2020-2027 Eight-year Construction Work Plan

The Oklahoma Department of Transportation is pleased to provide the 2020-2027 Eight-year Construction Work Plan which contains critically needed transportation improvement projects for our interstate, U.S. and state highways and bridges, which are referred to as "on-system." Oklahoma's road and bridge network serves as the backbone of the state's economy, moving people to work and goods to market. A healthy transportation system is essential to forge a strong economy and improve quality of life.

The 2020-2027 Eight-year Construction Work Plan projects are identified through an arduous consideration process led by the eight field division engineers with continuous input from many stakeholders and approved by the Transportation Commission. The initial Eight-year Plan was developed in 2002 and approved in 2003. This annual plan guides ODOT's project development and delivery strategies.

ODOT is striving for Oklahoma to be a "Top 10 State" in infrastructure by addressing two-lane highways with deficient shoulders, improving pavement conditions and reducing on-system structurally deficient bridges to less than 1%. In this plan, the number of two-lane highways with deficient shoulders will be reduced by 780 miles. Also, an additional 3,131 lane miles of pavement will be improved to a state of good repair. Lastly, in an effort to sustain the momentum and desired goal of maintaining a less than 1% structurally deficient bridge inventory, the plan will also improve 376 bridges that are currently at risk of becoming structurally deficient. There are a total of 657 bridges addressed in the plan.

The Rebuilding Oklahoma Access and Driver Safety, referred to as ROADS funding, has allowed ODOT to make significant improvements to the state's structurally deficient bridges since 2006. At the time, ODOT had 1,168 structurally deficient bridges on the highway system. Because of the consistent investment in the ROADS fund and the achievement of reaching the \$575 million cap for the first time, ODOT has reduced the number of structurally deficient bridges to 132 and is now able to begin addressing more bridges that are at risk of becoming structurally deficient.

On behalf of ODOT and our many partners who help us succeed in our mission to provide a safe, economical and effective transportation network for the people, commerce and communities of Oklahoma, I present the 2020-2027 Eight-year Construction Work Plan.

Tim Gatz
Oklahoma Secretary of Transportation
Oklahoma Department of Transportation Executive Director

**BUDGETARY
PROJECTIONS**

Budgetary Projections

CONSTRUCTION WORK PLAN - FFY 2020 through FFY 2027

The budgetary projections utilized for the basis of the fiscally responsible and financially balanced Construction Work Plan were established through a systematic evaluation of the Department's anticipated State-Aid and Federal-Aid revenues and expenditures. Projections were performed for Federal Fiscal Years 2020 – 2027 with the Federal Fiscal Year defined as beginning October 1st and ending on September 30th. The budgetary projections only address funding that has been historically and/or categorically committed to State, Federal and Interstate highway system improvements and does not address Department initiated set asides or other mandated programs.

For the purposes of the initial projections, an estimated baseline State-Aid amount of \$333.52 million and an estimated Federal-Aid amount of \$371.94 million was utilized as the Fiscal Year 2020 benchmark. The Federal-Aid amount includes a 7.5% projection overstatement to avoid any potential loss of future Federal-Aid funds due to under programming. Of particular note, the annual baseline State-Aid amount available for Construction Work Plan projects is expected to grow to over \$402.58 million during the next eight years.

As the Federal-Aid benchmark amount will vary based upon the results of the annual Congressional budgeting process, the estimated projections will require further adjustment and we will adapt our Construction Work Plan accordingly.

Once the Statewide projections are recorded by Fiscal Year, the following formula is applied to establish a baseline Fiscal Year projection for each Field Division:

% of Population + % of Mainline Highway System Miles + % of Previous 15 Year Const. Program

3

This formula considers common demographic, physical and historical criteria and yields a Divisional percentage that renders an equitable distribution of the available funds.

CORRIDOR PLAN PROJECTS

The budgetary projections for Federal Fiscal Years 2020 - 2027 are adjusted accordingly to reflect the debt service requirements of the Corridor Plan projects.

The individual project estimates exemplified in the Construction Work Plan constitute approximately 100% of the Federal Fiscal Years 2020 - 2027 anticipated available State and Federal formula funds including the 7.5% overstatement of Federal-Aid and any previously designated Interstate Maintenance funds and excludes the Corridor Plan debt service.

BALANCING PROCESS

Balancing Process

The balancing of the Construction Work Plan progressed in accordance with the roles and responsibilities generally defined in the following outline:

Field Division Engineers

The development of Construction Work Plan begins with our Field Division Engineers and is guided by their knowledge of the transportation needs and priorities in their respective Divisions. They and their staff work to maintain an understanding of the condition of the roads and bridges in their areas of responsibility. In addition, other key Department Divisions collect and analyze transportation data factoring the following general characteristics as applicable and listed in no particular order:

- surface condition
- bridge condition
- geometrics (vertical and horizontal alignment)
- average annual daily traffic (AADT)
- percentage of truck traffic
- accident history
- local, regional and national traffic patterns
- capacity

The understanding gained from this information is then coupled with the careful consideration of the Field Division's condition and capacity assessments of the highway network and the associated critical needs, their anticipated improvement budgets, and further communication with the Division's Transportation Commissioner. The Field Division Engineers then review and validate the scheduled Construction Work Plan projects and formulate a group of new projects to be added in accordance with the projected funding availability.

Strategic Asset & Performance Management Division and Programs Division

The Strategic Asset & Performance Management Division and Programs Division are responsible for coordinating the State's transportation planning efforts with those of Oklahoma's Metropolitan Planning Organizations, and consulting with the tribal governments and local officials with responsibilities for transportation. The development of the Long Range Plan, the maintenance of the Statewide Transportation Improvement Plan as derived from the first four years of the ODOT Eight Year Construction Work Plan, Corridor Studies, as well as early project development all include opportunities for public participation and review. The results of this public involvement, input from ongoing coordination and consultation, and the planning documents are provided to the Field Division Engineers for their consideration as the Work Plan is developed.

Project Management Division

The Project Management Division works directly with and assists the Field Division Engineers in the development of their respective Division's Construction Work Plan and in the subsequent daily management of the project development activities. Projects proposed

by the Field Division Engineers that did not previously exist in the Construction Work Plan are validated to the extent possible in order to institute a preliminary scope, schedule and budget. Concurrently and to the extent possible, the scope, schedule and budget of projects that previously existed in the Construction Work Plan are re-validated.

The Project Management Division then continues to facilitate necessary modifications to the scope, schedule and/or budgets of approved Construction Work Plan projects as more detailed information becomes available during the course of Project Development. Validation of projects is accomplished through drive outs and/or other project team meetings with the complete participation of appropriate Engineering and Operations Divisions as deemed necessary. The responsible Project Manager schedules, coordinates, documents and facilitates these meetings.

Director, Deputy Director and the Chief Engineer

The Director, Deputy Director and the Chief Engineer, in concert with the Director of Engineering, Director of Operations, Director of Capital Programs, the Programs Division, the Project Management Division and the Field Division Engineers work to fiscally constrain and balance the Construction Work Plan in accordance with the allocation requirements of the applicable Federal funding categories. The Work Plan balancing is performed with foremost consideration for maintaining the integrity of the Field Division Engineer's and the Transportation Commissioner's project priorities. In addition, the balancing process seeks to insure that each Field Division is allocated available funding in accordance with the aggregate State and Federal budget projections.

ADDITIONAL CONSIDERATIONS

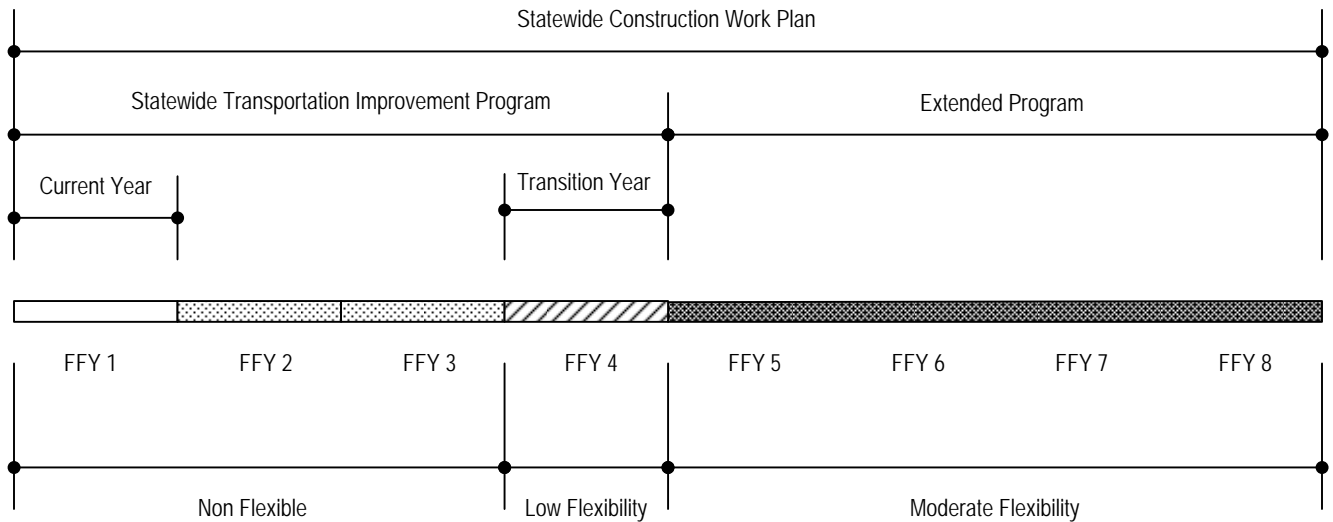

Given the number of extreme variables and the inherent need to maintain a balance between available funds and the Divisional funding commitments, the final Divisional projections are adjusted within a given year. Any adjustments are initiated with consideration for the on-going debt service requirements of the previous Corridor Plan projects, the ability to schedule and prepare projects for construction in the appropriate Federal-Aid funding categories and the ability to sustain a reasonable annual Construction Work Plan in each Division.

The Construction Work Plan is balanced within these guidelines and has been determined to be an equitable representation to the satisfaction of the Department and the Transportation Commission.

The Interstate Maintenance Earmarking commitment is evident in year 2020 as was determined necessary to encourage the substantial replacement, repair and preservation of the Interstate System. The IM Earmark commitment corresponds with the Divisional budgetary dedication by fiscal year, but has been discontinued beginning in 2021.

The Programs Division and the Project Management Division will work in concert with the Field and Central Office Divisions to continue the monitoring and management of the Construction Work Plan in accordance with the provisions of the Construction Work Plan Management Process.

CONSTRUCTION WORK PLAN MANAGEMENT PROCESS

- Projects are "Locked"
- Only modified through formal Program Revision Process
- Must Remain Balanced
- Evaluated yearly (July-August) to prepare for inclusion of Extended Program
- Potential projects to be considered for current program "Lock"
- Refined project Scope/Schedule/Budget
- Prioritized by Year
- May set minimum criteria for inclusion
- Must Remain Balanced
- Evaluated yearly (July-August) to prepare for inclusion of Extended Program
- Varying levels of Project Development
- Flexible Scope/Schedule/Budget
- Prioritized by Year
- Must Remain Balanced
- Any project can be advanced for consideration in the Transition Year
- Evaluated yearly (July-August) to prepare for inclusion of Unscheduled Projects
