Description of Amendment:

a. This is to incorporate the following:

Amendment 1 covers:

Questions and Answers Sheet

b. All other terms and conditions remain unchanged.

Supplier Company Name (**PRINT**)		Date
Authorized Representative Name (**PRINT**)	Title	Authorized Representative Signature

ODOT Agency Contract AC0005
Road Safety Equipment

QUESTIONS AND ANSWERS

Q1: For the first listing "Smart Sequential Road Flare," are you requesting pricing information for a specific set size or can we provide pricing for both available set sizes? These are available in sets of 10 sequential flares and sets of 6 sequential flares. Each set includes the sequential flares, a carrying/charging case, a DC Vehicle Charger Plug, an AC Wall Charger Plug, and a 2-year warranty. In addition to providing pricing for both set sizes, we can provide pricing for the individual flares for replacement needs as individual sequential flares can be purchased for loss sequential flares.

A1: Yes, please provide pricing for both the 10-flare set and the 6-flare set, as well as individual replacement flares.

Q2: For the second listing, "Smart Sequential Road Flare Charging Case," what information is required? The charging case is included with each set size so this may not be necessary as they come standard with the set. However, if you are looking to have them available as replacement parts, then this makes sense.

A2: Please provide separate pricing for additional charging cases and vehicle-mounted charging kits, if they are not already included in the quoted price. We would like to know the cost of purchasing these items separately as replacements or additional accessories.

Q3: Regarding listing number 8, "Smarter Sequential Cone Kit". This is also sold in different set sizes: a Set of 10 Smarter Sequential Cones and a Set of 6 Smarter Sequential Cones. Can we list both kit sizes for the line item?

A3: Yes, please include pricing for both the 10-cone kit and the 6-cone kit.

Q4: "Cone Adapters" listing, there are two types of cone adapters in two set sizes. Can we list the two type and the two set sizes?

A4: Yes, please list all available cone adapter types and set sizes, with separate pricing for each option.

Q5: Start/End Work Zone Pin: The Start/End Work Zone Pin available as a single line-item (including hardware, warranty, dashboard, data, etc.) that includes 6-months of connectivity and activation. How should we present the renewal cost for ongoing activation of the Work Zone Pin following the initial 6-months? Can we provide it as an additional line-item, the only difference being the duration of service?

A5: Yes, please list the initial purchase price, including the first six months of connectivity, and the ongoing activation renewal fee as separate line items.

Q6: Digital Alerting System: The Digital Alerting System is available as a single line-item (including hardware, warranty, dashboard, data, etc.) and comes with either 1-Year Digital Alerting Connectivity and Dashboard/Data Access OR 3-Year Digital Alerting Connectivity and Dashboard/Data Access. Can we provide both available options? And how should we present the renewal cost (month, year, etc.) for ongoing activation (without hardware cost) of the Digital Alerting System following the initial included connectivity? Can we provide it as an additional line-item?

A6: Yes, please provide pricing for both the one-year and three-year Digital Alerting System options. Please also list the renewal fee for continued connectivity and dashboard/data access as a separate line item, excluding hardware costs.

Q7: Impact Detection System: Similar to the Digital Alerting System, the Impact Detection System is available as a single line-item (including hardware, warranty, dashboard, data, etc.) and comes with either 1-year Impact Detection Monitoring and Dashboard/Data access OR 3-year Impact Detection Monitoring and Dashboard/Data access. Can we provide both available options? And how should we present the renewal cost (without hardware cost) for ongoing monitoring/connectivity of the Impact Detection System after the initial included connectivity ends? Can we provide it as an additional line-item?

A7: Yes, please provide pricing for both the one-year and three-year Impact Detection System options. Please also list the renewal fee for continued monitoring, connectivity, and dashboard/data access as a separate line item, excluding hardware costs.
