program.

CY 2024: Design & Construct ODO.

Project Justification

This project consists of constructing a new 8-unit T-hangar along with a 60' x 60' box hangar. This is in support of a statewide effort to increase revenue-generating aircraft storage space at airports to address the consistent hangar shortage across the state. The costs associated with this project are for the 2 hangar structures only and will take place after the taxiway development project.

Regional Business Airport

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to construct a new terminal building.

CY 2025: Design and Construct ODO.

Project Justification

The airport is in need of sufficient room and facilities in a dedicated terminal building to accommodate the mix between waiting passengers, pilots, and others visiting the airport. The improvements will provide amenities for users of the facility the amenities expected at a Regional Business Airport. The airport is working through a terminal area plan in anticipation of expansion of existing companies and the attraction of new business entities to the airfield.

Regional Business Airport

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to reconfigure the main apron.

CY 2029: Construct ODO.

Project Justification

Currently the pavement serving the main apron area is exhibiting significant distresses to include longitudinal/transverse cracking, raveling, and block cracking. Given the age of the pavement and its current condition it is likely several areas will require full pavement reconstruction as a rehabilitation would not provide for a long-term solution to the pavement distresses. This would also support the new terminal that will be constructed at the airport. Configuration will be determined as a result of a previously-funded terminal area planning project.

Project Description

The Overall Development Objective (ODO) of the proposed project is to construct the north of the taxiway to current design standards.

CY 2029: NPE Funded Design Only

CY 2030: Construct ODO

Project Justification

The airport continues to see increased traffic, especially during peak summer season. With this increased traffic some aircraft have been required to wait while landing/departing aircraft backtaxi on the runway. Construction of a parallel taxiway system will improve the safety and efficiency of the airport for the flying public while bringing taxiway connectors into current design standards.

Project Description

The Overall Development Objective of the proposed project is to construct a new terminal building.

CY 2024: NPE Funded Design Only

CY 2025: Construct terminal building

Project Justification

The current building has become outdated and is in need of repair/maintenance and updating. The existing building does not provide sufficient room and facilities to accommodate the mix between waiting passengers, pilots, and others visiting the airport. The improvements will provide passengers and users of the terminal the facilities and amenities they would expect to receive at a Regional Business Airport. Proposed Project

The Overall Development Objective (ODO) of the proposed project is to expand the terminal apron.

Project Justification

The existing apron used to be in a standard configuration directly in front of the terminal building until the parallel taxiway had to be realigned to meet FAA standards. This led to two smaller aprons being utilized, one north and one south of the terminal building. This project will expand the apron area closest to the terminal building to accommodate the traffic that the airport has.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to improve airport drainage and rehabilitate Runway 17/35.

CY 2025: NPE funded Design Only.

CY 2026: Construct ODO.

Project Justification

The existing runway pavement is exhibiting seasonal environmental distresses such as weathering, raveling, and longitudinal/transverse cracking. The pavement is at a point where it is more cost effective to rehabilitate than let it deteriorate until a point where reconstruction is required. Rehabilitation will include an overlay. Additionally, airport drainage improvements will be conducted in order to prevent continuous erosion.

Project Description

The Overall Development Objective (ODO) of the proposed project is to construct a new terminal building.

CY 2027: Design and Construct ODO.

Funding: The Department will participate in 50 percent of the project cost. However, the Department share will not exceed the Department's funding policy for terminal buildings (\$1,000,000).

Project Justification

The current building has become outdated and is in need of repair/maintenance and updating. The existing building does not provide sufficient room and facilities to accommodate the mix between waiting passengers, pilots, and others visiting the airport. The improvements will provide passengers and users of the terminal the facilities and amenities they would expect to receive at a Regional Business Airport.

General Airport

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to rehabilitate the runway 17/35.

CY 2027: Design and Construct ODO.

Project Justification

Currently the airport pavements are exhibiting longitudinal and transverse cracking due to seasonal environmental conditions. The pavement is at a point where it needs basic maintenance in order to preserve the condition and prevent further deterioration and the need for more expensive rehabilitation. This airport is listed as an unclassified airport in the most recent FAA ASSET Study and no longer receives any federal funds. The existing runway lights are at the end of their service life. The electrical cabling is also direct bury which has caused several issues. This project will provide dependable runway lighting during nighttime hours and periods of inclement weather.

Project Description

The Overall Development Objective (ODO) of the proposed project is to construct a parallel taxiway system to serve Runway 18/36.

CY 2020: Preliminary Engineering Report

CY 2025: NPE Funded design only

CY 2026: Construct ODO

Project Justification

The airport continues to see increased traffic, especially during peak summer season. With this increased traffic some aircraft have been required to wait while landing/departing aircraft back taxi on the runway. Therefore, construction of a parallel taxiway system will improve the safety and efficiency of the airport for the flying public. Project Description

The Overall Development Objective (ODO) of the proposed project is to rehabilitate and extend Runway 18/36.

CY 2026: Design & Construct ODO

Project Justification

The airport continues to see increased traffic, especially during peak summer season. With this increased traffic some aircraft have been required to land elsewhere due to current declared distances and many insurance providers requiring a full 5,000' of usable runway. This project will rehabilitate the existing runway at an opportune time to extend the life of the pavement while also constructing a small extension to reach a full 5,000' of usable runway surface. Proposed Project

The Overall Development Objective (ODO) of the proposed project is to extend Runway 18/36, install LED runway lights and PAPIs.

CY 2025: Design and Construct ODO

Project Justification

With the current runway length of 3,000', the airport cannot satisfy demand. The sponsor intends to provide documented aircraft demand that satisfies FAA's aviation demand criteria for the runway extension. The extension of the runway will be approximately 1,000' to the south to achieve a total length of 4,000' as well as a width of 75', which will allow the facility to reach FAA recommended design standards. This project will also include installation of new LED runway lights along the extension and existing runway edge and PAPIs.

General Airport

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to construct new hangars.

CY 2023: Design & Construct ODO.

Project Justification

This project consists of constructing (2) 40' x 40' hangars to house based aircraft at the facility. This is in support of a statewide effort to increase revenue-generating aircraft storage facilities at airports across the state.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to crack seal and repair cracks on the runway.

CY 2024: Design & Construct ODO

Project Justification

The existing runway pavement is exhibiting seasonal environmental distresses such as weathering, raveling, and longitudinal/transverse cracking. The pavement is at a point where it is more cost effective to rehabilitate than let it deteriorate until a point where reconstruction is required. Rehabilitation will include a crack seal and repair of more severe crack related distresses.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to construct a T-hangar facility.

CY 2025: Design & Construct ODO

Project Justification

Several of the hangars on the west side of the airport penetrate the Part 77 Transitional Surface. In an effort to spur relocation of the hangars and aircraft based within, this project will construct a T-hangar facility to which the hangar tenants can be relocated. This project is intended to support the initial relocation of aircraft to the east side of the airfield, and in discussions with the airport manager there is more desire from tenants for T-hangars rather than box hangars.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to construct a taxilane.

CY 2025: Design & Construct ODO

Project Justification

Construction of a new taxilane will improve access to additional development areas to ensure successful economic development opportunities for the airport. The airport is seeking to utilize FAA BIL funds to build out a new T-hangar facility that will allow for some of the tenants to relocate from the west side in the near term. Since the T-hangar is anticipated to be constructed in the last developable space, this taxilane project will ensure current tenants may construct/relocate their own hangars to the west while also encouraging other potential tenants to construct on the east side as well.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to overlay the runway pavement and install runway lights.

CY 2028: Design & Construct ODO

Project Justification

The runway lights were installed in 1982 and have reached the end of their useful life. The current lighting system is direct-buried and will be replaced with LED fixtures in a can and conduit system to enhance the safety and reliability of the lighting system. It will also be cost effective to install runway lights while the runway is closed for rehabilitation. The existing runway pavement has received maintenance projects at the appropriate times to seal cracks as needed, however the pavement is anticipated to be at a point where it will be more cost effective to rehabilitate than let it deteriorate until a point where full-depth reconstruction is required. It is anticipated this project will include a mill and overlay.

Tulsa International Airport (TUL)

National Business Airport

Project Description

The Overall Development Objective (ODO) is to conduct a new Air Traffic Control Tower and Terminal Radar Approach Control (TRACON) facility.

CY 2020: Conduct AFTIL Study.

CY 2023: PREP Funded Design-Only.

CY 2024: Construct ODO.

Project Justification

Currently airport's existing control tower facilities have aged and the building has deteriorated past the point where it needs to be replaced. Several times over the last couple of years the tower had to be closed for various maintenance reasons. The project will consist of constructing a new tower/TRACON and other associated facilities to provide safe and efficient air traffic services.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to construct a new Air Traffic Control Tower.

CY 2021: Planning Study

CY 2024: Construct ODO

Project Justification

The tower at Westheimer is one of the oldest contract air traffic control towers in the state. It is well past its service life and although the internal equipment has been updated and the structure itself has been rehabilitated several times over recent decades, it is time to construct a new tower. This new tower will be a separate structure and not attached to the terminal building like the current tower is.

West Woodward (WWR)

Regional Business Airport

Businesses Utilizing the Airport:

- Atwoods • Chicken Express • Eagle Med • Edge Drilling • Mewbourne Oil • Precision Pipeline • Sage Holdings • Sandridge

Project Description

The Overall Development Objective (ODO) of the proposed project is to construct a new terminal building.

CY 2024: PREP Funded Design Only

CY 2025: Construct Terminal Building.

Project Justification

The current building has become outdated and is in need of repair/maintenance and updating. The existing building does not provide sufficient room and facilities to accommodate the mix between waiting passengers, pilots, and others visiting the airport. The improvements will provide passengers and users of the terminal facilities and amenities they would expect to receive at a Regional Business Airport.

Project Description

The Overall Development Objective (ODO) of the proposed project is to extend runway 17/35.

CY 2026: Design and Construct ODO.

Project Justification

With the current runway length of 4,007', the airport is not usable by most jet traffic. The sponsor intends to provide documented aircraft demand that satisfies FAA's aviation demand criteria for the runway extension. The extension of the runway and taxiway will be approximately 498' to the north to achieve a total length of 6,000'.

Proposed Project

The Overall Development Objective (ODO) of the proposed project is to crack seal and seal coat the runway.

CY 2026: Design & Construct ODO.

Project Justification

The existing runway pavement is exhibiting seasonal environmental distresses such as weathering, raveling, and longitudinal/transverse cracking. The pavement is at a point where it is more cost effective to rehabilitate than let it deteriorate until a point where reconstruction is required. Rehabilitation will include a crack seal and repair of more severe crack related distresses.

State System

Oklahoma Department of Aerospace & Aeronautics

Project Description

The Overall Development Objective is to conduct a statewide airport economic impact study of the state's civilian and military airports. It has been almost 10 years since ODAA has conducted such a study of the state's airport system. This study will be a two part look at Oklahoma's civilian and military airports to determine the economic impact that both have on the state and local economy. The first part will look at each airport individually to determine its impact, both direct and indirect, on the local and state economies. The second part will be to combine these individual airport impacts to determine the economic impact of the state systems as a whole.

As part of this study the individual airports will receive deliverables that they can utilize in their community to promote the importance of the airport to both the general public and the community leaders. ODAA will receive deliverables on the statewide level that we can utilize to show the importance of the airport system and why we have the capital improvement program that provides much needed infrastructure funding to airports. There is also a portion of the study that will look at individual segments of aviation industry within Oklahoma and the impacts they have on the state.

CY 25/26 Work Element for Federal FFY 25/26 system planning grant only: Statewide economic impact study

Statewide Unclassified Airport Pavement Maintenance Package

Project Description

The Overall Development Objective (ODO) of the proposed project is to perform general pavement maintenance at a total of 5 airports.

CY 2026: Design and construct overall development objective.

Project Justification

It has been since the 2018/2019 timeframe the FAA provided a program for simple maintenance projects at several unclassified airports across the state. Based on visual inspections and predictive PCI data, it will be most cost beneficial to provide continued maintenance while ensuring safe landing surfaces at airports within the state system.

Statewide AWOS Package

Project Description

The Overall Development Objective (ODO) of the proposed project is to replace or install an Automated Weather Observing System (AWOS) at a total of 7 airports.

CY 2027: Design and construct overall development objective.

Project Justification

The replacement and installation of AWOS systems will improve the safety of each selected airport by providing pilots with accurate, real-time weather information. There will be a total of 7 AWOS systems installed or replaced at airports across the state. Individual project pages will be created once the locations are identified and approved.

Project Description

The Overall Development Objective is to conduct preliminary engineering studies at various locations within the Oklahoma Airport System. The Department's various locations grant activities are categorized into the following work element(s):

CY 2029 Work Elements for Federal FY 2029 various locations grant:

1. Conduct preliminary engineering reports to determine project scope and detailed cost estimate to assist the Department and FAA with the programming of federal and state funds. Projects that would be considered for preliminary engineering reports through this grant are projects anticipated for construction in FY 2032 and 2033. As those projects are identified they will be listed on this ACP page.

Agency Fiscal Year	FY 2028	FY 2029	FY 2030	Total
Department			\$50,000	\$50,000
FAA State Apportionment		\$450,000		\$450,000
FAA Discretionary				
FAA Non-Primary Entitlement				
Sponsor				
Total		\$450,000	\$50,000	\$500,000

Federal grants require 10% matching funds while state grants require 5% matching funds. Department funding is dependent on availability of State funds.
