

**McClellan-Kerr Arkansas River Navigation System** (MKARNS) is the waterway's official name - so-named by an Act of Congress, 1/5/1971 (PL91-649).

▲The MKARNS is 445-miles long and includes the Verdigris, Arkansas, and White Rivers. The System has an elevation differential of 420 feet from its beginning at mile 600 on the Mississippi River to the head of navigation near Tulsa.

▲The MKARNS is a multi-beneficiary system: water supply, navigation, fish and wildlife, recreation, hydropower generation, and flood control (when considered as part of the Arkansas River Basin Project and its upstream reservoirs that control when water flows).

▲There are 18 locks and dams - 13 in Arkansas and 5 in Oklahoma; each lock chamber is 110' wide x 600' long and can handle 8 barges and a towboat.

▲The U.S. Army Corps of Engineers maintains a 9 ft. channel depth on the MKARNS. Congress authorized a 12 ft. draft in 2005, but never appropriated funds. The current total of 1,500 short tons of capacity could be increased by 200 tons for each additional foot of draft.

▲The MKARNS serves a 12-state region, due to the Port of Catoosa being the most westerly inland river port that is ice free 24/7/365. The states include AR, OK, KS, TX, CO, MO, NE, MN, SD, ND, MT, and ID.

▲There are three designated Foreign Trade Zones on the MKARNS at the Ports of Little Rock, Muskogee and Catoosa. 42 countries have traded commerce with the Arkansas River Basin Region via the MKARNS.

▲The MKARNS status changed from a moderate to high-use waterway system in February 2015 after the Waterborne Commerce Statistics Center (WCSC) showed the 5 year average to be 3.3 billion ton-miles.

▲The Marine Highway M40 was upgraded from a "Connector" to a "Corridor" in 2015. Oklahoma and Arkansas were the first states to utilize Marine Highway signage recognizing the MKARNS as part of the overall freight network in both states.

▲Consolidated Grain and Barge operates 4 river facilities along the MKARNS with 3 in Oklahoma and 1 in Arkansas.

▲Prime industrial sites are available at the Port of Muskogee.

▲Federal cost of the System was \$1.2 billion. Add to that \$186.1 million for construction of Montgomery Point Lock & Dam (completed in 2004), for a total cost of \$1.39 billion.

▲Flood damages prevented by Arkansas River Basin projects under the jurisdiction of the Corps' Tulsa District totaled \$525 million in FY 2016. Cumulative damages prevented through 2016 equal an estimated \$14.9 billion.

▲In 2018, 1,181 recreational vessels locked through Oklahoma's 5 locks; 1,975 locked through Arkansas' 13 locks.

▲In 2017, 192,344 pleasure boats were registered in Oklahoma; 208,752 were registered in Arkansas.

▲The University of Tulsa Women's Rowing Team practices on the MKARNS, just south of the Port of Catoosa.

▲To fill 1 barge of bulk commodities at a 9 ft. draft, it takes 15 jumbo railcars or 60 large semis. One barge carries up to 1,500 tons, while a railcar holds 100 tons, and a large semi-truck transports 26 tons.

▲It is estimated that moving the current waterway traffic to rail would both increase fuel usage and raise CO<sub>2</sub> emissions by 270%.

▲A 2014 study showed that moving freight by barge resulted in cost savings of \$156.1 million for Oklahoma farmers, manufacturers and consumers, compared to the cost of alternative overland modes.

▲If Oklahoma's 5,498,811 tons of waterborne commerce were transported by alternative methods, it would require 219,952 trucks or 54,988 railcars, respectively.

▲If the entire system of the MKARNS' 10,932,172 tons of waterborne commerce were transported by alternative methods, it would require 437,287 trucks or 109,322 railcars, respectively.

▲The MKARNS shipped 29.8 million bushels of wheat and 45.5 million bushels of soybeans in CY 2018.

▲If you would like to be included on the mailing list for annual calendars, locking-through instructions, maps or have general questions, please email [waterways@odot.org](mailto:waterways@odot.org) for additional information.

# 2018 Tonnage

2018 tonnage on the entire McClellan-Kerr Arkansas River Navigation System totaled **10.9 million tons**, with a value of **\$3.5 billion**. Oklahoma's 2018 waterborne commerce totaled **5.5 million tons**, with a value of **\$2.1 billion**.

## Iron & Steel

1,719,430 tons (15.73%) \$ 980,590,929.00 (27.80%)

## Chemical Fertilizer

2,390,584 tons (21.87%) \$ 1,029,002,976.96 (29.18%)

## Other Chemicals

199,263 tons ( 1.82%) \$ 72,212,911.20 ( 2.05%)

## Petroleum Products

257,116 tons ( 2.35%) \$ 153,004,589.28 ( 4.34%)

## Sand, Gravel & Rock

2,921,893 tons (26.73%) \$ 32,023,947.28 (0.91%)

## Coke & Coal

373,100 tons ( 3.41%) \$ 65,382,044.00 ( 1.85%)

## Minerals/Building Materials

393,800 tons ( 3.60%) \$ 226,801,234.00 (6.43%)

## Food/Farm Products

396,648 tons ( 3.63%) \$ 99,959,262.48 ( 2.83%)

## Wheat

894,300 tons ( 8.18%) \$ 212,861,286.00 ( 6.04%)

## Equipment/Machinery

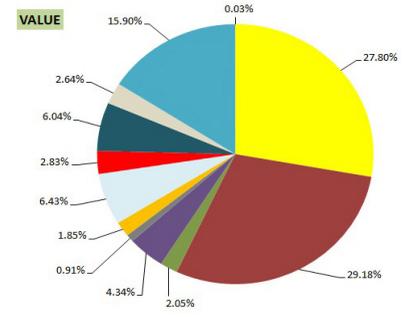

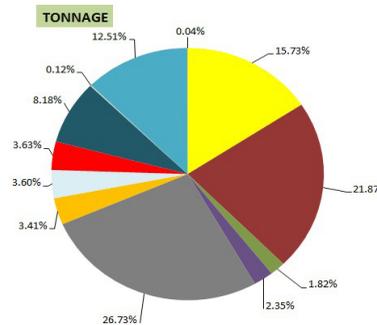

12,964 tons ( 0.12%) \$ 93,211,160.00 ( 2.64%)

## Soybeans

1,366,874 tons (12.51%) \$ 560,842,070.94 (15.90%)

## Miscellaneous

4,200 tons ( 0.02%) \$ 1,058,442.00 ( 0.03%)

**Graphs represent the ENTIRE MKARNS tonnage and value by commodity**

▲ Inland waterways are located in Alabama, Arkansas, Florida, Georgia, Illinois, Idaho, Indiana, Iowa, Kansas, Kentucky, Louisiana, Minnesota, Mississippi, Missouri, Nebraska, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, Washington, West Virginia, and Wisconsin. 41 states are directly served by the U.S. Army Corps of Engineers' ports and waterways.

▲ The United States exports approximately one-quarter of the grain it produces. On average, this includes nearly 45% of U.S.-grown wheat, 35% of U.S.-grown soybeans, and 20% of U.S.-grown corn.

▲ Studies have shown that without barge competition, agricultural shippers pay higher rail and highway transportation costs, the farther they are from an inland waterway.

▲ On average, one gallon of fuel moves one ton: Barge - 576 miles; Rail car - 413 miles; Semi-truck - 155 miles.

▲ River transportation creates almost ZERO noise pollution; not so with trains or trucks.

▲ According to the EPA, towboats emit 35% - 60% fewer pollutants than locomotives or trucks. The use of one barge eliminates the potential exhaust from 60 semi-trailer trucks or the power used to move 15 railcars.

▲ Hydropower facilities, built and maintained by the Corps, produce nearly one-third of the nation's total hydropower output, powering nearly 10 million households.

▲ Inland waterway transportation supports around 70,000 jobs in water transportation and around 800,000 jobs at industries dependent on barge-oriented commodities.

▲ Towboat operators pay a 29-cent per gallon diesel fuel tax that goes into the Inland Waterways Trust Fund, and a 4.3-cent tax earmarked for deficit reduction.

▲ Investments in inland river navigations infrastructure are investments in the long-term strength and security of the nation to keep the U.S. a major player in the global market.

## Did you know...

...that if waterborne cargo was diverted to highways, two inches of asphalt would be needed to increase the pavement thickness of 126,000 land miles of intercity Interstate? The effects would be greater for highways parallel to waterways.

...that President Richard M. Nixon dedicated the McClellan-Kerr Arkansas River Navigation System at a June 1971 ceremony at the Tulsa Port of Catoosa?

## Teachers & Students

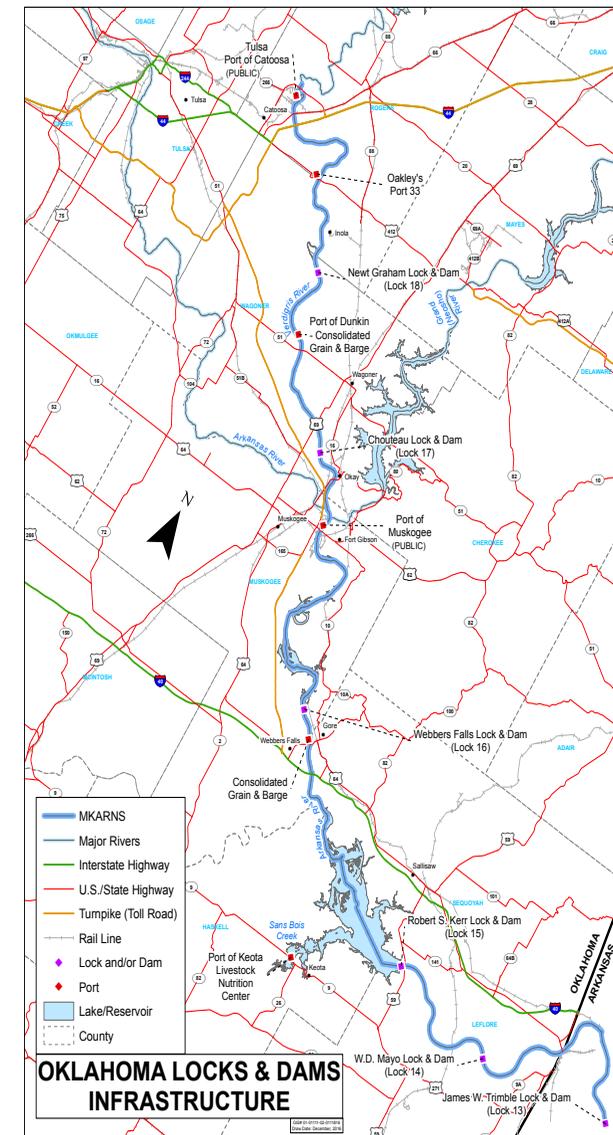

Get involved in the excitement at the Tulsa Port of Catoosa by visiting the Oklahoma Maritime Education Center. The free exhibit features interactive video kiosks teaching about the history and economic impact on Oklahoma. Also, see the Port's first towboat, the M/V Charley Border while on a tour. To schedule a classroom excursion, contact: 918.266.2291 [www.tulsaport.com](http://www.tulsaport.com)

The Roll-on/Roll-off Low Water Wharf is a public dock, operated by the Tulsa Port of Catoosa for transferring over-dimensional or overweight project cargo, such as giant processing equipment used in refineries.

"This publication, printed by The Oklahoma Department of Transportation is issued by ODOT, as authorized by the Secretary of Transportation." 2,000 copies have been prepared and distributed at a cost of \$0.12 each. Copies have been deposited with the Publications Clearinghouse of the Oklahoma Department of Libraries.
