

Residential Care Services are specialized ODMHSAS-funded services that are provided to individuals with a mental illness, age 18 and older, residing in designated residential care facilities. Residential Care Services consist of the provision of 24-hour supportive assistance to include physical exercise, daily living skills, and socialization activities. In addition to these services, ODMHSAS also funds an enhanced level of residential care services which includes additional staffing and support to meet the needs of individuals who cannot be accommodated with the standard Residential Care Services array.
