- Appendix F Well Report and Map

SUMMARY

The Oklahoma Department of Transportation (ODOT) retained Olsson to perform an Initial Site Assessment (ISA) for I-35 Grade, Drain, Bridge and Surface in McClain County, Oklahoma (hereinafter referred to as the Project and shown on Figure 1 in Appendix A). Olsson performed this ISA in conformance with the scope and limitations of the ODOT Hazardous Waste Scope of Services. A summary of the ISA findings, which is based on a review of historical records, regulatory databases, site reconnaissance, and interviews, is as follows:

No recognized environmental conditions or de minimis conditions were identified during the ISA. This project has a low risk of encountering hazardous waste-related conditions.

This report must be read in its entirety to develop a comprehensive understanding of the ISA information process.

1. INTRODUCTION

The Oklahoma Department of Transportation (ODOT) retained Olsson to perform an Initial Site Assessment (ISA) for the widening of I-35 from the SH-74 interchange, extending north 2.75 miles to the Cleveland County line and from one mile south of Ladd Road, extending north 4.15 miles to the SH-74 interchange in McClain County, Oklahoma (hereinafter referred to as the Project and shown on Figure 1 in Appendix A). The Project consists of widening I-35 for approximately 6.9 miles starting at the Cleveland County line and extending south near Goldsby, Oklahoma. The Project vicinity is generally characterized as right-of-way, grazing/pastureland, businesses, and paved parking lots. Table 1, below, summarizes the Project description and physical setting. A topographic map depicting the Project location reproduced from a portion of the applicable U.S. Geological Survey (USGS) 7.5-minute series topographic map is included in Appendix A as Figure 2. An aerial photograph was used to identify such features and is included in Appendix A as Figure 3.

Table 1. Project Description and Physical Setting.

PROJECT DESCRIPTION AND PHYSICAL SETTING		
Potable Water Provider	Goldsby Water Authority	
Sanitary Sewer Provider	Goldsby Water Authority	
Land Area	Approximately 295 acres	
PHYSICAL SETTING INFORMATION FOR SITE AND SURROUNDING AREA		SOURCE
Topography (Refer to Appendix A for an Excerpt of the U.S. Geological Survey (USGS) Topographic Map)		
Subject Project area Elevation	1100 - 1200 ft. above sea level	USGS 7.5-Minute Topographic Maps, Washington, Oklahoma, 2018
Groundwater Flow Direction *	Various	
Surface Runoff/ Topographic Gradient	Various	USGS 7.5-Minute Topographic Maps, Cole, Oklahoma, 2018
		USGS 7.5-Minute Topographic Maps, Norman, Oklahoma, 2018
		USGS 7.5-Minute Topographic Maps, Newcastle, Oklahoma, 2018

*The hydrogeologic gradient is not known but is inferred as parallel to topographic gradient in the immediate Subject Project area vicinity. The regional groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending on seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the Subject Project area cannot be directly ascertained.

1.1. Purpose of the Initial Site Assessment

This ISA was prepared in a manner consistent with the ODOT Hazardous Waste Scope of Services. The purpose of this ISA is to assist ODOT in identifying hazardous and potentially hazardous waste-related conditions within and adjacent to existing and proposed right-of-way (ROW), determine the level of risk they present to the project, and make recommendations for any follow-up investigations.

The ASTM (ASTM International) E1527-21 defines a recognized environmental condition (REC) as the presence or likely presence of any hazardous substances or petroleum products (as defined in ASTM E1527-21) in, on, or at a Subject Project area that is (1) caused by any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not considered RECs.

De minimis conditions are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies. Conditions determined to be de minimis are not RECs nor controlled recognized environmental conditions (CRECs).

1.2. Scope of Services

This ISA was performed in accordance with our consultant request for task order approval and the approved notice to proceed, dated June 15, 2022, and the ODOT Hazardous Waste Scope of Services. The ISA scope of services was undertaken through a review of regulatory databases, historical and physical record resources, interviews as applicable, and visual noninvasive reconnaissance of the Project area.

2. HISTORICAL RESOURCES REVIEW

Olsson reviewed historical records to identify past uses of the Project area and adjoining properties and conditions that could represent RECs for the Project area. Copies of historical documents are included in Appendix B.

The following historical data sources were reviewed for this ESA.

- Historical topographic maps: 1893, 1898, 1904, 1925, 1936, 1951, 1965, 1975, 1981, 1983, 1995, 2012, 2013, 2016 and 2018;
- Historical aerial photographs: 1949, 1955, 1962, 1975, 1984, 1995, 2003, 2008, 2013, and 2017;
- City directory information: 1992, 1995, 2000, 2005, 2010, 2014, and 2017; and,
- Sanborn Maps: Sanborn Library was searched, the Project area is unmapped.

The Project area was shown as undeveloped and agricultural land from 1893 to 1925. By 1936, the Norman Bridge has been constructed, along with Highway 9. Highway 74 is shown in along the northern portion of the Project area in 1951. By 1962, I-35 has been constructed on the Project area. From 1962 until the present, the Project area remains largely unchanged and contains I-35 and right-of-way.

East

The areas east of the Project area are shown to be undeveloped in 1893. By 1936, this area is dominated by river bottom land and agricultural land. By 1949, Highway 74 is constructed, and a landing field is constructed. By 1975, the landing field is converted into an airport and more residential properties are constructed. By 1984, multiple large buildings are constructed along the northeastern portion of the Project area, a car dealership is constructed on Adkins Hills Road. By 2003, a large area is cleared, and many buildings are constructed near the I-35 and Highway 9 intersection. By 2013, a large area is cleared east of the northern boundary of the Project area. This area remains the same up to today.

South

The areas south of the Project area are shown to be undeveloped until 1893. By 1898, homes and small farms are present. The area remains largely unchanged 1962 when I-35 is constructed. By 1984, multiple homes have been constructed and what appears to be a racetrack. By 2013, more homes are constructed.

West

The areas west of the Project area are unmapped 1893. In 1898, this area is shown to be largely undeveloped except for some small farms. From 1898 until 1955, more homes are constructed

west of the Project area. By 1975, buildings are constructed near Highway 74. By 1983, multiple more buildings are constructed area near where Highway 74 intersects I-35. As of 1984, many homes are constructed along the length of the Project area. By 2003, a large area is cleared, and buildings are constructed near the intersection of Highway 74 and I-35. By 2008, near the northern boundary of the Project area, Riverwind casino is constructed along with multiple gas stations. The area west of the Project area remains unchanged up to the present.

North

The areas north of the Project area are shown to be undeveloped river bottom in 1893. As of 1951, Highway 9 is constructed. By 1955, a large area is cleared north of the Project area. By 1962, three buildings are constructed along with a small roadway. As of 1975, another road is constructed running north and south. By 1995, a large complex of buildings is constructed immediately north of the Project area and a gas station is constructed along Highway 9. By 2003, three additional building are constructed north of the Project area. By 2008, another large area is cleared, and a building is constructed. By 2017, the numerous areas north of the Project area are cleared and more buildings are constructed. The area west of the Project area remains unchanged up to the present.

This space intentionally left blank.

3. ENVIRONMENTAL RECORDS REVIEW

Database information provided by EDR was reviewed to identify RECs in connection with the Project in accordance with ASTM E1527-21. Information in this section is subject to the accuracy of the data and the date at which the information was updated by the information services company.

Olsson reviewed the database information for its relevance to the Project; that is, as the information referred to spills or releases either occurring on the Project or at properties having the potential to affect the Project. As used in this report, the terms “up-gradient,” “down-gradient,” and “cross-gradient” are used to describe the topographic relationship between the Project and off-site properties relative to the general groundwater flow direction. Refer to the discussion provided in Section 1.

3.1. State and Federal Regulatory Databases

Appendix C contains the database report including the list of searched databases (both ASTM-E1527-21-required as well as supplemental databases), database descriptions and results, dates of updates, approximate minimum search distances, and maps. Table 2 summarizes the database listings identified within the ASTM E1527-21 search radii.

This space intentionally left blank.

Table 2. Database Findings Summary.

Database Record	ASTM E1527-21 Search Distance (Miles)	Identified Listings
Federal Databases		
NPL (National Priorities List)	1.0	0
Delisted NPL	1.0	0
SEMS (Superfund Enterprise Management System)	0.5	0
SEMS Archive	0.5	0
RCRA CORRACTS (Resource Conservation and Recovery Act [RCRA] Corrective Action Site)	1.0	0
RCRA TSDF (RCRA treatment, storage, and/or disposal facility)	0.5	0
RCRA-LQG (RCRA large quantity generator)	0.25	0
RCRA-SQG (RCRA small quantity generator)	0.25	0
RCRA-VSQG (RCRA very small quantity generator)	0.25	1
RCRA-NonGen (RCRA waste generator that no longer generates hazardous waste)	0.25	0
Federal Institutional Controls	0.5	0
Federal Engineering Control	0.5	0
ERNS (Emergency Response Notification System)	Subject Project area Only	2
Database Record	ASTM E1527-21 Search Distance (Miles)	Identified Listings
State and Tribal Databases		
State/Tribal NPL or SHWS (Superfund or Hazardous Waste Sites)	1.0	0
State/Tribal SEMS	0.5	0
State/Tribal Licensed Landfill List	0.5	0
LUST (leaking underground storage tank)	0.5	3
LAST (leaking aboveground storage tank)	0.5	0
UST (underground storage tank)	0.5	4

AST (aboveground storage tank)	0.5	8
HIST UST (historic underground storage tanks)	0.25	4
State/Tribal Institutional Controls	0.5	0
State/Tribal Engineering Controls	0.5	0
State/Tribal Voluntary Cleanup Sites	0.5	0
State/Tribal Brownfield Sites	0.5	0

The following sections provide a description of the ASTM E1527-21 databases. Section 3.2 provides discussions regarding pertinent database listings for the Project and immediate vicinity.

3.1.1 NPL, Delisted NPL, SEMS, and SEMS Archive

The U.S. Environmental Protection Agency (EPA) maintains a Superfund Enterprise Management System (SEMS) database of potentially hazardous waste facilities that have been reported to the EPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The National Priorities List (NPL) database is a subset of SEMS that identifies facilities that the EPA has assigned a priority cleanup status under the Superfund Program. These facilities may become Delisted NPL (removed from the NPL list) or SEMS Archive facilities when the EPA determines that no further response is appropriate or planned for a facility.

No NPL, Delisted NPL, SEMS, and SEMS Archive sites were identified within the ASTM E1527-21 search distances.

3.1.2 RCRA CORRACTS

The EPA maintains a Resource Conservation and Recovery Act (RCRA) corrective action site database (CORRACTS) of hazardous waste handler facilities where corrective action activity has occurred or is occurring.

No RCRA CORRACTS sites were identified within the ASTM E1527-21 search distances.

3.1.3 RCRA TSDF

The RCRA treatment, storage, and/or disposal facility (TSDF) database is maintained by EPA to identify facilities that treat, store, or dispose of hazardous waste as defined by RCRA.

No TSDF sites were identified within the ASTM E1527-21 search distances.

3.1.4 RCRA Generators

The EPA manages a database of RCRA facilities that generate hazardous waste. The RCRA large quantity generator (LQG) facilities generate over 1,000 kilograms (kg) of hazardous waste or over 1 kg of acutely hazardous waste per month. The RCRA small quantity generator (SQG) facilities generate between 100 kg and 1,000 kg of hazardous waste per month. The RCRA conditionally exempt small quantity generator (CESQG) facilities generate less than 100 kg of hazardous waste or 1 kg of acutely hazardous waste per month. The EPA RCRA generator database also lists facilities that have filed a status change from RCRA waste generator to an operation that no longer generates hazardous waste (NonGens).

One (1) RCRA Generator site was identified within the ASTM E1527-21 search distances.

3.1.5 Federal Institutional and Engineering Controls

The EPA maintains a list of facilities where institutional controls/engineering controls are in place to manage contamination that the agency approved to remain on-site. Administrative measures involving institutional controls can include groundwater use restrictions, construction restrictions, activity and use limitations (AULs), and post-remediation care requirements intended to prevent exposure to contaminants. Deed restrictions are generally required as part of the institutional controls. Engineering controls include various physical capping barriers, building foundations, liners, and treatment methods protective of human health and the environment.

No institutional or engineering controls were identified within the ASTM E1527-21 search distances.

3.1.6 Emergency Response Notification System (ERNS)

The U.S. Coast Guard National Response Center maintains a database of reported releases of oil and hazardous substances.

Two (2) ERNS listings were identified within the ASTM E1527-21 search distances.

3.1.7 State/Tribal Superfund or Hazardous Waste Sites (SHWS)

A State/Tribal Superfund or Hazardous Waste Sites (SHWS) database is maintained by the Oklahoma Department of Environmental Quality (ODEQ). The SHWS facility list is intended to be a state-level equivalent of the NPL and CERCLA Information System (CERCLIS) databases.

No SHWS sites were identified within the ASTM E1527-21 search distances.

3.1.8 State/Tribal Landfill and/or Solid Waste Disposal Sites

The State/Tribal Landfill and/or Solid Waste Disposal Sites databases list facilities maintained for the disposal of municipal solid waste (i.e., landfills).

No state/tribal landfill or solid waste disposal sites were identified within the ASTM E1527-21 search distances.

3.1.9 State/Tribal Leaking Storage Tank Lists

The Oklahoma Corporation Commission (OCC) maintains a list of leaking underground storage tank (LUST) and leaking aboveground storage tank (LAST) facilities.

Three (3) LUST facilities/sites were identified within the ASTM E1527-21 search distances.

3.1.10 State/Tribal Storage Tanks

The OCC maintains a database of registered aboveground storage tanks (ASTs), underground storage tanks (USTs) and historic underground storage tanks (HIST UST).

The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Oklahoma Corporation Commission's State UST List, List II Version. Four (4) USTs were identified within the ASTM E1527-13 search distances.

The Aboveground Storage Tank database contains registered ASTs. The data come from the Oklahoma Corporation Commission's State AST List. Eight (8) ASTs were identified within the ASTM E1527-21 search distance.

3.1.11 State/Tribal Institutional Controls

Similar to the EPA's federal list of institutional controls/engineering control facilities, the ODEQ maintains a list of facilities assigned state institutional controls.

No state or tribal institutional controls were identified within the ASTM E1527-21 search distances.

3.1.12 State/Tribal Voluntary Cleanup Sites

The ODEQ maintains a listing of facilities where owners and parties responsible for contamination have voluntarily undertaken cleanup activities overseen by the state.

No voluntary cleanup site was identified within the ASTM E1527-21 search distances.

3.1.13 State/Tribal Brownfields

The ODEQ maintains a database of facilities where expansion, redevelopment, or reuse of the facilities may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant.

No Brownfield sites were identified within the ASTM E1527-21 search distances.

3.1.14 Other

Database providers frequently report supplemental database search findings outside the required ASTM E1527-13 coverage. These may include Facility Index System/Facility Registry System (FINDS), the Aerometric Information Retrieval System (AIRS), SPILLS, TANKS, Historical Gas Stations, Historical Dry Cleaners, and other supplemental database resources. The supplemental database information is discussed where relevant to the Project.

Four (4) HIST USTs were identified within the ASTM E1527-21 search distances.

3.2. Database Information

The regulatory database review identified 22 database listings within the prescribed ASTM E1527-21 search radii.

3.2.1 Project Database Listings

The Project was referenced in the environmental database report.

The first ERNS incident identified occurred on July 7, 1993 and was located at 450 Atkins Hill Rd. in Norman, Oklahoma. The responsible party was Koch Material Company. Approximately 1,500 gallons of hydrochloric acid was spilled, however the spill was contained within secondary containment. This listing is not considered a REC.

The second ERNS incident identified occurred April 11, 2022 at 27191 Highway 74 in Goldsby, Oklahoma. The site is listed as a meat processing plant. On the day of the incident, a smell was reported, and a stream blood was observed coming from the facility. This discharge was observed impacting a nearby lagoon. While the database report listed this site as being within the Project area, it is 2 miles west of the Project area. This site is not considered a REC due to its distance from the Project area.

The Goldsby Store is located at 434 Interstate Drive in Goldsby, Oklahoma and is listed as having three USTs. No signs of leaks or discharge were observed during the field visit. These USTs are currently in use and are not considered RECs. These USTs were also listed in the HIST UST database. The Goldsby Store is also listed as having one AST. This AST has been removed from the ground. No signs of leaks or discharge were observed during the field visit. This listing is not considered REC for the Project area.

Hamm and Phillips Service is located at 548 W Interstate Drive and is listed as having one AST. This tank has been removed from the ground. No signs of leaks or discharge were observed during the field visit. This tank is not considered REC.

3.2.2 Vicinity Database Listings

The Project vicinity was identified in the environmental database report.

Pro Petro Services is located at 2103 E. Ludd Rd in Washington, Oklahoma, 747 ft southwest of the Project. Pro Petro Services was identified in the RCRA-VSQG database. This site is listed as producing ignitable waste and corrosive waste. In 2007, this site had 4 violations; however, these violations were all resolved within two months of being identified. This site is not considered to be a REC.

Goldsby Texaco is located at RR 1 Box 53, SH-74 & I-35 in Washington, Oklahoma, 311 ft south of the Project. Goldsby Texaco was identified in the HIST UST database. Three tanks were identified, and they were all listed as still being in use. No signs of leaks were observed during the site visit. These tanks are not considered RECs.

Henkels and McCoy is located at SH-9, 1 mi west of I-35, 319 ft southwest of the Project. This site is listed in the HIST UST database. Three tanks are identified, and they were all listed as currently in use. No signs of leaks were observed during the site visit. These tanks are not considered RECs.

Love's Country Store is located at 5317 SE 44th, 746 ft west northwest of the Project, and is listed as having seven USTs. Two of these tanks are permanently out of use. The rest of the tanks are currently in use. No signs of leaks or discharge were observed during the field visit. These tanks are not considered RECs. Five of these tanks were also listed in the HIST UST database. This site was also listed in the LUST database. A confirmed release was reported on June 08, 2015. This case was closed on March 15, 2022. This listing is not considered a REC.

Tarver Construction is north of Highway 9 and west of I-35, 959 ft west northwest of the Project, and is listed as having three USTs. All of these tanks have been removed from the ground. No signs of leaks or discharge were observed during the field visit. These tanks are not considered RECs. This site was also listed in the LUST database. A confirmed release was reported on November 11, 1998 and was closed on February 01, 2000. This listing is not considered a REC.

Sid's Easy Shop is located at 109 North Main, 1298 ft south of the Project, and is listed as having three USTs. These tanks are currently in use. No signs of leaks or discharge were observed during the field visit. These tanks are not considered RECs.

H&H Plumbing and Utilities is located at 266 Industrial Boulevard, 530 ft west of the Project, and is listed as having one AST. No signs of leaks or discharge were observed during the field visit. This tank has been removed from the ground and is not considered a REC. H&H Plumbing and Utilities is also listed as having two ASTs. These tanks are currently in use. No signs of leaks or discharge were observed during the field visit. These tanks are not considered REC.

David J Perry Airport is located at 351 DJP Memorial Boulevard, 645 ft east of the Project, and is listed as having one AST. This tank is currently in use. No signs of leaks or discharge were observed during the field visit. This tank is not considered REC.

B&H Construction is located at Industrial Boulevard, 1068 ft west of the Project, and is listed as having three ASTs. These tanks are all permanently out of use. No signs of leaks or discharge were observed during the field visit. These tanks are not considered RECs. B&H Construction is also listed as having three ASTs. These tanks are currently in use. No signs of leaks or discharge were observed during the field visit. These tanks are not considered REC.

7-Eleven is located at 1201 NE 12 Ave, 0.477 miles southwest of the Project area. This site was listed in the LUST database. A confirmed release was reported on June 23, 2010 and was closed on May 06, 2020. This listing is not considered a REC.

3.2.3 Unmapped “Orphan” Listings

Unmapped or “orphan,” database listings are facilities that a database provider typically could not locate because of inadequate geocode or address information. The database report listed 31 unmapped facilities located in the Project zip code area. Confirmation of the location of unmappable facilities listed by the information service company is beyond the scope of this study. However, a cursory review of the unmapped listings was performed.

Thirty-one (31) orphan sites were identified within the ASTM E1527-21 search distances. Eight of these were within the Project; however, none of these sites were considered RECs. None of the remaining sites appear to be near the Project and therefore are not considered RECs.

3.2.4 Goldsby Public Works and Fire

Olsson staff contacted Director of Public Works and 30-year veteran of the Goldsby Fire Department Ronnie Nelson by phone to request whether that agency-maintained hazmat incident or spill records for the Project area. Based on his review, no records were identified for the Project area. However, he did recall a few accidents that involved oil transportation trucks along I-35. His estimation is that none of these incidents involved more than 250 gallons of oil/fuel and that they were cleaned up by qualified personnel.

3.2.5 OWRB Groundwater Data

Olsson reviewed the Oklahoma Water Resources Board (OWRB) for locations of public water supplies and for wellhead protection areas. Based on the review, 171 water wells were identified from the database review. Five wells for public water supply were identified within the search radius, however, none were located within the Project area. No wellhead protection areas were

identified. Twelve wells were identified within the project area. Seven of these were groundwater wells, three are geotechnical borings, one was a monitoring well, and the remaining well was a geothermal well. Appendix F contains the Well Report and Map.

4. PROJECT AND ADJOINING PROJECT AREA RECONNAISSANCE

The following sections describe the Project and adjoining Project features noted during Olsson's site reconnaissance October 11, 2022, and in the Land Use Windshield Survey Form (Appendix E).

4.1. Limiting Conditions

Observation of the Project area surface features was not restricted at the time of the reconnaissance; therefore, limiting conditions that would otherwise represent a data gap were not encountered.

4.2. Reconnaissance Methodology

Upon arrival at the Project, Olsson personnel drove the extent of the Project via US-69, taking photos during the site visit. A land vehicular and pedestrian survey was used to visually inspect the entire Project area.

Olsson's biologist observed the adjacent Project features from readily accessible areas (Project boundaries). Photo documentation of representative features observed during the Project reconnaissance is provided in Appendix D.

4.3. Current and Past Uses of the Project

The Project currently contains portions of I-35 from 0.5 miles north of SH-9 to 1 mile south of E. Ladd Road and is surrounded by single family residential properties, agricultural, industrial, and commercial properties. The Project was historically used for transportation on I-35 and the associated ROW. The surrounding land use in the area has primarily been forested, agricultural, commercial, industrial and residential.

4.4. Subject Project Area Reconnaissance

No notable features were identified during Olsson's Project reconnaissance (see Appendix E Land Use Windshield Survey Form).

4.5. Adjoining Project Reconnaissance

Visual observations of adjoining properties (from Subject Project area boundaries) are summarized in Table 3 and are depicted on Figure 3 in Appendix A.

Table 3. Adjoining Project Reconnaissance

Direction	Description
North	North of the Project is the Canadian River and river bottom land.
East	East of the Project is predominantly pastureland/agricultural land with various businesses. These businesses include: Wade's RV Supercenter, Morton Buildings, Floyd's RV, Goldsby Gaming Center, Oklahoma Trailers Direct, Midcontinent Truck Sales, Jake's Custom Diesel, and Oklahoma Motorsports Complex.
South	South of the Project is I-35, agricultural land and an equine hospital.
West	West of the Project is predominantly pastureland/agricultural land with a few residential properties. Near exits along I-35, gas stations are present. B&H Construction, Riverwind Casino, Love's Travel Stop, Cimarron Energy, and Vickers Sand and Gravel are all present along the western portions of the Project.

5. INTERVIEWS

No Project representatives or owners were identified through Olsson's database search; therefore, no interviews occurred with owners or representatives of the Subject Project area. On September 19, 2022, Olsson spoke with Ronnie Nelson from the Goldsby Department of Public Works and requested records of reports of leaks, spills or concerns at or near the Subject Project area. No records or reports of were found.

6. EVALUATION

The following paragraphs summarize the findings, opinions, and conclusions of the ISA. Olsson has evaluated the provided information for significant data gaps that, if present, are discussed in their respective report sections.

Subject Project area Physical Setting

The Subject Project area includes a portion I-35 from the SH-74 interchange, extending north 2.75 miles to the Cleveland County line and from 1 mile south of Ladd Road, extending north 4.15 miles to the SH-74 interchange in McClain County, Oklahoma. The Subject Project area slopes generally to the east.

Historical Resources Review

Topographic maps, aerial photographs, city directories, and Sanborn Maps were reviewed to identify past uses of the Subject Project area and adjoining properties and to identify conditions that could represent RECs in association with the Subject Project area. No conditions that represent RECs were identified during the review.

Regulatory Database Review

The regulatory database review identified twenty-two database listings within the prescribed ASTM E1527-21 search radii. No RECs were identified. Database findings were identified in the previous sections.

Site Reconnaissance

Olsson performed a site visit on October 11, 2022. No notable features were identified during Olsson's site reconnaissance.

Interviews

Olsson did interviews with Ronnie Nelson from the Goldsby Department of Public Works and requested records of reports of leaks, spills or concerns at or near the Subject Project area. No records or reports were found.

Conclusions

No RECs were identified at the Project or on adjacent areas (Table 4, Appendix A Figure 3).

Table 4. Potential Environmental Hazards

Map ID	Business	Address	Type of Operation	Active / Closed	Environmental Concerns	Potential Constituents	Comments	Position Relative to ROW	Relative Elevation	Expected GW Flow Dir.	Level of Concern
1	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA

7. SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

Olsson conducted this ISA and reviewed all appropriate records made available to Olsson within the performance period of this assessment, conducted Project inspection, and performed an analysis of current and historical information collected during the record search. The information contained within the ISA report, to the best of Olsson's knowledge, is correct.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional, as defined in Section 312.10 of 40 Code of Federal Regulations (CFR) 312; and I have the specific qualifications based on education, training, and experience to assess a Project of the nature, history, and setting of the Project. I have developed and performed all appropriate inquiries in conformance with the standards and practice set forth in 40 CFR Part 312.

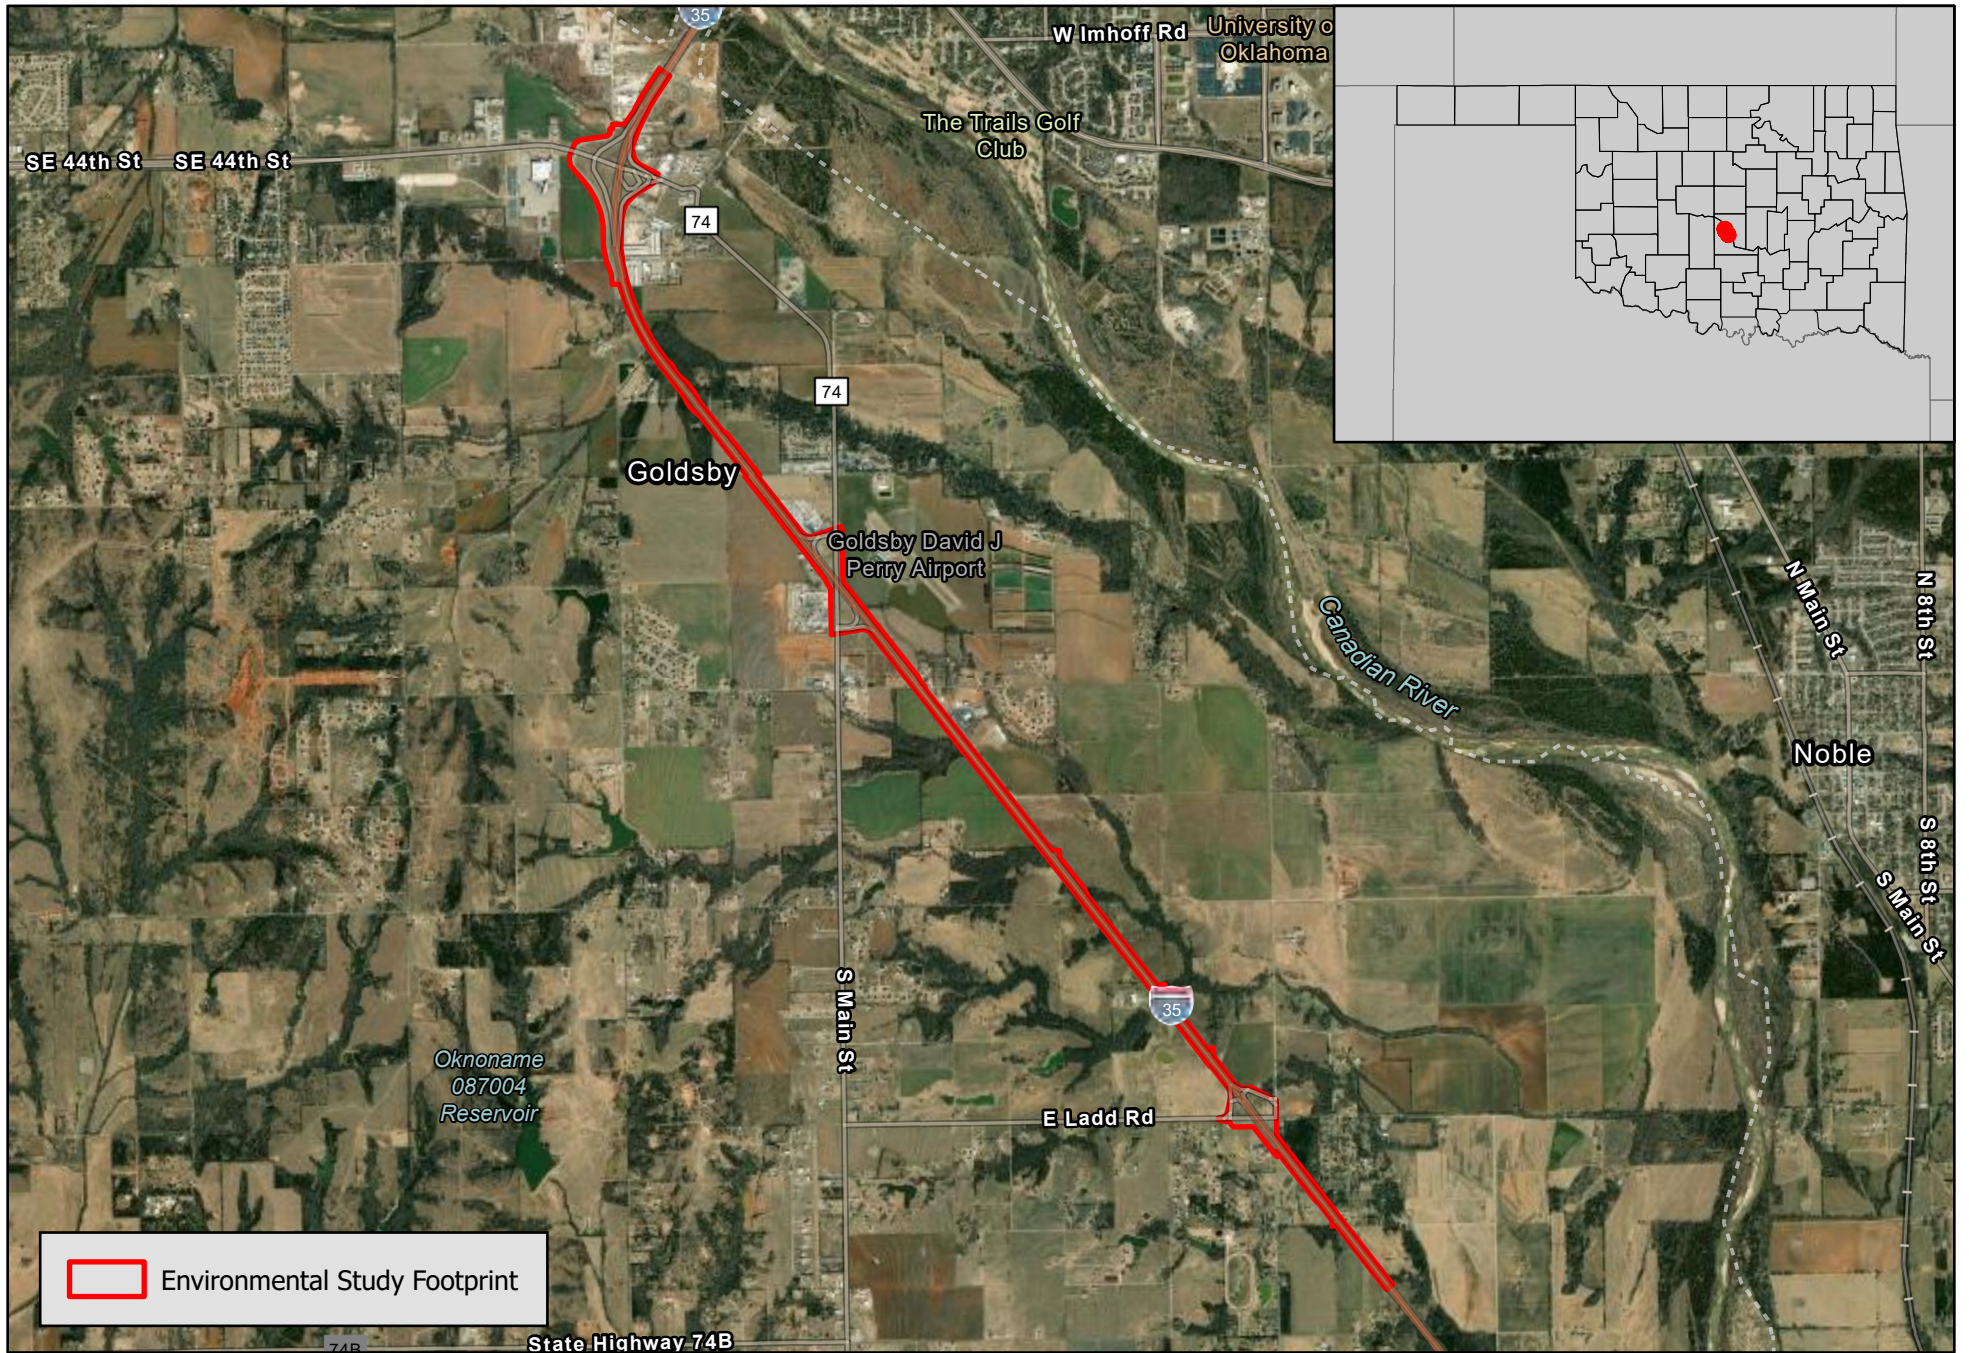

Nathan Hillis

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Olsson were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Olsson were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Project NA

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 8FF0-4D8D-B740

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Olsson (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/26/2022	Source: EPA

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/26/2022	Source: EPA
Date Data Arrived at EDR: 08/02/2022	Telephone: N/A
Date Made Active in Reports: 08/22/2022	Last EDR Contact: 09/01/2022
Number of Days to Update: 20	Next Scheduled EDR Contact: 10/10/2022
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/26/2022

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/26/2022	Source: EPA

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/20/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2022	Telephone: 214-665-6444

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/20/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2022	Telephone: 214-665-6444

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state and tribal brownfield sites

BROWNFIELDS: Brownfield Sites

Brownfields are defined by Oklahoma law as abandoned, idled or under used industrial or commercial facilities or other real property at which expansion or redevelopment of the real property is complicated by environmental contamination caused by regulated substances. This program provides a means for private parties and government entities to voluntarily investigate and if warranted, clean up properties that may be contaminated with hazardous wastes. The formal Brownfields Program provides specific state liability relief and protects the property from federal Superfund actions.

Date of Government Version: 09/07/2012

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Centers

Source: Department of Human Services

Telephone: 405-521-3561

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

OKLAHOMA GOVERNMENT WELL RECORDS SEARCHED

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.
