DISCUSSION AND POSSIBLE ACTION REGARDING ODMHSAS ADMINISTRATIVE RULES

Steven Buck, Deputy Commissioner of Communications and Prevention Services, stated that the Department of Mental Health and Substance Abuse Services, as part of the requirements set forth in the Administrative Procedure Act, has gone through a period of rulemaking/revisions for review and approval by the Board members.

Deputy Commissioner Buck stated that the public was given the opportunity to provide written comments, and a public hearing was held to allow further questions and comments to the proposed changes to this chapter. These comments were provided to the Board for their consideration.

The Board’s approval of these rules is part of the formal process to implement new rules and rule revisions. Should the Board choose to endorse the rules that are being presented for consideration, they would then be submitted to the Legislature. The Legislature would then go through their process for rule changes/revisions.

Deputy Commissioner Buck introduced Traylor Rains, Director of Policy and Planning, to present the chapter changes for the Board’s consideration.

Mr. Rains stated that three of the nine rules being presented today were brought forth at the November 21, 2014, Board meeting as emergency rules. They are being presented again today to move forward through the permanent rule process.

Other revisions include updates to terminology based on previous rule changes as well as administrative changes to certain provider certification processes.

DISCUSSION AND REPORT FROM THE PERFORMANCE IMPROVEMENT COMMITTEE
There was one presentation for the March meeting.

Teresa Croom, Systems of Care State Project Director, spoke about Family Drug Courts as follows:

Each district court has been authorized by state statute to establish family drug courts. The Oklahoma Department of Mental Health and Substance Abuse Services is responsible for assisting in the establishment of a family drug court. Oklahoma Family Drug Courts serve child welfare involved families that have had children removed due to the parent’s substance abuse.

The first Oklahoma family drug court was established in Tulsa County in 1998. Oklahoma has family drug courts in Tulsa, Okmulgee, Oklahoma, Canadian,
Cleveland, and Sequoyah County. There are mixtures of state supported and county supported family drug courts.

Oklahoma has been able to improve treatment services for Tulsa and Oklahoma County family drug courts due to federal grants. The main treatment enhancement has been the inclusion of family based treatment models Strengthening and Celebrating Families programs.

The addition of these services as well as other trauma practices for both the parent and the child has reduced the out-of-home placement length of time by 227 days compared to traditional deprived child welfare cases that are not in family drug court. The Kansas University evaluator did a brief cost analysis. 269 children were served, with an average of 227 fewer days in custody. For a cost savings of $18,614 per child and a total of $5,007,166 in cost avoidance.

We have been able to secure additional dollars from the Oklahoma Department of Human Services by contracting to expand the Tulsa family drug court and to sustain the Oklahoma County family drug court coordinator. We propose to implement this model with any family courts that ODMHSAS contracts with in the future. We are currently collecting data for Oklahoma County and writing a grant for federal funds to enhance the Okmulgee family drug court.

DISCUSSION AND POSSIBLE ACTION REGARDING CRITICAL INCIDENT REPORT
Mr. Crosby stated that the Board has been provided a report of critical incidents occurring at state-operated facilities. The report breaks down the critical incidents that have occurred since the last Board meeting, and also the number of incidents, over the past 12 months, to show any trends that may be occurring. The report also includes the number of incidents for each facility and compares these numbers to any available national average to provide context to how we are doing. Dr. Sullivan reminded the Board members that this report is reviewed at the Performance Improvement Committee meeting and that the main incidents involve medication errors that are usually attributed to pharmacy errors.

Dr. Beasley moved to approve the Critical Incident Report. Dr. Pierce seconded the motion.
