

The Petroleum Storage Tank Division (PSTD) doesn't provide Risk-Based Corrective Action (RBCA) training. The RBCA Applied at Petroleum Release Sites standard and methodology were developed by ASTM International. You may contact ASTM International directly at 610-832-9500 to serve as a clearinghouse to identify and arrange for up-to-date training on the RBCA methodology by qualified instructors. Approved RBCA training courses, seminars or schools will also be added to the bottom of this page as well as to the PSTDs list of Continuing Education classes as the division becomes aware of them. You can find this list on the OCC's website at <https://oklahoma.gov/occ/divisions/petroleum-storage-tank/licensees.html>

List of Approved RBCA training courses, seminars, schools:

American Society for Testing and Materials

Risk-Based Corrective Action (RBCA) Applied at Petroleum Release Sites

<https://store.astm.org/astm-tpt-11.html>

100 Barr Harbor Drive

West Conshohocken, PA 19428 610-832-9500

This course, along with the following two ITRC courses, will be accepted for the RBCA training component.

Bioavailability of Contaminants

https://clu-in.org/conf/itrc/BCS_050322/

Remediation Management of Complex Sites

https://clu-in.org/conf/itrc/rmcs_092222/

Edge Engineering & Science

Risk Assessment, RBCA & Vapor Intrusion Course – Online Course, November 4 & 5, 2026
