Leslie,
This needs to be directed to the Roadway Division Engineer.
Thanks
Ben

EM and Squad bosses

Roadway

Please size pipes to stub into ALL bridge RCB projects for all 4 sides. Please provide Bridge division those sizes so that they can design stub ins. Most of our problems at RCB's occur at the inlet and outlet due to side drains. It is our policy to now stub onto an apron or into side of RCB onto the floor for EVERY Bridge size RCB.

Please do not hesitate to contact me with any questions you may have.

Leslie Lewis PE, CFM

State Bridge Hydraulic Engineer
