OKLAHOMA HEALTHY TRANSITIONS INITIATIVE
...Making Goals a Reality for Youth & Young Adults

OHTI-2

Mental Health & Substance Abuse

The OHTI-2 is a State/Community Partnership to integrate services and supports for youth and young adults 16-25 with serious mental health conditions, and their families.

The OHTI-2 will create developmentally-appropriate and effective youth-guided local systems of care to improve outcomes in areas such as education, employment, housing, mental health and co-occurring services and to decrease contact with the juvenile and criminal justice systems.

Why we Serve

Youth and young adults ages 16-25 with serious mental health conditions are our most vulnerable group facing transition to adulthood. They are:

1. Least likely to graduate from high school
2. Three times more likely to commit a crime
3. More likely to engage in substance abuse
4. Less likely to find, obtain and keep a job
5. Least likely to achieve independent living

What is OHTI-2?

The OHTI-2 is a State/Community Partnership to integrate services and supports for youth and young adults 16-25 with serious mental health conditions, and their families.

OKLAHOMA Mental Health & Substance Abuse
OHTI-2’s Goals for Youth and Young Adults in Transition are to ensure they:

- Receive mental health and substance abuse service that are needed and desired.
- Reside in safe, affordable and stable housing.
- Receive education consultation and assistance.
- Earn sufficient income on which to live.
- Decrease contact with law enforcement.
- Improve relationships with family and others.
- Create seamless transition across child and adult systems.

The ODMHSAS will partner with Red Rock Behavioral Health Services (RR), in Oklahoma City (OKC), and Family and Children’s Services (FCS), in Tulsa, to create a strong, deep and wide safety net for young adults in transition (YATs), ages 16-25, with serious emotional disturbance (SED) or serious mental illness (SMI).

Red Rock Behavioral Health Services

We’re dedicated to creating, implementing, and expanding evidence-based treatment services and supports for young adults in transition (YATs) with serious emotional disturbance (SED) or serious mental illness (SMI) that are: developmentally appropriate; culturally competent; YAT-driven; and involve family and community members.
