DISTRICT 1 ENGINEER: CHRIS WALLACE, P.E.

- Right-of-Way & Utility Relocation anticipated to start in: 2021
- Construction anticipated to start in: 2023
- Current Annual Average Daily Traffic (AADT) in year 2020: 1,600 Vehicles a day
- Future Estimated AADT in year 2040: 2,250 Vehicles a day
- Highway will remain open to traffic at all times during construction

PROJECT INFORMATION SUMMARY

- Total Road Miles*: 1,109.50
- Total Interstate Miles*: 97.27
- Total Bridges**: 706

Counties: Adair, Cherokee, Haskell, McIntosh, Muskogee, Okmulgee, Sequoyah, Wagoner

*Totals DO NOT include Toll Roads
**Totals DO NOT include County Bridges

PLEASE PROVIDE YOUR COMMENTS BY 10/19/2020

VIRTUAL OPEN HOUSE
October 2 - 19, 2020
SH-82 near Blackgum, OK from the SH-100/SH-82 junction, extending east and north ~3 miles
Sequoia & Cherokee Counties: JP 30574(04) & 27116(04)

www.odot.org/SH82/Sequoyah

VIRTUAL OPEN HOUSE

The purpose of this project is to increase driver safety by correcting this segment of SH-82 with deteriorating pavement, no shoulders, sharp curves, limited sight distances, and steep slopes, and to replace a narrow bridge.

The public may view the project on the virtual Open House website, including details about right-of-way acquisition and access, and more details about the proposed improvements.

Dear Stakeholders, Property Owners, and Utility Owners:

The Oklahoma Department of Transportation (ODOT), in cooperation with the Federal Highway Administration (FHWA), proposes to make safety improvements to this segment of SH-82 from the SH-100/SH-82 junction in Blackgum, OK and extending east and north approximately 3 miles, located in Sequoyah and Cherokee Counties. SH-82 is part of the Cherokee Hills Scenic Byway that begins near Gore, OK and ends near West Siloam Springs, OK. The existing highway is a two-lane, open section facility with 11-foot wide driving lanes and no shoulders. The bridge over Snake Creek is a 22-foot wide span bridge. Current traffic volumes are estimated at 1,600 vehicles per day (vpd) and are projected to increase to 2,250 vpd by 2040. This section of SH-82 has sharp curves, insufficient sight distances, steep side slopes, no shoulders, and a narrow bridge.

In 2015, ODOT tasked a consultant to study five alternatives for improving this segment of highway while taking into consideration the cost of construction, right-of-way and utilities, potential environmental constraints, and the beauty of this scenic byway. The five alternatives were presented at a public Open House meeting held November 15, 2016. Based on the completed alignment study, public participation, and state and federal agency input, ODOT selected a preferred alignment.

**Project Background**

The Oklahoma Department of Transportation (ODOT), in cooperation with the Federal Highway Administration (FHWA), proposes to make safety improvements to SH-82 from the SH-100/SH-82 intersection in Blackgum, OK and extending east and north approximately 3 miles, located in Sequoyah and Cherokee Counties. SH-82 is part of the Cherokee Hills Scenic Byway that begins near Gore, OK and ends near West Siloam Springs, OK. The existing highway is a two-lane, open section facility with 11-foot wide driving lanes and no shoulders. The bridge over Snake Creek is a 22-foot wide span bridge. Current traffic volumes are estimated at 1,600 vehicles per day (vpd) and are projected to increase to 2,250 vpd by 2040. This section of SH-82 has sharp curves, insufficient sight distances, steep side slopes, no shoulders, and a narrow bridge.

In 2015, ODOT tasked a consultant to study five alternatives for improving this segment of highway while taking into consideration the cost of construction, right-of-way and utilities, potential environmental constraints, and the beauty of this scenic byway. The five alternatives were presented at a public Open House meeting held November 15, 2016. Based on the completed alignment study, public participation, and state and federal agency input, ODOT selected a preferred alignment.

**Project Description**

In an effort to increase safety, ODOT proposes to improve this segment of SH-82. Starting at McQuick’s Grocery, and extending east to where the highway curves north, the roadway will be widened to create a curb and gutter section with two 12-foot wide driving lanes with 6-foot wide shoulders on existing alignment. At the point where SH-82 curves north, the highway will transition to an open section roadway (i.e., no curbs) with two 12-foot wide driving lanes with 8-foot wide paved shoulders on east offset alignment. Skewed side streets, county roads and drives will be reconfigured to create perpendicular intersections. The bridge over Snake Creek will be replaced on east offset alignment with a 40-foot wide clear roadway span bridge. The highway will remain open during construction, and access to residences and businesses will be maintained throughout the project.

**Project Location**

The Oklahoma Department of Transportation (ODOT) ensures that no person or groups of persons shall, on the grounds of race, color, sex, religion, national origin, age, disability, retaliation or genetic information, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any and all programs, services, or activities administered by ODOT, its recipients, sub-recipients, and contractors. To request an accommodation please contact the ADA Coordinator at 405-521-4140 or the Oklahoma Relay Service at 1-800-722-0353, no later than 72 hours before any scheduled event. If you have any ADA or Title VI questions email ODOT-ada-titlevi@odot.org.

Sincerely,

Siv Sundaram, P.E.
Environmental Programs Division Engineer

The mission of ODOT is to provide a safe, economical, and effective transportation network for the people, commerce and communities of Oklahoma.
