The Oklahoma Department of Transportation (ODOT) in cooperation with the Federal Highway Administration (FHWA) is proposing to improve highway US 77 between SH 29 West junction and Long Avenue in Wynnewood in Garvin County, Oklahoma. There are three narrow 28-30 ft wide bridges over Washita River, Washita River overflow and unnamed creek located in this section. The existing highway is a two-lane facility with two, 12-ft wide driving lanes and 8-ft wide paved shoulders. The current and projected traffic on the highway warrants four lanes. The purpose of the project is to correct the structurally deficient/functionally obsolete narrow bridges on US 77 and to improve the efficiency of the highway.

As part of our efforts to keep the public informed and involved in the decision-making process, ODOT has scheduled a public meeting. The purpose of the public meeting is to present the proposed improvements and the results of the environmental studies, and to solicit public input before completing the design.

Should you have any questions regarding the project, please contact our consultant Mr. Geoff Canty, CC Environmenta, at (405) 761-1225, geoff@ccenviro.net or Mr. Robert Payao, ODOT Environmental Project Manager, at (405) 521-2312, or rpayao@odot.org.

The Oklahoma Department of Transportation (ODOT) ensures that no person or groups of persons shall, on the grounds of race, color, sex, religion, national origin, age, disability, retaliation or genetic information, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any and all programs, services, or activities administered by ODOT, its recipients, sub-recipients, and contractors. If any interested individual has a disability that may require accommodation to participate in this meeting, please contact ODOT ADA Coordinator at (405) 521-4140. Upon advance notification of the need for accommodation, reasonable arrangements will be made to provide accessibility to the meeting.

WE LOOK FORWARD TO SEEING YOU THERE
