The Oklahoma Department of Transportation will host a virtual public open house to update the public and present the latest information on the improvements to SH-80 near the Town of Hulbert in Cherokee County. This open house will present the proposed design for the project and allow the public to submit comments. Due to concerns over the spread of COVID-19, this will be a web-based format (no in-person meeting). The information will be available beginning January 6, 2022 and comments are requested by January 20, 2022.

**Purpose**

The purpose of this project is to correct roadway deficiencies, enhance safety, efficiently accommodate traffic, and provide direct connection to SH-51. The current roadway is a two-lane roadway with 10-foot-wide driving lanes and no shoulder. This portion of SH-80 has deteriorating pavement, no shoulders, and goes through the Town Hulbert to connect to SH-51.

To date, ODOT has developed and studied three alternatives for this segment of SH-80. An open house was held on February 4, 2020 to present the alternatives to the public and obtain input. Based upon the completed engineering review, public meeting participation and state and federal agency input; ODOT selected a new alignment west of existing S. Wilson Lane as the preferred alternative. The public may view this preferred alternative on the virtual open house website and more details about the proposed improvements.
January 3, 2022

Dear Stakeholders, Property Owners and Utility Owners:

Re: Grade, Drainage, Bridge, and Surface improvements on SH-80 from 0.85 miles of junction SH-80/SH-51 north 0.5 miles in Cherokee County, ODOT JP No. 31246(04)

The Oklahoma Department of Transportation (ODOT), in cooperation with the Federal Highway Administration (FHWA), is proposing improvements to State Highway (SH) SH-80 from 0.85 mile south of junction SH-80/SH-51, north 0.5 mile (on new alignment) near the Town of Hulbert in Cherokee County, Oklahoma. The existing segment of SH-80 has deteriorating pavement, no shoulders, and goes through the Town of Hulbert to connect to SH-51. The purpose of the proposed improvements is to correct roadway deficiencies, enhance safety, efficiently accommodate traffic, and provide direct connection to SH-51.

A Public Open House was held on February 4, 2020 to inform the public of the three alternatives that were being considered for the proposed improvements and obtain input. Based upon the completed engineering review, public meeting participation and state and federal agency input; ODOT selected a new alignment west of existing S. Wilson Lane as the preferred alternative. This preferred alternative is presented in the current virtual public open house.

Due to ongoing concerns about COVID-19, ODOT will host a virtual public open house from January 6 to January 20, 2022, to present the preferred alternative for the project and allow the public to submit input. This pamphlet contains additional information about the virtual public open house and our Property Rights Brochure. This brochure is for informational purposes only as your property may or may not be affected by the proposed project. After the virtual public open house, the meeting materials will be available on the ODOT Public Meeting Website: www.odot.org/publicmeetings.

If you are leasing this property, please notify your lessee of this virtual Open House.

Should you have any questions or would like additional information regarding this project, please email environment@odot.org, or call 405-325-3269.

Respectfully,

Chris Wallace, P.E.
District 1 Engineer

The Oklahoma Department of Transportation (ODOT) ensures that no person or groups of persons shall, on the grounds of race, color, sex, religion, national origin, age, disability, retaliation or genetic information, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any and all programs, services, or activities administered by ODOT, its recipients, sub-recipients, and contractors. To request an accommodation please contact the ADA Coordinator at 405-521-4140 or the Oklahoma Relay Service at 1-800-722-0353 no later than 72 hours before any scheduled event. If you have any ADA or Title VI questions email ODOT-ada-titlevi@odot.org.

“The mission of the Oklahoma Department of Transportation is to provide a safe, economical, and effective transportation network for the people, commerce and communities of Oklahoma.”

AN EQUAL OPPORTUNITY EMPLOYER
Project Background

ODOT tasked a design consultant in February 2019 to evaluate realignment/improvement alternatives for SH-80 to directly connect to SH-51 near the Town of Hulbert in Cherokee County. Three alternatives were developed as part of the February 2019 contract, which were presented at a public meeting on February 4, 2020 in Hulbert. Based upon the completed engineering review, public meeting participation and state and federal agency input; ODOT selected a new alignment west of existing S. Wilson Lane as the preferred alignment. This meeting presents the preferred alternative which achieves the purpose of the project. The purpose of this project is to correct roadway deficiencies, enhance safety, efficiently accommodate traffic, and provide direct connection to SH-51.

Project Description

ODOT proposes to add shoulders, widen the driving lanes, and construct a new bridge on a new alignment. The new roadway will have two 12-foot wide driving lanes with 8-foot paved shoulders. See Figure 1 for details. The new bridge over Double Spring Creek will have a clear roadway width of 40-feet. The proposed SH-80 alignment will be west of S. Wilson Lane which will provide a direct connection to the existing SH-51. The existing highway would remain open during construction, and access to residences and businesses would be maintained. The purpose of proposed improvements is to correct roadway deficiencies, enhance safety, efficiently accommodate traffic, and provide direct connection to SH-51.

The enclosed map shows the design of the preferred alternative. The public may view the project design on the virtual open house website and read more about how the project will affect homes and businesses.

Figure 1: Proposed Typical Section
PROJECT INFORMATION SUMMARY

- Total Estimated Construction Cost of Project: **$4.9 Million**
- Right-of-Way Acquisition and Utility Relocation Anticipated to Start in: **2022**
- Construction Anticipated to Start in: **2025**
- Current Annual Average Daily Traffic (AADT) in year 2019: **320 Total VPD/102 trucks per day (S. Wilson Lane)**
- Future Estimated AADT by Year 2043: **1,210 Total VPD/387 trucks per day (S. Wilson Lane)**

**Totals** DO NOT include Toll Roads

**DIVISION 1 ENGINEER: CHRIS WALLACE, P.E.**

- **Total Road Miles:** 1,110.70
- **Total Interstate Miles:** 97.31
- **Total Bridges:** 698

**Counties:** Adair, Cherokee, Haskell, McIntosh, Muskogee, Okmulgee, Sequoyah, Wagoner

**PLEASE PROVIDE YOUR COMMENTS BY January 20, 2022**
