

# CERTIFICATION OF ENGINEER AND/OR LAND SURVEYOR

\_\_\_\_\_ is not adequately staffed to perform the required engineering  
*Name of Utility Company*

and relocation supervision of the utility relocation adjustments required to clear  
\_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_; therefore, we request authorization from the

*JP number County Highway*

Oklahoma Department of Transportation to use \_\_\_\_\_  
*Consultant/Land Surveyor name*

to perform that engineering/surveying and relocation supervision. Work performed by the consultant for the utility will include a Utility Relocation Agreement Form and a Proposal of work, containing detailed cost estimates and plan drawings. The consultant shall furnish a cost not to exceed estimate, including hourly rates for each employment classification, of the remuneration: Engineering will be expected to complete all pre-design evaluation, design, and relocation supervision, and Surveying will be expected to complete survey staking. (Attach to this document).

All companies retained by \_\_\_\_\_ will be included in the cost  
estimate. *Consultant/Land surveyor name*

The State will reimburse the Utility Owner the proportionate share for Engineering/Surveying services. The State will fund these Engineering/Surveying services after approval of the Certification of Engineer and/or Land Surveyor (R/W Form 309), and will fund construction costs once the Utility Relocation Agreement (R/W Form 305) has been approved.

Once the Utility Relocation Agreement is approved, the State shall make necessary adjustments from future reimbursements to share the proportionate cost of these services.
