1.0 EXECUTIVE SUMMARY

This document summarizes the public meeting conducted for the I-40/I-40B interchange (Exit 65) within the City of Clinton. These improvements will likely affect and include the intersection at Gary Boulevard and Lexington/Oliver Avenue, Red Wheat Drive, Boulevard of Champions, and Chapman Road. The purpose of the study was to investigate ways to improve the function and operation of the I-40/I-40B interchange as well as the intersection at Gary Boulevard and Lexington/Oliver Avenue. The purpose of the meeting was to obtain information from the public to further assist in the identification of critical social, economic and environmental effects that may result from potential improvements in the future. ODOT was also seeking public input on the potential changes to access onto I-40 and the local road system. The public meeting was held at 6:00 PM on May 24, 2016 at Frisco Conference Center, located 101 South 4th Street in Clinton, Oklahoma.

Thirty (30) public attendees signed in for the meeting. The meeting included a presentation on the project from the Oklahoma Department of Transportation's (ODOT) consultants, Poe and Associates and Able Consulting, and the Field Division Engineer. Representatives from ODOT, Poe and Associates, and Able Consulting were available for discussion before and after the presentation. The comment period was open until June 7, 2016 with a total of seven (7) written comments received, including five (5) from agencies and two (2) from members of the public.

Agency solicitation letters were mailed out for the project April 22, 2016. The five (5) responses received from the agencies are summarized in Table 1.

Table 1: Agency Comment Summary

Agency	Comment
U.S. Department of Interior - Bureau of Land Management	No BLM interests would be affected by the project.
Oklahoma Conservation Commission	They indicated hydric soils are not indicated on the Custer County Soil Survey map. The project should not significantly impact wetland resources in the area.
Oklahoma Department of Commerce	Supportive of solution to the issues concerning the I-40 interchange (Exit 65) that permit safe access to I-40 and Clinton to maximize the transportation potential of I-40 in Clinton.
Oklahoma Aeronautics Commission	Commented that the project does not appear to pose a hazard to the safe and efficient use of navigable airspace. The Federal Aviation Administration (FAA)'s notice criteria tool to determine if a 7460-1 form needs to be filed with the FAA.

Oklahoma Tourism and Recreation Department	The tennis courts are part of a federally funded outdoor recreation project. The alternatives we prefer are Concept A with signal or Concept B with a traffic circle.

There was a general concern about Exit 65A and how it would affect Exit 65. There were two separate comments received expressing concern about noise levels and noise walls. Also, similar comments were expressed for desire to see the modern roundabout at the intersection. Table 2 summarizes both the written public comments received and the verbal comments/questions from the public meeting.

Table 2: Public Comment Summary both Written and Verbal Comments Combined

Comment	# of Comments
Questions and statements regarding Exit 65A and Exit 65 how access will be modified.	**2**
Request for overhead signs as an interim improvement.	**1**
Statement regarding accidents at Gary Blvd/Oliver.	**1**
In favor of modern roundabout at the intersection at Gary Blvd and Lexington.	**2**
Comments regarding traffic noise at Hampton Inn and overpass of 65A and a request for noise walls.	**2**
In favor of direct access to each of the four businesses on Red Wheat Drive.	**1**

2.0 INTRODUCTION

This document summarizes the public meeting conducted for the I-40/I-40B interchange (Exit 65) within the City of Clinton. These improvements will likely affect and include the intersection at Gary Boulevard and Lexington/Oliver Avenue, Red Wheat Drive, Boulevard of Champions, and Chapman Road. Currently, the I-40/I-40B interchange has no east bound access to I-40, and the northbound exit ramps end at the intersection of Gary Boulevard and Lexington/Oliver Avenue creating traffic flow issues. The intersection of Gary Boulevard and Lexington/Oliver Avenue is being studied due to accident history, intersection layout, and proximity to the I-40/I-40B interchange. The purpose of the study is to investigate ways to improve the function and operation of the I-40/I-40B interchange as well as the intersection at Gary Boulevard and Lexington/Oliver Avenue.

ODOT and the City of Clinton have tasked a Consultant to examine concepts for improving the I-40/I-40B interchange and the intersection at Gary Boulevard and Lexington/Oliver Avenue while taking into consideration operation and geometrics, construction cost, right-of-way and

utility impacts, drainage, constructability, and environmental constraints. The preliminary engineering study examines six concepts as potential improvements to the I-40/I-40B interchange. The concepts seek to increase safety and provide improved traffic access to the interstate and local systems. The potential improvements include reconstruction as necessary for the I-40/I-40B interchange as well as the intersection at Gary Boulevard and Lexington/Oliver Avenue. Improved access to I-40 will be investigated which may result in local access changes.

The purpose of the meeting was to obtain information from the public to further assist in the identification of critical social, economic and environmental effects that may result from potential improvements in the future. ODOT was also seeking public input on the potential changes to access onto I-40 and the local road system.

The public meeting was held at 6:00 PM on May 24, 2016 at Frisco Conference Center, located 101 South 4th Street in Clinton, Oklahoma. The meeting included a presentation about the concepts being considered for improvements to the I-40/I-40B interchange as well as the intersection at Gary Boulevard and Lexington/Oliver Avenue. This included why the improvements are needed, the type of improvements under consideration, and the potential impacts to motorists and the surrounding community for each of the concepts.

3.0 AGENCY SOLICITATION

Agency solicitation letters were mailed on May 6, 2016. These letters provided a short project description, brief history of the study area with an enclosed project location map and alternative concept maps. The letter requested recipients provide input by June 7, 2016 and included an invitation to the public meeting. This letter was sent to thirty-one (31) State and Federal agencies along with Cheyenne-Arapaho Tribes, Oklahoma Route 66 Association, and Southwestern Oklahoma Development Association. A copy of the solicitation letter and the mailing list is included in **Appendix A**.

3.1 AGENCY COMMENTS AND ODOT RESPONSES

The agency letters received are summarized below along with an ODOT response.

1) The **U.S. Department of Interior - Bureau of Land Management (BLM) stated** no BLM interests would be affected by the project. Thanked ODOT for the opportunity to review.

   ODOT Response: These comments are noted.

2) The **Oklahoma Conservation Commission** indicated hydric soils are not indicated on the Custer County Soil Survey map. The project should not significantly impact wetland

resources in the area. If an on-site investigation is needed they indicated the US Army Corps of Engineers should be consulted.

ODOT Response: These comments are noted.

3) The **Oklahoma Department of Commerce** is supportive of a solution to the issues concerning the I-40 interchange (Exit 65) that permit safe access to I-40 and Clinton to maximize the transportation potential of I-40 in Clinton. Safe and accessible transportation corridors are essential to economic and community growth.

ODOT Response: These comments are noted.

4) The **Oklahoma Aeronautics Commission** stated that the project does not appear to pose a hazard to the safe and efficient use of navigable airspace; however, the potential for construction equipment to impact airspace necessitates a review via the Federal Aviation Administration (FAA)'s notice criteria tool to determine if a 7460-1 form needs to be filed with the FAA.

ODOT Response: A commitment in the NEPA document will include notifying the FAA of proposed construction via FAA Form 7460-1 prior to construction.

5) The **Oklahoma Tourism and Recreation Department** stated the tennis courts at the corner of Gary Blvd. and Lexington Avenue are part of a federally funded outdoor recreation project. The alternatives we prefer are Concept A with signal or Concept B with a traffic circle. Those alternatives appear to promote safety and traffic flow, yet preserve the use of the tennis courts in their existing location.

ODOT Response: This information was previously provided by the Department and the tennis courts and high school will be avoided with all alternatives.

4.0 PUBLIC MEETING

4.1 MEETING NOTIFICATION

In addition to the notification provided via the agency solicitation letters (see above), notice of the public meeting was sent by letter to the Governor's office, elected officials (federal and state), Federal Highway Administration, Oklahoma Transportation Commissioner, Custer County Commissioners, the City of Clinton, Clinton Chamber of Commerce, Route 66 Museum, local school districts, emergency service providers, post offices, medical facilities and airports in

the project area. The letter provided a brief description of the purpose and need for the project, the project history, and an invitation to the public meeting. The letter was accompanied by a project location map. Thirty-one (31) letters were mailed on May 6, 2016. A copy of the letter and the mailing list is included in **Appendix B**.

Notice of the public meeting was also sent by postcard to all property owners and utility owners in the study area. Fifty-seven (57) postcards were mailed on May 10, 2016. A copy of the postcard and the mailing list is included in **Appendix C**.

4.2 MEETING INFORMATION AND FORMAT

The public meeting was held at 6:00 PM on May 24, 2016 at Frisco Conference Center, located 101 South 4th Street in Clinton, Oklahoma.

Forty-four (44) attendees signed in to the meeting thirty (30) of which were members of the public and 14 (fourteen) were either ODOT or consultant personnel. Public meeting attendees signed in for the meeting included Clinton Chamber of Commerce, City of Clinton Mayor and all City Councilors; thus creating a quorum and a council meeting was held. Also the Clinton Daily News and representatives from La Quinta, OHP, SWODA, Western Oklahoma Wellness Initiative and County Commissioner were in attendance. A copy of the sign-in sheets is included in **Appendix D**.

Brent Almquist ODOT Division 5 Engineer opened the meeting and discussed the project and current interchange. David Streb with Poe and Associates provided the existing conditions of the project area and traffic volumes. Jennifer Koscelny with Able Consulting provided the project constraints. Matt Brown with Poe and Associates presented the conceptual alternatives and project timeline.

A question and answer period followed. ODOT, Poe and Associates and Able Consulting staffs were then available for one-on-one and small group discussions. Alignment maps of each conceptual alternative were provided for public viewing at exhibit tables within the facility. A copy of the presentation is included in **Appendix E** and copies of the meeting handout and strip maps are included in **Appendix F**. The presentation covered:

- Meeting and Project Purpose
- Existing Conditions
- Highway Traffic Volumes
- Project Constraints
- Conceptual Alternatives
- Project Timeline
- General Questions and Comments

4.3 SUMMARY OF PUBLIC MEETING COMMENTS

The public meeting comments during the meeting were relatively few, but the one-on-one conversation with staff that followed was extensive. There was a general concern about Exit 65A and how it would affect Exit 65.

Table 3: Public Meeting Questions/Comments from Meeting

Comment	# of Comments
Exit 65A and Exit 65 comments	**2**
What happens to Exit 65A and how the two interchanges will work? What will happen to the frontage roads?	
I live in Chandler addition and exit at 65A what will happen? If I need to go to Walmart, how do I get there?	
What will happen to the frontage roads?	
Request for overhead signs in the interim	**1**
People do not know how to find eastbound. Like how to get to Atwood's, if we put up a sign, they can prepare. Overhead signs would be great for right now.	
Accidents at Gary Blvd/Oliver	**1**
At Lexington going east/west drivers have trouble deciding where to go and create accidents. Drivers stop in middle of road.	

4.4 WRITTEN PUBLIC COMMENTS

There were two written comments received as a result of the public meeting that can be found in Appendix H. The first comment received was a four page letter with five major points as summarized below. Both comments received expressed concerns about noise levels and noise walls. Also, both expressed a desire to see the modern roundabout at the intersection.

Table 4: Written Comments Received Matrix

Comment	# of Comments
Concerns: 1) The exit 65A eastbound ramp being moved back to 28th Street and commercial business being impacted. A recommendation was provided to solve the issue. 2) The exit 65A westbound ramp and recommendations for improvement. 3) noise (see below) 4) In favor of the traffic circle plans at Gary Blvd and Lexington. 5) Provided comments on all	**1**

concepts (refer to letter)	
ODOT Response:	
First choice for intersection is a modern roundabout and direct access to each of the four businesses on Red wheat drive.	**1**
ODOT Response:	
Noise level increase at the Hampton Inn and a request for both retaining wall and a noise wall (20 feet high) since noise is the biggest complaint.	**2**
Please consider a noise wall at the overpass of 65A exit.	
ODOT Response: **A noise study will be completed for this project. The ODOT Noise Policy and approved Federal Highway Administration (FHWA) noise modeling will be completed for the existing and future traffic levels to determine impacted receivers. If there are noise impacts, noise abatement will be considered. The FHWA procedures can be found at http://www.fhwa.dot.gov/environment/noise/, and the ODOT Noise Policy can be obtained by request from the ODOT Environmental Programs Division.**

1.0 Introduction

This document summarizes the public meeting conducted for the I-40 & Gary Blvd. (Exit 65) interchange project in Custer County [JP 31482(04)]. ODOT completed a study of six initial alternatives in 2016 (Alternatives 1-6) and held a public meeting on May 24, 2016. In response to public feedback, ODOT tasked Garver to develop two additional alternatives to provide improved mobility on I-40 and improved access for both interstate and local traffic (Alternatives 7 and 8). These two additional alternatives were evaluated taking into consideration construction costs, right-of-way and utility costs, and environmental constraints, which resulted in the selection of an alternative for the corridor (Alternative 7). The purpose of this meeting was to inform the public of the selected design and receive public input. The purpose of this project is to improve safety and traffic operations and improve mobility in the I-40 corridor and on adjacent city streets and intersections.

Alternative 7 consolidates the interchanges at Exits 65 and 65A (Gary Boulevard and Neptune Drive) into a single interchange by utilizing frontage roads and modern roundabouts located near the midpoint, between the two interchanges (**Figure 1**). I-40 would be reconstructed and raised to accommodate the new bridges over the railroad west of Gary Boulevard and over Neptune Drive. Alternative 7 also consolidates Red Wheat Drive and Gary Boulevard into one through street with a connection south under I-40 to Chapman Road.

Figure 1: Alternative 7 Overview

2.0 Agency Solicitation

Initial agency solicitation letters were mailed on January 24, 2019. These letters provided a short project description, the purpose of the project, and a brief description of the design selection process along with an enclosed project location map and selected alternative map. The letter requested recipients provide input by March 14, 2019 and included an invitation to the public meeting to be held on February 28, 2019. This letter was sent to federal and state resource agencies and Indian Tribes. A copy of the agency solicitation letter and the mailing list is included in **Appendix A**.

3.0 Public Meeting

3.1 Public Involvement Plan

A Public Involvement Plan (PIP) was prepared for this project to ensure effective community engagement, particularly of traditionally underserved populations (low-income and minority populations) and those with limited English proficiency. The PIP identified the locations of these populations and included methods specifically intended to reach these groups. A copy of the Public Involvement Plan is included in **Appendix B**.

3.2 Meeting Notification

In addition to the notification provided via the agency solicitation letters (see above), notice of the public meeting was sent by letter to the Governor's office, elected officials (federal and state), Custer County Commissioners, officials of the city of Clinton, local school districts, emergency service providers, and medical facilities in the study area. The letter provided a brief description of the purpose and need for the project and an invitation to the public meeting. The letter was accompanied by a project location map. Letters were mailed on January 24, 2019. A copy of the letter and the mailing list is included in **Appendix C**.

Notice of the public meeting was also sent by letter to all property and utility owners in the study area on January 24, 2019. A flyer announcing the meeting was hand-delivered to all homes and businesses within the study area on February 12, 2019. A copy of the letter, mailing list, flyer, and flyer distribution map is included in **Appendix D**.

3.3 Meeting Information and Format

The public meeting was held on February 28, 2019, at 6:00 PM at the Frisco Conference Center at 101 South 4th Street, Clinton, OK. Eighty-six (86) people signed in for the meeting, including Senator Brent Howard, Clinton Mayor David Berrong, representatives from the Cheyenne & Arapahoe Tribes, City of Clinton, Town of Arapahoe, Custer County, Southwestern Oklahoma Development Authority, Clinton Economic Development Authority, ODOT, Garver, area businesses, local media, and members of the public. A copy of the sign-in sheets is included in **Appendix E**.

Brent Almquist, ODOT Division 5 Engineer, opened the meeting and welcomed the attendees. Mr. Almquist briefly described the project. Garver then gave a presentation about the project, followed by an open question and answer period facilitated by Mr. Almquist. The presentation covered:

- Purpose of the Meeting
- Purpose of the Project
- Project History
- Project Area Information
- Proposed Design
- Benefits and Impacts
- Next Steps

ODOT and Garver staff were available both before and after the formal presentation for one-on-one and small group discussions with the public. Display boards showing the proposed design were available for public viewing in two locations. A three-dimensional video presentation of the proposed design ran on continuous loop, and a roundabout walk-through station was set up for the attendees to simulate maneuvering through a model roundabout on foot. A handout including a description of the study, the purpose of the study, and showing the proposed design for the project was available in English and Spanish. Copies of the FHWA handout *Roundabouts: A Safer Choice* were also available in English and Spanish. A copy of the presentation is included in **Appendix F**. A copy of the display boards and meeting handouts is included in **Appendix G**. All materials, including the video, were posted to the ODOT website on March 1, 2019 (*https://www.ok.gov/odot/Programs_and_Projects/Public_Meetings_and_Hearings/20190228.html*). The public and agency comment period was open until March 14, 2019.

3.4 Questions/Comments Received at Meeting

Comments and questions from the meeting were primarily related to how the roundabouts would be signed, truck use of the roundabouts, access and visibility to businesses on Gary Boulevard, travel times, and construction duration. The questions and comments posed after the presentation are presented below with ODOT/Garver responses in italics. An additional list of comments heard during one-on-one discussions is also presented.

Comments During Open Q&A Session:

- How will the project be let? One project or separate for road and bridges? *If funding permits ODOT would prefer to let the whole project as one contract.*
- Will the roadway be asphalt or concrete? *Still looking into it.*
- The roundabouts will need signage to direct people.
- What will be the speed limits on the ramps and in the roundabout? *Speed limit in the roundabouts will be 15 mph. The ramps are designed to be longer than normal to allow more time for acceleration and deceleration.*
- What are the dimensions of the roundabouts? *They have a radius of 55-60 feet (120 feet inside diameter, 150 feet outside diameter). They were designed to accommodate a double semi-trailer.*
- What is the distance between Gary Blvd. or Neptune Dr. and the roundabout? *Approximately 2000 feet (less than ½ mile).*
- Thank you for keeping Exits 65 and 65A. Will this affect the use of businesses on Gary Blvd. or travel times to residences near Neptune because of increased distances/out of direction travel? *This solution is the result of much study by several groups to try and keep both interchanges*

open. Currently they are too close together and it is difficult to design something that meets federal standards.

- Is this the only option? What about the diverging diamond? *This is the best option to keep both interchanges open.*
- How will this help traffic at the Gary/Lexington/Oliver intersection? *It will become a more traditional four-leg intersection and less confusing for drivers. It eliminates multiple roadways in same direction (e.g. WB ramps, Red Wheat Drive).*
- This is a great idea and concept.
- How long will construction take? *Estimate about 450 days.*
- Will Gary Blvd. have a center turn lane? *Yes*
- Thank you for getting this project in Clinton, it needs to be fixed.
- Thank you for coming. Not crazy about the concept but need to think about it.
- What will happen to my property value? *Improved access may increase property value.*
- I am the director of transportation for the Cheyenne & Arapahoe Tribes – what can you do about Exit 69? We would like to see it on ODOT's 8 year plan. *Let's discuss after the Q&A session.*
- What will be the elevation change on I-40? *Estimate about 7-8 foot raise on I-40 to accommodate new bridges. There will be excavation under I-40 for the new Gary Blvd.*
- Will this provide local jobs? *It will be put out to bid, but yes it could.*

Comments During One-on-One Discussions:

- Specific property concerns with right-of-way, noise, loss of trees, utilities
- Creek on the north side of I-40 is full of debris and needs to be cleaned out
- You should have considered a cloverleaf interchange
- Desire to keep Blvd of Champions in current location near Neptune Dr. intersection
- Concern that (EB) I-40 traffic will bypass Gary Blvd because they will have to exit and turn back
- Like the extension of Gary Blvd south to Chapman Road.

3.5 Summary of Written Comments

Thirteen (13) written comments from agencies and local governments, and nine (9) written comments from members of the public were received both during and after the public meeting. Copies of the written comments are included in **Appendix H**. ODOT responses to the comments are shown in italics after each comment.

3.5.1 Agency Comments

The **Bureau of Land Management (BLM)** found no BLM surface lands or Federal minerals within or near the project area. The BLM has no concerns or objections to the proposal. *Response: Thank you for your comment.*

The **National Park Service** has no comment at this time. *Response: Thank you for your response.*

The **Bureau of Indian Affairs (BIA)** found that there are tribal or Individual Indian trust lands within the project area. The BIA is concerned about impacts to these properties and would like clarification and consultation on what improvements will be made once design is finalized. The BIA recommends ODOT

contact the Cheyenne and Arapaho Tribes as they have historic ties to the area and should be consulted. *Response: ODOT is aware of the Indian trust lands in the area and no impacts to these properties are currently anticipated. ODOT will continue to consult with the BIA as the project develops. ODOT notified the Cheyenne & Arapaho Tribes of the project and representatives from the tribe attended the public meeting. Formal consultation regarding sites of traditional religious or cultural importance will take place in the next phase of the project.*

The **Cheyenne and Arapaho Tribes** have reviewed the project and determined it will have no adverse effect. However, the Tribes request notification if additional studies indicate the presence of traditional cultural properties or other cultural materials. The Tribes also state that ODOT would be required to assess any cultural materials discovered during construction. *Response: Thank you for your comment. Additional consultation with the Cheyenne and Arapaho and other interested Tribes will continue throughout the project development process.*

The **Oklahoma Corporation Commission** found no active or plugged oil and gas wells located in the project area. *Response: Thank you for the information.*

The **Oklahoma Department of Tourism and Recreation, State Parks** found a Land and Water Conservation park in the study area that would be adversely affected by decreasing the buffer and landscape on the margins of the tennis courts on the Clinton High School property. The existing trees provide a pleasant landscape and add a sense of established settlement and place to Clinton. Damage to these trees would be a cost to replace and rebuild. Use of the tennis courts would be diminished by increased noise from the decrease of the buffer. If any land not currently owned by the City is acquired in this area, it must be replaced and costs absorbed by the City. The City would be required to notify State Parks of any conversion of use and work with State Parks to resolve the differences. This is a complicated and costly process and limits opportunities for other recreational projects to make progress. Information is available on the National Park Service website under the Land and Water Conservation Fund program. State Parks provided a photograph and map indicating the relevant area. *Response: There may be temporary impacts to the Clinton High School property during construction in order to construct the new Gary Blvd/Lexington Ave. intersection. However, these impacts will not affect the tennis courts or the landscape trees adjacent to Lexington Avenue or Gary Boulevard. ODOT will continue to coordinate with the City of Clinton, Clinton High School, and the Oklahoma Department of Tourism and Recreation as design progresses.*

The **Oklahoma Department of Environmental Quality (ODEQ)** stated that prior to beginning any construction activity disturbing more than one acre, a Notice of Intent (NOI) must be submitted and authorization under OKR10, construction stormwater, must be obtained. *Response: Once a construction project is defined, ODOT and its contractors will follow all requirements of OKR10.*

The **Oklahoma Aeronautics Commission (OAC)** reviewed the project and noted that it does not appear to pose a hazard to the safe and efficient use of navigable air space. The OAC recommends that ODOT use the Federal Aviation Administration (FAA) notice criteria tool to determine if a 7460-1 form needs to be filed with FAA. *Response: Once a construction project is defined, ODOT will determine the need for the 7460-1 form and file with the FAA if required.*

The **Oklahoma Historical Society, State Historic Preservation Office (SHPO)** found that the roadbed for Route 66 has been documented along Gary Boulevard, Exit 65, and Neptune Drive. The SHPO provided links to the Route 66 thematic study and references to the discussion of Route 66 in Clinton. The SHPO understands that ODOT will initiate formal consultation under Section 106 of the National Historic Preservation Act if and when required. *Response: Thank you for the information on Route 66 in the project area. ODOT will initiate formal consultation under Section 106 in the next phase of the project.*

The **Oklahoma Archeological Survey (OAS)** found that there are no known archeological sites listed in the project area, but that based on topographic and hydrological setting, archeological materials are likely to be encountered. The OAS considers a field inspection necessary prior to project construction. The OAS also indicated that ODOT must have a letter from the SHPO's office to document consultation pursuant to Section 106 of the National Historic Preservation Act. The OAS also stated that ODOT is responsible for consultation with the appropriate Native American tribe/groups to identify any concerns regarding properties of traditional and/or ceremonial value. *Response: Thank you for the information. ODOT will perform an archeological evaluation pursuant to Section 106 in the next phase of the project, and will continue to consult with the OAS and well as the SHPO and Native American tribes.*

The **City of Clinton** passed a resolution of dissent on March 14, 2019 stating that the alternative presented at the February 28, 2019 public meeting was not in the best interest of the citizens of Clinton. The City recognized the need for improvements, and the City would prefer that one of the options presented in 2016 be selected, keeping both Exit 65 and Exit 65A open. *Response: ODOT will reconsider two of the alternatives from the previous study: Alternative 2 Conventional Diamond and Alternative 5 Modern Roundabout (Dumbbell). ODOT will further investigate the feasibility of these alternatives and present a comparison of the benefits and impacts of all three alternatives (Alternatives 2, 5, and 7) at a future public meeting. ODOT will continue to work with the City of Clinton and area stakeholders to understand local concerns and address these as completely as possible in the design.*

David Berrong, **Mayor of Clinton**, submitted two separate written comments. Mayor Berrong requested that ODOT consider an alternative to Alternative 7 presented at the public meeting. Keeping both Exit 65 and 65A open is important. He is concerned that commerce on Gary Blvd. might suffer with the roundabouts between the two exits. He states that commercial development experts have questioned the impacts that the proposed plan would have on Gary Blvd properties south. In a letter to ODOT Chief Engineer Brian Taylor, Mayor Berrong expressed a desire to work with ODOT to modernize the Exit 65/65A interchanges and that the impression of the city and the public following the 2016 public meeting was that the final design would be selected from one of the options presented at that time. The Mayor asks that ODOT refocus on the 2016 alternatives and keep both Exit 65 and 65A open. *Response: ODOT will reconsider two of the alternatives from the previous study: Alternative 2 Conventional Diamond and Alternative 5 Modern Roundabout (Dumbbell). ODOT will further investigate the feasibility of these alternatives and present a comparison of the benefits and impacts of all three alternatives (Alternatives 2, 5, and 7) at a future public meeting. ODOT will continue to work with the City of Clinton and area stakeholders to understand local concerns and address these as completely as possible in the design.*

Lyle Miller, **Custer County Commissioner,** likes the plan. He was impressed by the recently constructed roundabout in Oklahoma County. He would like to see an entrance from Gary Blvd. added

between Braums and Long John Silvers to help development. Selling unused ODOT property south of Kmart would also help development. Thank you for the project – it is badly needed. *Response: Thank you for your comments.*

3.5.2 Public Comments

Nine (9) written comment forms/letters from the public were received. Some letters included more than one comment. Comments from the public are summarized in Table 1 and in the paragraphs below:

Table 1: Public Comment Summary

Comments in Support of Alternative 7	**5**
It is needed and will solve problems	
Like the roundabouts	
Like the long accel/decel lanes	
Provides easy access to Gary and Neptune	
Works well to keep both exits open	
Please follow through with this important plan	
Supports future growth	
Like the Gary Blvd. improvements	
Comments with Concerns about Alternative 7	**2**
Does not help traffic flow	
Does not support development south of I-40	
Plan will reduce traffic on Gary Blvd. and hurt businesses	
Go back to previous plan that maximized traffic on Gary Blvd. and kept interchange in current location	
This plan only benefits the businesses adjacent to I-40 (same owner)	
General Comments/Questions	**3**
Specific concerns about access	
Keep both Exit numbers on highway signs	
Would like additional exit to north on north roundabout	
Would like additional roundabouts at frontage road/Gary Blvd intersections	
Keep Red Wheat Drive as business access drive	
Ok if you have to close 65A/Neptune if it simplifies things	
Allow local businesses to bid/subcontract	
Proposed new interchange at 28th Street	
Concerns about noise	
Concerns about property values	
Consider naming frontage road Red Wheat Drive	
Will you place signs at exits for food/shopping?	

Comment 1:

- Happy to see comments from 2016 were incorporated into new design.
- Roundabouts are unusual but well thought out and workable
- Much of the plan will be on our land and will affect our businesses (businesses owned by commenter were listed in the letter).
- Information provided regarding status of underground storage tanks on various properties and well/water line location

- Concern about internal parking lot access at Water Zoo for campers/RVs
- Don't need driveway to Water Zoo maintenance door
- Request for exit off north roundabout for proposed new development to the north
- Keep both exit numbers on signs

Comment 2:

- This is a unique concept. I like the long acceleration and deceleration lanes. Also like having eastbound access to I-40 from Gary Blvd. Provides easy access to Gary Blvd. and Neptune Dr. which we don't have today.
- Request for additional roundabouts at Gary Blvd/frontage road intersections to address accidents from left turning vehicles. Allow access to roundabout to/from the west for future development.
- Limit access to Gary Blvd and keep Red Wheat Drive for business access. Allows for travel between businesses without having to use Gary Blvd.

Comment 3:

- I like the idea and works well to keep both exits open.
- I am not opposed to keeping only Gary Blvd. open to simplify things.
- Would like to see opportunity for local businesses to be able to bid or be subcontractors.

Comment 4:

- I approve of the plan, please follow through on this important improvement
- The plan presented will solve many existing problems

Comment 5:

- City has two major concerns: 1) facilitate growth, 2) provide safe traffic flow. The proposed plan does provide some assistance to commercial, industrial, recreational, and residential growth.
- The plan has shortcomings related to traffic flow.
- The plan will limit city growth to the south including industrial areas, brick plant park area, on west, southwest, and southeast sides of the city. These areas need easy direct access to I-40.
- Exit 65/65A interchange location provides only limited access to potential growth areas.
- Like the proposed Gary Blvd. improvements – suggest also improving Chapman Road and extend east to US-183.
- Provide new interchange at I-40/28th Street

Comment 6:

- Pizza Hut has been in business in Clinton for over 40 years. It was originally on 10th Street because it had on and off-ramp access to I-40 for customers and deliveries. Over time that part of town declined and Pizza Hut began looking for a new location. Relocated to Gary Blvd/Jacee Ln. across from High School. We got visibility from Gary Blvd. and traffic from Route 66. Our business has doubled since the move due to the location on Gary Blvd.
- The current plan will reduce traffic on Gary Blvd. and destroy my business and other businesses on Gary Blvd.
- Against this plan. Want an alternate plan that provides access to I-40 eastbound from Exit 64 (typo? Exit 65?).

- Encourage you to scrap the current design and go back to a previous design that maximized traffic flow on Gary Blvd. and keeps Exit 64 (65?) in its current location.
- Under current plan, traffic will skip the new exit and will take exits to the east or skip Clinton.
- Current plan appears to benefit the businesses adjacent to I-40 with provide entrances – these are all owned by the same individual. Looks like this owner influenced the plan. You should not change traffic to benefit one owner at the expense of others on Gary Blvd.

Comment 7:

- Build a wall to reduce noise on the north side of the project behind the neighborhood and/or behind Hampton Inn.
- How will home values be affected?

Comment 8:

- Concern about noise impacts – Concord Avenue is very close to the project. Please notify us if the study determines a noise wall is warranted.
- Consider naming the frontage road Red Wheat Drive – this is a culturally significant name in Cheyenne and Arapaho tribal territory.

Comment 9:

- As a business owner on Gary Blvd – will you be placing signs at the exits for food/shopping?

3.5.3 Responses to Public Comments

Response to Comments in Support of Alternative 7: ODOT thanks you for your comments and appreciates your input. ODOT believes that improvements to the interchange(s) are needed to resolve safety and access concerns.

Response to Comments with Concerns about Alternative 7: ODOT will reconsider two of the alternatives from the previous study: Alternative 2 Conventional Diamond and Alternative 5 Modern Roundabout (Dumbbell). ODOT will further investigate the feasibility of these alternatives and present a comparison of the benefits and impacts of all three alternatives (Alternatives 2, 5, and 7) at a future public meeting. ODOT will continue to work with the City of Clinton and area stakeholders to understand local concerns and address these as completely as possible in the design.

Responses to General Questions: ODOT understands the concerns about access and signage, and the importance of signing the new interchange appropriately to clearly direct travelers to their intended destination. We appreciate the input on signage for the interchange, local streets, and area businesses. As the project progresses, ODOT will study impacts to properties in more detail, including a detailed noise study.

RE: Solicitation for Input for I-40 Interchange Improvements and Intersection Modification at Exit 65, I-40B West Jct. in Clinton, Custer County, Oklahoma, JP 31842(04)

Dear Mr. Ledbetter,

The Oklahoma Department of Transportation (ODOT) is soliciting comments on proposed improvements to I-40 between S. 28th Street and Neptune Drive, including the I-40 & Gary Boulevard interchange (Exit 65) in the City of Clinton, Custer County, Oklahoma. The existing interchange includes on- and off-ramps in close proximity, and the current ramp configuration is contributing to traffic flow issues at the Gary Blvd./Lexington/Oliver intersection. The existing interchange also lacks eastbound access to I-40. In addition, the City of Clinton is continuing to experience commercial growth, which is anticipated to generate future traffic volumes beyond the capacity of the existing interchange and adjacent intersections. Please see the enclosed figures which depict the areas associated with the improvements to I-40.

The purpose of this project is to improve safety and traffic operations and improve mobility in the I-40 corridor. ODOT completed a study of six initial alternatives and held a public meeting on May 24, 2016. In response to public feedback, ODOT tasked a new consultant to develop two additional alternatives to provide improved mobility on I-40 and improved access for both interstate and local traffic. These alternatives were evaluated taking into consideration construction costs, right-of-way and utility costs, and environmental constraints, which resulted in the selection of an alternative for the corridor. Details of these alternatives are available upon request from ODOT.

A second public meeting to inform the public of the selected alternative and receive public input will be held at **6:00 PM on February 28, 2019** at the Frisco Conference Center, 101 S. 4th Street, Clinton, OK 73601. This project is still in the developmental stages and any comments relative to the social, economic, or environmental effects of this proposal will be appreciated. To allow adequate time for evaluation of your comments, we would appreciate receiving a response by March 14, 2019. Your written comments should be directed to the Environmental Programs Division Engineer, Oklahoma Department of Transportation, 200 NE 21st St., Oklahoma City, Oklahoma 73105, or email to environment@odot.org. We appreciate your cooperation in this matter. For further information or if you have any questions, please contact Brent Almquist, ODOT Division 5 Engineer, at (580) 323-1431 or balmquist@odot.org, or Kirsten McCullough, Environmental Project Manager, Garver at (918) 250-5922 or kjmccullough@garverusa.com.

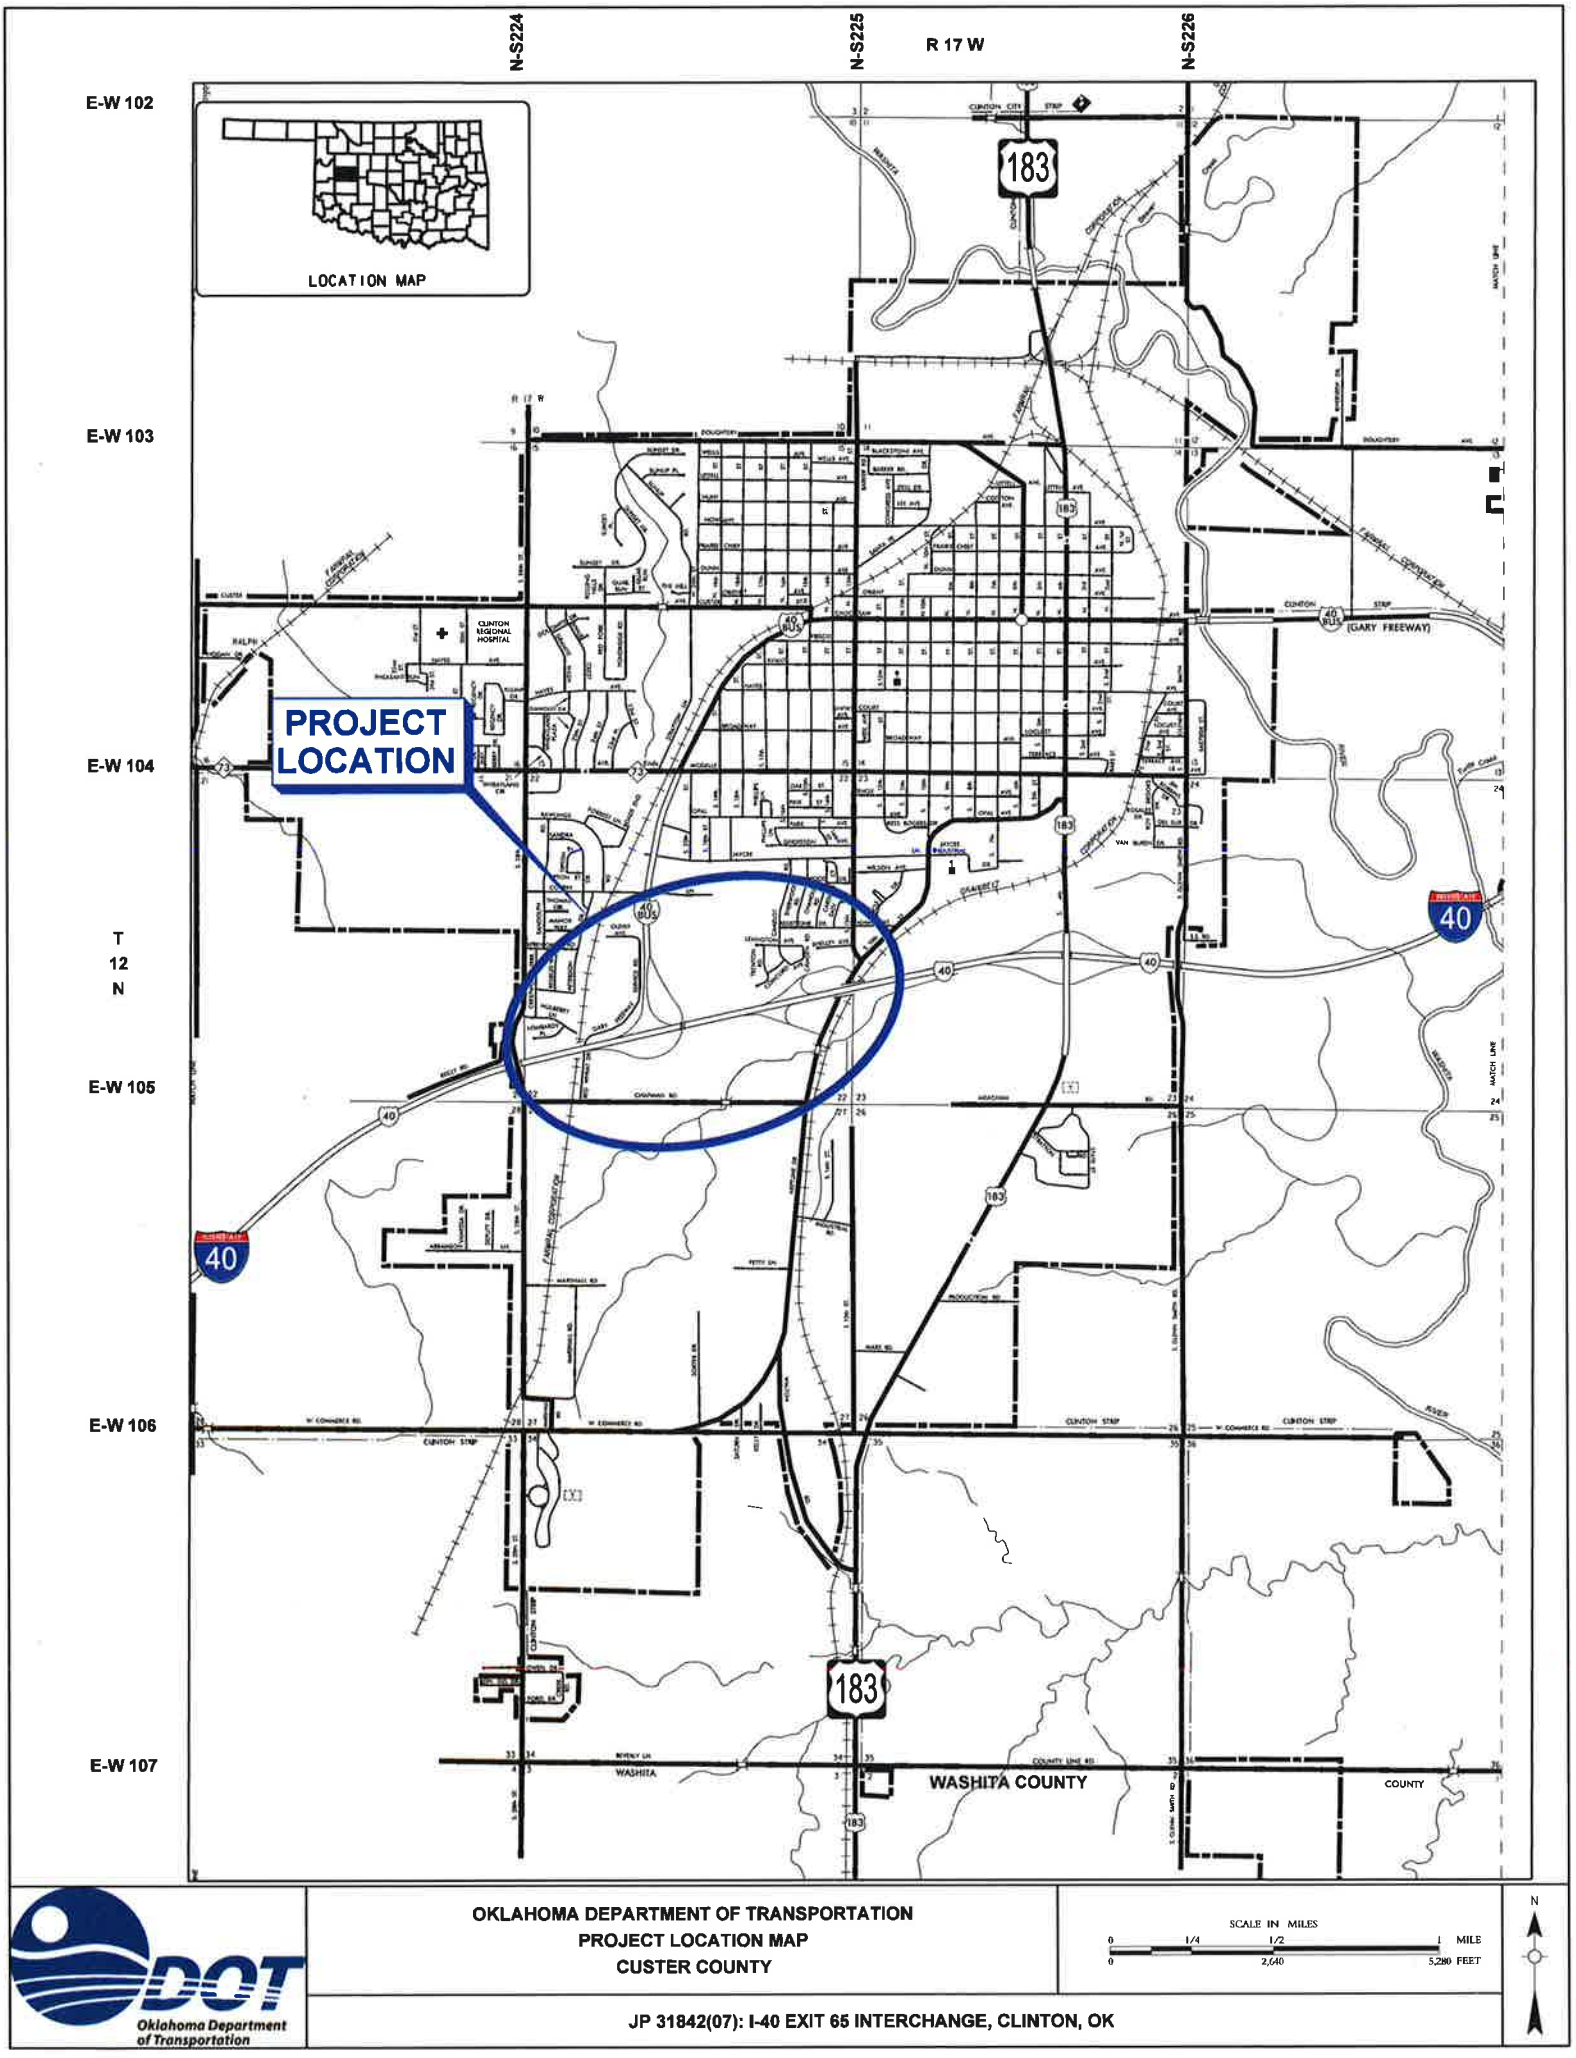

Sincerely,

Siv Sundaram, P.E.
Environmental Programs Division Engineer

Public Involvement Plan

I-40 Exit 65

Public Involvement Plan

JP 31842(04) EC-1962

Custer County

Prepared for:

Oklahoma Department of Transportation

Prepared by:

GARVER

January 10, 2019

Introduction

This document provides a Public Involvement Plan for the I-40 Exit 65 Study in the City of Clinton, Custer County, Oklahoma [JP 31842(04)]. This plan specifically addresses the outreach methods proposed to ensure effective community engagement, particularly of traditionally underrepresented populations (i.e. low-income and minority populations) to meet the principles and requirements of Executive Order 12898 on Environmental Justice, Title VI of the Civil Rights Act of 1964, and the implementing regulations of the Federal Highway Administration (FHWA) in regards to these programs.

The US Department of Transportation (USDOT) Environmental Justice (EJ) Strategy identifies three fundamental principles of EJ that guide USDOT actions:

1. To avoid, minimize, or mitigate disproportionately high and adverse human health and environmental effects, including social and economic effects, on minority and low-income populations.
2. To ensure the full and fair participation by all potentially affected communities in the transportation decision-making process.
3. To prevent the denial of, reduction in, or significant delay in the receipt of benefits by minority and low-income populations.

This plan is developed to address the second goal and provide maximum opportunity for all communities to participate in the study. Encouraging the participation of traditionally underrepresented communities in the transportation planning process allows communities to identify the benefits and burdens associated with the proposed activity, and suggest alternatives to mitigate impacts based on their concerns. This input helps transportation agencies comply with another core EJ principle-avoid, minimize, or mitigate disproportionately high and adverse impacts.

Minority and low-income communities are often underrepresented in the transportation decision-making process due to economic, social, and cultural factors, such as language barriers or factors that prevent these populations from attending traditional public meetings such as non-traditional work schedules, lack of transportation, or lack of child care. Notification of meetings can also be challenging, as renters are difficult to identify and are typically not captured in property owner databases.

This plan describes the corridor under consideration, the studies done to date and their findings, the communities represented in the project area, and the proposed plan to notify and engage these communities.

Study Introduction and Background

The Oklahoma Department of Transportation (ODOT), in cooperation with the FHWA is studying improvements to I-40 between 28th Street and Neptune Road, including the Exit 65 and 65A interchanges (at Gary Boulevard/I-40 BUS and at Neptune Road/10th Street) in the City of Clinton, Custer County, Oklahoma (**Figure 1**). The purpose of the study is to identify the need for transportation improvements in the corridor, examine potential alternatives, and determine a preferred concept to guide future project planning and programming. The need for improvements is primarily related to improving safety, mobility, and access.

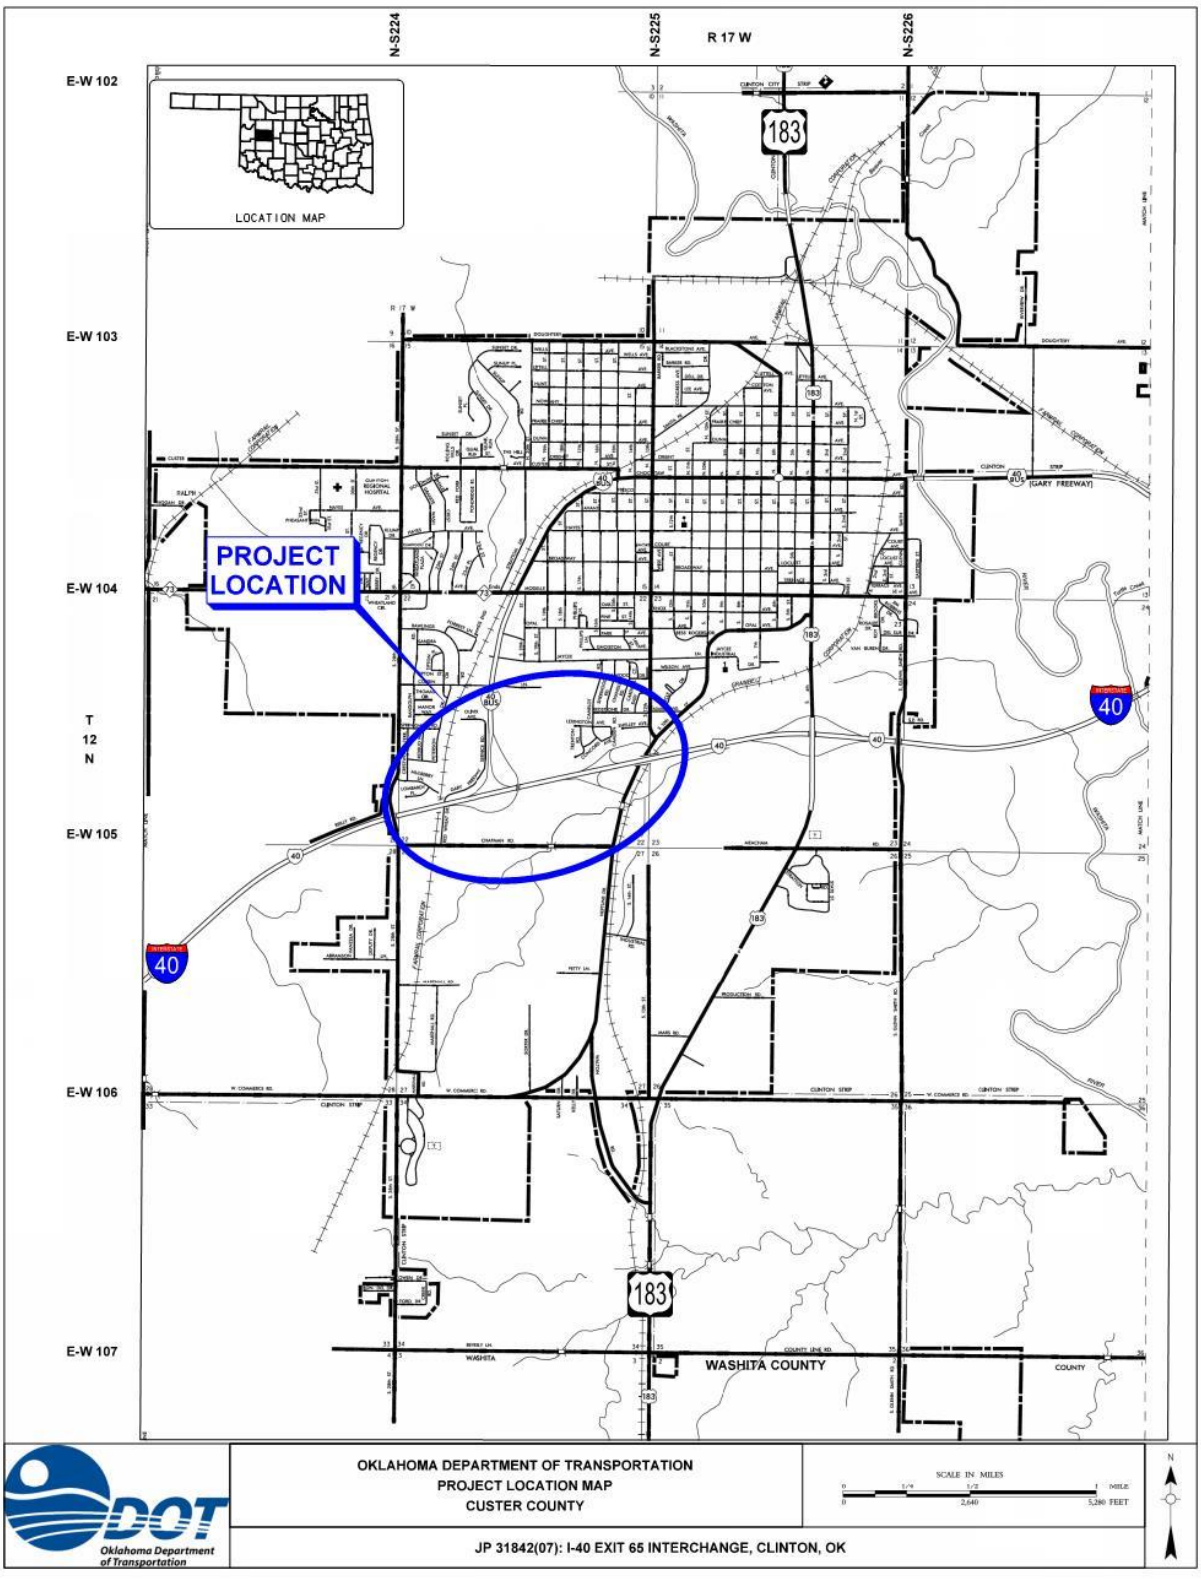

Figure 1: I-40 Exit 65 Project Location Map

I-40 is an important local, regional, and interstate connection for passenger and freight traffic. I-40 currently carries approximately 22,000 vehicles per day through this area, 45% of which are trucks. By the year 2050, traffic volumes are expected to grow to 30,700 vehicles per day. The existing configuration of the Exit 65 and 65A interchanges, combined with the high volume of truck traffic, contributes to safety and mobility issues through the interchanges and at adjacent intersections. The intersection of the I-40 Ramps/Gary Boulevard and Red Wheat Drive/Lexington Avenue is particularly problematic.

Analysis of crash data showed that total crash rates on I-40 between 2007-2017 were nearly 1.4 times the rates for similar statewide facilities, and injury crash rates were nearly 2.0 times the rates for similar statewide facilities. The crashes are especially concentrated near the on and off ramps at the interchanges. At the 10th Street/Neptune Drive interchange, the short acceleration length in the eastbound direction and the short deceleration length in the westbound direction contributed to the number of crashes in that area. At the Gary Boulevard interchange, vehicles driving too fast at the eastbound off-ramp led to 6 rollover crashes near the gore and 1 rollover crash on the ramp itself.

Fifty-four (54) crashes, or 22% of the crashes for the entire study area, occurred at the intersection of Gary Boulevard/I-40 Ramps and Red Wheat Drive/Lexington Avenue. The most common types of crashes at this intersection were right angle followed by angle turning. The complexity of the intersection and close proximity to the Oliver Avenue and Red Wheat Drive intersection were contributing factors to these crashes; drivers were often confused and did not realize who had the right-of-way.

ODOT completed an initial Preliminary Engineering (PE) Study for the Exit 65 interchange in 2017. The initial study included six alternatives to improve the interchange. ODOT presented these alternatives to the public at a public meeting on May 24, 2016 in Clinton. In response to public feedback, ODOT removed the initial six alternatives from consideration and developed two additional alternatives to provide improved mobility on I-40 and improved access for both interstate and local traffic. These two alternatives were evaluated taking into consideration construction costs, right-of-way and utility costs, and environmental constraints, which resulted in the selection of a preferred alternative for the corridor. The preferred alternative includes:

- Reconstruction of I-40 from 28th Street to Neptune Boulevard
- Replace the existing bridges over the railroad and over Neptune Drive to address vertical clearance deficiencies and provide adequate width for the reconstructed I-40
- Add access to eastbound I-40 from Gary Boulevard
- Extend Gary Boulevard to the south under I-40 to Chapman Road
- Remove Red Wheat Drive and provide business access to Gary Boulevard
- Construct 2-way frontage roads with modern roundabouts between Exits 65 and 65A
- Consolidates two interchanges into one with access to both Gary Boulevard and Neptune Boulevard

Communities in the Study Area

Providing adequate opportunity for all communities to engage in the study requires identification of the different communities present in the general study area. Identification of these communities comes from a number of sources, primarily the US Census, which provides data on low-income and minority communities as well as limited English proficiency. Additional information is available from other federal, state, and local sources such as the USDA Food and Nutrition Service, the Department of Housing and Urban Development, the Oklahoma Department of Education, and the City of Clinton.

Demographic data from the 2016 American Community Survey was collected from Census Tract 9604, Block Group 4 in Custer County to assess the presence of minority, low-income, and limited-English proficient populations. This block group includes the entire project study area (**Figure 2**).

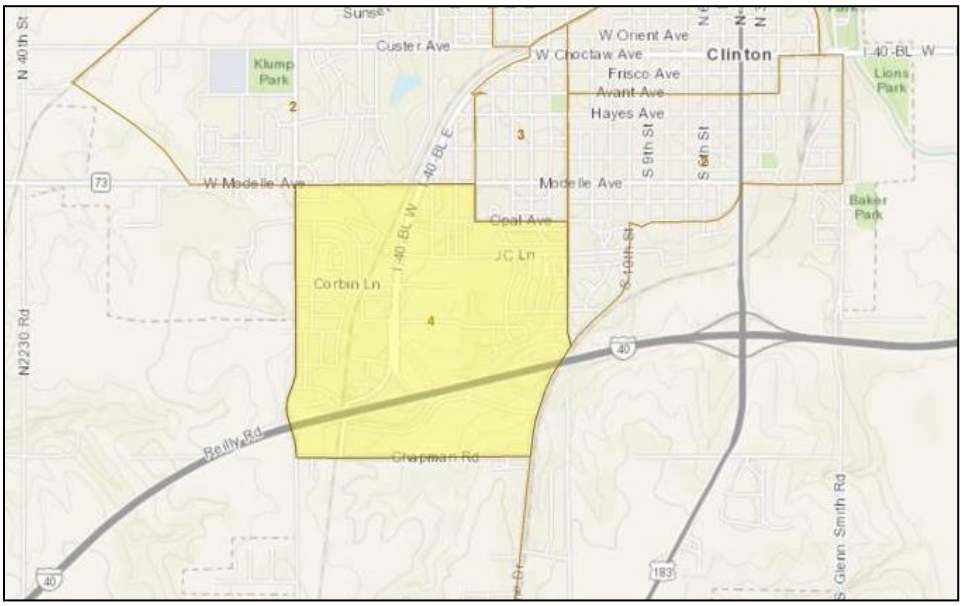

Figure 2: Census Tract 9604, Block Group 4, Custer County, Oklahoma

Table 1, **Table 2,** and **Table 3** summarize the data, along with data from the state of Oklahoma, Custer County, and the City of Clinton for comparison.

Data suggest that the study area contains relatively high percentages of Hispanic individuals. Also compared to the City of Clinton, Custer County, and the state overall, the study area has relatively high percentages of Asian individuals. However, when looking at the English proficiency of the study area population, only about 2% speak English "Not Well" or "Not at All". This suggests that while there may be Environmental Justice considerations when assessing impacts of the project, in terms of public involvement it is not likely that non-English notifications or meeting materials will be needed.

Review of information on low-income populations suggests that there is a very low percentage of low-income individuals in the study area. However, information from the Oklahoma State Department of Education suggests that between 77 and 85% of school-age children are considered low-income and qualify for free or reduced lunch programs. Additionally, according to information on the City of Clinton website, approximately 64.4% of the dwelling units in the city are owner-occupied, suggesting a rental rate of around 36%. While it is unknown exactly where in the city rental units tend to be concentrated,

providing a public meeting flyer door-to-door in addition to mail would potentially increase the visibility of the public meeting among renters.

I-40 Exit 65 Public Involvement Plan

The public involvement plan for the I-44 Corridor Study will include traditional outreach methods such as written letters and a public meeting, as well as methods more specifically targeted to the low-income in the study area. Traditional outreach will include written letters to federal and state agencies, and written public meeting invitations to local and elected officials, utility owners, and all property owners within the corridor study area. There will be a media release and all information about the meeting will be posted on the ODOT website.

Methods to reach environmental justice populations will include hand delivery of meeting notices door to door (to capture renters), and posting of notices in community facilities such as churches, the local library, and local community center. While there is a relatively large Hispanic population in the study area, data do not suggest that English proficiency is limited. Therefore, only English meeting materials are proposed.

The following is a list of area churches, schools, and community facilities where meeting information could be posted:

Study Area Churches:

First Church of God - 1900 Lexington Ave., Clinton, OK 73601
First Mennonite Church – 700 S. 19th Street, Clinton, OK 73601
Tabernacle Baptist Church – 1410 Shelley Ave., Clinton, OK 73601 (closed?)

Schools:

Southwest Elementary School - 1903 Opal Ave., Clinton, OK 73601
Clinton High School - 2130 W. Gary Blvd., Clinton, OK 73601

Other:

Clinton Public Library – 721 Frisco, Clinton, OK 73601
Clinton Activity Center – 600 S. 28th Street, Clinton, OK 73601

RE: Public Meeting for I-40 Interchange Improvements and Intersection Modification at Exit 65, I-40B West Jct. in Clinton, Custer County, Oklahoma, JP 31842(04)

Dear Commissioner Huckabay,

The Oklahoma Department of Transportation (ODOT), in cooperation with the Federal Highway Administration (FHWA), is proposing improvements to I-40 between S. 28th Street and Neptune Drive, including the I-40 & Gary Boulevard interchange (Exit 65) in the City of Clinton, Custer County, Oklahoma (see attached map). The existing interchange includes on- and off-ramps in close proximity, and the current ramp configuration is contributing to traffic flow issues at the Gary Blvd./Lexington/Oliver intersection. The existing interchange also lacks eastbound access to I-40. In addition, the City of Clinton is continuing to experience commercial growth, which is anticipated to generate future traffic volumes beyond the capacity of the existing interchange and adjacent intersections.

The purpose of this project is to improve safety and traffic operations and improve mobility in the I-40 corridor. ODOT completed a study of six initial alternatives and held a public meeting on May 24, 2016. In response to public feedback, ODOT has tasked a new consultant to look at additional alternatives for improving I-40 and the Gary Boulevard interchange while taking into consideration construction costs, right-of-way and utility costs, and environmental constraints. These alternatives were evaluated, which resulted in the selection of an alternative for the corridor.

As part of our efforts to keep the public informed of this study, a second public meeting has been scheduled for **February 28, 2019 at 6:00 PM** at the Frisco Conference Center, 101 S. 4th Street, Clinton, OK 73601. The purpose of this meeting is to present the selected design alternative along with additional information about the project and obtain information from the public to further assist in the identification of critical social, economic, and environmental effects that may result from the project.

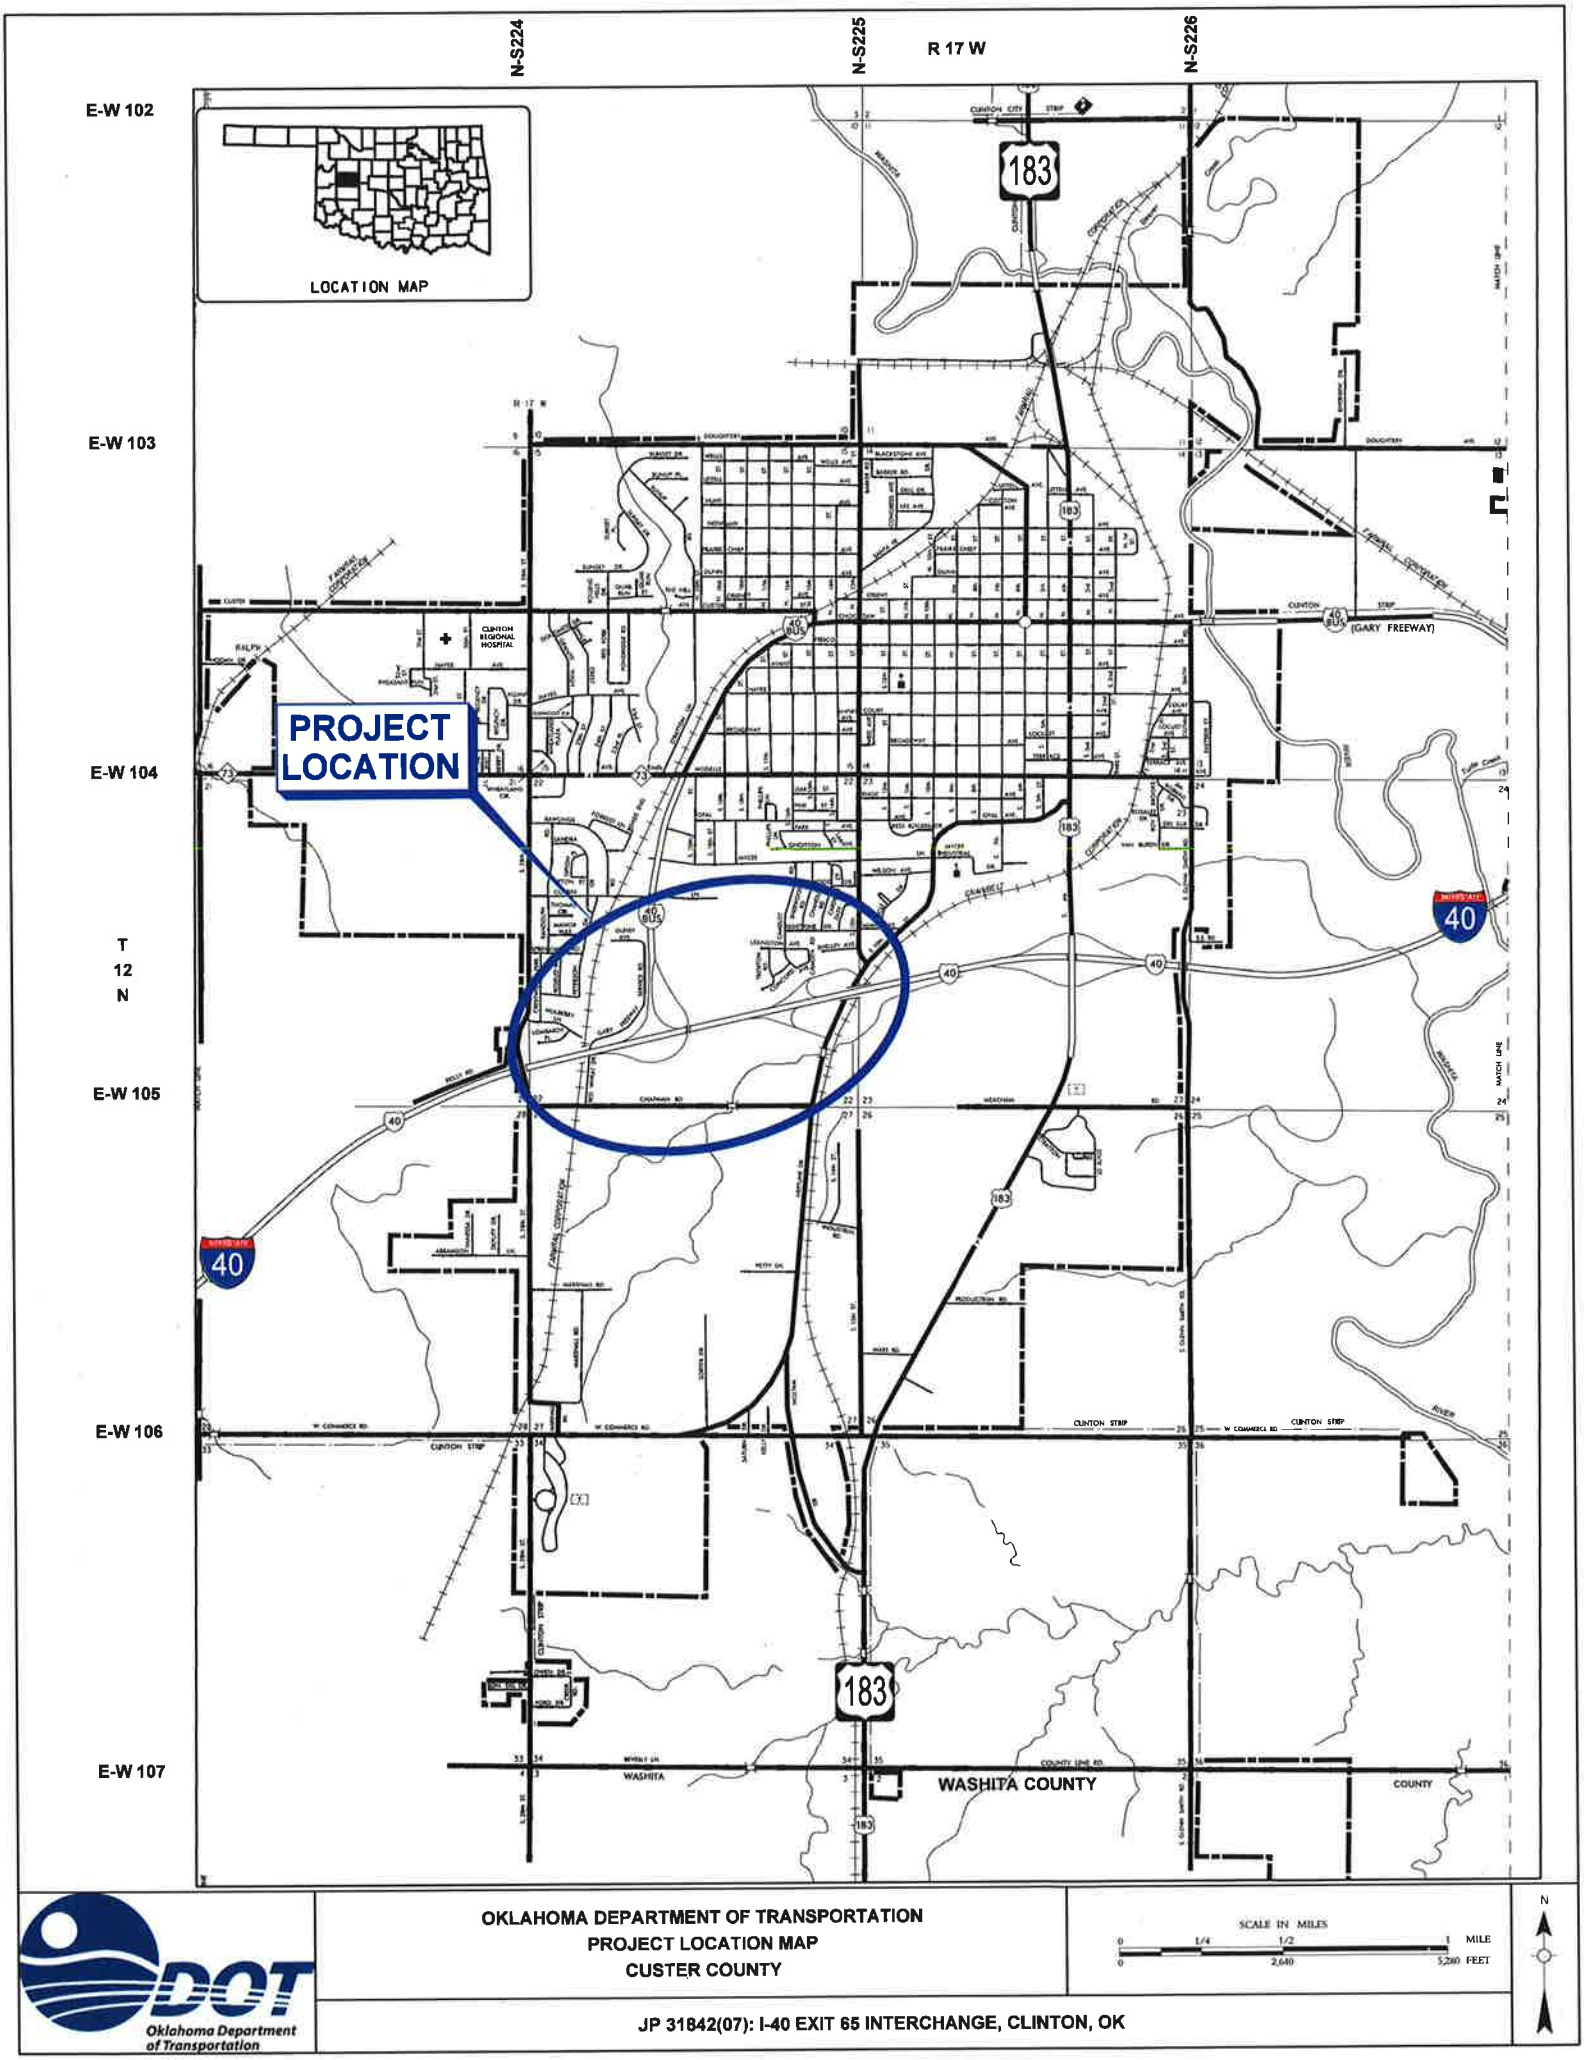

For further information or if you have any questions, please contact Brent Almquist, ODOT Division 5 Engineer, at (580) 323-1431 or balmquist@odot.org, or Kirsten McCullough, Environmental Project Manager, Garver at (918) 250-5922 or kjmccullough@garverusa.com.

Sincerely,

Siv Sundaram, P.E.
Environmental Programs Division Engineer

RE: Public Meeting for I-40 Interchange Improvements and Intersection Modification at Exit 65, I-40B West Jct. in Clinton, Custer County, Oklahoma, JP 31842(04)

Dear Property Owner/Utility Owner,

The Oklahoma Department of Transportation (ODOT), in cooperation with the Federal Highway Administration (FHWA), is proposing improvements to I-40 between S. 28th Street and Neptune Drive, including the I-40 & Gary Boulevard interchange (Exit 65) in the City of Clinton, Custer County, Oklahoma (see attached map). The existing interchange includes on- and off-ramps in close proximity, and the current ramp configuration is contributing to traffic flow issues at the Gary Blvd./Lexington/Oliver intersection. The existing interchange also lacks eastbound access to I-40. In addition, the City of Clinton is continuing to experience commercial growth, which is anticipated to generate future traffic volumes beyond the capacity of the existing interchange and adjacent intersections.

The purpose of this project is to improve safety and traffic operations and improve mobility in the I-40 corridor. ODOT completed a study of six initial alternatives and held a public meeting on May 24, 2016. In response to public feedback, ODOT has tasked a new consultant to look at additional alternatives for improving I-40 and the Gary Boulevard interchange while taking into consideration construction costs, right-of-way and utility costs, and environmental constraints. These alternatives were evaluated, which resulted in the selection of an alternative for the corridor.

As part of our efforts to keep the public informed of this study, a second public meeting has been scheduled for **February 28, 2019 at 6:00 PM** at the Frisco Conference Center, 101 S. 4th St., Clinton, OK 73601. The purpose of this meeting is to present the selected design alternative along with additional information about the project and obtain information from the public to further assist in the identification of critical social, economic, and environmental effects that may result from the project.

If you are leasing your property, please inform your lessee of the project and the public meeting.

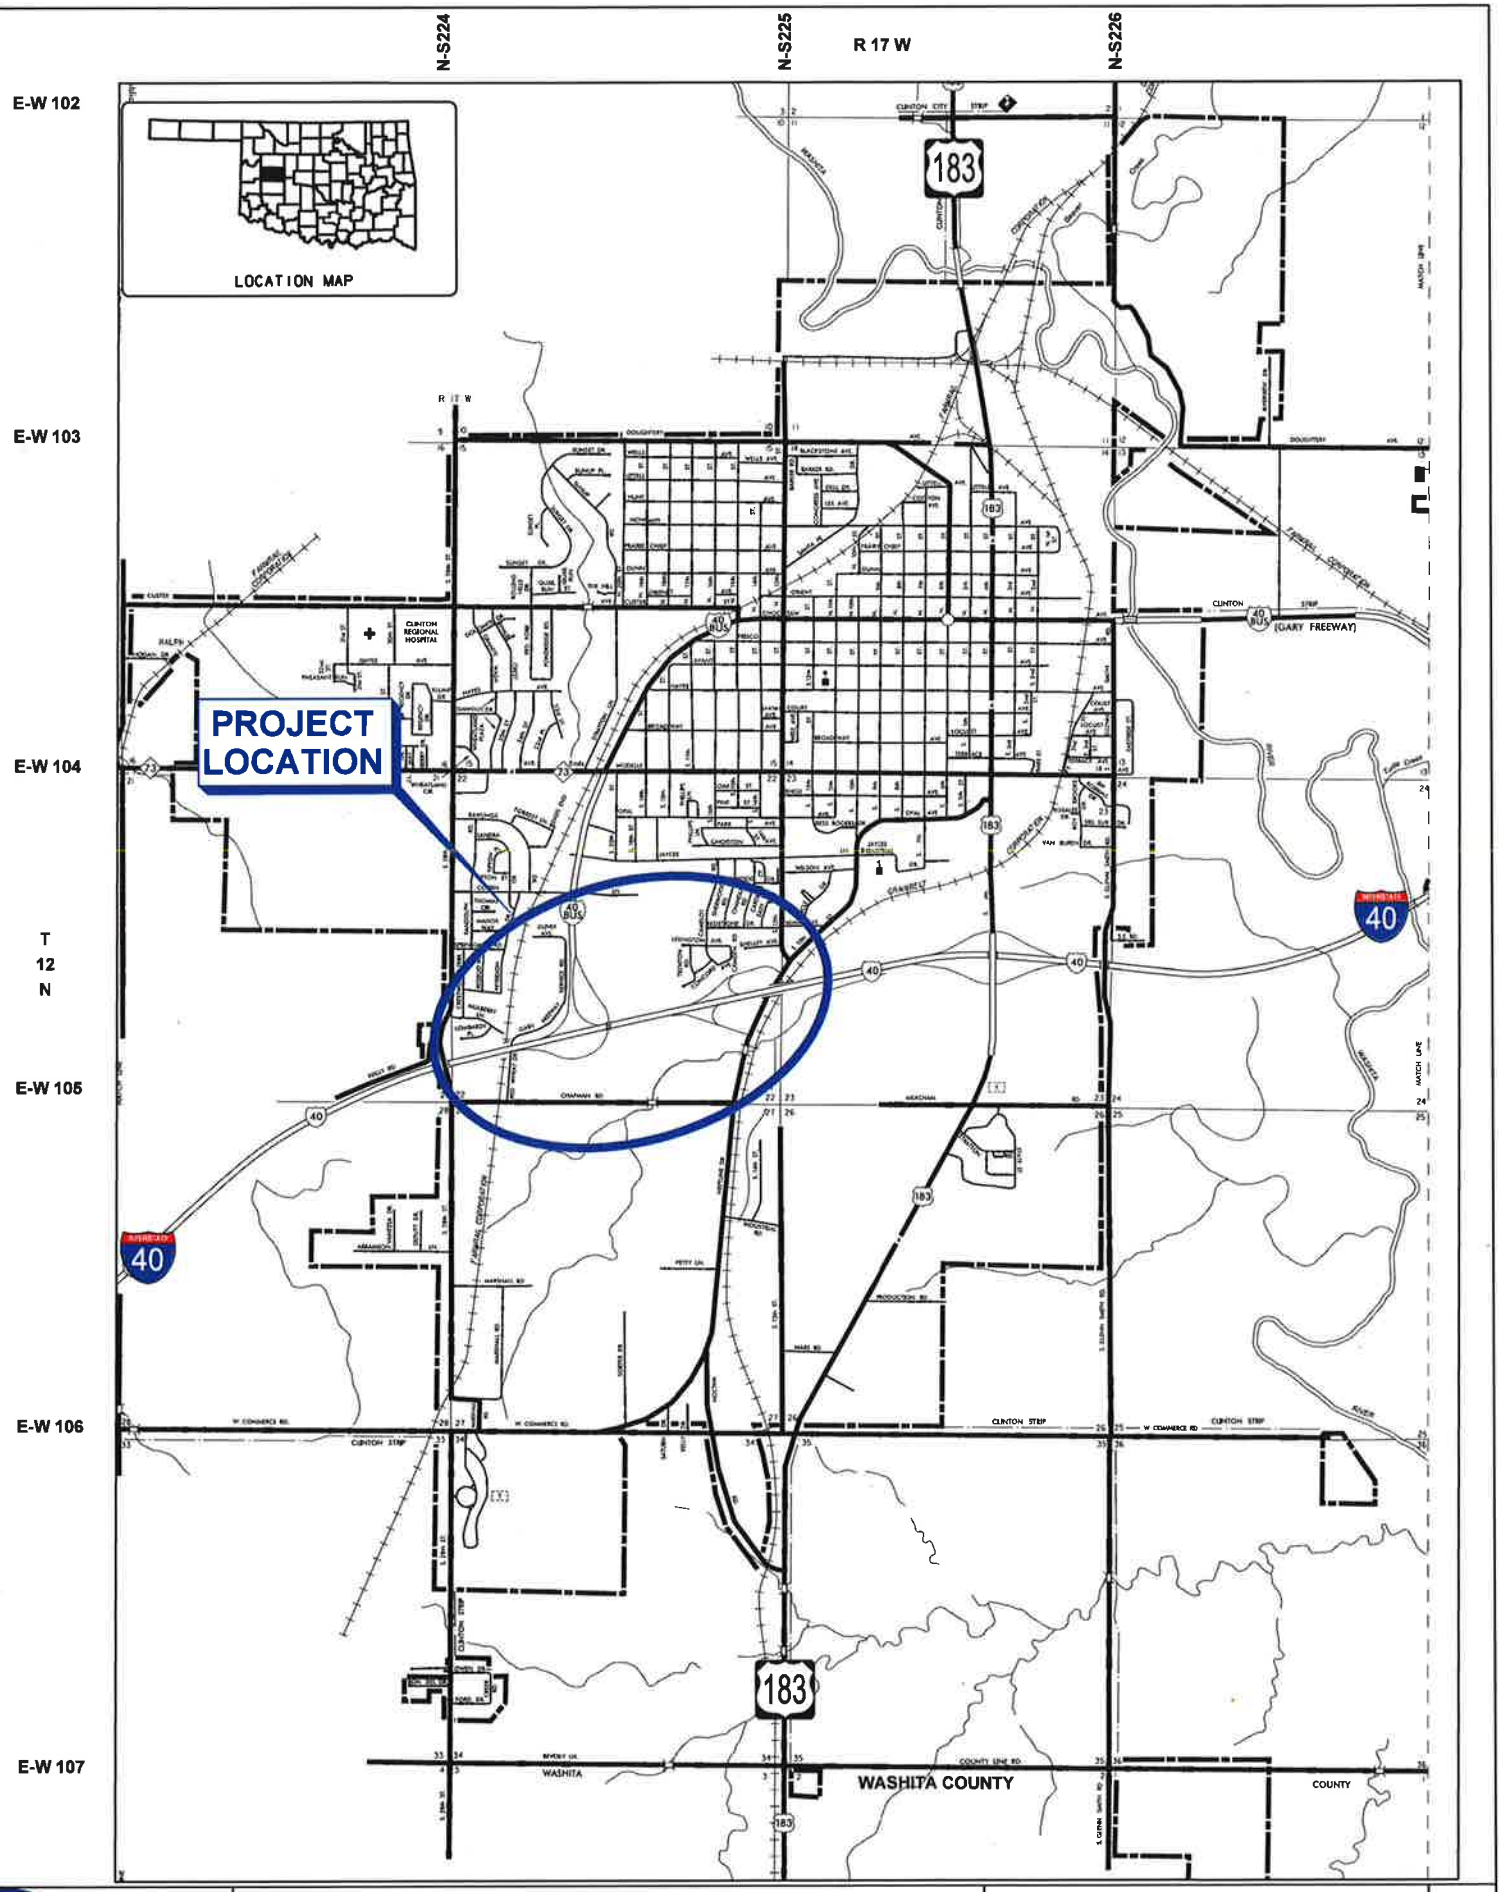

For further information or if you have any questions, please contact Brent Almquist, ODOT Division 5 Engineer, at (580) 323-1431 or balmquist@odot.org, or Kirsten McCullough, Environmental Project Manager, Garver at (918) 250-5922 or kjmccullough@garverusa.com.

Sincerely,

Siv Sundaram, P.E.
Environmental Programs Division Engineer

The Oklahoma Department of Transportation invites you to a

PUBLIC MEETING

for I-40 Exit 65 (Gary Boulevard) Clinton, Oklahoma

February 28, 2019 at 6:00 PM

Frisco Conference Center

101 South 4th Street, Clinton, OK 73601

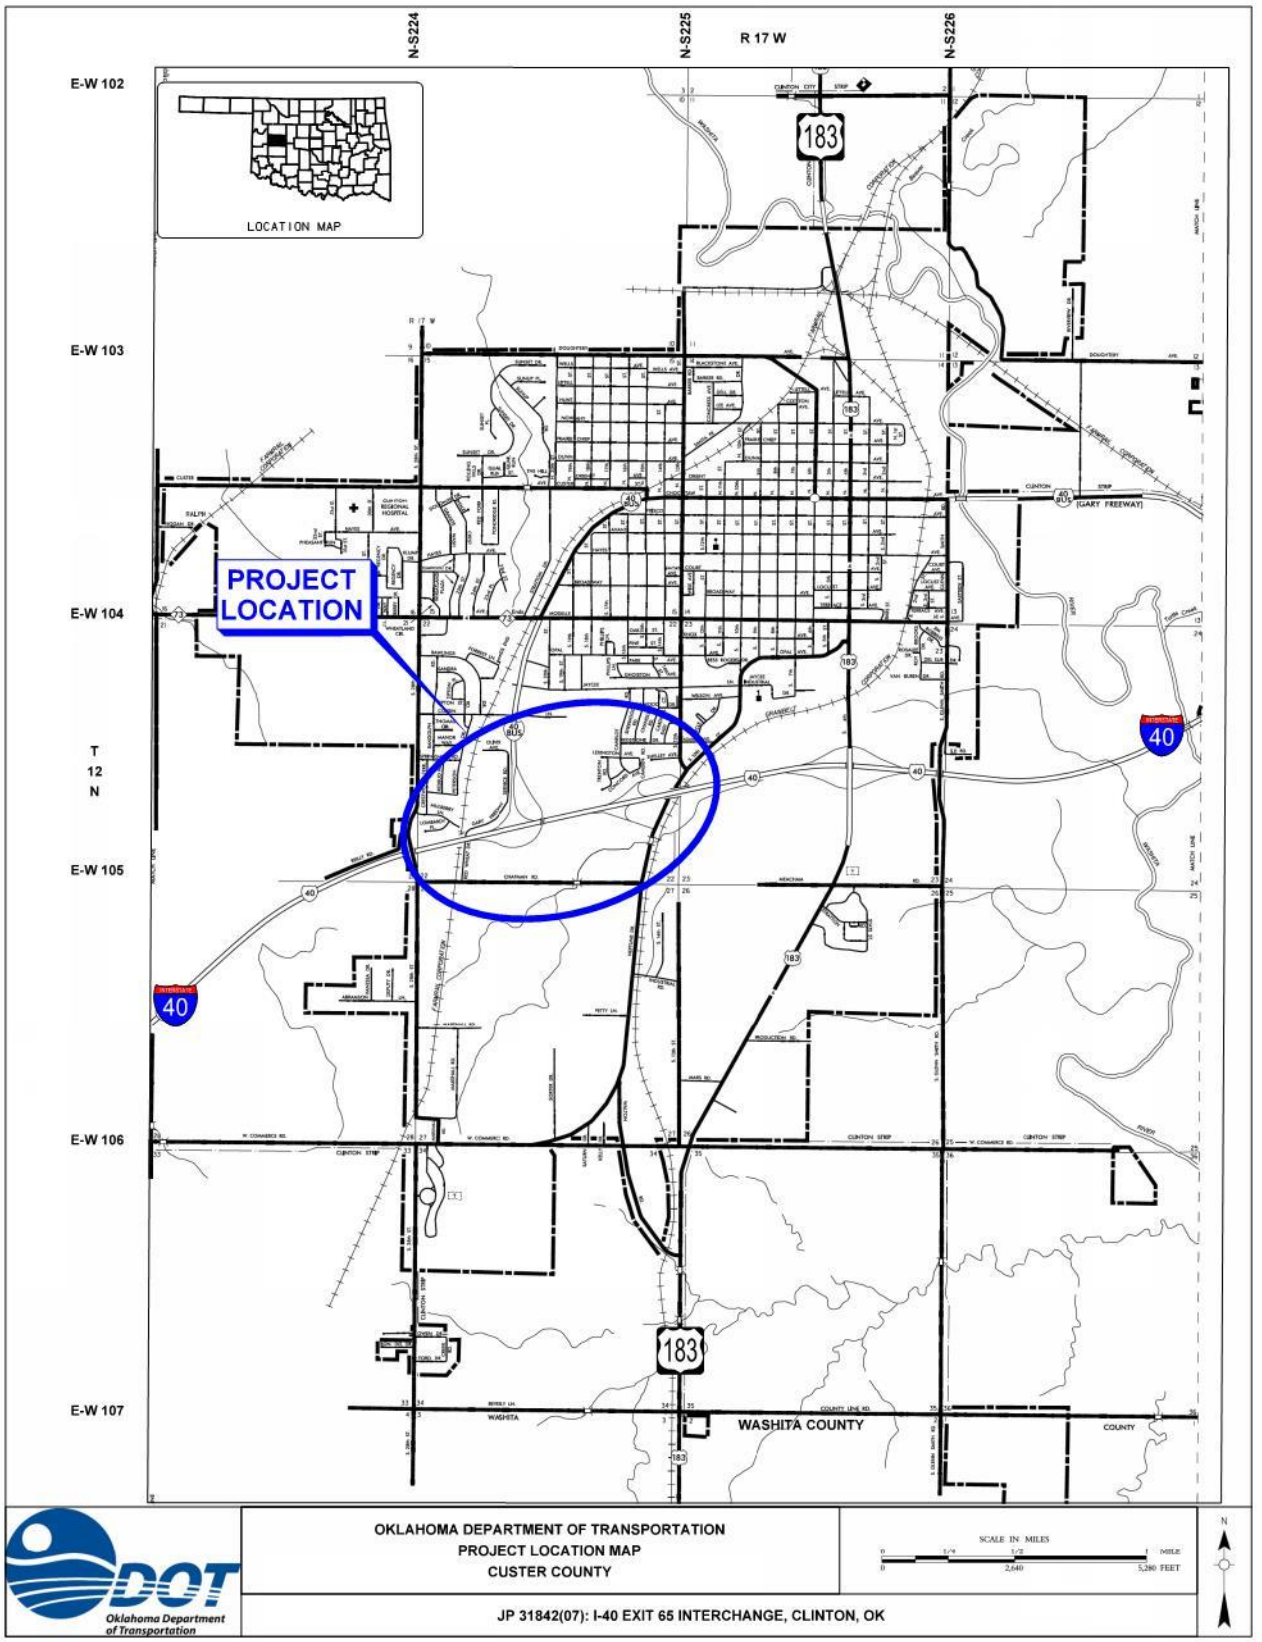

The purpose of this meeting is to inform the public and receive input on the selected design for the I-40 Exit 65 (Gary Boulevard) interchange in the City of Clinton, Oklahoma. In response to feedback received at the first public meeting on May 24, 2016, ODOT has developed new alternatives that provide improved access for both I-40 and local traffic. These alternatives were evaluated taking into consideration construction costs, right-of-way and utility costs, and environmental constraints, which resulted in the selection of an alternative for the corridor. ODOT will present the selected alternative for additional comment at this upcoming public meeting.

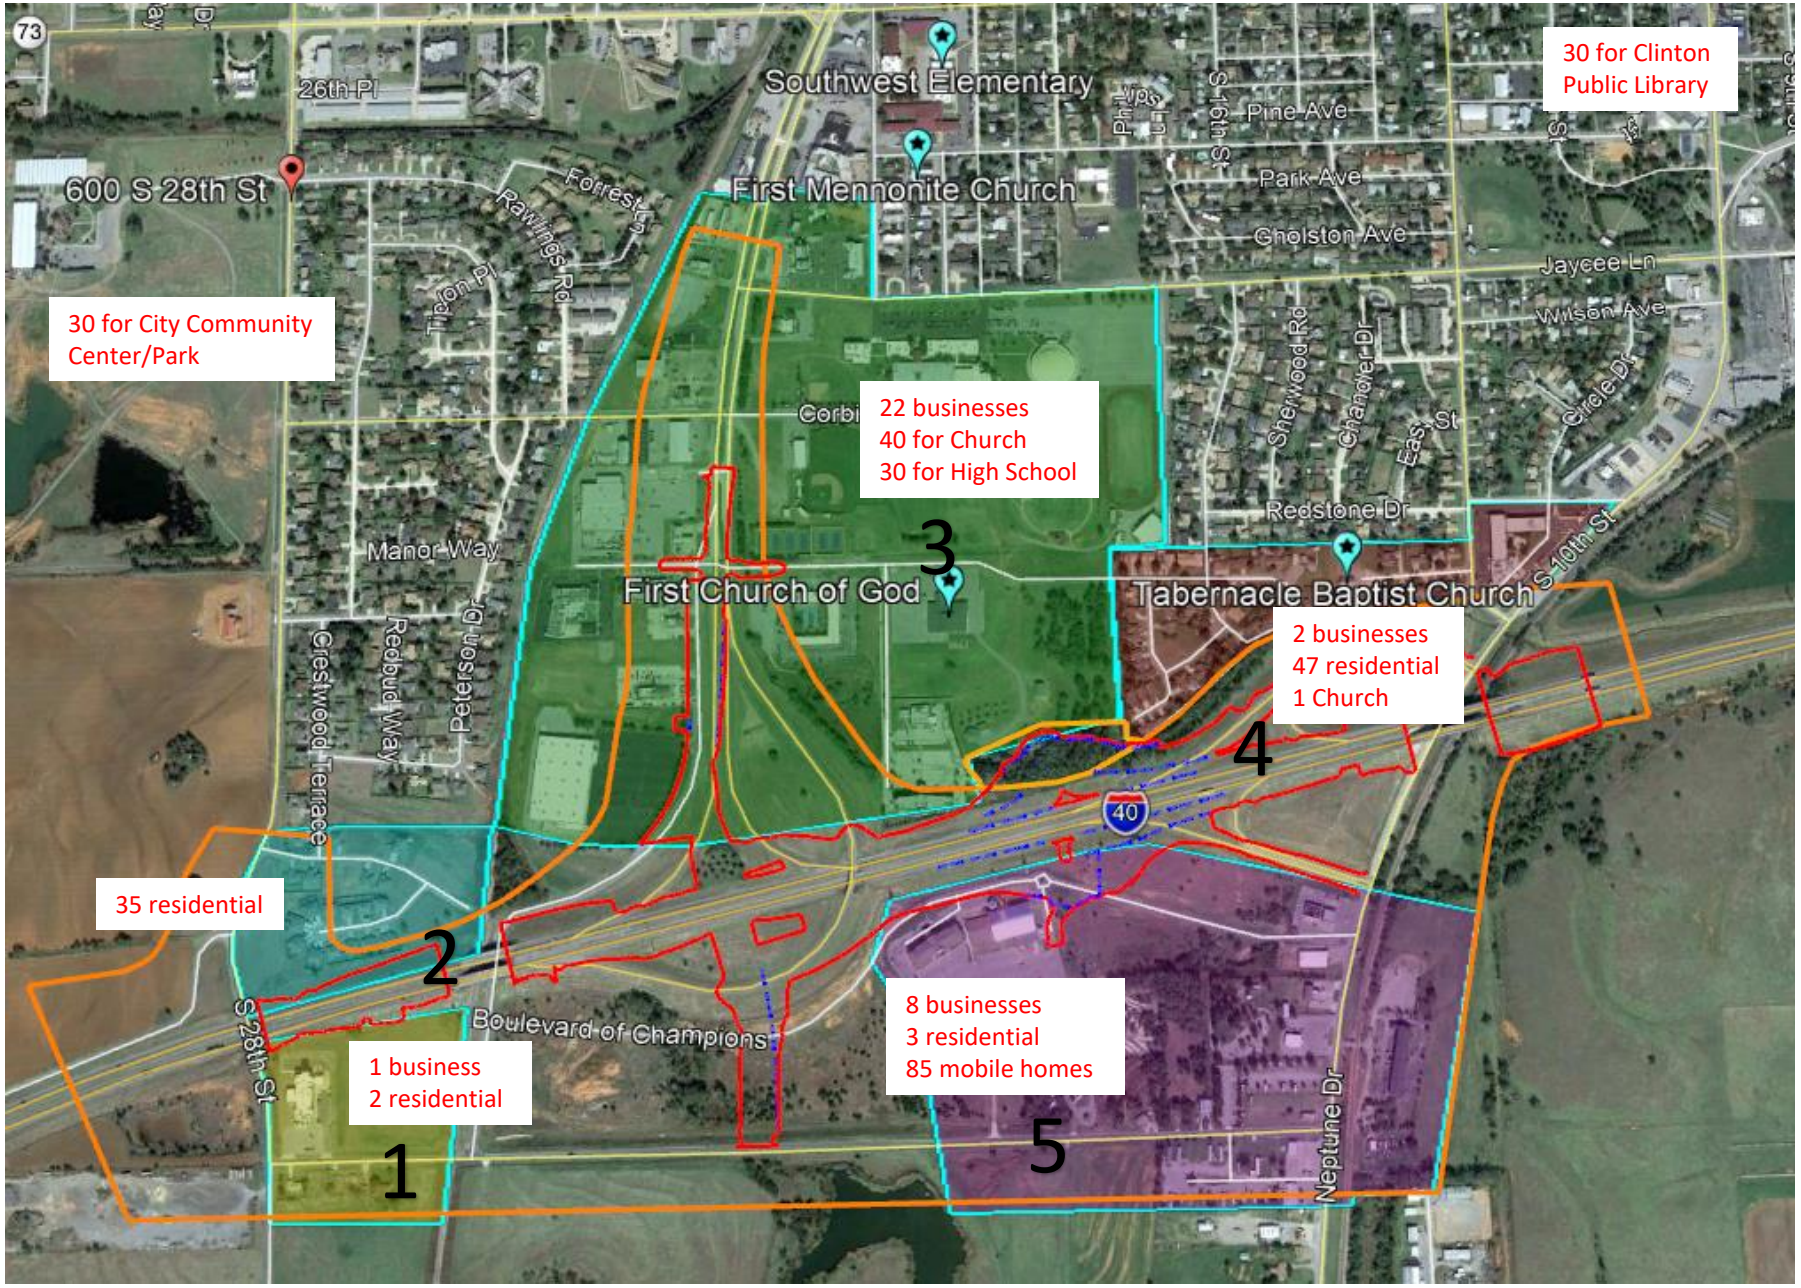

The purpose of this project is to improve safety and traffic operations and improve mobility in the I-40 corridor. Topics to be presented at the meeting include:

- Purpose and Need for the Project
- Proposed Improvements
- Anticipated Impacts
- Next Steps

If you have any questions regarding the study, please contact Kirsten McCullough, Garver, at 918-250-5922 or kjmccullough@garverusa.com. We hope to see you there!

The Oklahoma Department of Transportation (ODOT) ensures that no person or groups of persons shall, on the grounds of race, color, sex, religion, national origin, age, disability, retaliation or genetic information, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any and all programs, services, or activities administered by ODOT, its recipients, sub-recipients, and contractors. To request an accommodation please contact the ADA Coordinator at 405-521-4140 or the Oklahoma Relay Service at 1-800-722-0353. If you have any ADA or Title VI questions email ODOT-ada-titlevi@odot.org.

Public Meeting Presentation

Oklahoma Department of Transportation

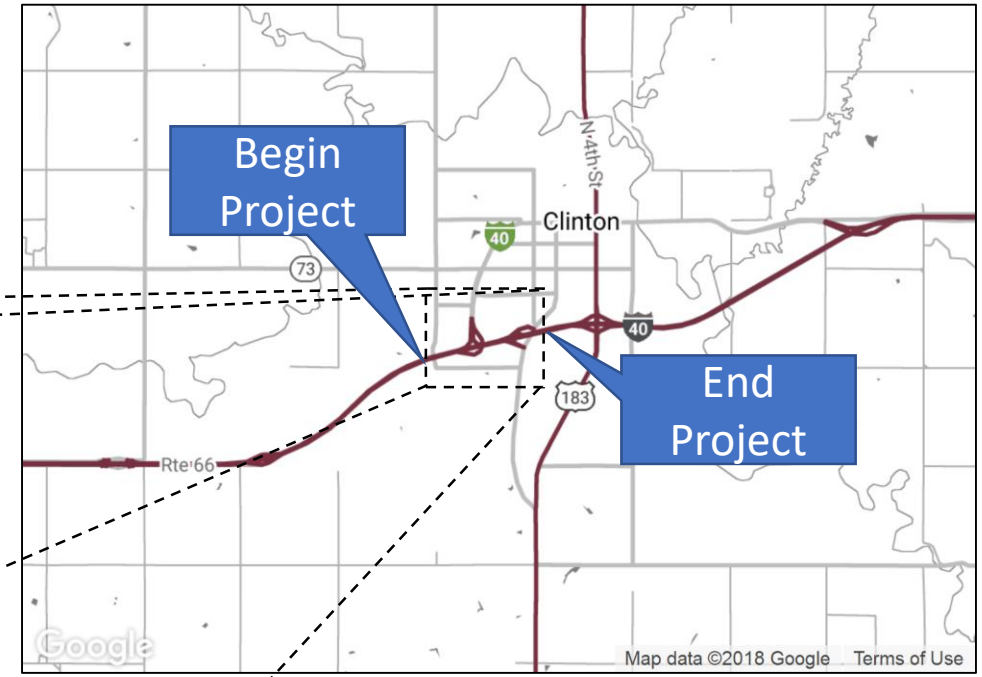

Public Meeting for I-40 & Gary Blvd. (Exit 65) Interchange

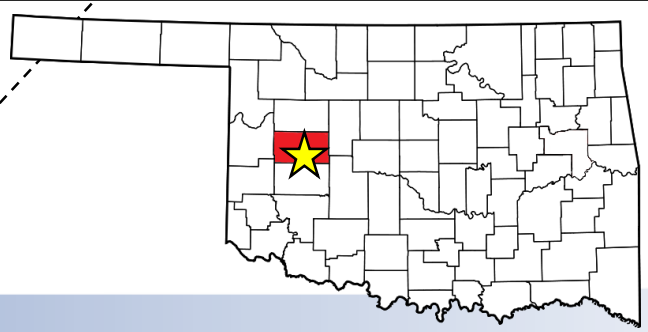

February 28, 2019

Purpose of the Meeting

- To Inform the Public and Present the Selected Alternative for I-40 Exit 65 in Clinton, OK

Oklahoma Department of Transportation

Purpose of the Project

- Improve Safety
- Improve Traffic Operations and Mobility
  - On I-40
  - On City Streets and Intersections
- Improve Access to Existing and Future Commercial and Residential Development

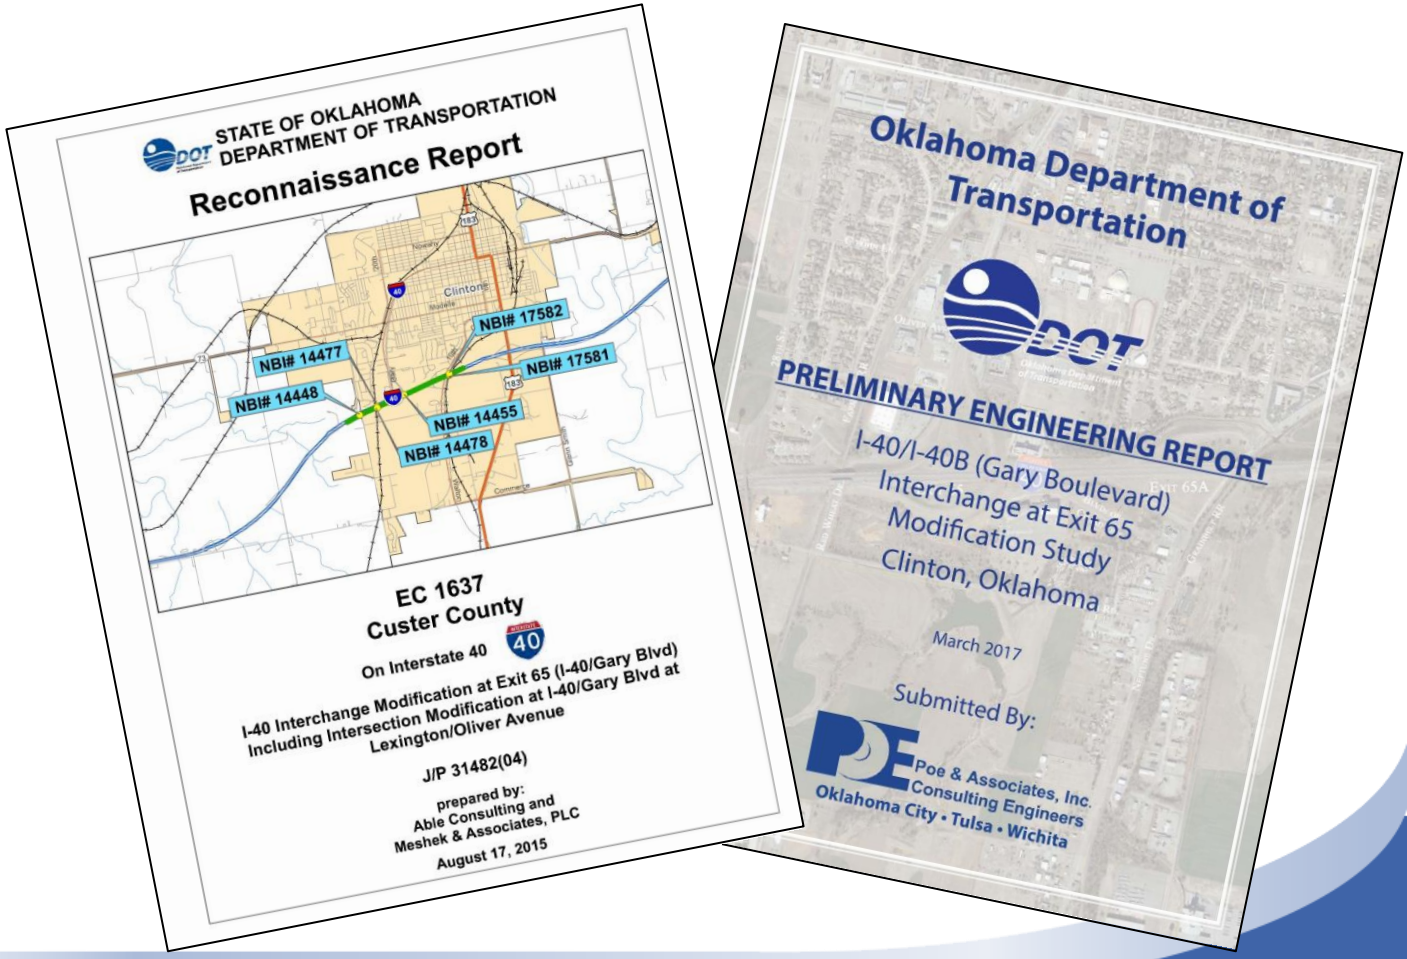

Oklahoma Department of Transportation

Project History

Project History

- In May 2015 ODOT Commissioned an Interchange Study for I-40/Gary Blvd
- The Study Evaluated the Current Functionality of the I-40 Exit 65 Interchange, and Traffic at Nearby Intersections

Oklahoma Department of Transportation

Project History

- A Public Meeting was Held May 24, 2016 in Clinton
- Six Alternatives Were Shown
- Comments at the Meeting Included:
  - Desire for Eastbound and Westbound I-40 Access From Both Neptune Blvd. (Exit 65A) and Gary Blvd. (Exit 65)
  - Desire to Keep Both Exit 65 and 65A Open
  - Concerns Regarding Accessibility of Frontage Roads

I-40/I-40B (Gary Boulevard) Interchange at Exit 65 Modification Study Concepts

Oklahoma Department of Transportation

Project History

- As a Response to Public Comments, ODOT Developed two Additional Alternatives to:
  - Keep Both Exit 65 and 65A
  - Provide Improved Frontage Road Access
  - Improve Local Access and Intersections
- Minor Differences Between the two Alternatives Consisting Mainly of the Alignment of Red Wheat Drive/Gary Blvd

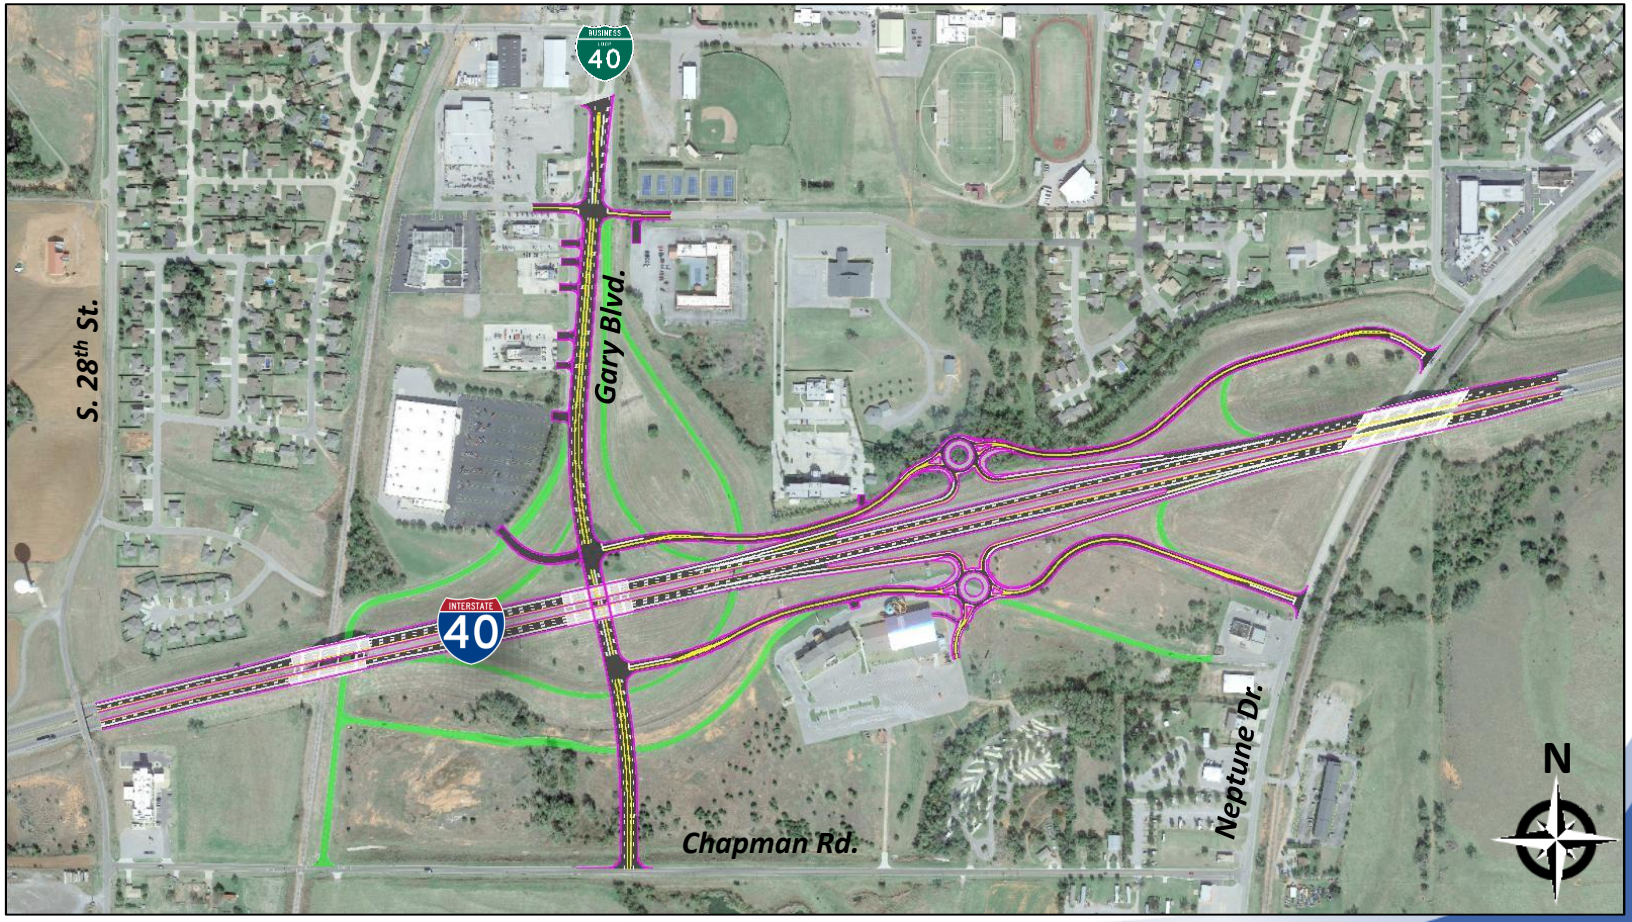

Oklahoma Department of Transportation

Project History

- Alternative 7 was Selected for the Following Reasons:
  - Provides Full Access to I-40 in all Directions from Both Gary Blvd. and Neptune Dr.
  - Shorter and More Direct Connection to I-40
  - Lower Environmental Impact
  - Lower Construction Cost
- Remainder of Presentation will Discuss Only Alternative 7

Oklahoma Department of Transportation

Project Area Information

Project Area Information

- I-40
  - 4-Lane Divided Highway With 10-ft Outside Shoulders, 4-ft Inside Shoulders and Grass Median
  - Twin Bridges Over Red Wheat Dr./Railroad and Neptune Dr. /Railroad
  - Posted Speed Limit is 70 mph
  - Projected Traffic (2050): **30,700** Vehicles/Day (**45%** Trucks)
- Two Interchanges

- Intersections ☐
- Drives

ODOT Oklahoma Department of Transportation

Project Area Information

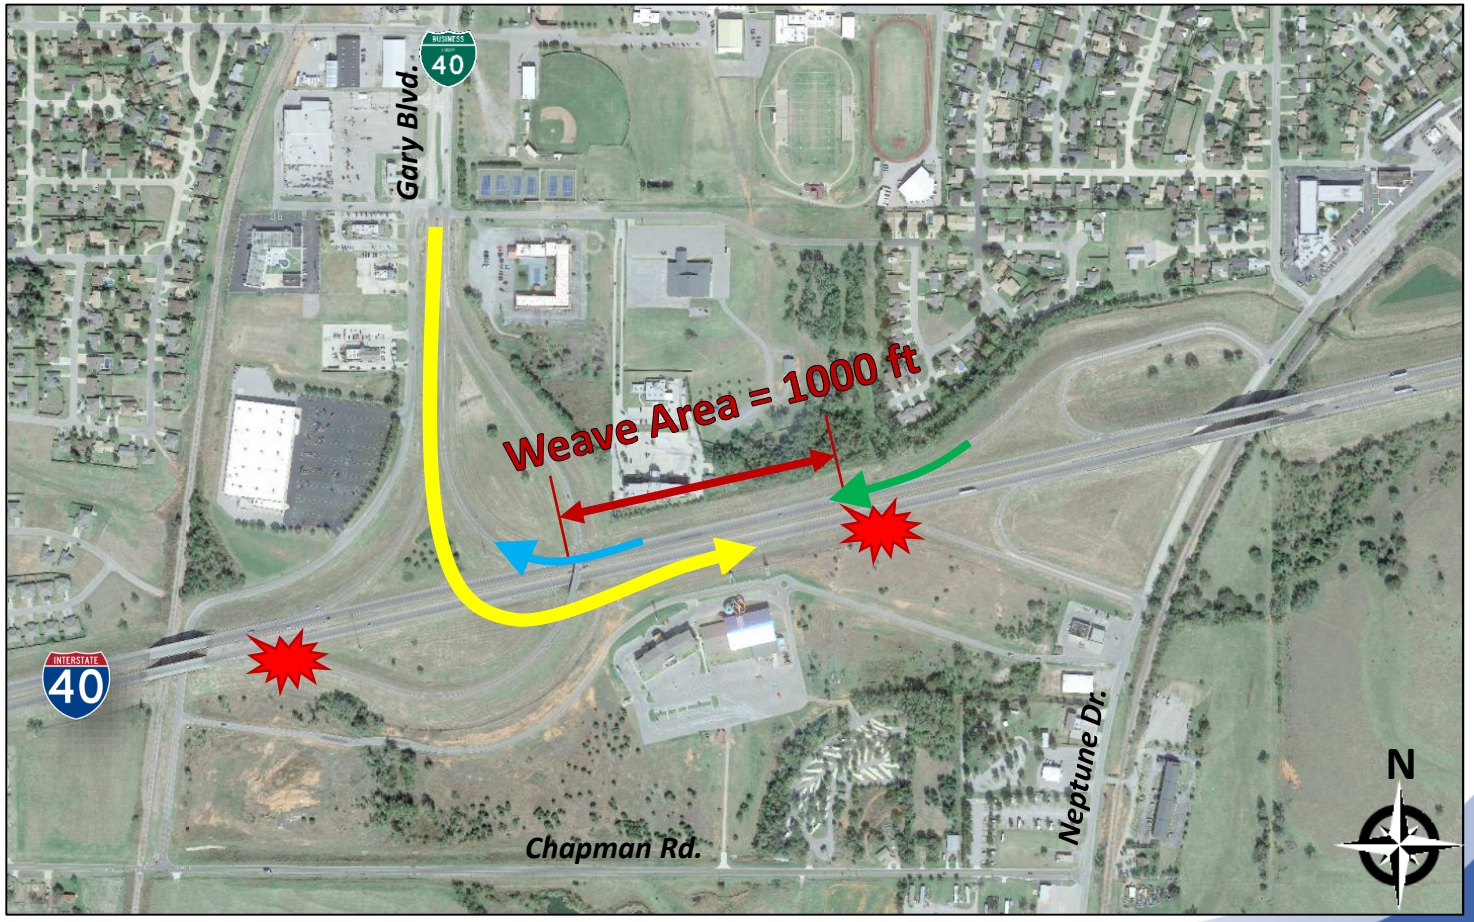

- Collision Data
  - Total: 246 Documented Collisions (2007-2017)
    - 5 Fatalities
    - 12 Serious Injury
  - Most Common Type of Collision (>50%)
    - Fixed Object
    - Rear-End
  - Gary Blvd./Red Wheat Dr./Ramps Intersection Included 22% of the Collisions

Oklahoma Department of Transportation

Existing Roadway Conditions Warrant Improvement

- Highway Deficiencies
  - Interchange Spacing
  - Missing Ramp Movement
  - Ramp Departures
- Local Road Deficiencies
  - Intersection Confusion
  - Weave Area Traveling North
  - Driveway Proximity

Oklahoma Department of Transportation

Existing Roadway Conditions Warrant Improvement

- Highway Deficiencies
  - Interchange Spacing
  - Missing Ramp Movement
  - Ramp Departures
- Local Road Deficiencies
  - Intersection Confusion
  - Weave Area Traveling North
  - Driveway Proximity

Oklahoma Department of Transportation

Existing Bridge Conditions Warrant Improvement

- Built in 1959
- Functionally Obsolete (4)
  - Shoulder Widths
  - Parapet Height
  - Vertical Clearance
- Structurally Deficient (1)
  - Poor Condition Rating
  - Needs Attention

Oklahoma Department of Transportation

Existing Bridge Conditions Warrant Improvement

- Built in 1959
- Functionally Obsolete (4)
  - Shoulder Widths
  - Parapet Height
  - Vertical Clearance
- Structurally Deficient (1)
  - Poor Condition Rating
  - Needs Attention

Oklahoma Department of Transportation

Existing Bridge Conditions Warrant Improvement

- Built in 1959
- Functionally Obsolete (4)
  - Shoulder Widths
  - Parapet Height

- Structurally Deficient (1)
  - Poor Condition Rating
  - Needs Attention

Oklahoma Department of Transportation

Land Use and Environment

- Land Use is Mostly Commercial With a few Residential Areas
- South of I-40 Commercial and Church Properties are Under Development
- Important Community Facilities Include:
  - Schools
  - Churches
  - Recreational Facility

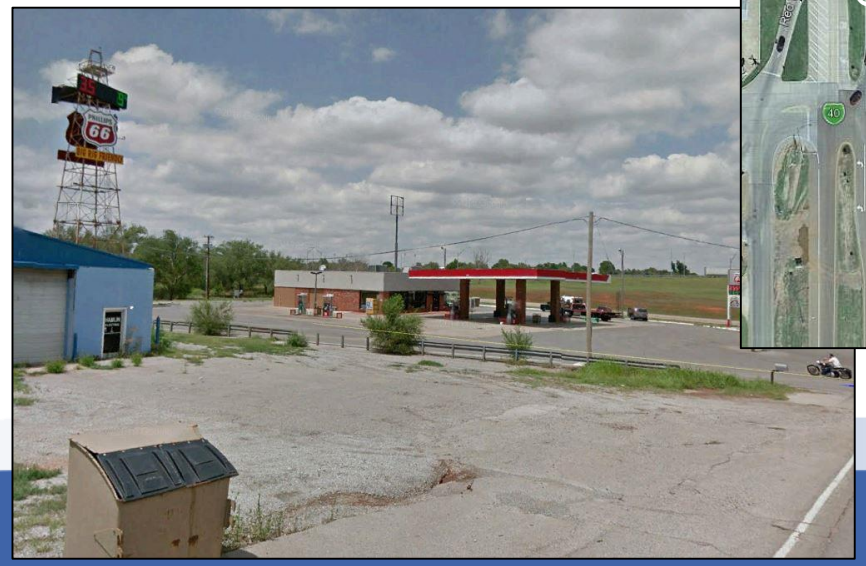

Oklahoma Department of Transportation

Land Use and Environment

- Environmental Resources Include:
  - Streams & Wetlands
  - Sites Containing Potentially Hazardous Materials (e.g. Gas Stations)
  - Portions of original Route 66 roadway along Gary Boulevard and Neptune Drive
  - Public Recreational Property (high school tennis courts and trees)

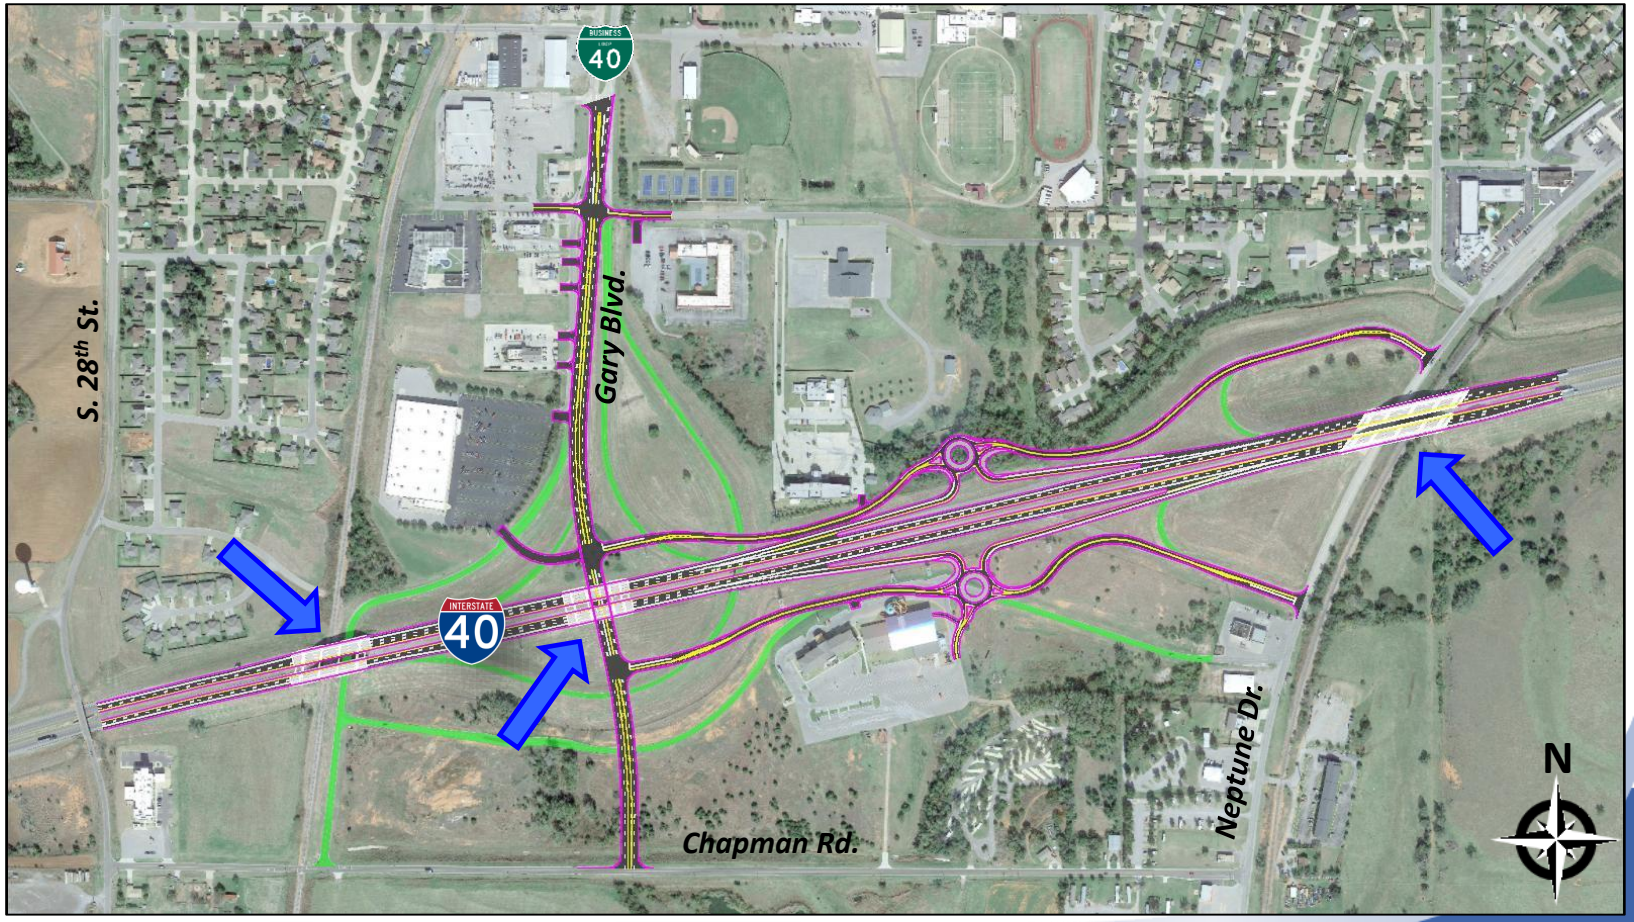

ODOT Oklahoma Department of Transportation

Proposed Design

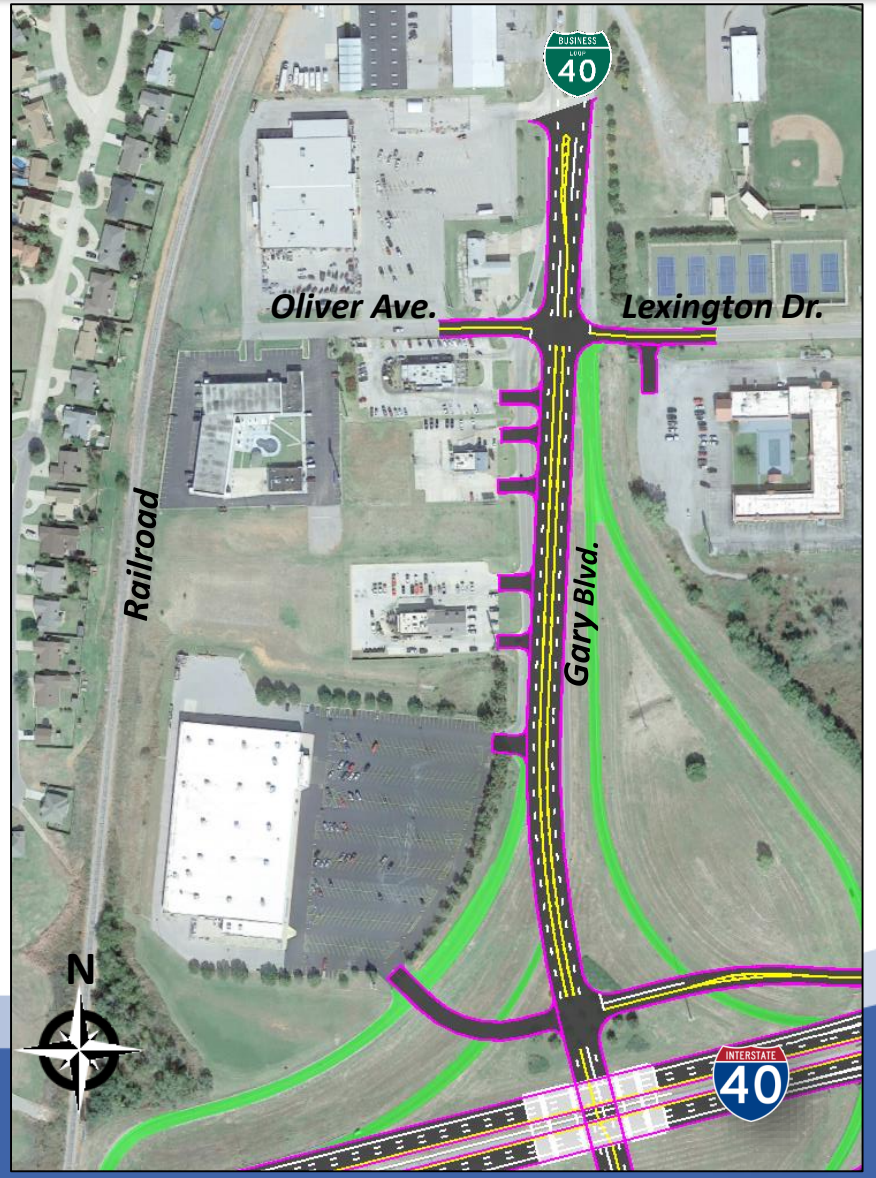

Proposed Design

- Reconstruct I-40 With New Bridges
- Green areas are potential pavement removal
- Gary Blvd. as Five-Lane South to Chapman

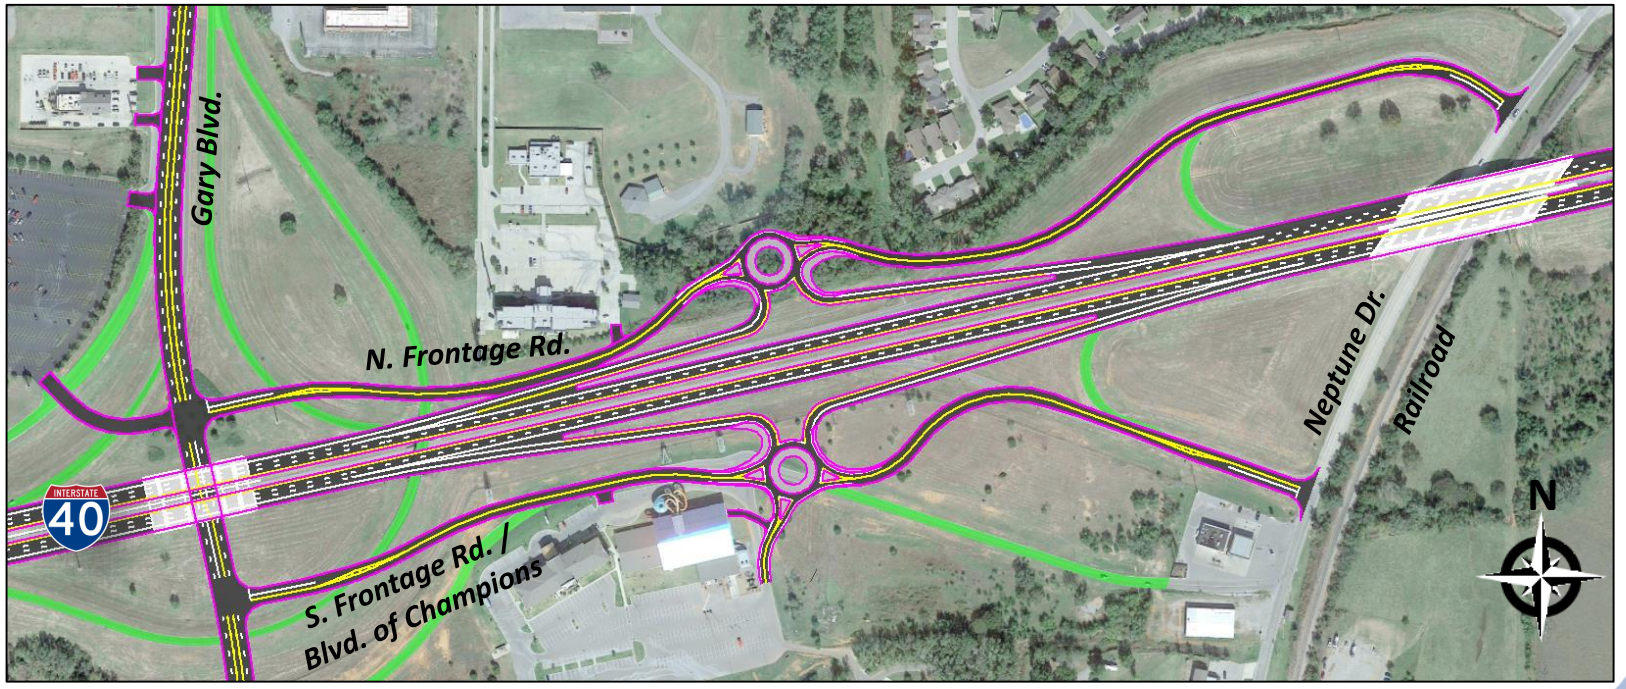

Proposed Design

- Gary Blvd. as Five-Lane South to Chapman
- Remove Red Wheat Dr.

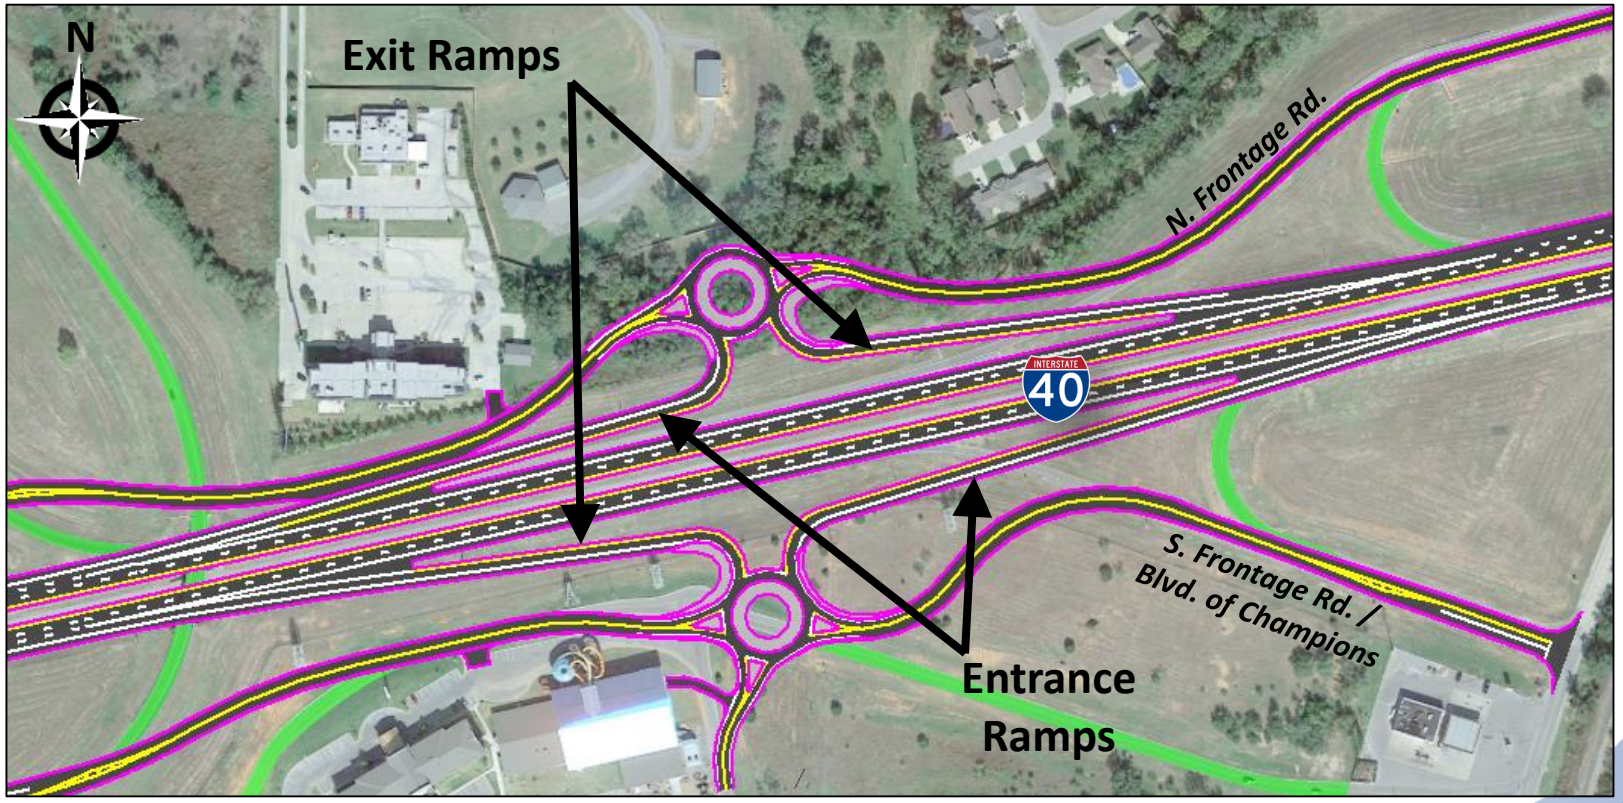

Proposed Design

- Two-Way Frontage Roads
  - North Frontage Rd.
  - Relocated Blvd. of Champions
- Consolidate Two Interchanges Into One
- Direct Access to Both Gary Blvd. & Neptune Dr.

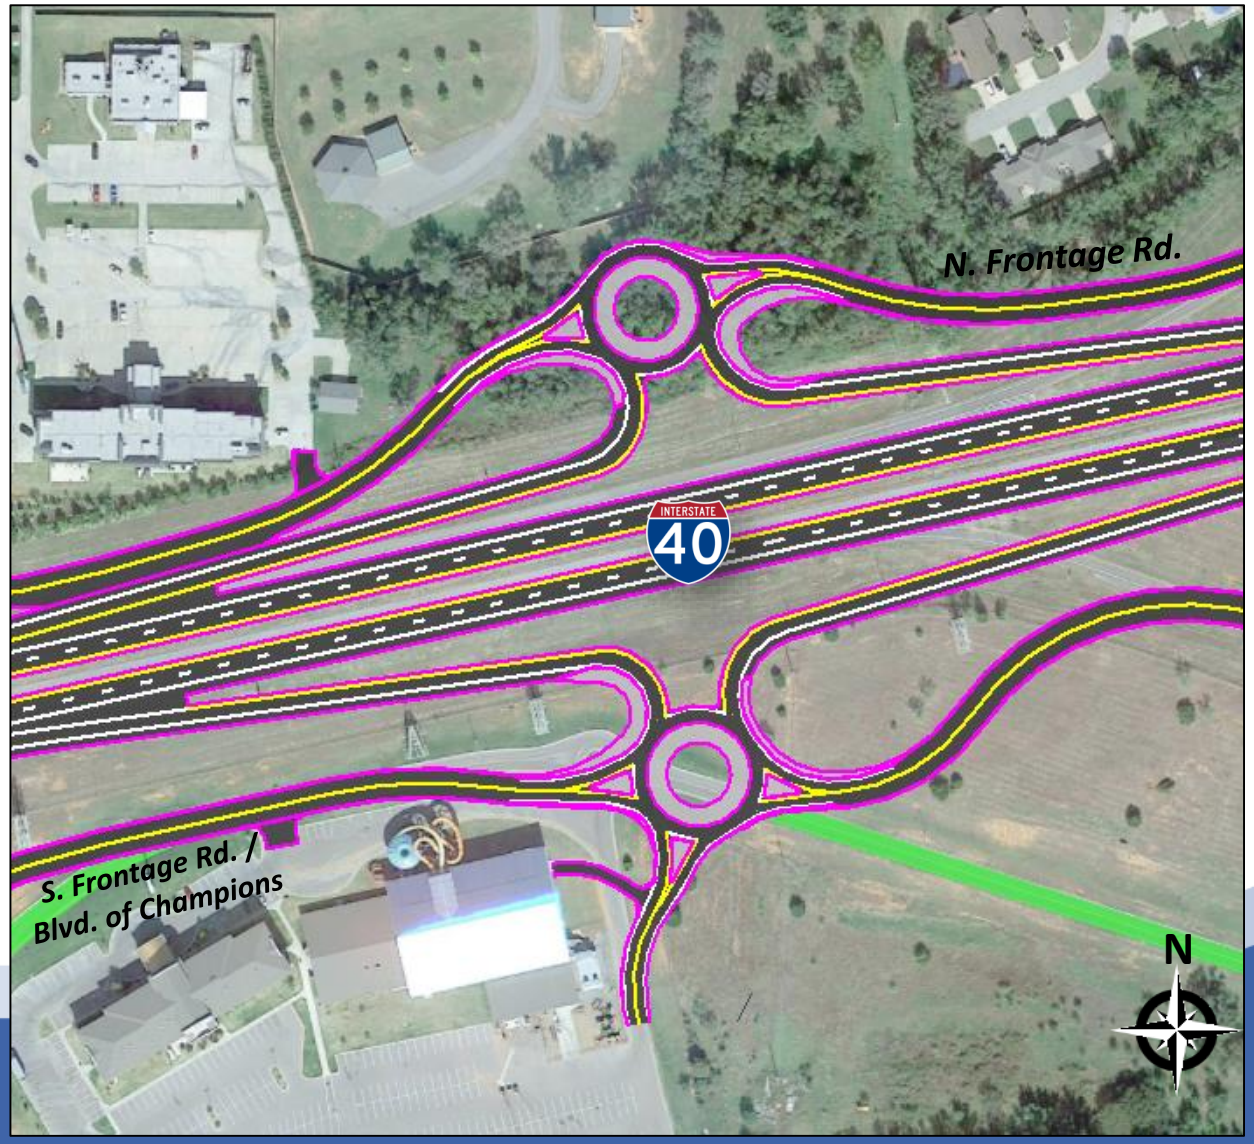

Proposed Design

- Exit Ramps off I-40
- Entrance Ramps onto I-40
- Longer Acceleration and Deceleration Lanes for Ramps

Proposed Design

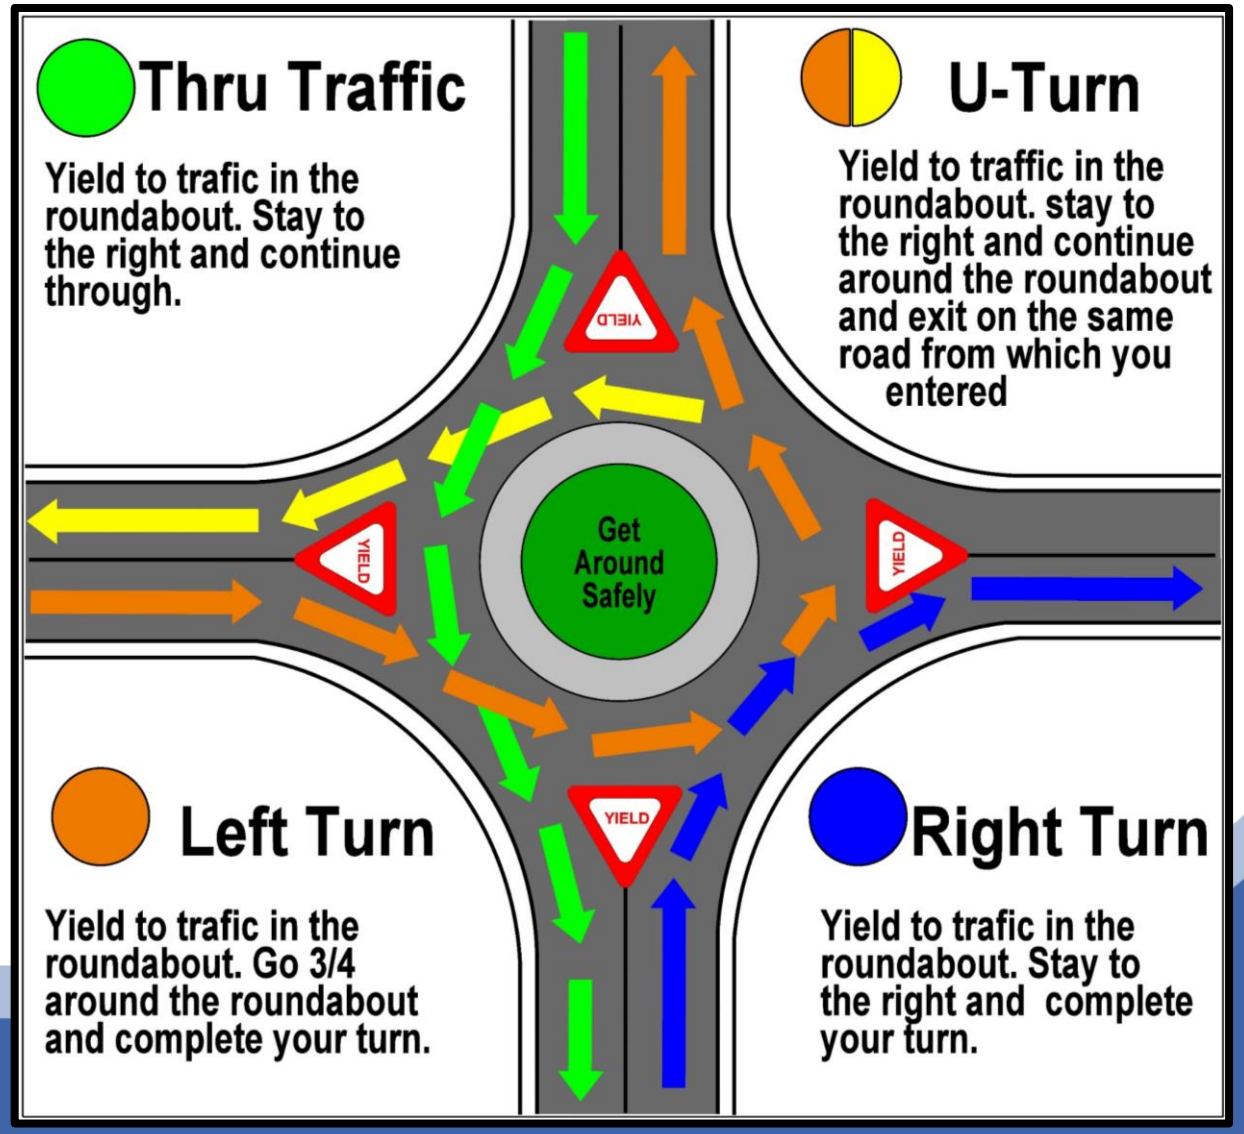

- Roundabouts
  - Designed for Semi Trucks
  - Utilizes Truck Aprons
  - No Signals
  - Fewer Collision Points

Roundabout: Rules of the Road

Vehicles Within the Roundabout Have the Right-of-Way

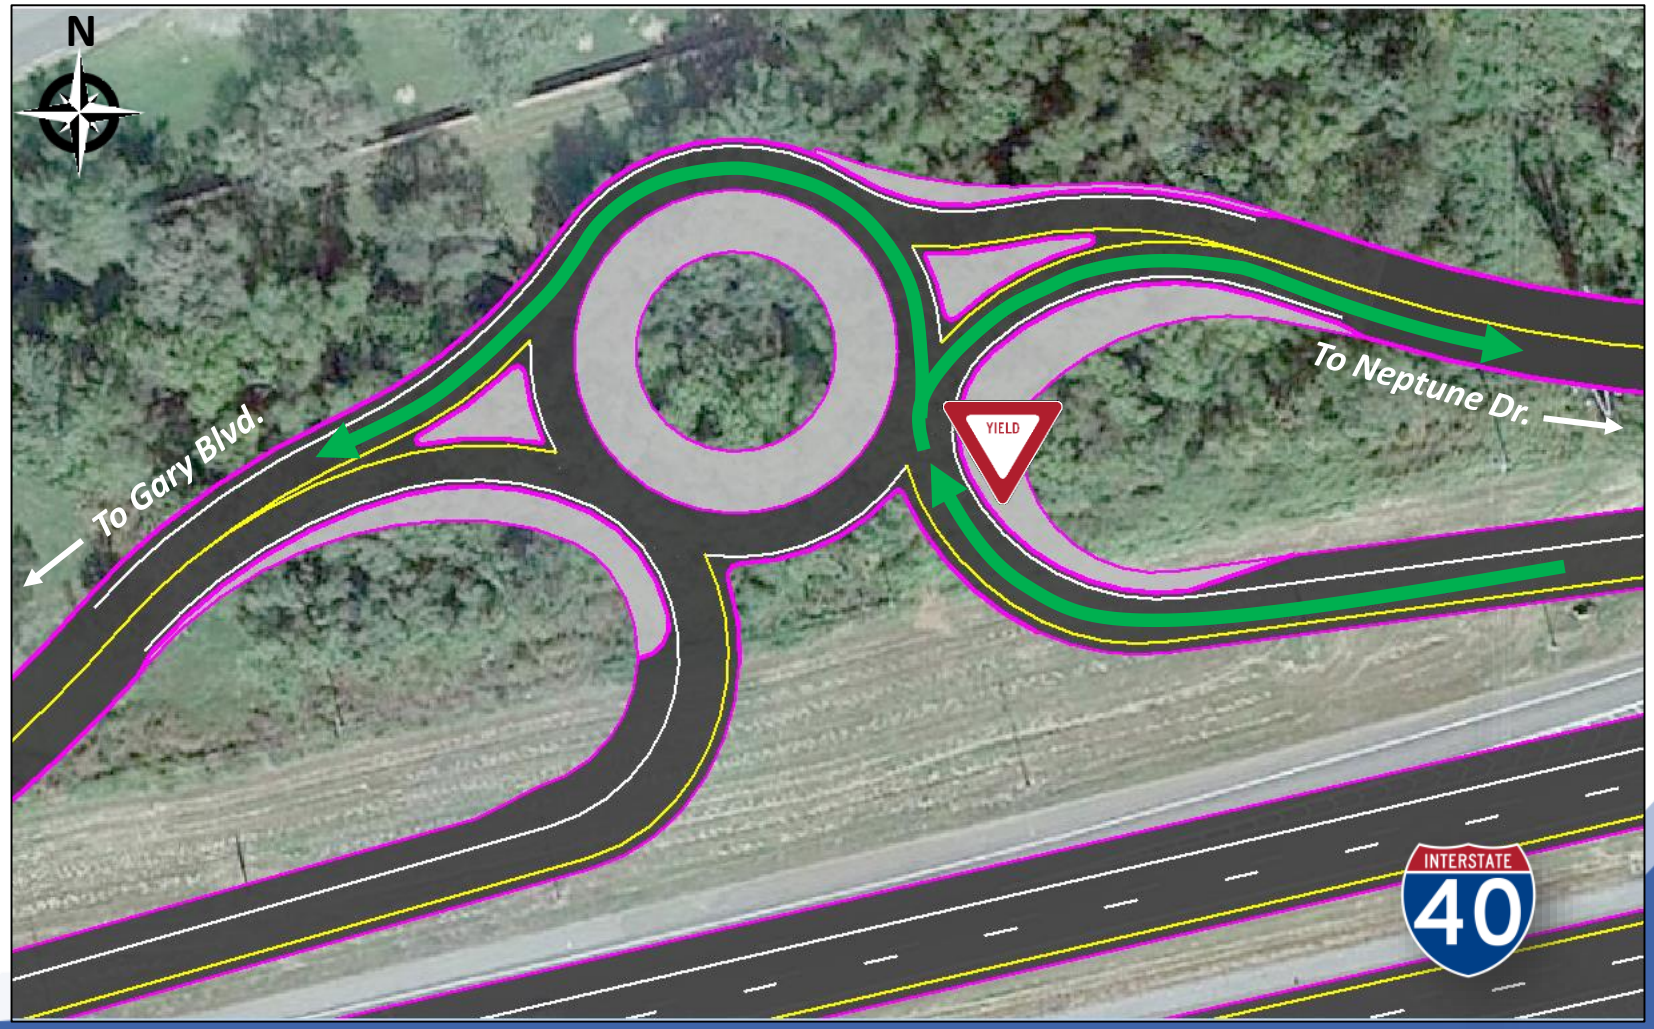

1. As you Approach, Look to the Left to see if any Drivers are Traveling in the Roundabout
2. Once There is an Adequate gap in Traffic, Enter the Roundabout
3. Use Your Turn Signal as you Approach Your Exit
4. If you Miss Your Exit, go Around Again

Maneuver Thru the Roundabout

- I-40 WB Off
- I-40 WB On Ramp
- Thru Movements

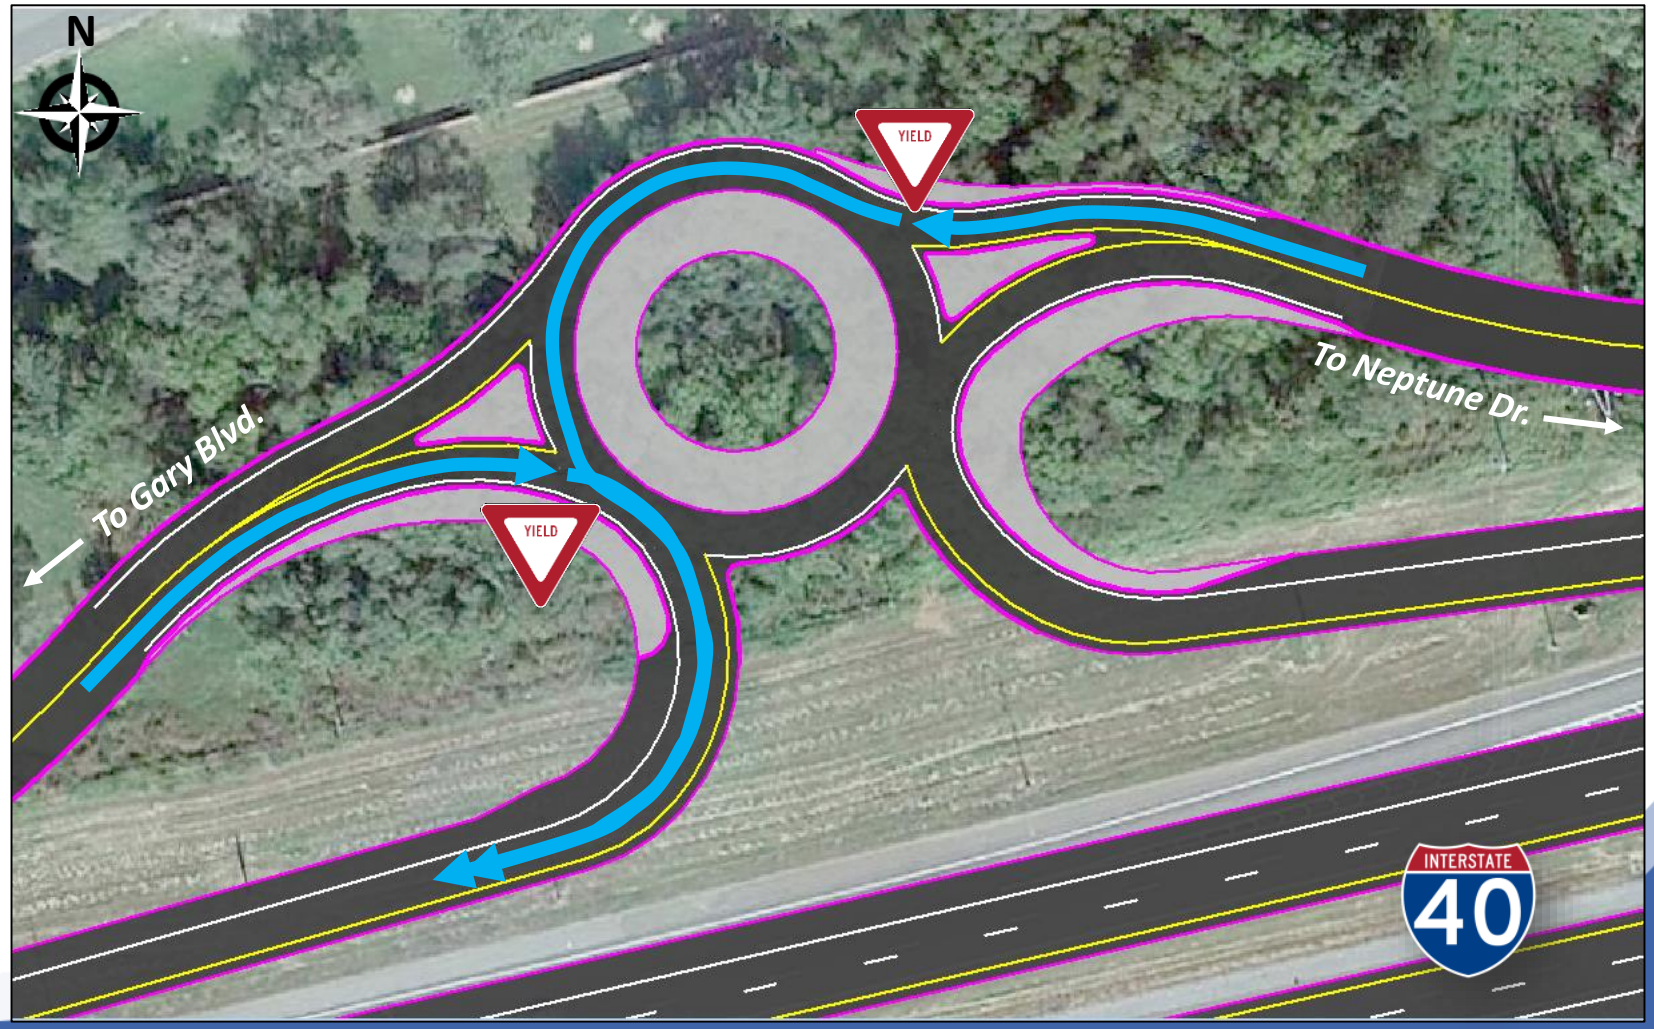

- Difficult to Make Wrong Way Turns Onto Ramps

Maneuver Thru the Roundabout

- I-40 WB Off
- I-40 WB On Ramp
- Thru Movements

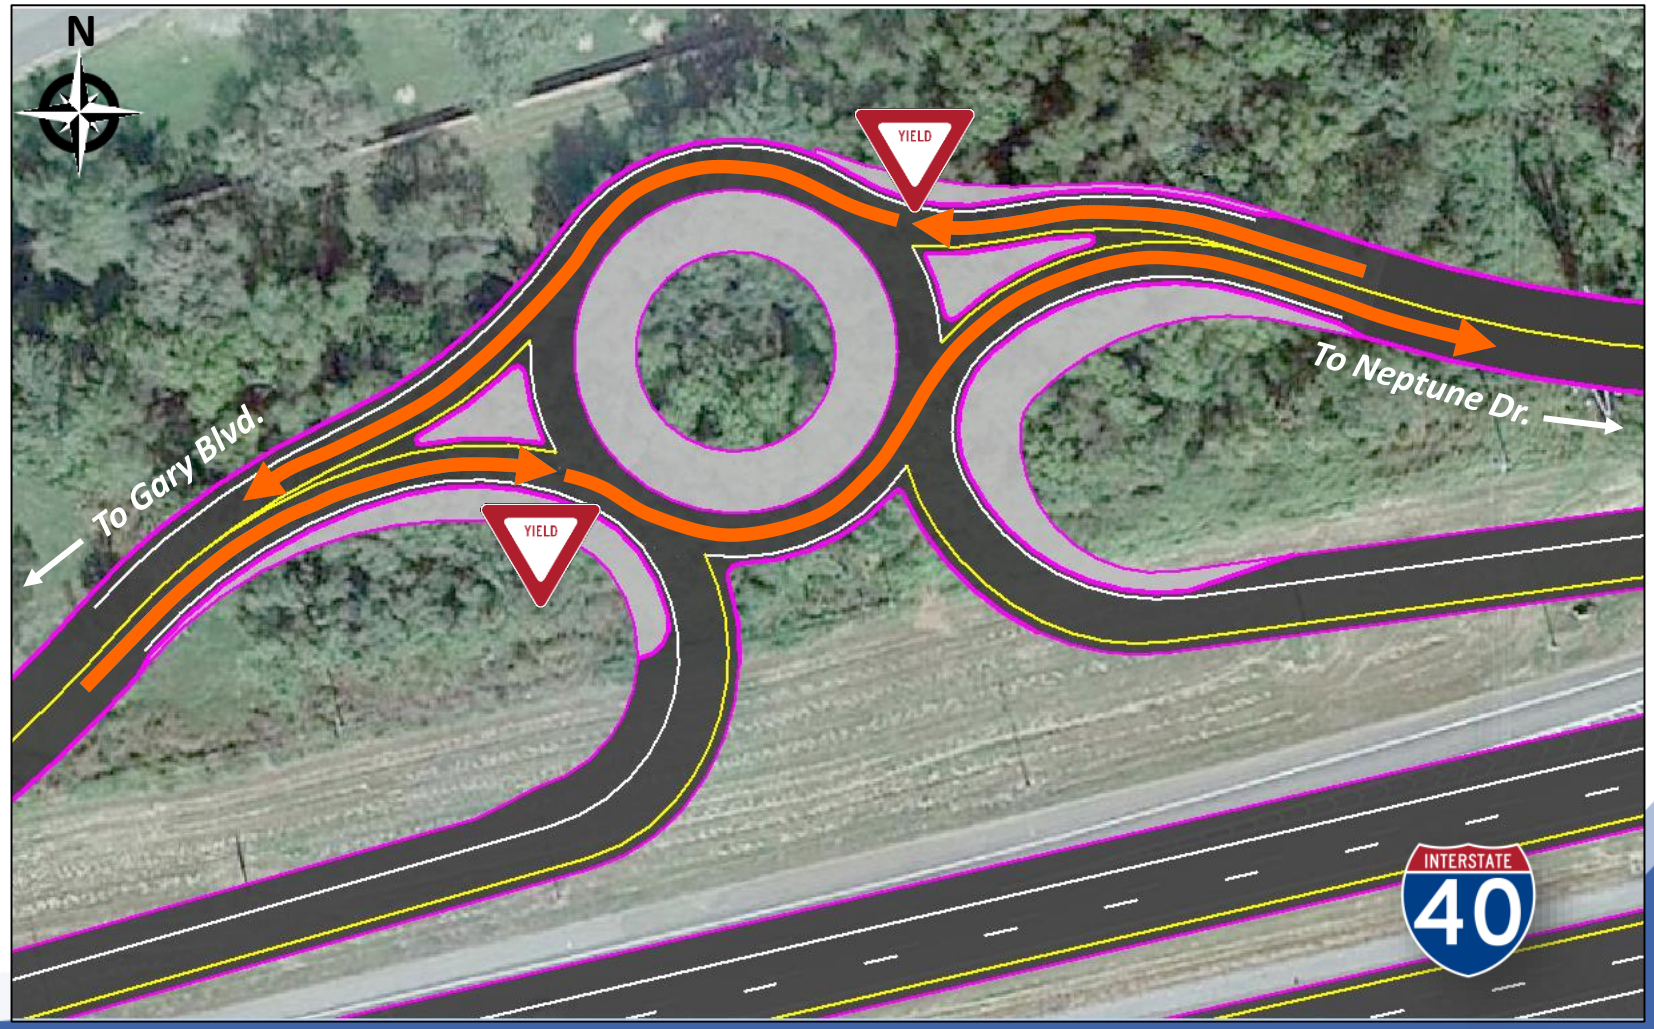

- Difficult to Make Wrong Way Turns Onto Ramps

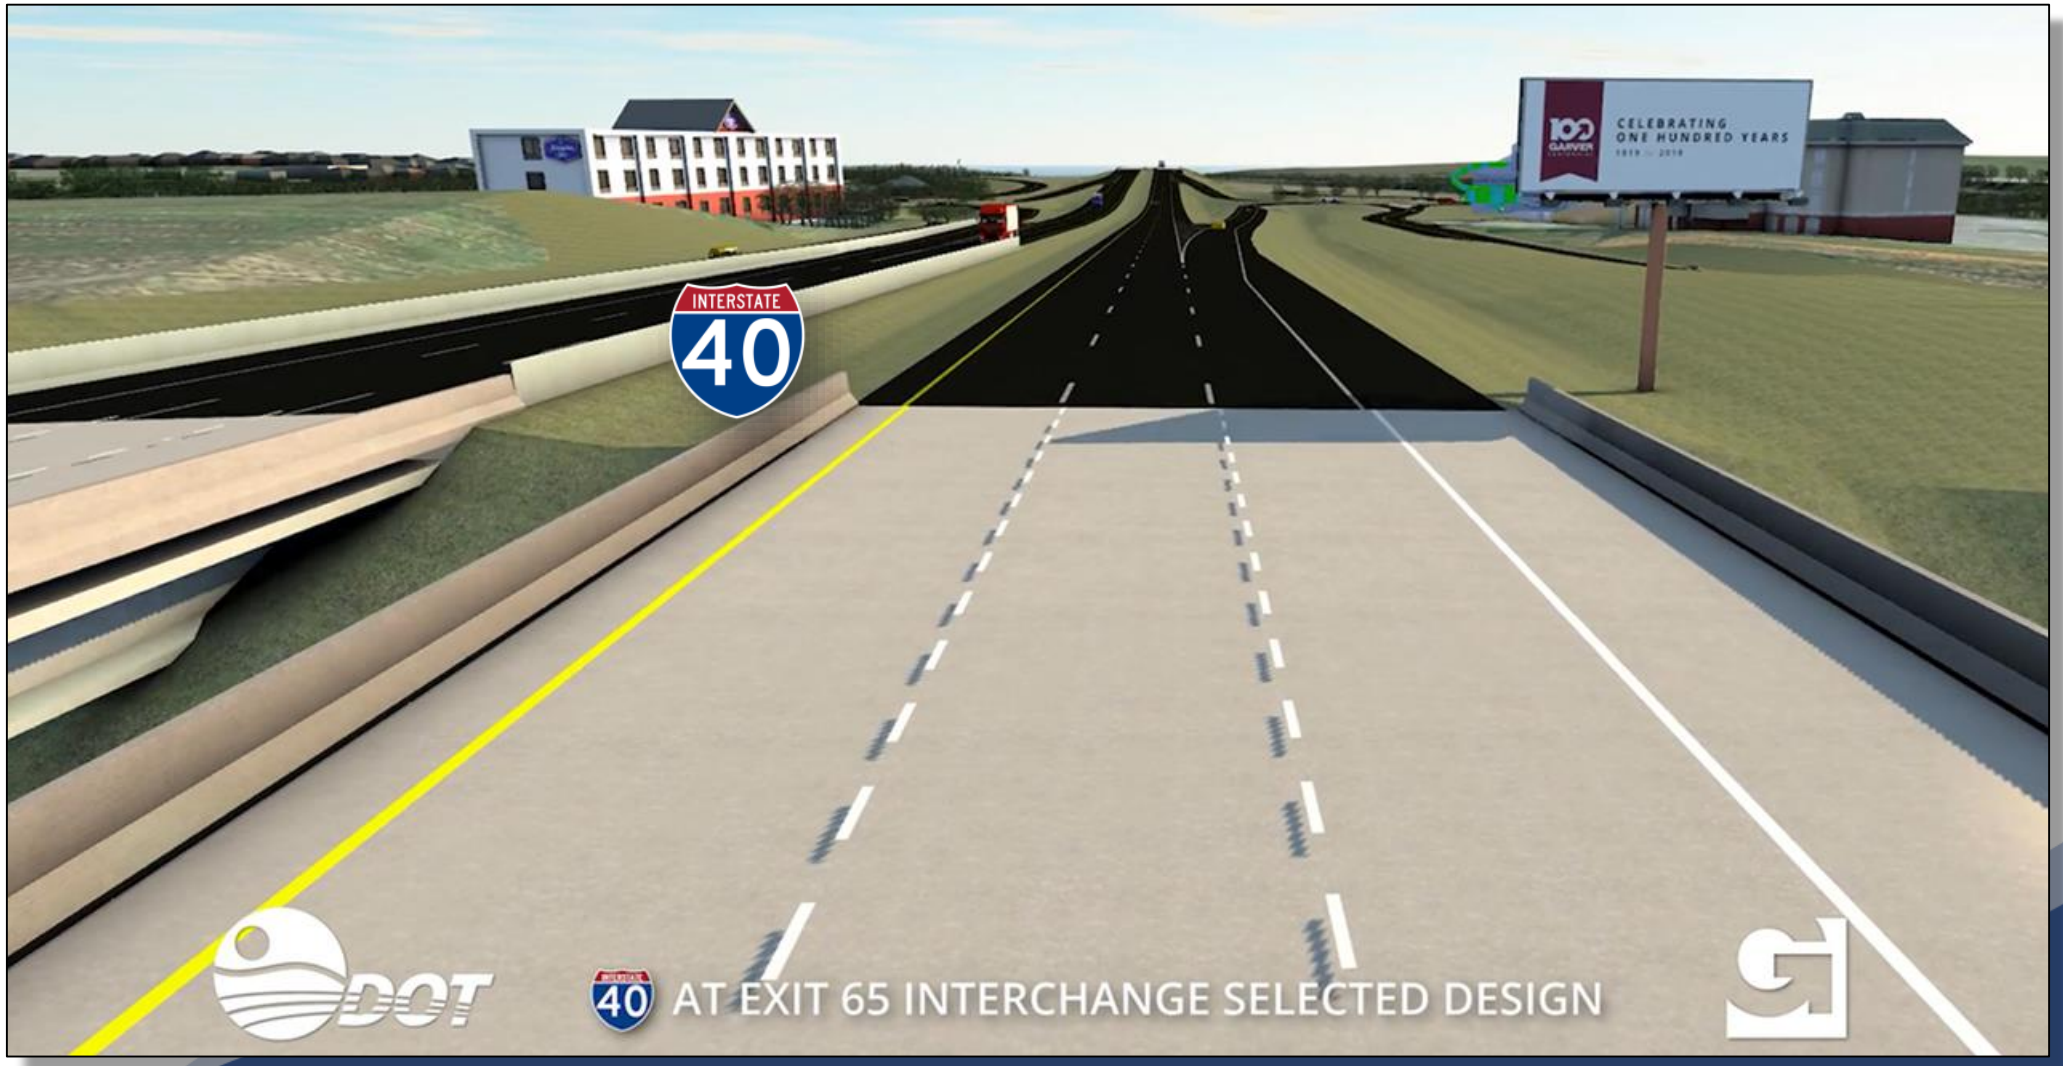

Maneuver Thru the Roundabout

3D Visualization

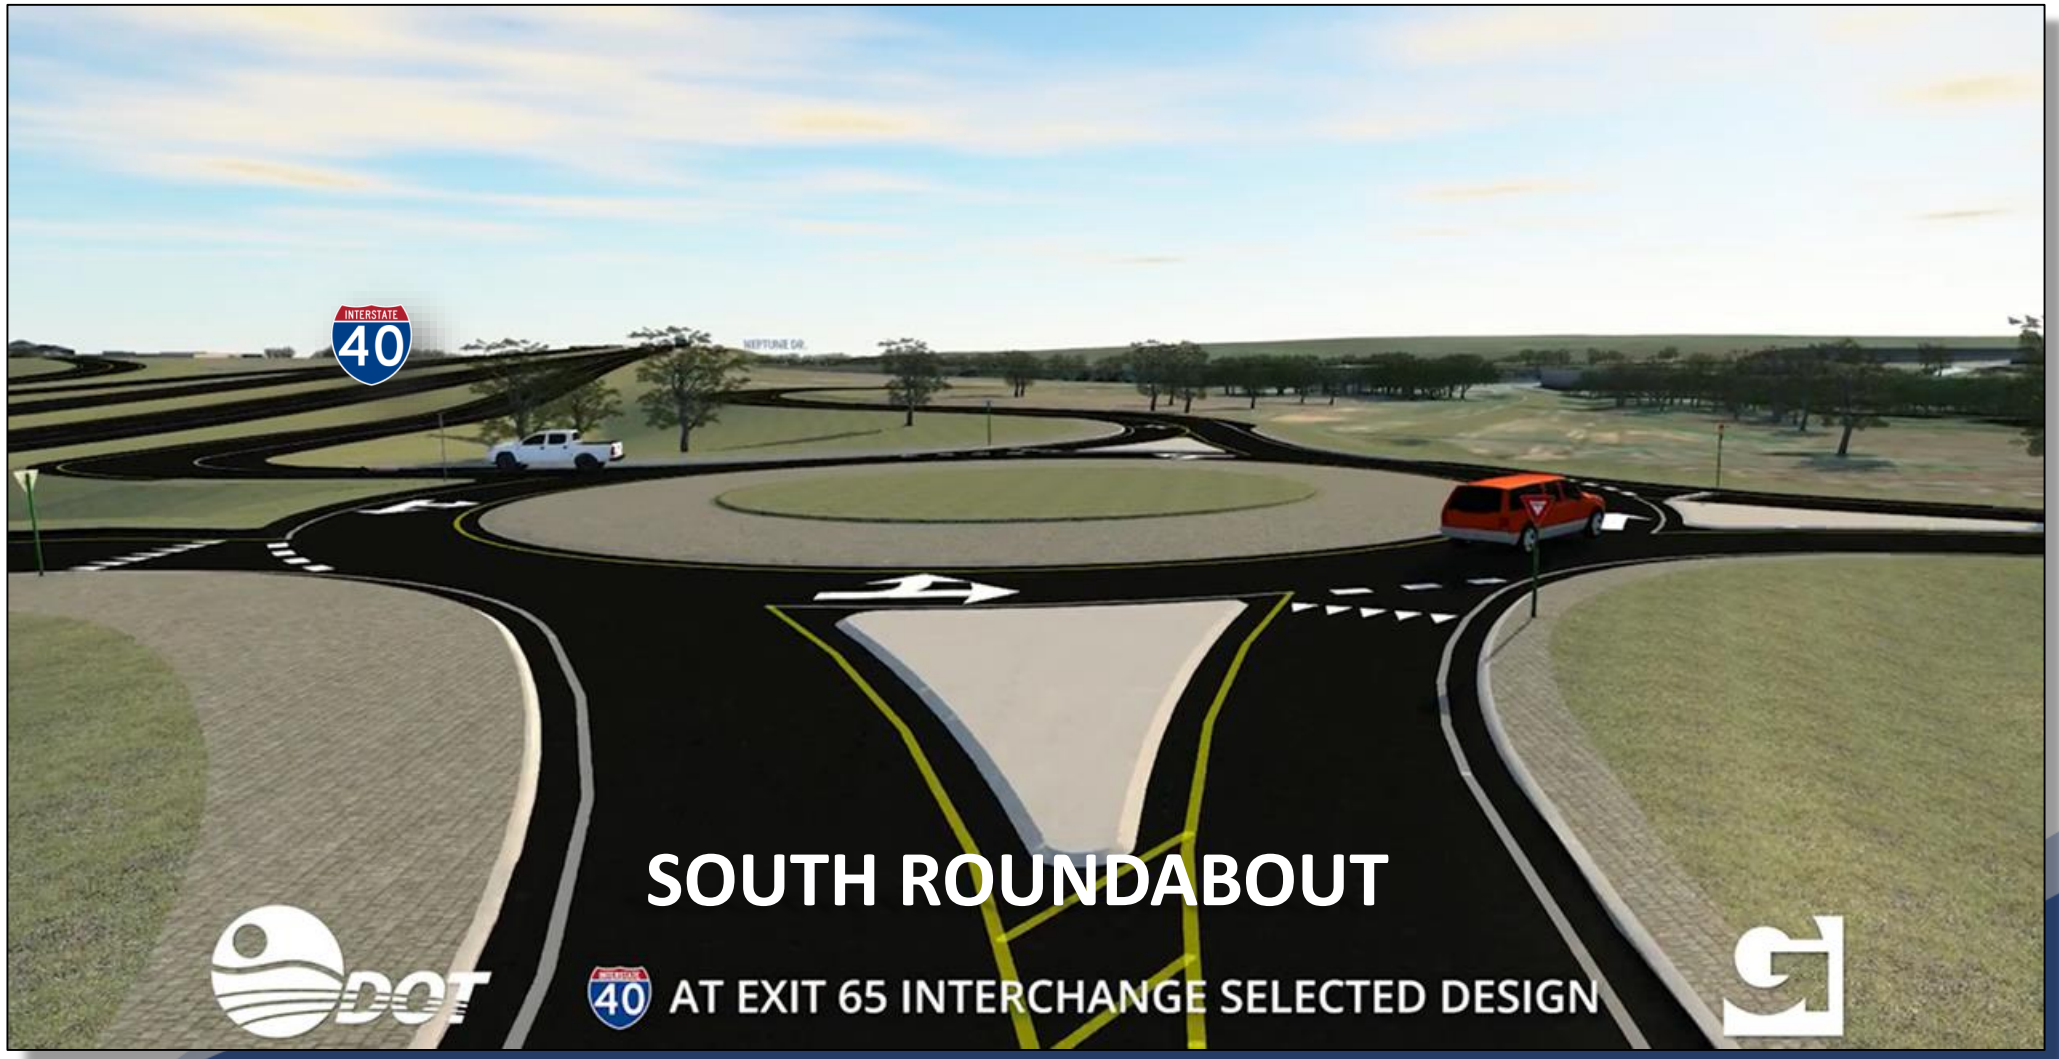

3D Visualization

3D Visualization

What are the Impacts?

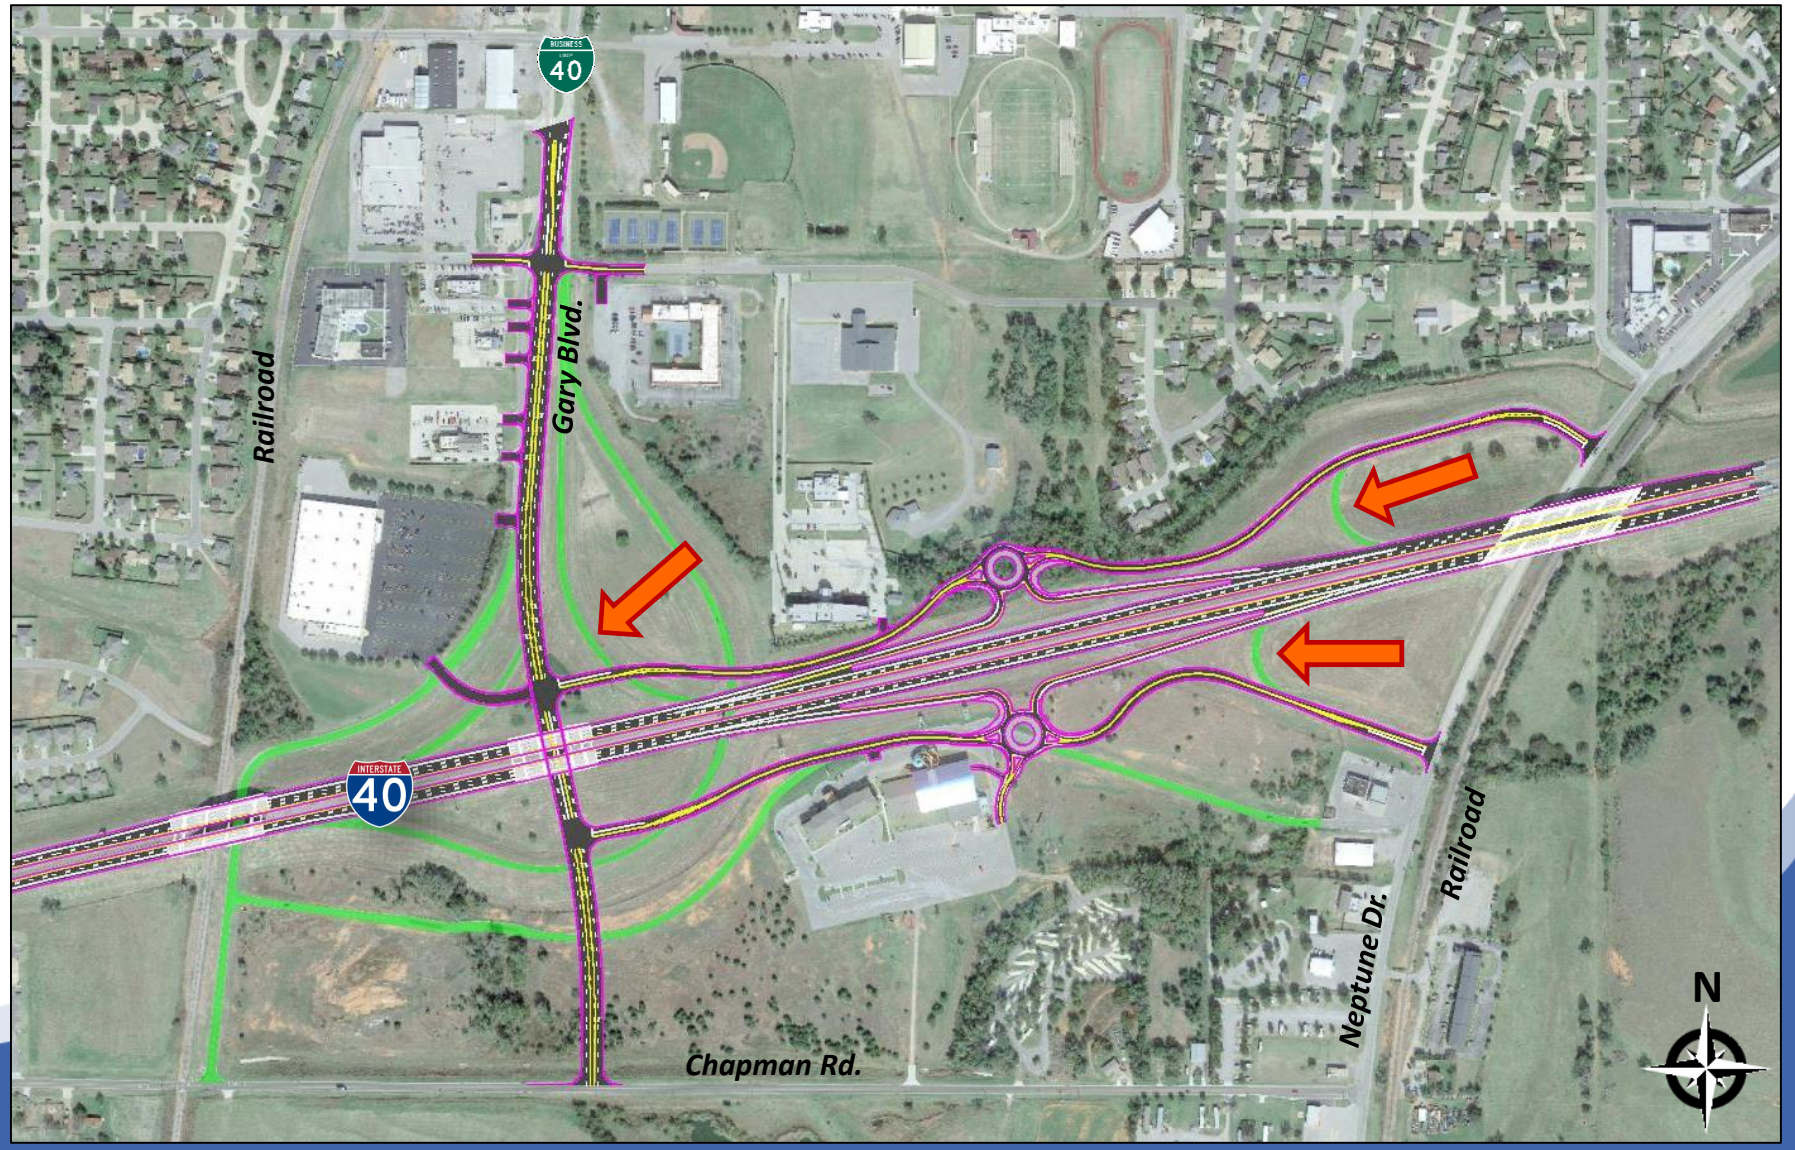

- Construction Cost Estimated at $37.9M
- Purchase of Land (no Relocations Anticipated)
- Potential to Sell Surplus Land

ODOT
Oklahoma Department of Transportation

Maintenance of Traffic During Construction

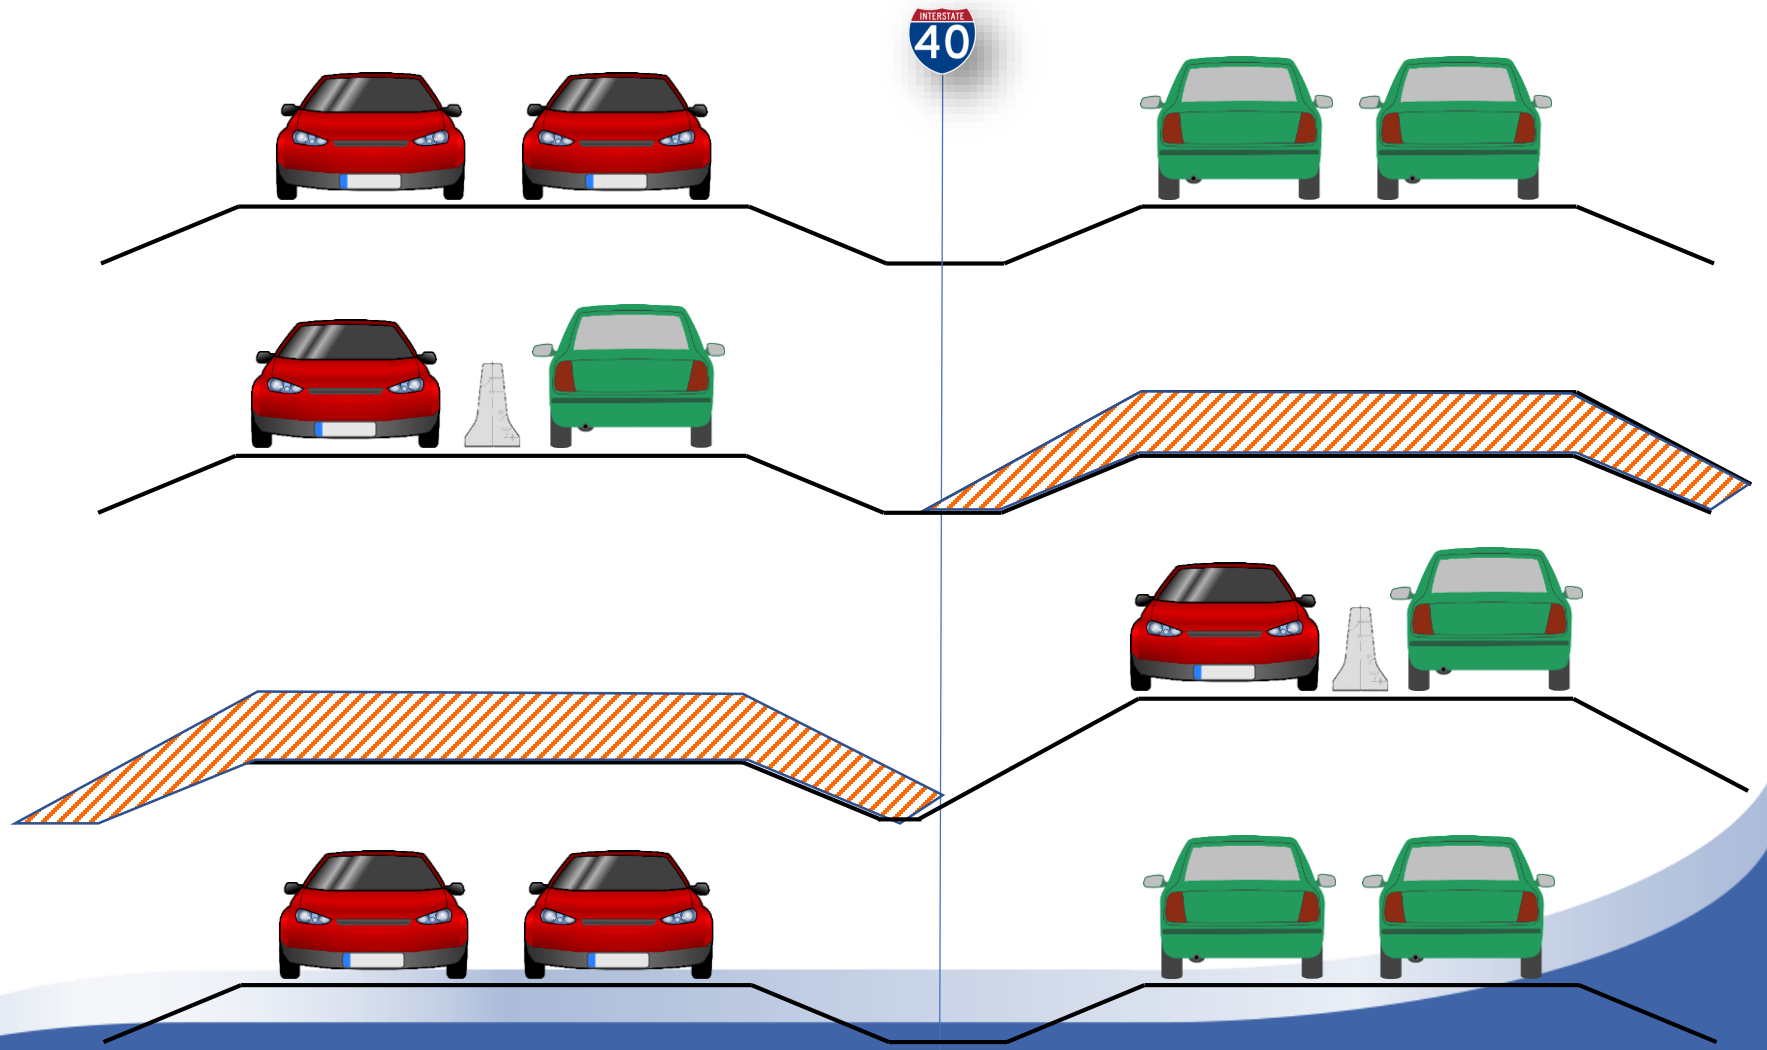

- One Ramp in Each Direction Will Remain Open at Either Gary Blvd. or Neptune Dr.
- A Temporary Ramp Will be Constructed and Used for Travelers Wanting to go East on I-40
- I-40 Traffic Will be Shifted to one Side With one Lane in Each Direction

ODOT
Oklahoma Department of Transportation

Maintenance of Traffic During Construction

- One Ramp in Each Direction Will Remain Open at Either Gary Blvd. or Neptune Dr.
- A Temporary Ramp Will be Constructed and Used for Travelers Wanting to go East on I-40
- I-40 Traffic Will be Shifted to one Side With one Lane in Each Direction

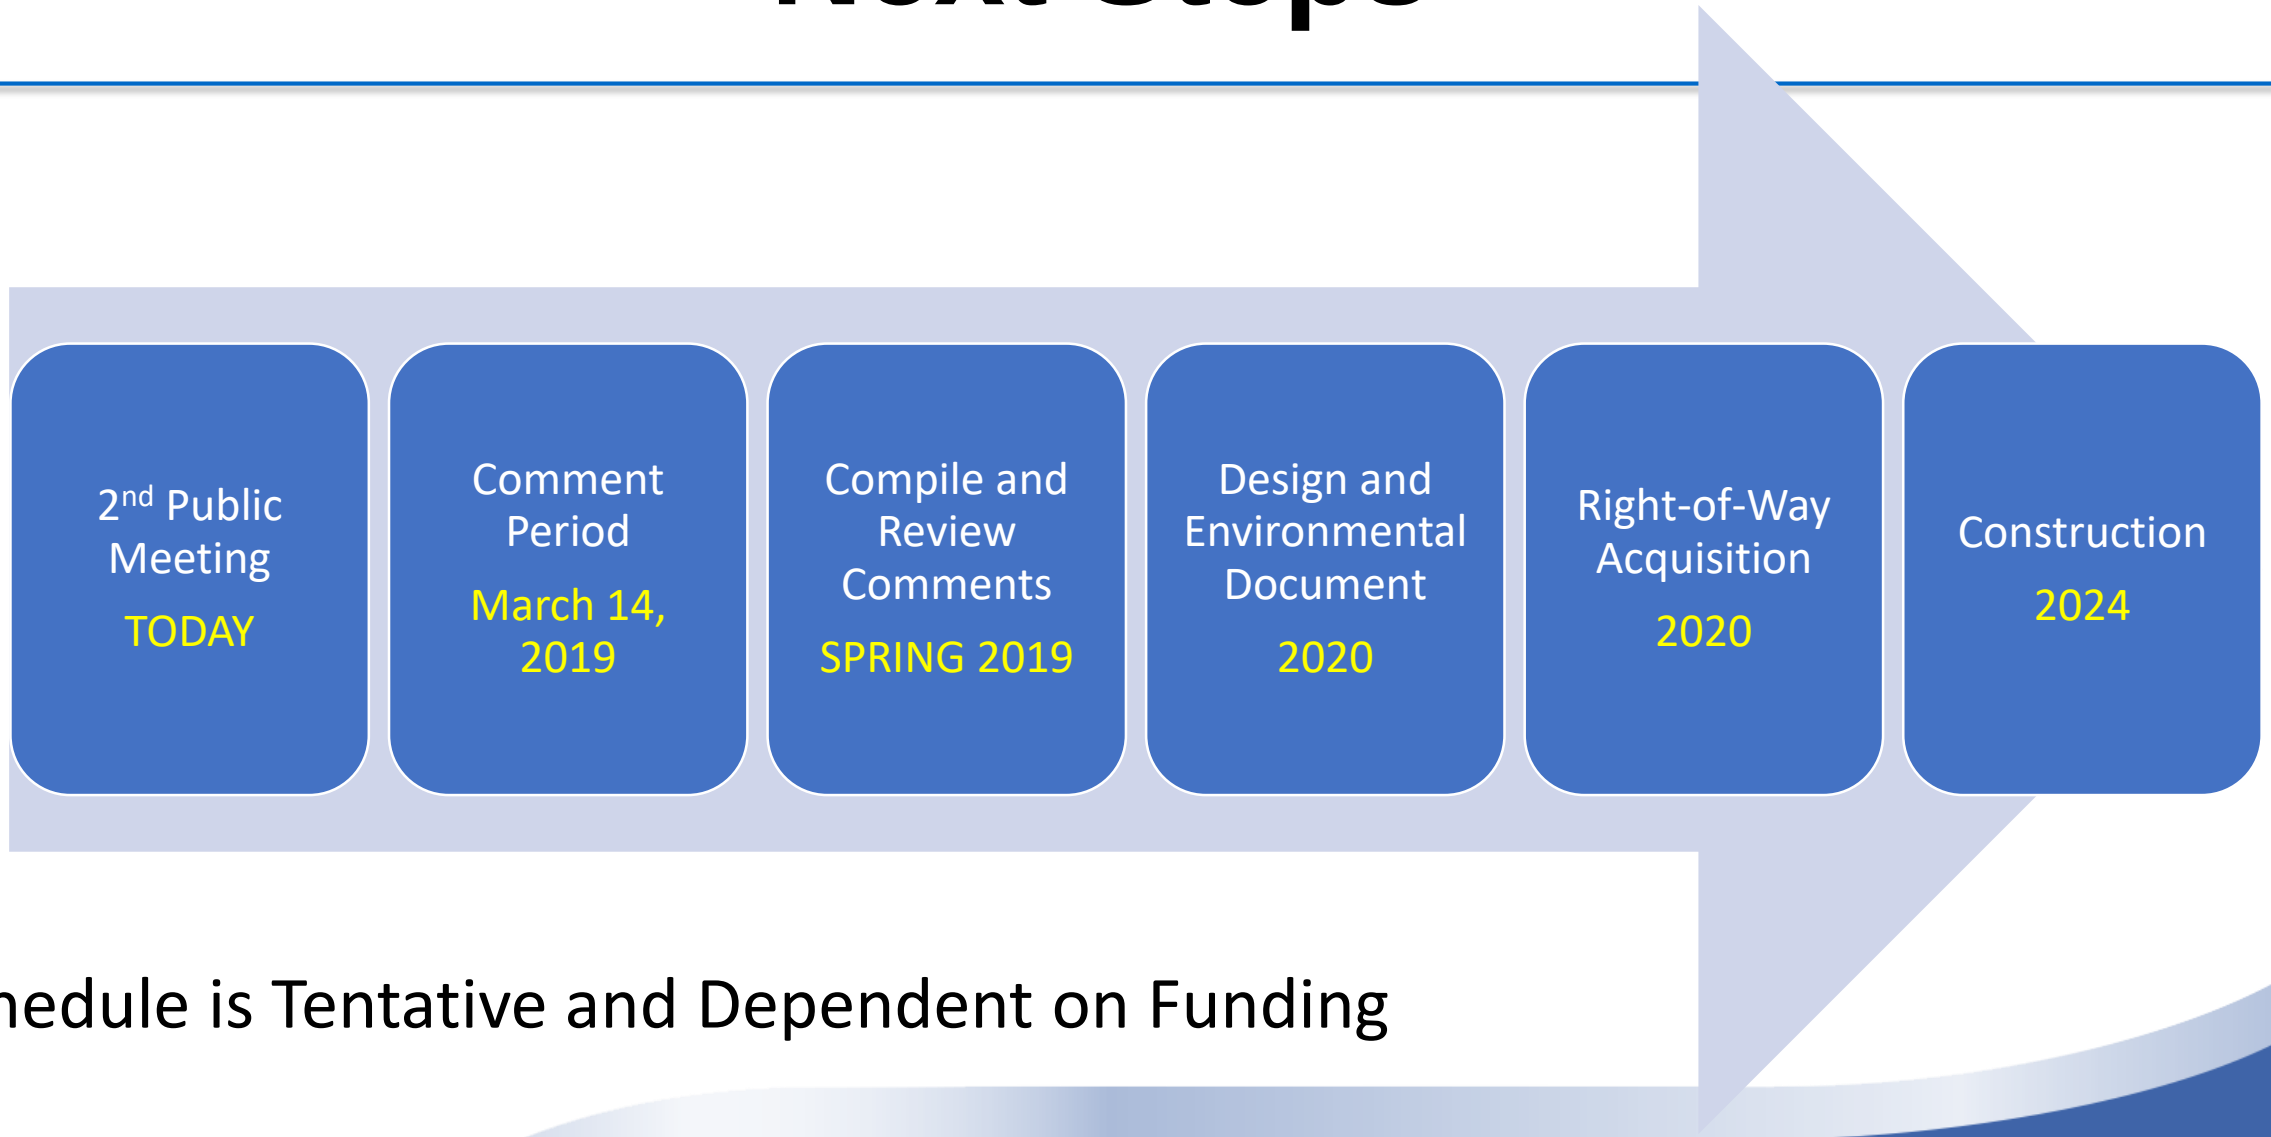

Oklahoma Department of Transportation

Impacts

- Environmental
  - Commercial Properties
    - Minor Changes in Access to Some Properties. No Relocations are Anticipated
  - Community Facilities
    - Some Land may be Required From Church Property
  - Route 66
    - Unlikely to be historically significant
  - Tennis Courts & Trees
    - Potential for Minor Temporary Impacts During Construction. Trees will be Avoided.
  - Small Portion of a Creek may Require Relocation
  - Noise
    - A Noise Study Will be Completed to Determine if There Will be Noise Impacts

Next Steps

Schedule is Tentative and Dependent on Funding

Public Meeting Handout and Display Boards

DOT PUBLIC MEETING

Oklahoma Department of Transportation

February 28th, 2019 @ 6:00 P.M

Frisco Conference Center | 101 South 4th Street | Clinton, OK 73601

I-40 Exit 65 (Gary Boulevard) • Custer County, OK • JP: 31482(04)
Presentation of the Selected Alternative

Purpose of Meeting:

To inform the public of the selected alternative for improvements to the I-40/Gary Boulevard and I-40/ Neptune Drive interchanges (Exits 65 and 65A).

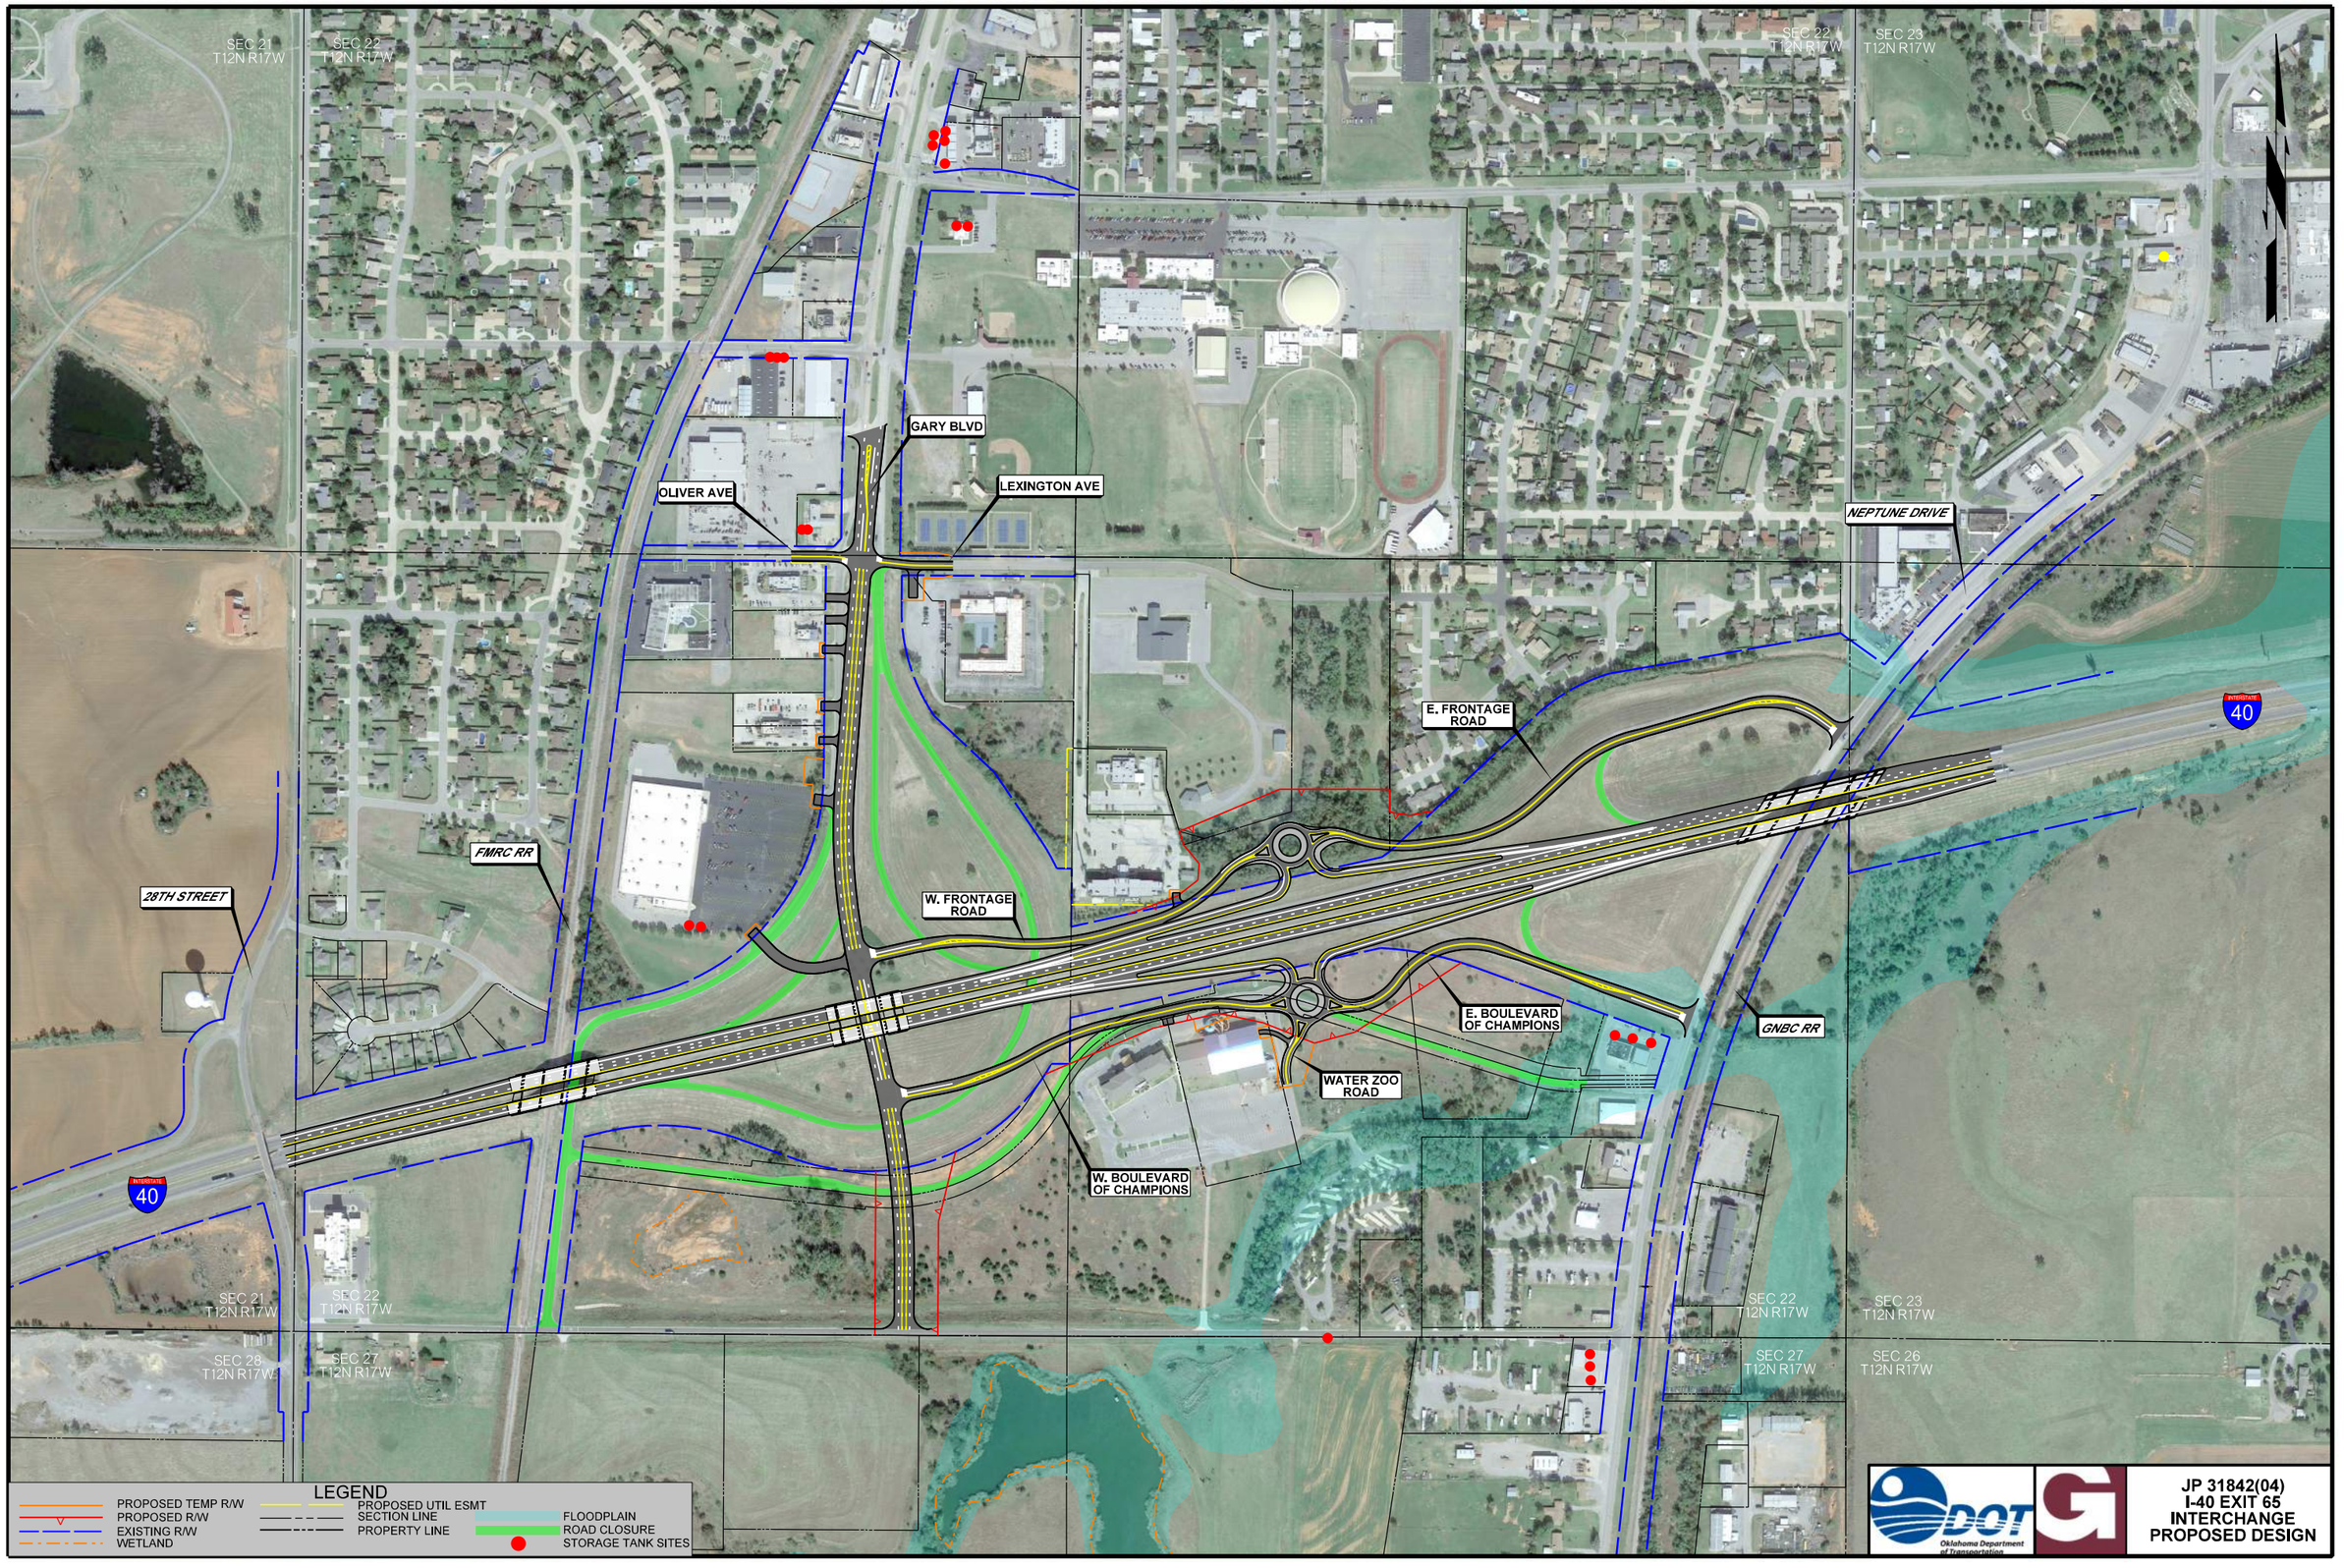

Project Background:

The Oklahoma Department of Transportation (ODOT) completed a study of six initial alternatives and held a public meeting on May 24, 2016 in Clinton to present these concepts and obtain comments. In response to public feedback, ODOT developed two additional alternatives to provide improved mobility on I-40 and improved access for both interstate and local traffic. These alternatives were evaluated taking into consideration construction costs, right-of-way and utility costs, and environmental constraints, which resulted in the selection of an alternative for the corridor. ODOT will present the selected alternative at this second public meeting.

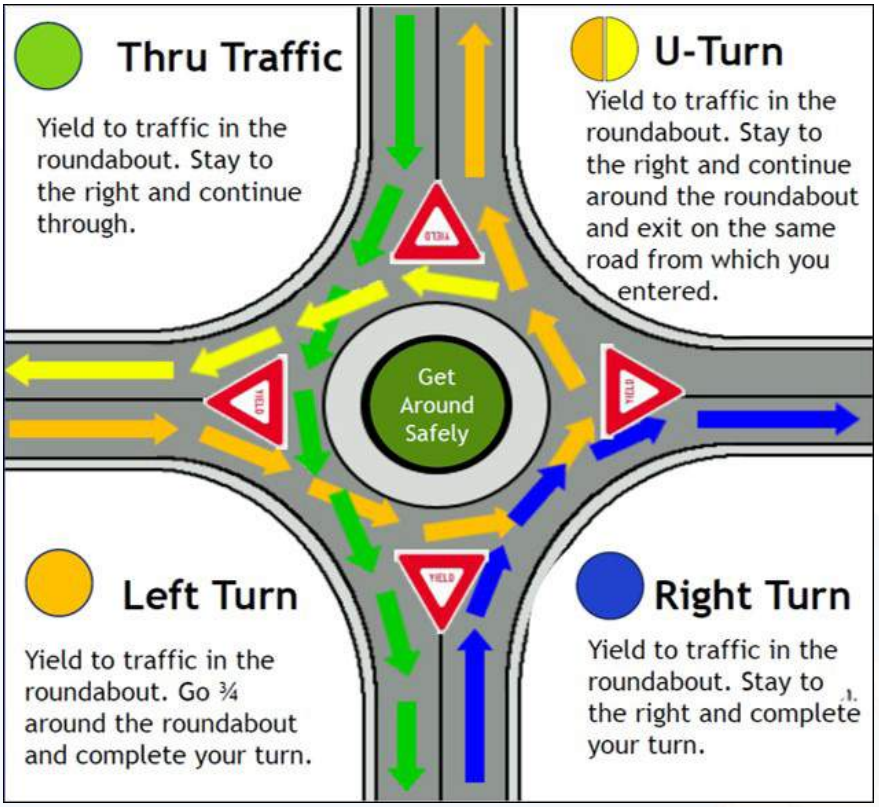

Purpose and Description of Current Project:

The purpose of this project is to improve safety, traffic operations, and improve mobility in the I-40 corridor and to make improvements to adjacent local streets and intersections. The current interchange ramps (Exit 65 – Gary Boulevard and Exit 65A – Neptune Dr.) are close in proximity, contributing to traffic flow issues along Gary Boulevard. Additionally, the City of Clinton is continuing to experience commercial growth, which is anticipated to generate future traffic volumes beyond the capacity of the existing interchange and adjacent intersections. The selected design alternative will consolidate Exit 65 and Exit 65A into one new interchange by utilizing two-way frontage roads with modern roundabouts at each frontage road midpoint. This design will provide access to both directions of I-40 from Gary Boulevard and Neptune Drive. The project will also improve local road traffic operations and access to current and future businesses by extending Gary Boulevard south to Chapman Road and providing businesses with direct access. Red Wheat Drive will no longer be needed and will be removed. The intersection of Gary Boulevard with Oliver Drive/Lexington Avenue will be improved to a more traditional four-leg intersection to reduce driver confusion.

PROJECT INFORMATION SUMMARY

- Total Estimated Cost of this project: **$37.9 Million**
- Right-of-Way & Utility Relocation programmed to start in: **2020**
- Construction programmed to start in: **2024**
- Current Annual Average Daily Traffic (AADT) in year 2018: **20,000 Vehicles per day**
- Future Estimated AADT by year 2050: **30,700 Vehicles a day**
- I-40 may be reduced to one lane in each direction during construction. Access to I-40 will remain open in all directions via Exit 65 and/or Exit 65A

*Totals DO NOT include *Toll Roads*

DIVISION 5 ENGINEER: BRENT ALMQUIST, P.E.

**Totals DO NOT include *County Bridges*

***Total Road Miles:**
1,592.47

***Total Interstate Miles:**
86.27

****Total Bridges:**

Oklahoma Department of Transportation

DOT REUNIÓN PÚBLICA

28 de febrero de 2019 a las 6:00 p. m.
Frisco Conference Center | 101 South 4th Street | Clinton, OK 73601

I-40 Salida 65 (Gary Boulevard) • Condado de Custer, Oklahoma • JP: 31482(04)
Presentación de la alternativa seleccionada

Propósito de la reunión:

Informar al público sobre la alternativa seleccionada para las mejoras en las intersecciones I-40/Gary Boulevard y I-40/Neptune Drive (Salidas 65 y 65A).

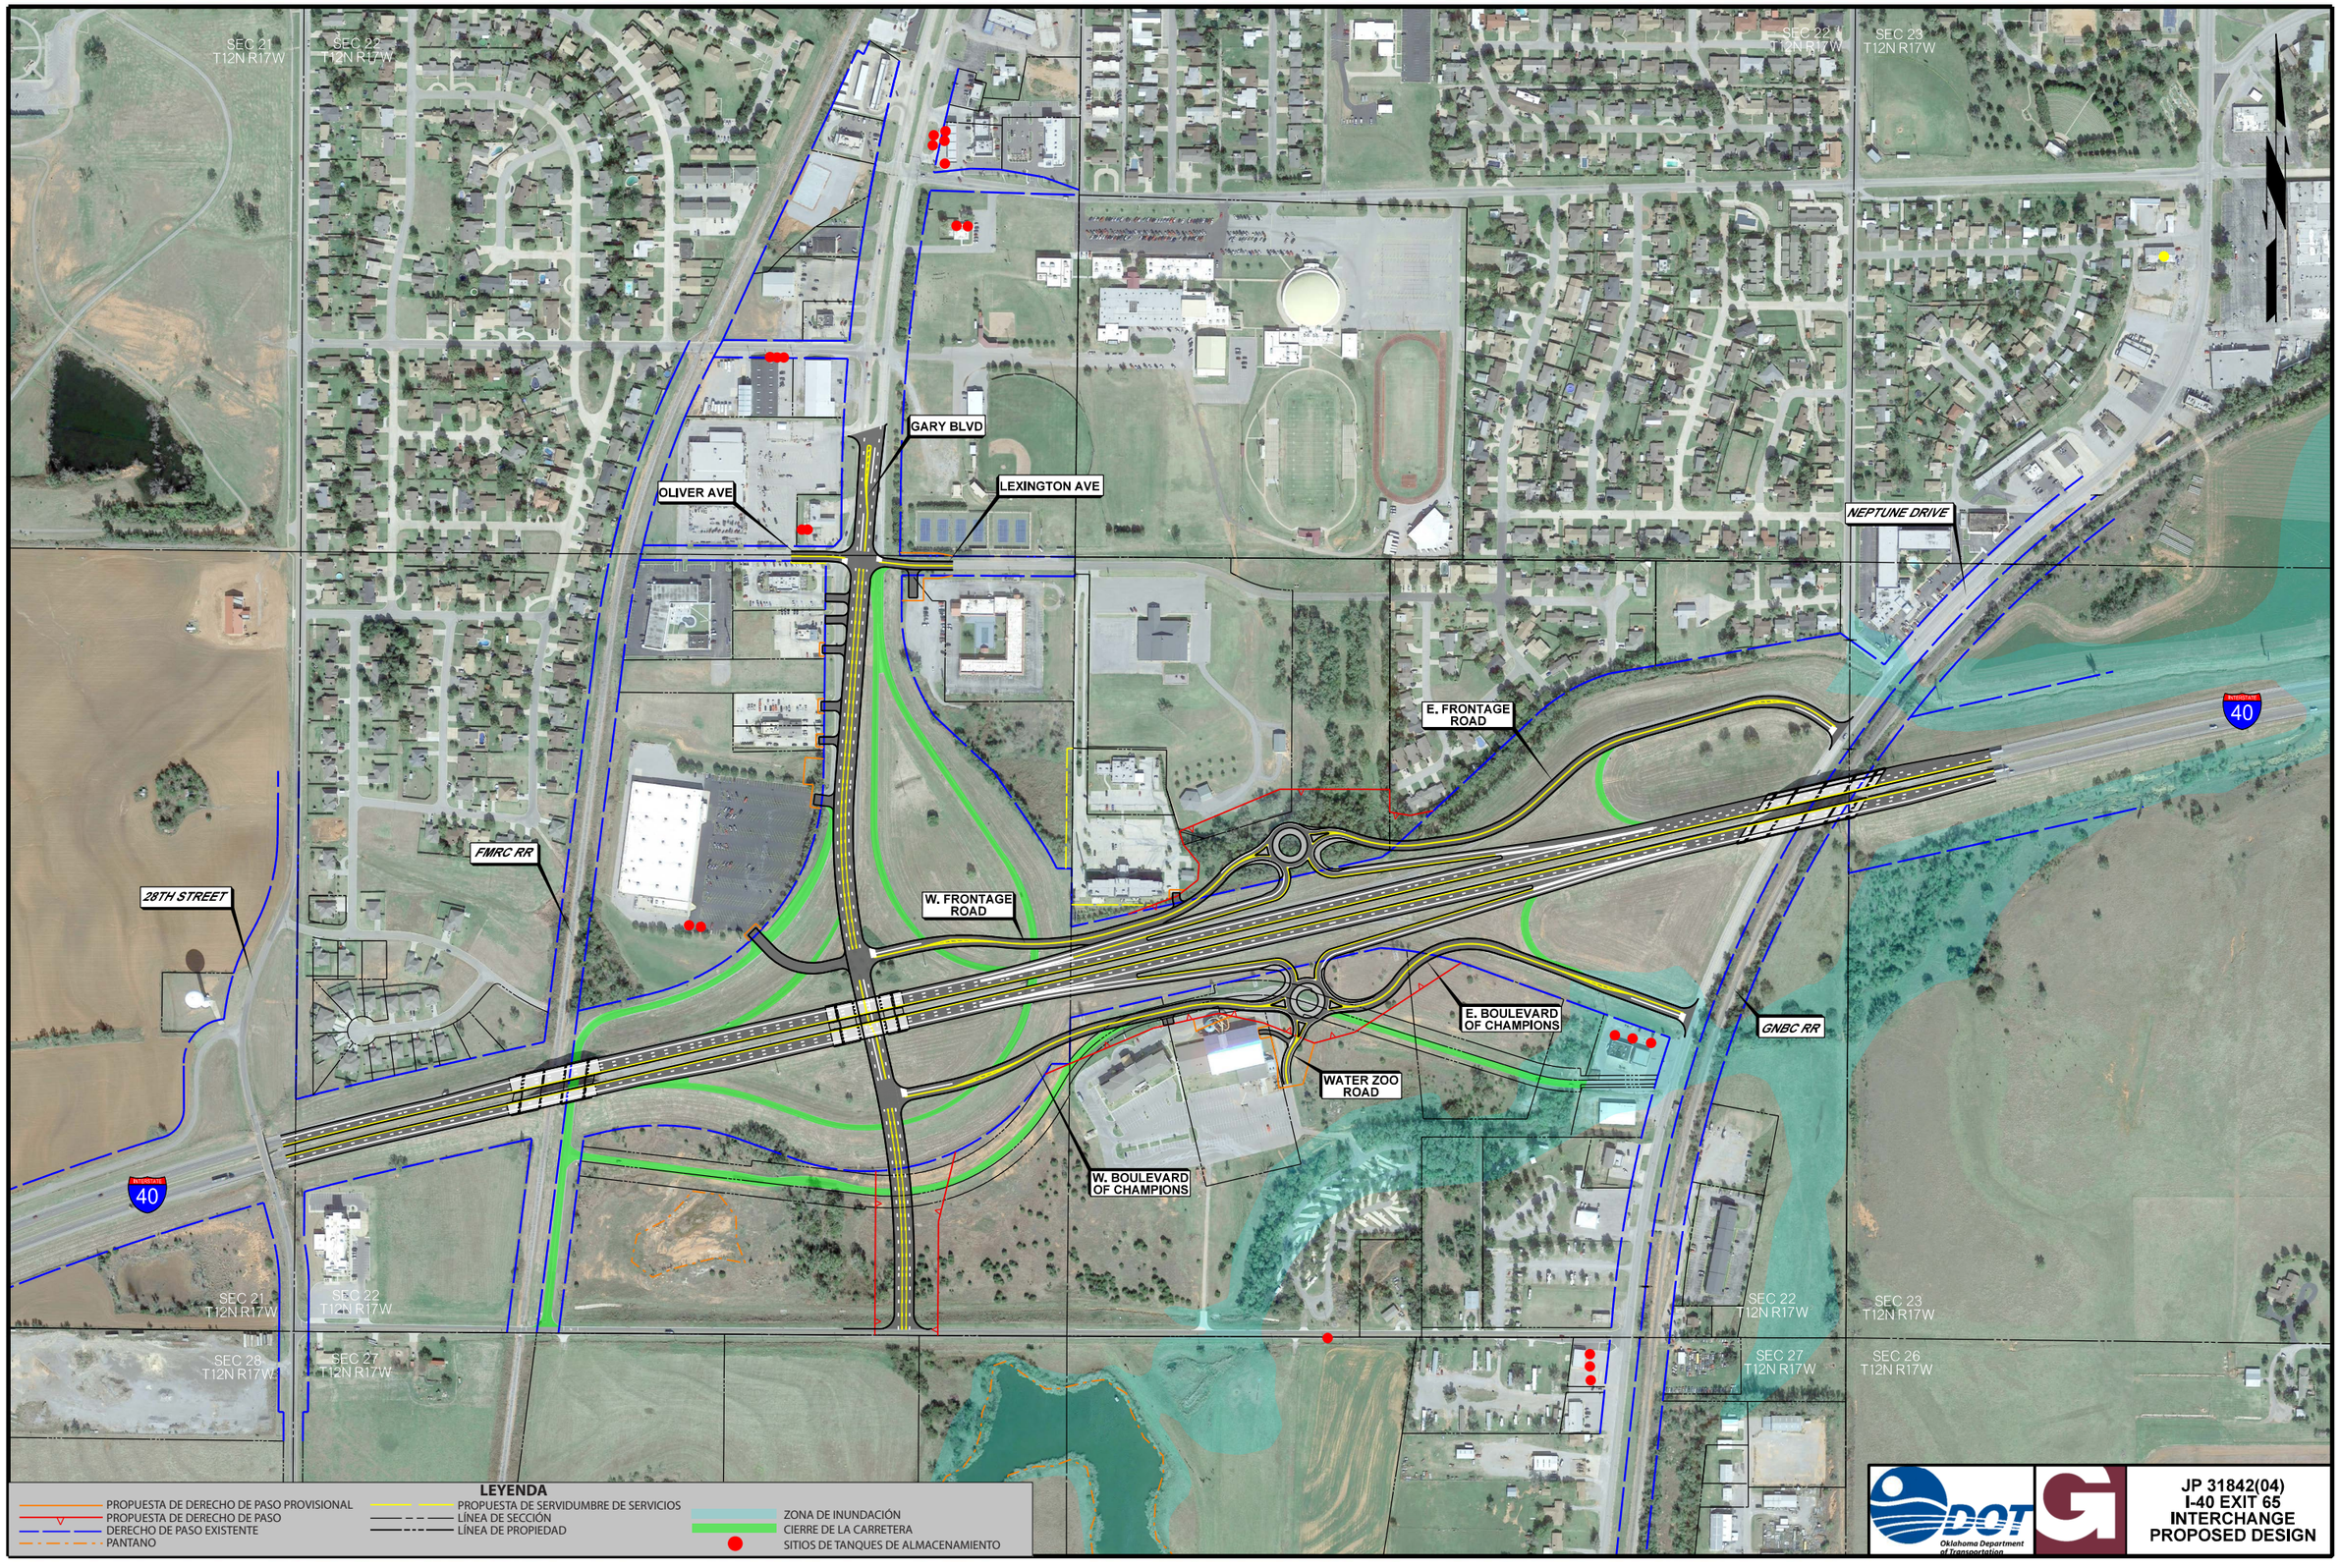

Antecedentes del proyecto:

El Departamento de Transporte de Oklahoma (Oklahoma Department of Transportation, ODOT) completó un estudio de seis alternativas iniciales y llevó a cabo una reunión pública el 24 de mayo de 2016 en Clinton para presentar estos planteamientos y obtener comentarios. En respuesta a los comentarios del público, el ODOT desarrolló dos alternativas adicionales para mayor movilidad en la I-40 y mejor acceso para el tráfico interestatal y local. Se evaluaron estas alternativas con base en los costos de construcción, de derecho de paso y de servicios públicos, así como en las restricciones ambientales, lo que dio como resultado la selección de una alternativa para el corredor. El ODOT presentará la alternativa seleccionada en esta segunda reunión pública.

Propósito y descripción del proyecto actual:

El propósito de este proyecto es mejorar la seguridad, las operaciones de tráfico y la movilidad en el corredor de la I-40 y hacer mejoras en las calles e intersecciones adyacentes. Las actuales rampas de intersección (salida 65 - Gary Boulevard y salida 65A - Neptune Dr.) están muy cerca, lo que se añade a los problemas de flujo de tráfico a lo largo de Gary Boulevard. Además, la ciudad de Clinton sigue experimentando un crecimiento comercial, que se anticipa que puede generar futuros volúmenes de tráfico más allá de la capacidad de la intersección existente y de las adyacentes. La alternativa seleccionada de diseño consolidará la salida 65 y la salida 65A en una nueva intersección mediante la utilización de vías laterales de doble sentido con modernas rotondas en el punto medio de cada vía. Este diseño proporcionará acceso a ambas direcciones de la I-40 desde Gary Boulevard y Neptune Drive. Además, mejorará las operaciones de tráfico local y el acceso a las empresas actuales y futuras mediante la ampliación de Gary Boulevard hacia el sur hasta Chapman Road y el acceso directo a las empresas. La Red Wheat Drive ya no será necesaria y será eliminada. Se mejorará la intersección de Gary Boulevard con Oliver Drive/Lexington Avenue a una intersección más tradicional de cuatro tramos para reducir la confusión del conductor.

RESUMEN DE LA INFORMACIÓN DEL PROYECTO

- Costo estimado total de este proyecto: **$37.9 millones**
- Derecho de paso y reubicación de servicios públicos programados para comenzar: **2020**
- Construcción programada para comenzar: **2024**
- Promedio anual de tráfico diario (Annual Average Daily Traffic, AADT) actual en el año 2018: **20,000 vehículos por día**
- AADT futuro estimado para el año 2050: **30,700 vehículos al día**
- I-40 puede reducirse a un carril en cada dirección durante la construcción. El acceso a la I-40 permanecerá abierto en todas las direcciones a través de la salida 65 o la salida 65A

* Las cifras totales NO incluyen *las autopistas de peaje*

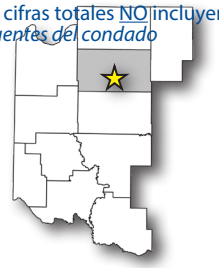

INGENIERO DE LA DIVISIÓN 5: BRENT ALMQUIST, INGENIERO PROFESIONAL

***Número total de millas de carretera:**

Sugerencias (continuación)

FHWA-SA-08-006

"Personally, I love them, and I'll tell you why. You only have to stop one lane of traffic, then go to the middle and wait. The cars can't go much faster than 20 mph through the roundabout so the crossing aspect is great."

Denise Haltom
School Crossing Guard, Suamico, Wisconsin
Green Bay Press-Gazette
February 6, 2001

"We have had a lot of people not very happy about the idea of roundabouts, but after they are constructed, those fears mostly go away."

Brian Walsh
Washington State Department of Transportation
Seattle Times
June 5, 2002

"We all know people speed up to get through a yellow light. But at the roundabout, all the vehicles have to slow down ... we have almost 50 roundabouts now, we have a lot [fewer] personal injuries. We have fewer fatalities."

James Brainard
Mayor, City of Carmel, Indiana

November 8, 2007

Safe Roads for a Safer Future
Investment in roadway safety saves lives

Education is key.

Education is vital to the acceptance and success of a roundabout. Navigating a roundabout is easy. But because people can be apprehensive about new things, it's important to educate the public about roundabout use.

There are just a few simple guidelines to remember when driving through a roundabout:

1. Slow down.
2. If there's more than one lane, use the left lane to turn left, the right lane to turn right, and all lanes to go through, unless directed otherwise by signs and pavement markings.
3. Yield to pedestrians and bicyclists.
4. Yield at the entry to circulating traffic.
5. Stay in your lane within the roundabout and use your right-turn signal to indicate your intention to exit.
6. Always assume trucks need all available space — don't pass them!
7. Clear the roundabout to allow emergency vehicles to pass.

Visit **safety.fhwa.dot.gov** to learn more about roundabouts

U.S. Department of Transportation
Federal Highway Administration

Design standards for roundabouts continue to evolve, and not all features of existing roundabouts meet current recommended practice. Please refer to FHWA's web site for recommendations on current design practice.

Original source photo by Lee Rodegerdts. Photo has been altered to illustrate roundabout and updated signage.

Roundabouts

A Safer Choice

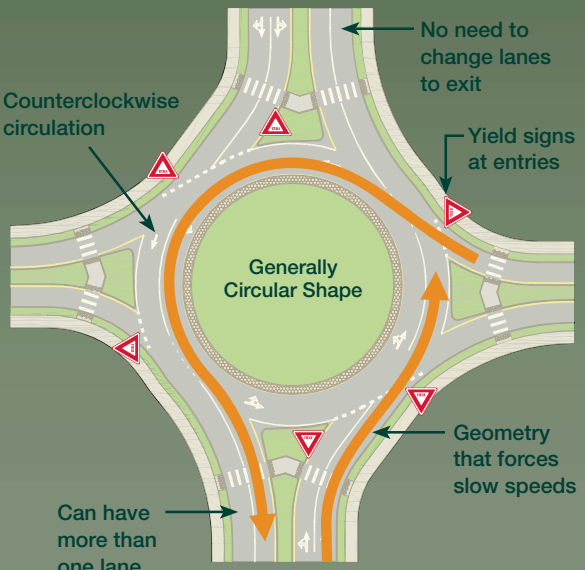

What is a roundabout?

A roundabout is a type of circular intersection with yield control of entering traffic, islands on the approaches, and appropriate roadway curvature to reduce vehicle speeds.

Modern roundabouts are different from rotaries and other traffic circles. For example, roundabouts are typically smaller than the large, high-speed rotaries still in use in some parts of the country. In addition, roundabouts are typically larger than neighborhood traffic circles used to calm traffic.

A roundabout has these characteristics:

Source: *Roundabouts: An Informational Guide*. Federal Highway Administration, Washington, D.C., latest version, except as noted.

Why consider a roundabout?

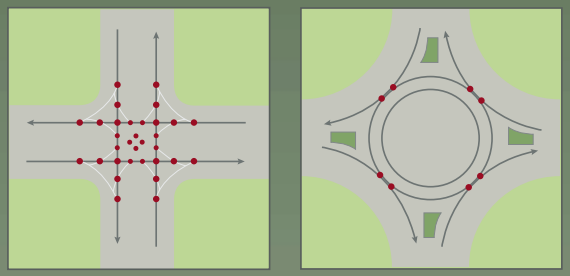

Compared to other types of intersections, roundabouts have demonstrated safety and other benefits.

Roundabouts:

> Improve safety

- More than 90% reduction in fatalities*
- 76% reduction in injuries**
- 35% reduction in all crashes**
- Slower speeds are generally safer for pedestrians

With roundabouts, head-on and high-speed right angle collisions are virtually eliminated.

[Traditional intersection] [Roundabout]

● Potential vehicle conflict point

* "Safety Effect of Roundabout Conversions in the United States: Empirical Bayes Observational Before-After Study." Transportation Research Record 1751, Transportation Research Board (TRB), National Academy of Sciences (NAS), Washington, D.C., 2001.

** NCHRP Report 572: Roundabouts in the United States. National Cooperative Highway Research Program, TRB, NAS, Washington, D.C., 2007.

> Reduce congestion

- Efficient during both peak hours and other times
- Typically less delay

> Reduce pollution and fuel use

- Fewer stops and hard accelerations, less time idling

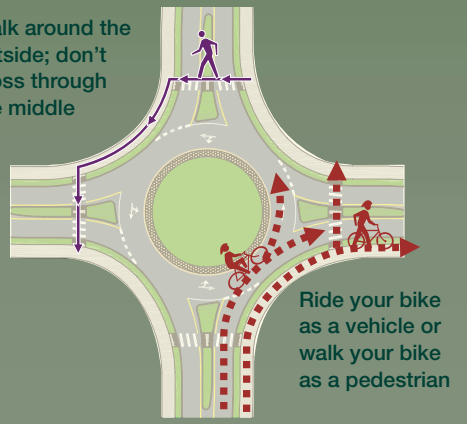

> Save money

- Often no signal equipment to install, power, and maintain
- Smaller roundabouts may require less right-of-way than traditional intersections
- Often less pavement needed

> Complement other common community values

- Quieter operation
- Functional and aesthetically pleasing

Tips for safely walking and biking through a roundabout

Research is ongoing on additional treatments and design considerations to address the needs of visually impaired pedestrians.

FHWA-SA-08-006

"En lo personal me encantan, y le diré por qué. Usted sólo debe hacer detener un carril de tráfico, luego pasar al carril central y esperar. Los vehículos no pueden andar más rápido de 20 millas por hora cuando transitan en la rotonda, de manera que en el aspecto del cruce de peatones es maravilloso."

Denise Haltom
Guardia de cruce escolar, Suamico, Wisconsin
Green Bay Press-Gazette
6 de febrero de 2001

"Muchas personas no se muestran muy contentas con la idea de las rotondas, pero cuando estas son construidas, por lo general sus temores desaparecen."

Brian Walsh
Departamento de Transporte del estado de Washington
Seattle Times
5 de junio de 2002

"Todos sabemos que las personas aceleran para pasar un semáforo en amarillo, pero en la rotonda, todos los vehículos deben disminuir la velocidad. Ahora contamos con aproximadamente 50 rotondas, y tenemos mucho menos lesiones personales y ocurren menos fatalidades."

James Brainard
Alcalde, Ciudad de Carmel, Indiana
www.nbc17.com
8 de noviembre de 2007

Safe Roads for a Safer Future
Investment in roadway safety saves lives

La educación es clave.

La educación es de vital importancia para la aceptación y el éxito de una rotonda. El transitar en una rotonda es fácil, pero debido a que algunas veces la gente puede sentir miedo ante las cosas nuevas es importante educar al público acerca del uso de las rotondas.

Los siguientes son algunos consejos sencillos para recordar cuando se conduce por una rotonda:

1. Desacelerar.
2. Si hay más de un carril, usar el carril izquierdo para girar a la izquierda; el carril derecho para girar a la derecha; y todos los carriles para continuar transitando, a menos que se indique de otro modo mediante señales y marcas en el pavimento.
3. Ceder el paso a los peatones y ciclistas.
4. Ceder el paso a la entrada al tránsito que ya está circulando dentro de la rotonda.
5. Mantenerse en su carril dentro de la rotonda y usar su señal de giro a la derecha para indicar su intención de salir.
6. Asumir siempre que los camiones necesitan todo el espacio disponible; no intente pasarlos.
7. Despejar la rotonda para permitir el paso de los vehículos de emergencia.

Visite el sitio safety.fhwa.dot.gov para obtener más información acerca de las rotondas.

U.S. Department of Transportation
Federal Highway Administration

Las normas de diseño para las rotondas siguen evolucionando, y no todas las características de las rotondas existentes cumplen con las normas recomendadas vigentes. La página de Internet de la FHWA proporciona las recomendaciones sobre las normas de diseño vigentes.

09-0876

Rotondas

Una elección más segura

¿Qué es una rotonda?

Una rotonda es una intersección de tipo circular con control de acceso del tránsito que ingresa a ella, con islas en las aproximaciones y curvaturas apropiadas en la vía para reducir la velocidad de los vehículos.

Las rotondas modernas son diferentes de las glorietas y otras intersecciones rotatorias de tránsito. Por ejemplo, las rotondas son normalmente más pequeñas que las glorietas grandes y de alta velocidad, que todavía se utilizan en algunas partes del país. Además, usualmente, las rotondas son más grandes que las intersecciones rotatorias de tránsito usadas en los vecindarios para disminuir el tránsito.

Una rotonda tiene las siguientes características:

Fuente: Roundabouts: An Informational Guide. Federal Highway Administration, Washington, D.C., última versión, excepto como se indica. Disponible en Inglés solamente.

¿Por qué considerar una rotonda?

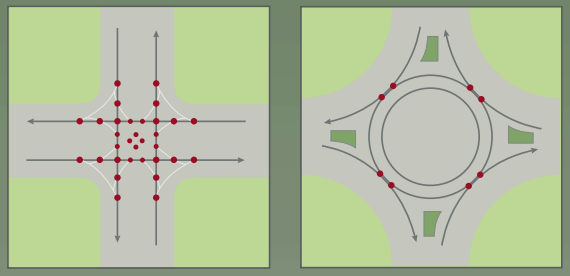

En comparación con otros tipos de intersecciones, las rotondas han demostrado ofrecer seguridad además de otros beneficios.

Las rotondas:

> Mejoran la seguridad

- Reducción de muertes en más del 90%*
- Reducción de lesiones del 76%**
- Reducción de todo tipo de colisión del 35%**
- Las velocidades más bajas generalmente son más seguras para los peatones

Las rotondas prácticamente eliminan las colisiones de frente y de ángulos rectos a gran velocidad.

[Intersección tradicional] [Rotonda]

● Punto potencial de conflicto de vehículos

* "Safety Effect of Roundabout Conversions in the United States: Empirical Bayes Observational Before-After Study." Transportation Research Record 1751, Transportation Research Board (TRB), National Academy of Sciences (NAS), Washington, D.C., 2001. Disponible en Inglés solamente.

** NCHRP Report 572: Roundabouts in the United States. National Cooperative Highway Research Program, TRB, NAS, Washington, D.C., 2007. Disponible en Inglés solamente.

> Reducen la congestión

- Eficacia durante horas de mayor afluencia vial, así como otras horas de menor tráfico
- Generalmente significan menos demoras

> Reducen la contaminación y el gasto de combustible

- Menos paradas y aceleraciones forzadas, menos tiempo en detenimiento

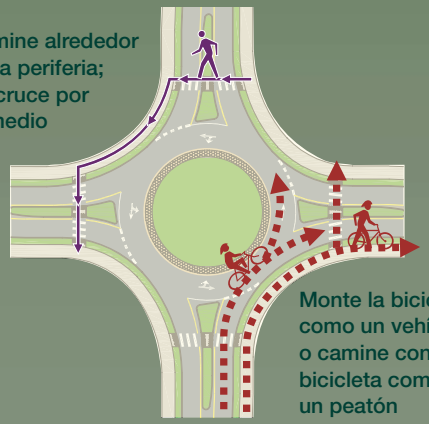

> Ahorran dinero

- Por lo general, no se requiere instalar, accionar y mantener ningún equipo de señalización
- Las rotondas más pequeñas pueden requerir menos situaciones de derechos de paso que las intersecciones tradicionales
- Suelen necesitar menos pavimento

> Complementan otros valores comunes de la comunidad

- Operación más silenciosa
- Son funcionales y estéticamente agradables

Consejos para caminar y andar en bicicleta de forma segura por una rotonda

Se están llevando a cabo investigaciones sobre tratamientos adicionales y consideraciones de diseño para atender las necesidades de los peatones con limitaciones visuales.

Oklahoma City, OK 73105-3204

Dear Mr. Sundaram:

Thank you for extending the opportunity to the Bureau of Land Management (BLM) Oklahoma Field Office to provide comments on the following proposed project:

Custer County
I-40 interchange improvements and intersection modification at Exit 65, I-40B West Jct. in Clinton. Job Piece No. 31842(04).

Our office has reviewed the information provided in your January 24, 2019, letter. A search of our files shows there are no BLM surface lands or Federal minerals within or near the project area. There are no BLM administered Indian mineral interests near or within the project area. Therefore, the BLM has no concerns or objection to the proposal.

Sincerely,

John Ledbetter
Realty Specialist

Oklahoma Department of Transportation
200 N. E. 21st Street
Oklahoma City, OK 73105-3204

Dear Ms. Sundaram:

Thank you for the opportunity to comment on the proposed improvements to I-40 between South 28th Street and Neptune Drive, including the I-40 & Gary Boulevard Interchange in the City of Clinton, Custer County, Oklahoma (Project Number: JP 31842[04]. Your description of the project indicates that it is in the early developmental stage and a final plan has yet to be determined.

A review of Bureau of Indian Affairs (BIA) maps of the planned project location indicates that there are tribal or Individual Indian trust lands within the project area. The BIA has jurisdiction within the project area and there are concerns that the proposed improvements will impact Indian trust lands within the jurisdiction of the Southern Plains Region. This office would like clarification and consultation as to what improvements will be made once the design is finalized.

It is recommended that you contact the Cheyenne and Arapaho Tribes as they have historic ties to the area and should be consulted to address concerns that they might have regarding the potential for this project to impact sites of importance to their respective histories or cultural traditions.

If any additional information is required, please contact David Anderson, Regional Environmental Scientist, Southern Plains Region, Bureau of Indian Affairs, at (405) 247-1532.

Sincerely,

Regional Director

RE: JP# 31842(04)

On behalf of the Tribal Historic Preservation Office of the Cheyenne and Arapaho Tribes, thank you for the notice of the referenced project. I have reviewed your Consultation request under Section 106 of the National Historic Preservation Act regarding the project proposal and have commented as follows.

At this time, it is determined to be categorized as **No Adverse Effect;** However, if at any time during the project implementation should any change orders occur which would affect the current APE, or if inadvertent discoveries are made that reflect **additional** evidence of traditional cultural properties (TCP) such as: ceremonial or celebration objects, stone rings, villages, burial mounds, battlefield artifacts, or human remains please cease work immediately, in area of discovery and notify the Cheyenne Arapaho THPO Office within 72 hours.

Also, if inadvertent discoveries are made; pursuant to Title 36 Code of Federal Regulation Part 800.13, as amended; you will also be required to make arrangements for a professional archaeologist to visit the site of discovery and assess the potential significance of any artifacts or features that were unearth. If human remains are discovered State and Tribal NAGPRA representatives will be contacted and protocols will be executed.

Please contact me with the THPO ID number at (405) 422-7482 or chrednose@c-a-tribes.org, if you have any questions or concerns. Thank you again for your notification!

>
> There is a Land and Water Conservation park that would be adversely impacted by widening and decreasing the buffer and landscape on the margin of the tennis courts at Gary Blvd. The grass and trees provide a pleasant landscape at this entrance to the school and the shopping and eating opportunities in Clinton Oklahoma. In general, western Oklahoma is an area of prairie landscape, with trees only along the creeks and rivers. However, the existing trees along Gary Boulevard add a sense of established settlement and sense of place to Clinton. If there was damage by a wildfire or ice storm, the area would be rebuilt, and landscaping would be counted as a damage. Therefore, road expansion causing damage and eventual replacement would be a cost to the sense of continuity. It would be a cost to replace and rebuild.
>
> With regard to the active recreation resource provided by the tennis courts, the cost to students' opportunities to participate in this sport, as well as adults in this sport would be diminished and there would be more noise from traffic if the buffer were decreased. If any school or city land not designated as highway or street right of way is taken, it must be replaced and the costs absorbed by the city. The City must notify us of their intentions to address the conversion of use and work with us to resolve the differences. The land used to replace any parkland taken cannot be currently designated as park land use. This process is complicated and costly. It diminishes opportunities for other recreational projects to make progress. Information is available on the web on the National Park Service website under the Land and Water Conservation Fund program. The following is a picture of the area in question as well as the area designated on the map included with your letter dated January 24, 2019.

Subject: Environmental Impact Review

Dear Ms. Sundaram:

In response to your request, we have completed an environmental review of air, land and water records for the project listed below. Additional recommendations to consider may be found at https://go.usa.gov/xnhCE.

Project
Letter dated January 24, 2019 – I-40 Exit 65 Interchange Improvements, Clinton, Custer County, OK

Comment
While no environmental concerns under DEQ jurisdiction are anticipated, please be aware of the following regulatory requirements.

Prior to beginning any construction activity disturbing more than one acre, you must submit an NOI and obtain authorization under OKR10, construction stormwater.

Future requests may be submitted electronically to EnvReviews@deq.ok.gov by attaching a single pdf file containing your request and any attachments.

Thank you for the opportunity to provide our comments. If you have any questions or need clarification, please contact me.

Regards,

OKLAHOMA AERONAUTICS COMMISSION

February 11, 2019

Siv Sundaram, P.E.
Environmental Programs Division Engineer
Oklahoma Department of Transportation
200 Northeast 21st Street
Oklahoma City, OK 73105-3204

Re: Solicitation for Input Regarding I-40 Interchange Improvements and Intersection Modification at Exit 65, I-40B West Jct. in Clinton, Custer County, Oklahoma, JP 31842(04)

Dear Ms. Sundaram,

This is in reference to your January 24, 2019 letter concerning the changes to the I-40 interchange improvements, and intersection modification at Exit 65, in the town of Clinton. The Commission would like to draw your attention to the CFR Title 14 Part 77.13, which states that any person/organization who intends to sponsor any of the following construction or alterations must notify the Administrator of the FAA:

- any construction or alteration exceeding 200 ft above ground level
- any construction or alteration:
  - within 20,000 ft of a public use or military airport which exceeds a 100:1 surface from any point on the runway of each airport with at least one runway more than 3,200 ft
  - within 10,000 ft of a public use or military airport which exceeds a 50:1 surface from any point on the runway of each airport with its longest runway no more than 3,200 ft
  - within 5,000 ft of a public use heliport which exceeds a 25:1 surface
- any highway, railroad or other traverse way whose prescribed adjusted height would exceed the above noted standards
- when requested by the FAA
- any construction or alteration located on a public use airport or heliport regardless of height or location

Based on the limited information provided in your letter and our cursory review, the potential project **does not** appear to pose a hazard to the safe and efficient use of

110 N. Robinson Ave., Suite 200 • Oklahoma City, OK 73102 • (405) 604-6900 (405) 604-6919 Fax

navigable airspace. However, sometimes the most critical items affecting navigable airspace can be construction equipment (cranes, etc.), light poles and fixtures. Because of this, the Commission recommends that you use FAA's notice criteria tool (at the web address given below) to determine if a 7460-1 form needs to be filed with the FAA.

https://oeaaa.faa.gov/oeaaa/external/gisTools/gisAction.jsp?action=showNoNoticeRequiredToolForm

If a 7460-1 form is required for any permanent structure with this project please inform the Commission as soon as possible. You could be required to file a tall structure permit, under the rules of the Aircraft Pilot and Passenger Protection Act, with the Commission. Should you have any questions in the matter, please do not hesitate to contact me at ctaber@oac.ok.gov or (405) 604-6910.

Sincerely,

Catherine Taber
Aviation Program Manager
Oklahoma Aeronautics Commission

RE: File #0885-19; I-40 Interchange Proposed Improvements Project, #JP-31842(04), Clinton, Custer County, Oklahoma

Dear Ms. Sundaram:

On February 7, 2019, we received your solicitation for input concerning the referenced project with your letter dated January 24, 2019. It is our understanding that the project is in its design review stage and that the preferred alternative has not yet been formalized. Upon review of the documentation provided, the preferred alternative involves improvements to I-40 between South 28th Street and Neptune Drive, including the I-40 and Gary Boulevard interchange (Exit 65) in the City of Clinton.

According to our files, the roadbed for Route 66 has been documented along Gary Boulevard, exit 65 and Neptune Drive. Below is a link to the Route 66 Roadbed thematic study that is available online. Page 28, item numbers 89, 90, and 91 provide a description of the roadbed in Clinton, and on Pages 83 and 84 maps are provided that depict the roadbed location in relation to the proposed project area.

Oklahoma Route 66 Roadbed Documentation Project (1926-1970) and A Survey of Roadbed and Integral Structures (2001-2002): https://www.okhistory.org/shpo/thematic/rt66roadbed.pdf

You or your representative are welcome to review the hard copy files for the thematic study in our office, and you should contact Sara Werneke, Historic Preservation Specialist, at 405/522-4478 to schedule an appointment for this purpose.

Should consultation on your project pursuant to Section 106 of the National Historic Preservation Act become necessary, it is our understanding that the Oklahoma Department of Transportation as delegated by the U.S. Department of Transportation, Federal Highway Administration, will formally initiate that process with our office.

If you have any questions, please do not hesitate to contact Catharine M. Wood, Historical Archaeologist, at (405) 521-6381. Thank you.

Sincerely,

Lynda Ozan
Deputy State Historic
Preservation Officer

RE: OAS FY19-0982 ODOT Proposes Improvements to I-40 Interchange, Intersection Modification at Exit 65, Clinton.
JP 31842(04).
Legal Description: S ½ of Section 22, T12N, R17W, Custer County, Oklahoma.

Dear Environmental Programs Division Engineer:

The Community Assistance Program staff of the Oklahoma Archeological Survey has received the above referenced project in order to identify area that may potentially contain prehistoric or historic archeological materials (historic properties). The location of your project has been crosschecked with the state site files containing approximately 26,500 archaeological sites, which are currently recorded for the state of Oklahoma. **No sites are listed in your project area, but based on the topographic and hydrologic setting of your project, archeological materials are likely to be encountered. An archaeological field inspection is considered necessary prior to project construction in order to identify significant archaeological resources that may exist in the project area.** This review has been conducted in cooperation with the Oklahoma SHPO. Please contact this office at (405) 325-7211 for additional information.

This environmental review and evaluation is done in cooperation with the State Historic Preservation Office, Oklahoma Historical Society. The responsible federal agency or their official delegate must also have a letter from that office to document consultation pursuant to Section 106 of the National Historic Preservation Act.

In addition to our review comments, under 36CFR Part 800.3 you are reminded of your responsibility to consult with the appropriate Native American tribe/groups to identify any concerns they may have pertaining to this undertaking and potential impacts to properties of traditional and/or ceremonial value.

Sincerely,

Alexandra S. Flores
Staff Archaeologist

RESOLUTION 889

A RESOLUTION OF DISSENT, REGARDING PLANS PROPOSED AT THE FEBRUARY 28, 2019 OKLAHOMA DEPARTMENT OF TRANSPORTATION PUBLIC MEETING FOR INTERCHANGE AND INTERSECTION MODIFICATION

WHEREAS, THE City of Clinton is in complete support and advocates for the modification and modernization of I-40 relating to Exit 65 and the work necessary to keep Exit 65A open and viable ("the Project");

WHEREAS, the staff of Division 5 of the Oklahoma Department of Transportation (ODOT) have diligently worked and considered options, which have been presented to the citizens of Clinton;

WHEREAS, on Thursday, May 24, 2016, the staff of Division 5 of ODOT presented the citizens of Clinton with five construction concepts to modernize Exit 65 as well as concepts to keep Exit 65A open;

WHEREAS, The citizens of Clinton were asked to make comments on the five concepts at the meeting, which would be evaluated by ODOT; and

WHEREAS, the Citizens were told that one of the five concepts would be chosen after consideration of the public comments;

WHEREAS, on Thursday, February 28, 2019 ODOT presented a Project proposal to the citizens of Clinton which differed from the five concepts presented to and commented on by Clinton citizens in 2016; and

WHEREAS, after discussion with the citizens and business owners the City of Clinton does not believe that the Project plans presented on February 28, 2019, resemble any of the five concepts presented in 2016 and is not in the best interest of the citizens of Clinton.

NOW, THEREFORE, be it resolved by the City Council of the City of Clinton:

1. The Council believes that the Project plans should be consistent with the concepts presented in 2016; and

2. The Council appreciates the ongoing work of the staff of Division 5 of ODOT and believes that the City and ODOT can work together in concert to identify the best plan among the original five concepts that adequately modernizes Exit 65 and keeps Exit 65A open.

Passed and approved the 14th day of March, 2019.

DAVID BERRONG, MAYOR

ATTEST:

LISA ANDERS, CITY CLERK

"I have the following comment(s) or question(s) about the proposed project to improve the I-40 Exit 65 Interchange at Gary Boulevard in Clinton, Custer County, OK."

Please consider any reasonable alternative to this option 7 that would keep 65 & 65A. I understand the safety issues with both exits but it is a concern that commerce might suffer on Gary Blvd because of this attempt to split the Gary "U" with turnabouts in middle of two exits. I have spoken to commercial development experts that have questioned economic impact on Gary Blvd properties south.

Comments on this project can be submitted in several ways, including but not limited to:

March 20, 2019

Brian,

Thank you for showing interest in our Exit 65/Gary Blvd I-40 design project. We are used to having excellent leadership at the head of Division 5 in Engineer Brent Almquist, and welcome your interest as Chief Engineer for ODOT.

Focusing on our latest phone conversation, we stand ready to work with ODOT where appropriate in developing the final design and project specs for our long awaited modernization of Exit 65/Gary Blvd I-40 along with continued access to Exit 65A/Neptune Park.

The presentation to Clinton citizens and business owners by ODOT in May of 2016, was received well with the general anticipation, based on ODOT communication, that the final project design would come from one of the Poe design concepts which was followed by the assumption that Poe and Associates would see the project through, working with ODOT.

Your stated commitment to re-examining the project after carefully reviewing citizen input from the private, business and governmental sector is positively noted; we stand ready to input from the governmental sector where helpful.

Our Resolution of Dissent was clear in praising the professionalism and intent of ODOT and our desire to refocus on the concepts developed by Poe and Associates which seemed to highlight the modernization of Exit 65/Gary Blvd while simultaneously keeping Exit 65A open and viable with service roads. We concluded, stating our belief that the final project product will reflect our working together with ODOT toward the common goal of an excellent project done as quickly as possible.

At your suggestion, we will wait and look forward to working with ODOT after the review of the comments on the project from Clinton citizens, business owners and governmental leaders, as well as ODOT's own reflection on the project.

I am confident in your professionalism and sincere interest in our project at the state level.

David D. Berrong

Good Morning Brent and others;

Re: I40 iNTERCHANGE DESIGN REVISED

Back on May 27, 2016 I wrote to you with my comments and suggestions about the 2016 plan. At that time I wondered how much attention my letter and suggestions would receive. But I am happy to see that our comments and suggestions did receive consideration in the new plans for the Interchange

The new revised plan for the Interchanges is an unusual, but a well thought out plan and I believe it will be a workable plan.

Much of the proposed plan will be on land we now own and will involve businesses we now own and operate. These include :

Holiday Inn Express & Suites
WATER ZOO.COM INDOOR WATER PARK CLINTON OK.
Neptune Station ROUTE 66
Hampton Inn by Hilton

1. The 66 station at the eastbound exit 65A where it meets Neptune Drive. Its the land with the 3 red dots. And those tanks are in place an in active use.
2. The Water Zoo Indoor Water Park just SW of the proposed South traffic circle
3. The Holiday Inn Express just west of the Water Park on Blvd of Champions
4. The Water Zoo campground just South of the traffic circle exit labelled Water Zoo Road
5. The Hampton Inn just west of the North Traffic circle
6. oUR corporate offices South of the 66 station(#1 above) also showing 3 red dots for tanks Please be advised that those 3 tanks have been removed years ago.
7. The former Jays Tire store at the corner of Gary Blvd and Oliver Avenue- with 1 red dot Those tanks were also removed many years ago

Overall I have no problem with the plan. But a couple of comments

1. The Water Zoo building handles the registration for the Water Zoo Campground. Units up to 65 feet and more drive in the driveway and park in the large paved area between the driveway and the large bowl slide in FRONT of the Water Zoo Building. THEY THEN EXIT to the East (by the existing circle because there is no room to make a U Turn for these large units and they proceed south to the campground entrance. It appears that the new circle and right of way red line is not taking into consideration that these units have to exit the east end of the water zoo front parking lot.
2. The South traffic circle- again- We do not need the pavement off the circle up to the water zoo building. There is an overhead door there but its only for maintenance.
3. The treed area NE of the North Traffic circle is planned for a duplex housing subdivision. May I ask for a North exit off the North traffic circle similar to the Tail you have going south off the South traffic circle(Water Zoo road).
4.

I saved my most important suggestion for last. But before I start let me preface my suggestion with this background information in the hopes it will give me more credibility with you. It seems like I've been involved with traffic safety most of my adult life. At the ripe age of 15 and before I even had a drivers license I observed a intersection near my parents home in New York City The intersection required a NYC traffic police officer standing in the intersection every morning. To be brief in my story let me say that I made a suggestion to the NYC Traffic Department and they adopted my suggestion and the officer was no longer needed and traffic flowed smoother and safer. That was in 1956 and that intersection is still that design today 63 years later.

Then in my next life I became a New York State Police Trooper and then promoted to Sergeant/station commander. In that position I was responsible for 10-55 men as well as being responsible for Criminal and Traffic conditions in my county. It was the equivalent of the Troop Commander in the OHP. In that position it was my responsibility to work closely with NYDOT on traffic conditions and traffic safety situationsin my area.

Many of my suggestions to NYDOT to improve safety were adopted by them. I'm not trying to impress you but I am trying to gain credibility with you for my suggestion.

Now to my biggest suggestion for this interchange design

At the present time you have full exits at 65A and with this plan will have a full exit at exit 65. As well There are 10 businesses at exit 65A and it is important that exit 65A remain an exit NUMBER after the project is completed. My point here is that the motels and station, campground (Hargus CG) all advertise as being at exit 65A. There are logo signs for Gas food Lodging on the main line for businesses at exit 65A. Equally important businesses at exit 65 also have logo signs, advertise in directories, Expedia etc. If the exit number is consolidated into just one exit number - Be it 65 or 65A - One set of businesses will get hurt .

Let me use one business as an example - The Days Inn at exit 65A (Full disclosure- I have no interest in the days Inn) The days Inn advertises in the Days Inn directory, it advertises on Expedia and numerous other web booking sites And if the 65A designation ceases to exit how does a motorist either East Bound or west bound on I-40 get off the new exit and find their way to the Days Inn from the traffic circle.?

There are TOO MANY business at both exits to list them all in the circle. And besides that would further congest the circle. My suggested solution to the problem is to maintain the exit 65 AND 65a signage and double number the Exit as "exit 65 65A". On the main line each direction. Now I do not know of an exit with a double number. But this is a new interesting design exit and I believe a case can be made for an application to the Federal Highway administration to number this exit as 65 65A.

Then when a motorist gets on the circle (eitherone) the circle signs on the circle can designate which ramp from the circle goes to 65 and which to 65A . It cleans up the signage, improves safety and is less confusing to the motorist as he tries to figure out how to find the Days Inn.

Now earlier I said that I was not aware of any Interstate exit that had double numbers. And thats true. But there are exits signed as for example exits 44A-B and they use the same signage on the main line (EXIT 44A- B 1 mile ahead.) and they use the same exit ramps as well. Many of these are in Florida and Georgia but they must comply in some manner with the Federal Highways traffic safety manual. I drove from Daytona beach to Orlando airport just 2 days ago and saw several of these. The only difference they have an 44A and a 44 B while we have a 65 and a 65A.

Thank you for your consideration of my comments and suggestion. Feel free to call me or e mail if anything needs further clarification or discussion. walt@clintonamerica.com or cell 580 445 3555

Good Morning Brent

In my letter of March 5 I neglected to mention that I have a well at the East end of the Hampton Inn and just east of where the concrete parking lot ends. And straight North of that little maintenance building we have there. I don't think the Garber folks know its there

That well feeds the Holiday Inn Express and soon the water zoo as well. It crosses I-40 just East of the maintenance building in the location where we bored I-40 a couple of years ago.

Just wanted to bring it to everyone's attention in case they do not know that the well and line is there.

Very truly yours

Walter Schumacher

Subject: Comments: I-40 Exit 65 at Gary Boulevard Concept (JP31482(04))

Dear ODOT,

I have the following comment(s) or question(s) about the proposed project to improve the I-40 Exit 65 Interchange at Gary Boulevard in Clinton, Custer County, OK.:

The concept is very unique. I like the long acceleration and deceleration lanes. Having east-bound access to I-40 from Gary Blvd will be appreciated by residents and the local businesses. This will also give easy access from Gary Blvd to Neptune Drive (which doesn't exist now).

I recommend making these changes to the design:
1) Include roundabouts where Gary Blvd intersects the frontage roads. We have many accidents in this area when vehicles are turning left. Your design keeps all the left turns onto Gary Blvd. Eliminate the entrances on the west side of Gary Blvd and require vehicles to travel to the roundabout are use it as a U-turn to return north. Also, drivers that are not used to the roundabouts at the end of the exit ramps will exit the roundabout toward Gary Blvd when they want to reach Neptune Drive. Roundabouts at the intersection with Gary Blvd. will allow them to make a U-turn at Gary Blvd to return to their destination.
2) Shift Gary Blvd to the east, keeping the existing road in front of these businesses. This will allow drivers to travel between the existing businesses (e.g. eating lunch at Braums after shopping at K-Mart), without entering Gary Blvd.
3) Build the south roundabout for connection to a future road that enters the roundabout from the west.

Please see my attached markup of your plan drawing.

Regards,
Eric Schumacher

"I have the following comment(s) or question(s) about the proposed project to improve the I-40 Exit 65 Interchange at Gary Boulevard in Clinton, Custer County, OK."

I like the idea and think it works well to keep both interchanges. I would not be opposed to having access to only Gary Blvd. to simplify things. I would also like to see the opportunity to have local businesses be able to bid or be subcontractors.

BRENT ALMQUIST
ODOT DIV. ENGINEER #5

I-40 EXIT 65 (GARY BOULEVARD) CUSTON COUNTY

DEAR SIR

IN REGARD TO THE PROPOSED LOCAL TRAFFIC AND INTERSTATE PLAN, I RATHER NOT CRITICIZE BUT RATHER FACILITATE RESOLUTIONS. THE CITY HAS TWO MAJOR CONCERNS. FIRST TO STIMULATE GROWTH. SECOND TO PROVIDE SAFE GOOD TRAFFIC FLOW. THE PLAN PRESENTED ON FEB 28TH, 2019 DOES PROVIDE LIMITED ASSISTANCE TO THE CITY IN THIS ASPECT! THESE ARE ELEMENTS SUCH AS COMMERICAL GROWTH, INDUSTRIAL GROWTH, RECREATIONAL/ NON-WORK ACTIVITY GROWTH, AND HOUSING DEVELOPMENT GROWTH.

THESE ISSUES ALSO RELATE TO TRAFFIC FLOW TO AND IN THE CITY AS WELL AS INTERSTATE TRAFFIC FLOW. THE PROPOSED I-40, CITY ACCESS HAS SEVERAL SHORT COMINGS WITH RESPECT TO CITY NEEDS.

THE PROPOSED I-40 CITY INTERCHANGE LOCATION WILL IMPEDE CITY GROWTH TO THE SOUTH, AND DOES LITTLE TO PROVIDE EASY ACCESS TO CITY GROWTH POTENTIAL AREAS, SUCH AS: THE INDUSTRIAL AREAS THE RECREATIONAL SPORT ACTIVITY PARK FACILITY, IE. THE BRICK PLANT PARK AREA. THESE AREAS ARE ON THE CITY OUTER WEST, SOUTHWEST, AND SOUTHEAST.

THE SOUTHWEST AND SOUTHEAST INDUSTRIAL AREAS HAVE A NEED FOR EASY DIRECT ACCESS TO THE INTERSTATE TRAFFIC SYSTEM (I.E.) I-40 INTERCHANGE. THE BRICK PLANT PARK FACILITY WOULD ALSO BENEFIT BY HAVING DIRECT ACCESS CLOSE TO I-40.

Received Time Mar. 12. 2019 5:00PM No. 0040

THE PROPOSED I-40 INTERCHANGE LOCATION PROVIDES VERY LIMITED AND RESTRICTED ACESS TO THESE POTENTIAL CITY GROWTH AREAS. THE INTERSTATE TRAFFIC NEEDS EASY ACCESS FOR TRUCK REFUELING AND REPAIR SOURCES, TOURIST TRAVELERS SERVICES AND A VARIETY OF OTHE RELATED FACILITIES. THESE WILL BE VERY LIMITED BY THE PROPOSED INTERCANGE LOCATION AS NOW PLANED. THE PROPOSED PLAN PROVIDES NO MAJOR LAND AREA TO GROW THOSE POTENTIALS. AMENITIES COULD BRING NEW JOBS AS WELL AS OTHER COMMUNITY IMPROVEMENT POTENTIAL.

I BELIVE THAT A MORE ADVANTAGES SOLUTION TO ADDRESS THE ABOVE STATED CONCERNS WOULD BE AS FOLLOWS:

FIRST RESOLVE GARY-BLVD SOUTHWEST TRAFFIC PROBLEMS BY FOLLOWING THE PROPOSED PLAN SOLUTION. HOWEVER IN ADDITION BUILD ON THAT SOLUTION BY RENOVATING CHAPMAN ROAD INTO A BLVD EQUIVALENT TO GARY-BLVD. THE WEST CHAPMAN ROAD/BLVD WOULD TERMINATE AREA OF SOUTH 28TH STREET (IE) AREA FOR NEW I-40 ON/OFF ACCESS. THE EXISTING S. 28TH STREET SHOULD BE IMPROVED TO PROVIDE INTERSTATE AND LOCAL ACCES TO THE BRICK PARK FACILITY TO THE NORTH OF I-40 AS WELL AS TO THE SOUTH TO THE EXISTING INDUSTRIAL AREA TIEING INTO OLD ROUTE 66.

THE IMPROVED CHAPMAN RD/BLVD SHOULD ALSO EXTEND EAST THE GARY/CHAPMAN INTERCHANGE (SUGGEST ROUND ABOUT) TO NEPTUNE DRIVE. I WOULD ALSO SUGGEST CHAPMAN RD/BLVD BE EXTENDED EAST TO PROVIDE FOR AN INTERCHANGE AT STATE HIGHWAY 183.

Received Time Mar. 12. 2019 5:00PM No. 0040

THESE SUGGESTED REVISIONS OF THE PRESENT PLAN WOULD ELIMINATE MANY CRITICAL CITY NEEDS TO A GREAT EXTENT AND WOULD OVER COME THE CITY PLIGHT OF BEING GROWTH LIMITED BY I-40 DOUBLE CIRCLE INTERCHANGE IN THE MID CITY AREA. THE CITY GROWTH GEOGRAPHICALLY HAS ALWAYS BEEN RESTRICTED BY THE WASHITA RIVER ON THE NORTH, NORTHWEST AND NORTHEAST. THE CITY IS IN RESPECT LIMITED TO AREAS OF GROWTH THESE LIMITS REQUIRE THAT A PLAN MUST BE IMPLEMENTED TO TAKE ADVANTAGE OF THE OPPORTUNITIES THAT ARE AVAILABLE. NOW IS THE TIME TO IMPROVE THE CITY AND I-40 RELATIONSHIP CONDITIONS.

THANK YOU FOR YOUR CONSIDERATION
REGARDING MY COMMENTS.

SINCERLY

Calvin Moore

"I have the following comment(s) or question(s) about the proposed project to improve the I-40 Exit 65 Interchange at Gary Boulevard in Clinton, Custer County, OK."

Pizza Hut has been doing business in Clinton, OK for over 40 years. Our original location was 1024 S 10th Street. We did business at this location for 35+ years. We located here because there was an on and off ramp heading both east and west bound on I-40 which gave us quick access to both sides of town for deliveries as well as gave through traffic on I-40 access to our restaurant with easy on and off from I-40. Over the years business in that part of town began to decline causing businesses to close and/or relocate to a different part of Clinton or a neighboring town. Business in this part of town got so bad we began to look for a new location in Clinton. We spent over 5 years looking for a new location while our business deteriorated. We felt a loyalty to Clinton to remain in town and continuing doing business but we were at a point when we were close to shutting the doors and leaving Clinton. Hutchinson Oil Company (HOC) then approached us that they would be building a new C-Store at the corner of Gary Blvd and Jaycee Ln and would be putting in a stripe mall behind and asked if we would be interested in anchoring this building. It was the perfect spot for us, to get out of the area we were currently located and move across from the High School and have visibility from Gary Blvd to get that traffic from old route 66. Our business has doubled since we have moved into this location at 2001 Jaycee Ln. We still sell the same pizza and we still have the same manager from our location at 1024 S 10th St. The magic wand or silver bullet is Gary Blvd. If you proceed with the current plans at exit 64 on I-40 you will destroy the traffic flow on Gary Blvd and old route 66.

COMMENT FORM

Comments Continued

By destroying this traffic flow you will take my business along with the other neighboring businesses and decrease sales and profits dramatically. There has to be an alternate plan that will allow traffic to have access to I-40 eastbound from exit 64. I understand that there have been multiple project drawings that allow for eastbound access. I strongly encourage you to scrap this current project design and go back to one of the other designs that allow traffic flow to remain high on Gary Blvd and old route 66. There is a reason they call the I-40 business loop through Clinton a tourist trap. It was originally designed to get folks traveling on I-40 to start at one end of town and go through to the other end of town in an effort to get those tax dollars and keep business viable. The only thing I see with this current project drawing is travelers will skip the proposed exit for the two other exits east of town or they will skip Clinton all together. It also appears to be a new tourist trap if you take this new proposed exit. It appears to benefit five businesses with access to each of these businesses with a private entrance into each. Holiday Inn Express, Comfort Inn, Water Zoo, Montana Mikes Steakhouse, and the Neptune C-Store. It is very ironic that all 5 of these businesses are owned by the same individual Walter Schumacher who is accussed of trafficing Filipino nationals to the US for cheap labor. It looks like when viewing these plans it is as if Walter Schumacher drew them up himself. You cannot change the traffic flow so that it benefits one business owner while destroying many business owners on and along Gary Blvd.

I am 110% against this current plan and I know that I am echoing the same opinion as many other business owners along Gary Blvd. DO NOT continue on with this plan and go back to one of the other plans that keeps exit 64 where it is currently located!

"I have the following comment(s) or question(s) about the proposed project to improve the I-40 Exit 65 Interchange at Gary Boulevard in Clinton, Custer County, OK."

I am concerned about the noise impact. Concord ave. is very close to proposed site. If results of study determine a sound proof wall is needed, please notify us in the neighborhood.

Thinking of signage and naming, if there is no uniform street naming other than Frontage Road, please consider changing Frontage Rd. to Red Wheat Drive. Red wheat is a culturally significant name and is in Cheyenne and Arapaho tribal territory.

Executive Summary

This document summarizes the virtual public open house conducted for the I-40 Exit 65/65A Interchange Modification project in the City of Clinton, Custer County. The purpose of the public open house was to update the public on the status of the project, present the most recent alternatives (Alternative 2D and 9B) for the project, obtain public input, and outline the next steps and schedule for the project.

Due to concerns about the spread of COVID-19, ODOT held a virtual public open house. The public open house was held on-line between December 2 and December 21, 2020. Thirty-six (36) people signed in on the website. However, sign-in was not required. According to the website analytics, 897 unique users viewed the website over the 19-day period. After the home page, the interactive maps were the most frequently viewed pages (973 views of Alternative 2D, 358 views of Alternative 9B), followed by the presentation and comment submittal pages. In total, one hundred fifty-five (155) individuals submitted written comments/questions either through mail, email, or on the interactive maps. An additional 1,189 pre-filled comment forms expressing a preference for Alternative 9B were received from local businesses. An additional 763 names were submitted on a "petition" expressing a preference for Alternative 9B. It is not known if the individuals that submitted pre-filled comment forms and/or signed the petitions were unique or if some individuals submitted both. Comments from four state agencies were also received.

Agency comments included the following:

- The Oklahoma Department of Environmental Quality (ODEQ) determined that no adverse environmental impacts under ODEQ jurisdiction are anticipated. All projects exceeding 1 acre of disturbance must obtain authorization under OKR10.
- The Oklahoma Aeronautics Commission (OAC) indicated that project does not appear to pose a hazard to safe and efficient use of navigable airspace.
- The Oklahoma Corporation Commission did not find any active or plugged oil and gas wells within the project area.
- Oklahoma State Parks indicated that Alternative 2D would be best for the Clinton High School tennis courts which are a Land and Water Conservation Fund (LCWF) project.

Of the one hundred fifty-five (155) people that submitted comments on the project, the majority (92, or 59%) expressed a preference for either Alternative 2D or Alternative 9B. Of those expressing an alternative preference, 51 (55%) preferred Alternative 2D, and 41 (45%) preferred Alternative 9B. An additional 34 comments were received that expressed a desire to keep Neptune Drive/Exit 65A open, although they did not expressly state a preference for Alternative 9B. Eight people commented to leave the interchanges alone and not do anything. Other comments were received in small numbers. In addition to the written comment forms, 1,189 pre-filled comment forms and 763 signatures were received expressing a preference for Alternative 9B. Comments are tabulated in **Table ES1**.

Table ES1: Major Issues of Concern

Issue	**# of Comments**
Prefer Alternative 2D	***51***
Safer/existing loop ramps at 65A are dangerous	21
Best for the future growth of Clinton/preserves more land for development	18
Less costly	10
Simpler/Alternative 9B is confusing	7
Best for access with frontage roads	5
Modernizes Gary Boulevard	1
Less impactful	1
Prefer Alternative 9B	***41***
Best for businesses/Alternative 2D will hurt businesses	24
Provides the best/most direct access to I-40	5
Need to maintain access to Route 66	4
Shorter trips/Alternative 2D will mean longer trips	3
I use 65A frequently	3
Alternative 2D is confusing/all traffic at one interchange	3
Alternative 2D will cause more traffic on residential streets	2
Alternative 2D will hurt tax revenues/economy	2
Exit 65A is the best route for visitors	1
City growth more important than cost or accidents	1
Keep Neptune Drive Open	***34***
Don't do anything	***8***

Other	***41***
Prefer the roundabouts (Alternative 7)	3
Thank you – this project is needed	2
Just fix Exit 65/add the eastbound on-ramp	2
Other comments/questions	34
Pre-filled Comments for Alternative 9B	***1,189***
Petition Signatures for Alternative 9B	***763***

Responses to Comments

To be added when approved by ODOT.

Introduction

This document summarizes the virtual public open house conducted for the I-40 Exit 65/65A Interchange Modification project in the City of Clinton, Custer County. The purpose of the public open house was to update the public on the status of the project, present the most recent alternatives (Alternatives 2D and 9B) for the project, obtain public input, and outline the next steps and schedule for the project.

Virtual Public Open House

Virtual Open House Notification

Notice of the virtual public open house was sent by regular USPS mail to elected officials (federal, state, and local), property owners, and utility owners in the study area. The mailing included a project pamphlet with information on how to access the virtual public meeting. The pamphlet also included brief information about the project, the project history, the purpose and need, the proposed alternatives, and an alternative comparison matrix. The pamphlet also included the construction schedule and cost. A map displaying both alternatives, a comment form, and self-addressed stamped envelope were included with the pamphlet. All materials were provided in both English and Spanish. Pamphlets were mailed on December 1, 2020. The pamphlets were also delivered using the USPS Every Door Direct Mail service to 1,584 addresses in the project vicinity. A copy of the pamphlets, comment forms, mailing lists, and direct mail information is included in **Appendix A.**

ODOT also advertised the meeting via social media. Facebook posts were published on December 2 and December 16, 2020. The Clinton Daily News also published articles about the project and the virtual public open house on December 3, December 5, and December 16, 2020. The Weatherford Daily News published an article about the project on December 3, 2020. Copies of the articles can also be found in **Appendix A**.

Meeting Information and Format

The virtual public open house was held on-line between December 2 and December 21, 2020. Both the open house and comment period were extended from December 16 to December 21 due to inclement weather and the large number of comments received. The website address was www.odot.org/I40CusterExit65. Thirty-six (36) people signed in on the website. However, sign-in was not required. According to the website analytics, 897 unique users viewed the website over the 19-day period. After the home page, the interactive maps were the most frequently viewed pages (973 views of Alternative 2D, 358 views of Alternative 9B), followed by the presentation and comment submittal pages. A copy of the summary analytics and list of the website sign-in are included in **Appendix B**. Prints of the website pages and the posted materials are included in **Appendix C.** The website included the following pages:

- Homepage with brief background about the project, welcome videos from Brent Almquist, ODOT District 5 Engineer, and David Berrong, Mayor of Clinton, dates of the virtual public open house, a telephone number contact, submission of written comments, and instructions for ADA accommodations.

- Sign-in and Handout – a form for signing in and a PDF copy of the notification pamphlet and map.

- Project History – a discussion of the history of the I-40 Exit 65/65A project including the alternatives developed and previous public meetings.

- Meeting Presentation – a presentation describing the proposed project. Both a PDF with script and a video with voice over were included.

- Interactive Maps – ArcGIS on-line maps showing both Alternative 2D and Alternative 9B in detail, including proposed right-of-way. The interactive maps included a comment feature.

- Right-of-Way Information – ODOT's Property Rights Brochure

- Frequently Asked Questions – a list of common questions about this project.

- Submit a Comment – on-line form to submit a comment as well as a PDF file of the comment form for download.

- Informaciòn en Español – a page containing the pamphlet and comment forms (on-line and PDF) in Spanish.

Agency Solicitation

Agency solicitation letters were mailed on December 4, 2020. These letters provided a short project description and included information about the virtual public open house and requested that recipients provide input by December 16, 2020. Enclosed with the letter was a copy of the project location map. This letter was sent to state and federal resource agencies and Indian Tribes. A copy of the agency solicitation letter and the mailing list is included in **Appendix D**.

Interactive Maps

The website included links to two interactive maps – one for each of the proposed alternatives – showing the proposed designs. The interactive maps included the capability to capture comments. Sixty (60) comments were left on the interactive maps; 39 on Alternative 2D and 21 on Alternative 9B. Copies of the Interactive Map comments are included in **Appendix E** and are included in the comment summary table (**Table 1**).

Summary of Comments and Responses

In total, one hundred fifty-five (155) individuals submitted written comments/questions either through mail, email, or on the interactive maps. An additional 1,189 pre-filled comment forms expressing a preference for Alternative 9B were received from local businesses. Seven hundred sixty-three (763) names were submitted on a "petition" expressing a preference for Alternative 9B. It is not known if these individuals submitted multiple comments or signatures. Comments from four state agencies were also received. Copies of the written comments are included in **Appendix F**.

Agency Comments

The Oklahoma Department of Environmental Quality (ODEQ) determined that no adverse environmental impacts under ODEQ jurisdiction are anticipated; however, ODEQ recommends that prior to beginning any construction activity disturbing more than one acre, an NOI must be submitted and to obtain authorization under OKR10. In addition, if water and/or wastewater utilities will need to be relocated as part of the project, a construction permit from ODEQ's Water Quality Division will be required.
Response: Thank you for your comment. ODOT will require the contractor to obtain the appropriate permits from ODEQ.

The Oklahoma Corporation Commission (OCC) responded there are no active or plugged oil/gas wells in the project area.
Response: Thank you for your comment.

The Oklahoma Aeronautics Commission (OAC) indicated that the project does not appear to pose a hazard to safe and efficient use of navigable airspace. The OAC recommended that ODOT use the FAA's notice criteria tool to determine if Form 7460-1 needs to be filed with the FAA. The OAC also requested that ODOT inform them if a Form 7460-1 is required, as additional permits may be needed.
Response: ODOT will file Form 7460-1, if required.

Oklahoma State Parks indicated that Alternative 2D appeared to be better for the Clinton High School tennis courts, which area a Land and Water Conservation Fund (LCWF) property. Alternative 2D appears not to affect the tennis courts.
Response: Thank you for your comment. Neither alternative is anticipated to affect the tennis courts.

Public Comments

One hundred fifty-five (155) people submitted comments on the project. Comments are tabulated in **Table 1.** The majority of comments (92, or 59%) expressed a preference for either Alternative 2D or Alternative 9B. Of those expressing an alternative preference, 51 (55%) preferred Alternative 2D, and 41 (45%) preferred Alternative 9B. An additional 34 comments were received that expressed a desire to keep Neptune Drive/Exit 65A open, although they did not expressly state preference for Alternative 9B. Eight people commented to leave the interchanges alone and not do anything. Other comments were received in small numbers. In addition to the written comment forms, 1,189 pre-filled comment forms and 763 signatures were received expressing a preference for Alternative 9B.

Table 1: Major Issues of Concern

Issue	**# of Comments**
Prefer Alternative 2D	***51***
Safer/existing loop ramps at 65A are dangerous	21
Best for the future growth of Clinton/preserves more land for development	18
Less costly	10
Simpler/Alternative 9B is confusing	7
Best for access with frontage roads	5
Modernizes Gary Boulevard	1
Less impactful	1
Prefer Alternative 9B	***41***
Best for businesses/Alternative 2D will hurt businesses	24
Provides the best/most direct access to I-40	5
Need to maintain access to Route 66	4
Shorter trips/Alternative 2D will mean longer trips	3
I use 65A frequently	3
Alternative 2D is confusing/all traffic at one interchange	3
Alternative 2D will cause more traffic on residential streets	2
Alternative 2D will hurt tax revenues/economy	2
Exit 65A is the best route for visitors	1
City growth more important than cost or accidents	1
Keep Neptune Drive Open	***34***
Don't do anything	***8***

Other	***41***
Prefer the roundabouts (Alternative 7)	3
Thank you – this project is needed	3
Just fix Exit 65/add the eastbound on-ramp	2
Use a frontage/backage road for businesses on west side of Gary to reduce number of driveways on Gary.	2
Other comments/questions	31
Pre-filled Comments for Alternative 9B	***1,189***
Petition Signatures for Alternative 9B	***763***

Responses to Comments

Responses to the public comments on the project are listed below. ODOT responses are in *italics.*

Prefer Alternative 2D:

The primary benefit of Alternative 2D is increased safety. Maintaining the ramps at both Exits 65 and 65A present safety challenges related to merging traffic and speed differentials. The collision history in the area suggests that the existing ramp configuration and speeds may be contributing to the elevated collision rate. Alternative 2D is lower cost and uses less land, which results in potentially more land available for future development. Alternative 2D is a simpler layout and utilizes a more traditional diamond configuration, which is likely to be familiar to most travelers. Frontage roads would be provided on both sides of I-40 between Gary Boulevard and Neptune Drive/10th Street, and a free-flow turnround would be provided at Gary Boulevard so that traffic having to backtrack to and from Neptune Drive/10th Street would not need to pass through the traffic signals at Gary Boulevard. This would shorten the additional travel time to less than one minute per trip. Both alternatives include improvements to Gary Boulevard.

Prefer Alternative 9B:

The primary benefit of Alternative 9B is providing more direct access to Neptune Drive/10th Street at Exit 65A. While the access at Exit 65A is convenient for the businesses directly adjacent to the interchange, the ease of access to most locations will not be significantly reduced with the removal of the Exit 65A ramps. Alternative 2D will provide frontage roads and is not anticipated to increase traffic on residential streets. Alternative 9B, while meeting minimum FHWA criteria for acceleration/deceleration lane lengths, does not provide improved safety. It is anticipated that collisions would increase slightly under

Alternative 9B over the existing condition. While ODOT recognizes the importance of city growth and has partnered with the City of Clinton to develop this project, safety is ODOT's first priority.

Keep Neptune Drive Open:
Both alternatives keep Neptune Drive open. Alternative 2D provides access to Neptune Drive from I-40 via Gary Boulevard and frontage roads. Alternative 9B provides direct access to Neptune Drive from I-40, similar to today.

Don't do Anything:
The existing interchange configuration does not meet current design criteria, and there is an elevated collision rate as a result. Doing nothing will not achieve the project goals of improving safety and mobility.

Other Questions/Comments:
Prefer Alternative 7

- *Alternative 7 utilized roundabouts to keep both Exit 65 and 65A open. Alternative 7 received negative feedback from the public and the City of Clinton requested that more traditional options be investigated.*

- Thank you – the project is needed.
  - *Thank you for your comment.*
- Just fix Exit 65/add the eastbound on-ramp.
  - *An additional ramp cannot be added with the current configuration due to spacing between ramp movements and minimum weave distances required. In addition, only adding the missing ramp will not achieve the project goals of improving safety and mobility.*
- There is too much access to Gary Boulevard – traffic should use a frontage or backage road with a signal at Lexington Avenue.
  - *Right-of-way constraints prevent the addition of a frontage road between Gary Boulevard and the existing businesses. The City of Clinton could consider a circulation road behind those businesses in the future.*
- You should clarify that Alternative 2D does not close Exit 65A.
  - *Alternative 2D will remove the existing loop ramps at Exit 65A. Access to Neptune Drive will be provided via Exit 65 (Gary Boulevard) and frontage roads with a protected turn around.*
- Will our taxes go up because of this project?
  - *ODOT's portion of the project will be funded from state and federal sources. The funding source for the City of Clinton's portion (improvements to Gary Boulevard) has not been determined.*

- Construct sound walls.
    - *Once an alternative is selected, ODOT will perform a detailed traffic noise study according to ODOT and Federal Highway Administration (FHWA) criteria. If noise impacts are identified and abatement proves to be prudent and feasible per ODOT Noise Policy, sound walls will be constructed.*
- Pull in the frontage roads closer to I-40 at Neptune to make more land available for development.
    - *The frontage roads are designed to use the existing pavement rather than build new pavement. In addition, moving the frontage roads in closer would require retaining walls for the I-40 embankment. Adding pavement and retaining walls would increase project cost.*
- Add access to the Hampton Inn from the I-40 off ramp.
    - *Direct access to interstate ramps is not allowed by ODOT and FHWA design criteria due to safety concerns.*
- Keep Red Wheat Drive between the two Kmart entrances to maintain circulation.
    - *Alternative 9B shows the reconstruction of pavement between the K-Mart entrances in the general location of the existing Red Wheat Drive.*
- Add a right turn on southbound Gary Boulevard for business access.
    - *Turn lanes will be evaluated based on traffic volume demand. There are two through lanes proposed in each direction on Gary Boulevard as well as a center two-way left turn lane.*
- Move Gary Boulevard further west.
    - *Moving Gary Boulevard further west was investigated but was not possible due to project constraints such as the bridge over the railroad, maximum allowable slopes on the road, and required weave distances. The current location shown for Gary Boulevard is the farthest west it could be shifted and still meet all the design criteria.*
- Would be nice to have sidewalks and crosswalks on Gary Boulevard.
    - *Cross walks and sidewalks were not investigated during the preliminary study, but the proposed Gary Boulevard improvements currently include a shelf area behind the curb that can be used to install a sidewalk in the future. Where proposed signals are warranted, cross walks will also be evaluated.*
- Don't like the long driveway to Kmart – seems to break up land that could be used for development.
    - *The second driveway provide more access and circulation to the old Kmart property; however, it is optional and not required.*
- Add signage at the intersection of Neptune and Chapman Road to direct I-40 traffic west to Gary Boulevard.
    - *Thank you for your comment. The plan for signs will be developed in later phases of the project.*

- Do the bridges at 28th Street get replaced? They need to be widened/updated.
    - *No, the bridges at 28th Street are not part of the current project.*
- Keep Exit 65A but make it safer.
    - *There are limited options for keeping all the access at Exit 65A while still implementing a safe design that meets all current criteria. Alternative 9B keeps Exit 65A but is not expected to improve safety.*
- Keep Red Wheat Drive and construct a 5-leg roundabout at Gary/Red Wheat/Lexington/Oliver.
    - *A 5-leg roundabout concept was considered during the early phases of the project. However, it received negative feedback as compared to a more standard intersection. Additionally, with the extension of Gary Boulevard and proposed direct connections for businesses, Red Wheat Drive results in a redundant corridor that the City must maintain as well as a significantly longer bridge along I-40 for ODOT to maintain. Due to increased costs, both short term and long term, and the fact the corridor would result in a redundant movement, Red Wheat Drive will be removed in either Alternative 9B or 2D and a more standard intersection will be provided at the Gary and Lexington/Oliver intersection.*
- Closing Red Wheat Drive reduces connectivity.
    - *Traffic will be able to use the new extension of Gary Boulevard and connectivity will remain, similar to today.*
- Connect the old Kmart to Mulberry Lane to the west.
    - *Such a connection, while possible, might increase traffic through residential areas which is not desirable. It would also require an at-grade railroad crossing which introduces the potential for collisions. Since these are both local roads, any new connections would be the decision of the City of Clinton and not part of the project to improve the highway.*
- The acceleration/deceleration lanes on Alternative 9B are good.
    - *These lane lengths meet minimum FHWA criteria.*
- Construct a roundabout at the Gary Boulevard/Blvd of Champions/I-40 ramp termini.
    - *An Alternative like this was considered earlier in the study, but received negative feedback as compared to an interchange with more common, standard intersection layouts along Gary Boulevard.*
- Add a southbound left turn lane from Gary Boulevard to Blvd. of Champions.
    - *The proposed center two-way left turn lane can be converted into a left turn bay based on traffic volume warrants and safety analysis evaluated during later design phases.*
- While the intersection of Gary and the I-40 ramps near the Water Zoo does seem confusing, there is a similar intersection on Czech Hall Road in Yukon and it works fine.
    - *Yes, the intersection between Gary Boulevard and the proposed ramps in the Alternative 9B configuration are similar to those mentioned in Yukon.*

- We visit the water park – there is easy access.
    - *Access to the Water Zoo Water Park from Neptune Drive will remain the same under both alternatives. Access from Gary Boulevard will be improved since the connection to Blvd. of Champions will result in a shorter distance required than the existing access from Red Wheat Drive.*
- Close Exit 65A – it is dangerous.
    - *Alternative 2D removes the loop ramps at Exit 65A to improve safety.*
- City Council does not fully support Alternative 2D.
    - ??? (need ODOT input)
- Do whatever is simplest.
    - *ODOT considers many factors when selecting the proposed improvements including, but not limited to, safety and cost. The simplest improvement would be that which results in the safest and most cost-effective alternative, which also meets current design standards.*
- If it will improve traffic safety and mobility, I am for it.
    - *Alternative 2D is anticipated to be safer and promote better mobility.*
- Will you fix the grades on Lexington Avenue?
    - *The grades will be moderately improved but limited to only the reconnection required for the Gary Boulevard realignment. The grades will adhere to current design criteria for the roadway classification.*
- Please remove the trees in the I-40 right of way for visibility and aesthetics
    - *Any vegetation within the Right of Way that impedes visibility necessary for maintaining a safe clear zone offset will be removed.*
- Are you allowing for 6 lanes on I-40?
    - *Yes. The project includes 4 through lanes (2 each direction) but will accommodate the widening to 6 lanes if warranted by traffic analysis in the future.*
- Combine Exits 65 and 65A
    - *The previous Alternative 7 combined the two exits. However, this alternative received negative feedback from the public and the City of Clinton.*
- Will there be a stop sign or a signal at Gary Blvd/Lexington/Oliver?
    - *Based on traffic analysis, the intersection does not meet the required warrants for a traffic signal. Stop signs will be installed, similar to what is there today.*

Other comments and questions not specifically related to this project are not answered in detail here. Improvements to other Clinton city streets are beyond the scope of this project.

Pamphlet and Mailing Lists

VIRTUAL PUBLIC OPEN HOUSE

December 2 - 16, 2020

I-40 Exit 65/65A in Clinton

Interchange and Intersection Modification
Custer County: JP 31842(04)

www.odot.org/I40CusterExit65

VIRTUAL PUBLIC OPEN HOUSE

The Oklahoma Department of Transportation will host a virtual public open house to update the public and present the most recent proposed alternatives for the I-40 Exit 65 (Gary Boulevard) and Exit 65A (Neptune Drive) Interchanges in Clinton, OK. This open house will present two proposed alternatives to reconfigure the two interchanges, and allow the public to submit input. Due to concerns over the spread of COVID-19, this will be a web-based format (no in-person meeting). This information will be available beginning December 2, 2020 and comments are requested by December 16, 2020.

Purpose

The purpose of the project is to improve safety, traffic operations, and mobility in the I-40 corridor and to make improvements to adjacent local streets and intersections. The current interchange ramps at Exit 65 (Gary Blvd.) and 65A (Neptune Dr.) are in close proximity, and the current ramp configuration is contributing to confusion at the Gary Blvd./Lexington Ave./Oliver Ave. intersection. In addition, the City of Clinton is continuing to experience commercial growth, and to continue to foster that growth the city needs more direct access to the south side of I-40. The anticipated growth is expected to generate future traffic volumes beyond the capacity of the existing interchange and adjacent intersections.

To date, ODOT has developed and studied eight alternatives for this interchange. Public meetings were held in 2016 and 2019 to present the alternatives to the public and obtain input. Since the last public meeting in February 2019, ODOT has worked with the City of Clinton to revise and refine Alternative 2D and develop Alternative 9B. The public may view these alternatives on the virtual open house website and see additional information about the project. ODOT would like the public's input on these alternatives so that they can move forward with design and construction of the project.

RE: I-40 Interchange Improvements and Intersection Modification at Exit 65, I-40B West Jct. in Clinton, Custer County, ODOT JP No. 31842(04)

Dear Stakeholders, Property Owners, and Utility Owners,

The Oklahoma Department of Transportation (ODOT), in cooperation with the Federal Highway Administration (FHWA), is proposing improvements to I-40 between S. 28th Street and Neptune Drive, including the I-40 & Gary Boulevard and Neptune Drive interchanges (Exit 65/65A) in the City of Clinton, Custer County, Oklahoma. The existing interchanges includes on- and off-ramps in close proximity, and the current ramp configuration is contributing to confusion at the Gary Blvd./Lexington Ave./Oliver Ave. intersection. The existing interchange at Gary Boulevard also lacks eastbound access to I-40. In addition, the City of Clinton is continuing to experience commercial growth and to continue to foster that growth the city needs more direct access to the south side of I-40. The anticipated growth is expected to generate future traffic volumes beyond the capacity of the existing interchange and adjacent intersections.

The purpose of this project is to improve safety and traffic operations and improve mobility in the I-40 corridor. ODOT completed a study of six initial alternatives and held a public meeting on May 24, 2016. In response to public feedback, ODOT tasked a consultant to look at additional alternatives for improving I-40 and the Gary Boulevard interchange while also maintaining access to Exit 65A at Neptune Drive. These alternatives considered construction costs, right-of-way and utility costs, and environmental constraints. Alternatives 7 and 8 were presented at a public meeting on February 28, 2019. Feedback at that meeting from the City of Clinton and the public resulted in ODOT revisiting and refining some of the original project alternatives. In response, Alternatives 2D and 9B were developed and are presented in the current virtual public open house.

Due to ongoing concerns about COVID-19, ODOT will host a Virtual Public Open House from **December 2 - 16, 2020**. The purpose of the Virtual Public Open House is to update the public on the status of the project, present the two most recent alternatives, and obtain public input. This pamphlet contains additional information about the Virtual Public Open House. After the Virtual Public Open House, project information may be viewed at www.odot.org/publicmeetings.

If you are leasing this property, please notify your lessee of this virtual public open house.

Should you have any questions or would like additional information regarding this project, please email environment@odot.org or call 405-325-3269.

Respectfully,

Sivaraja S Sundaram

Siv Sundaram, P.E.
Environmental Programs Division Engineer

To request an accommodation please contact the ADA Coordinator at 405-521-4140 or the Oklahoma Relay Service at 1-800-722-0353. If you have any ADA or Title VI questions email ODOT-ada-titlevi@odot.org.

Project History

ODOT initiated a study of the I-40/Gary Blvd. interchange in May 2015. The study looked at the current functionality of the interchange as well as traffic at nearby intersections. Six alternatives were developed as part of the 2015 study, which were presented at a public meeting on May 24, 2016 in Clinton. Public feedback from that meeting expressed a desire for eastbound and westbound access from both Gary Blvd. (Exit 65) and Neptune Dr. (Exit 65A), and to keep both interchanges open. In response to that feedback, ODOT developed Alternatives 7 and 8 that achieved these goals with the use of frontage roads and roundabouts between the two exits. Feedback from the public and the City of Clinton expressed concern with the out of direction travel that would be required, and the relatively new and unfamiliar roundabout configuration. As a result of the concern over Alternatives 7 and 8, ODOT revisited the original six alternatives. This meeting presents Alternative 2D and 9B, which are more traditional interchange designs that still achieve the majority of the City's and the public's stated goals.

Project Description and Proposed Alternatives

The project will reconstruct I-40 from 28th Street east to approximately 0.3 miles east of Neptune Drive. The bridges over Red Wheat Drive and Neptune Drive and the adjacent railroads will be replaced with new bridges to accommodate the new I-40 width and to provide sufficient vertical clearance for the railroads underneath. Gary Boulevard will be widened to a 5-lane roadway with a center turn lane and will be extended south under I-40 to Chapman Road. New bridges will be constructed on I-40 over Gary Boulevard. Due to the new configuration of Exit 65, Red Wheat Drive will no longer be needed and will be removed. Businesses that currently access Red Wheat Drive will have new driveways that will connect directly to Gary Boulevard. The intersection of Gary Boulevard with Lexington Ave./Oliver Ave. will be reconfigured to a standard 4-leg intersection.

Alternative 2D and 9B present different options for the configuration of Exit 65 and 65A (see enclosed exhibit). Alternative 2D will construct a standard diamond interchange at Exit 65. Traffic will have access on and off I-40 at this location in both directions. Due to insufficient distance for traffic to safely merge on and off I-40, the loop ramps at Exit 65A will be removed and the other ramps will be reconfigured to connect to the frontage roads. New frontage roads will connect Gary Boulevard with Neptune Drive on both sides of I-40. A free-flowing turnaround lane will be provided on the east side of Gary Blvd. to accommodate westbound I-40 traffic exiting to Neptune Drive and Neptune Drive traffic accessing eastbound I-40. The other movements at Neptune Drive will utilize the frontage roads and the ramps at Gary Boulevard.

Alternative 9B constructs a folded diamond interchange at Exit 65, similar to the existing interchange at Neptune Drive, which maintains access to and from I-40 in both directions. In Alternative 9B, all of the Exit 65 ramps are on the west side of Gary Boulevard, utilizing loop ramps for the westbound off ramp and eastbound on ramp. The existing loop ramps at Exit 65A are reconstructed and maintained in their existing configuration. No frontage roads are necessary.

PROJECT MATRIX

I-40 Exit 65/65A Project Summary Matrix

	Construction Cost	Right-of-Way Cost	Access with Direct I-40 Ramps	Estimated Future Collisions (per year)	Total Bridge Area (sq. ft.)	Floodplain Impacts (ac)	Wetland Impacts (ac)	Stream Impacts (ft.)
Alternative 2D	$ 46.83 M	$ 2.48 M	4 ramps (with turnaround)	16.2	85,845	4.043	0.105	352
Alternative 9B	$ 48.28 M	$ 2.08 M	8 ramps	19.7	98,638	5.268	0.105	393

lower cost / less impact
higher cost / more impact

PROJECT INFORMATION SUMMARY

- Total Programmed Construction Cost of Project: **$20.1 Million**
- Right-of-Way Acquisition and Utility Relocation Programmed to Start in: **2021**
- Construction Programmed to Start in: **2024**
- Current Annual Average Daily Traffic (AADT) in year 2018: **19,460 vehicles per day**
- Future Estimated AADT by Year 2050: **30,700 vehicles per day**

AUDIENCIA
PÚBLICA VIRTUAL

2 al 16 de diciembre del 2020

Interestatal 40 (I-40)
Salida 65/65A en Clinton

Modificaciones a la intersección y el intercambio vial
Condado de Custer: JP 31842(04)

www.odot.org/I40CusterExit65

AUDIENCIA PÚBLICA *VIRTUAL*

El Departamento de Transporte de Oklahoma (Oklahoma Department of Transportation, ODOT) llevará a cabo una audiencia pública virtual para presentar la propuesta más reciente sobre las alternativas en los intercambios de la carretera estatal 40 (I-40) salidas 65 (Gary Boulevard) y 65A (Neptune Drive) en la ciudad de Clinton, OK. En esta audiencia se presentarán dos alternativas para la reconfiguración de los intercambios viales de la carretera y se le dará la oportunidad al público de dar comentarios acerca del proyecto. Debido a las preocupaciones sobre la propagación del virus COVID-19, esta audiencia será ofrecida a través de un formato virtual (debido a la propagación del virus COVID-19 no habrá reuniones presenciales). Esta información estará disponible a partir del 2 de diciembre del 2020 y se solicitan comentarios antes del 16 de diciembre del 2020.

Propósito

El propósito de este proyecto es mejorar la seguridad, las operaciones de tráfico y la movilidad en la carretera interestatal 40 (I-40) y mejorar las calles adyacentes y intersecciones. Los intercambios actuales de las salidas 65 (Gary Boulevard) y 65A (Neptune Dr.) están a una distancia muy cerca, y la configuración de las rampas ocasionan una confusión vial en las intersecciones de Gary Blvd./Lexington Ave./Oliver Ave.. Además, la ciudad de Clinton está en continúo desarrollo comercial, y para continuar fomentando el crecimiento de la ciudad se requiere de un acceso más directo al lado sur de I-40. Se espera que el crecimiento anticipado a futuro genere un volumen de tráfico más allá de la capacidad de la intersección y las calles adyacentes existentes.

Hasta la fecha, ODOT ha desarrollado y evaluado ocho alternativas para estos intercambios. En el 2016 y 2019 varias audiencias al público se ofrecieron para presentar las alternativas con el objetivo de recolectar algún comentario. Desde la última audiencia en febrero del 2019, ODOT y la ciudad de Clinton han perfeccionado Alternativa 2D y desarrollado la Alternativa 9B. El público podrá ver estas alternativas en el sito web de la audiencia virtual y ver información adicional acerca del proyecto. ODOT invita al público someter algún comentario o sugerencias acerca de las alternativas del proyecto para seguir adelante con el diseño y construcción del proyecto.

RE: Mejoramientos al Interestatal 40 (I-40) y Modificaciones al Intercambios Viales en I-40 en Salida 65/65A, I-40B oeste Jct. in Clinton, Condado de Custer, ODOT JP No. 31842(04)

Estimados propietarios, propietarios de servicios públicos y público interesado,

El Departamento de Transporte de Oklahoma (ODOT), en cooperación con La Administración Federal de Carreteras (FHWA), propone hacer mejoramientos al interestatal 40 (I-40) entre S. 28th Street y Neptune Drive, incluyendo los intercambios viales en I-40 con Gary Boulevard y Neptune Drive (Salidas 65/65A) en la Ciudad de Clinton, Condado de Custer, Oklahoma. Los intercambios viales existentes de salida y entrada se encuentran a una distancia muy cercana y la configuración de las rampas ocasionan confusión vial en las intersecciones de Gary Blvd./Lexington Ave./Oliver Ave. El intercambio vial en Gary Boulevard carece de acceso al I-40 en la dirección este. Además, la ciudad de Clinton está en continúo desarrollo comercial, y para continuar fomentando el crecimiento la ciudad se requiere de un acceso más directo al lado sur de I-40. Se espera que el crecimiento anticipado a futuro genere un volumen de tráfico más allá de la capacidad de la intersección y las calles adyacentes existentes.

El propósito de este proyecto es mejorar la seguridad, las operaciones de tráfico y la movilidad en la carretera interestatal 40 (I-40). ODOT completó un estudio de seis alternativas iniciales y llevó a cabo una reunión pública el 24 de mayo de 2016. En respuesta a los comentarios del público, ODOT le pidió a un consultor que examinara las alternativas adicionales para mejorar la I-40 y la intersección de Gary Boulevard, y al mismo tiempo mantener el acceso a la salida 65A en Neptune Drive. Se evaluaron estas alternativas con base en los costos de construcción, de derecho de paso y de servicios públicos, así como en las restricciones ambientales.

Las alternativas 7 y 8 fueron presentadas en una reunión pública el 28 de febrero de 2019. Los comentarios de la ciudad de Clinton y el público en esa reunión dieron como resultado que ODOT revisara y perfeccionara algunas de las alternativas del proyecto original. En repuesta, las alternativas de 2D y 9B fueron desarrolladas y presentadas en la actual audiencia pública virtual.

Debido a la preocupación sobre la propagación del virus COVID-19, ODOT llevará a cabo una audiencia pública virtual **del 2 al 16 de diciembre de 2020.** El propósito de la audiencia virtual es para actualizar al público del estado del proyecto, presentar las dos alternativas más recientes, y obtener comentarios del público. Este folleto incluye información adicional sobre la audiencia pública virtual. Después de la audiencia pública virtual, la información del proyecto se encontrará disponible en el sitio web: www.odot.org/publicmeetings.

Si usted está alquilando esta propiedad, por favor notifique a su arrendador acerca de esta audiencia pública virtual.

Si usted tiene alguna pregunta o quisiera obtener más información sobre el proyecto, por favor envíe un correo electrónico a environment@odot.org o llame al 405-325-3269.

Respetuosamente,

Sivanuja S Sundaram

Si tiene alguna pregunta de ADA o título VI, envíe un correo electrónico ODOT-ada-titlevi@odot.org.

Historia del Proyecto

ODOT incinió un estudio del intercambio vial de la interestatal 40 (I-40)/Gary Blvd. en mayo de 2015. El estudio examinó a la funcionalidad acutal del intercambio vial y el tráfico de las intersecciones aledañas. Se desarrollaron seis alternativas como parte del estudio de mayo de 2015, las cuales fueron presentadas en la reunión pública del 24 de mayo del 2016 en Clinton. De acuerdo a la opinión expresada del público se pidio el acceso hacia el este y el oeste de las calles de Gary Blvd. (Salida 65) y Neptune Dr. (Salida 65A), y mantener los dos intercambios abiertos. En respuesta a los comentarios, ODOT desarrolló las alternativas 7 y 8 que lograron estos objetivos mediante el uso de las vías paralelas y las glorietas entre las dos salidas. La opinión del público y la ciudad de Clinton expresaron una preocupación con la dirección del sentido vial, y la configuración y el desconocimiento de la glorieta. Como resultado a las preocupaciones por las alternativas de 7 y 8 ODOT revisó las seis alternativas originales. Esta reunión presenta las alternativas 2D y 9B, las cuales son un diseño más tradicional y logran cumplir la mayoría de los objectivos de la ciudad y el público en general.

Descripción del Proyecto y Propuestas Alternativas

El proyecto reconstruirá la I-40 de 28th Street este aproximadamente 0.3 millas al este de Neptune Drive. Los puentes sobre Red Wheat Drive y Neptune Drive y los ferrocarriles adyacentes serán reemplazados con puentes nuevos para acomodar la anchura nueva de la I-40 y para proporcionar suficiente espacio libre vertical para el paso de los ferrocariles. Gary Boulevard se extenderá a una carretera de 5 carriles con un carril de giro central y se extenderá hacia el sur por debajo de la I-40 a Chapman Road. Nuevos puentes serán construidos en la I-40 sobre Gary Boulevard. Debido a la configuración nueva de la Salida 65, Red Wheat Drive no será necesaria y será eliminada. Los negocios con acceso actual a Red Wheat Drive tendrán nuevos caminos de entrada que se conectarán directamente a Gary Boulevard. La intersección de Gary Boulevard con Lexington Ave./Oliver Ave. se reconfigurará a una intersección estándar de 4 tramos.

Alternativas 2D y 9B presentan opciones diferentes para la configuración de las salidas 65 y 65A (vea la ilustración adjunta). Alternativa 2D construirá un intercambio vial tipo diamante estándar en la salida 65. El tráfico tendrá acceso a la I-40 en está lugar en ambas direcciones. Debido a la distancia insuficiente para unirse al tráfico de la I-40 de manera segura, las rampas circulares serán removidas de la salida 65A y otras rampas serán reconfiguradas conectando a las vías paralelas. Las nuevas vías paralelas conectarán Gary Boulevard con Neptune Drive en ambos lados de la I-40. Un carril de giro libre será añadido del lado este de Gary Blvd. para acomodar el tráfico que circula hacia el oeste de la I-40 saliendo a Neptune Drive y el traficó de Neptune Drive que accede el este de la I-40. El resto de tráfico vehicular en Neptune Drive utilizará las vías paralelas y las rampas en Gary Boulevard.

Alternativa 9B propone la construcción de un intercambio vial de diamantes doblado en la salida 65, similar al intercambio vial actual en Neptune Drive, que mantiene el acceso de ida y venida de la I-40 en ambas direcciones. La Alternativa 9B, todas las rampas de la Salida 65 están al lado oeste de Gary Boulevard, utilizando rampas circulares para la salida y entrada hacia rampa este. Las rampas circulares actuales en la Salida 65A están reconstruidas y serán matenidas en su configuración acutal. Las vías paralelas no serán necesarias.

MATRIZ DEL PROYECTO

Resumen de la matriz del proyecto
I-40 Salida 65/65A

	Costo de Construcción	Costo del Derecho de Paso	Acceso directo a las Rampas del I-40	Costo Estimado por Colisiones a Futuro (por año)	Área Total de Puente (sq. ft.)	Impactos de Zona de Inundacion (ha)	Impactos de los Pantanos (ha)	Impactos del Arroyo (p)

New Exit 65 plans compared

Wednesday the Oklahoma Department of Transportation rolled out its latest ideas for improving the I-40 Exit 65 interchange near the Kmart building in what is being called a "virtual open house."

The entire scope of the project is located on I-40 beginning at 28th Street and extending east to approximately 1/3 mile east of Neptune Drive.

THE DETAILS

Estimated project cost: Plan 2D –$46.83 million; Plan 9B –$ 48.28 million

See the entire ODOT presentation at www.odot.org/I40CusterExit65

The next step: Submit any comments by Dec. 16, 2020.

Finalize accepted plan in January, 2021

Project design and the detailed environmental studies and the beginning right-of-way acquisition is anticipated to start in 2021. Construction expected to start in 2024.

PURPOSE OF THE PROJECT

In the virtual presentation, ODOT said the purpose of the project is to improve safety, improve traffic operations and mobility, correct bridge deficiencies and to support the city of Clinton's existing and future land use.

Improving Safety

The presentation said there had been 246 documented accidents in the study area from 2007- 2017 – including five fatalities and 12 serious injuries.

Nearly one-fourth of the accidents occurred at Gary Boulevard and Red Wheat Drive intersection (commonly referred to as Malfunction Junction by Clinton residents).

Improving Traffic Operations and Mobility

The existing Exit 65 and 65A interchanges are spaced closely together, which means that traffic entering and exiting the interstate must weave together in a relatively short distance. The short weave distances are a safety concern.

Exit 65 is also lacking the southbound to eastbound entrance to I-40.

The intersection at Gary Boulevard, Lexington Avenue, Red Wheat Drive and Oliver Avenue leads to driver confusion and there are several driveways that cause conflicts.

Correcting Bridge Deficiencies

The existing bridges on I-40 over Red Wheat Drive and Neptune Drive and the adjacent railroads were built in 1959 and need attention. The bridges are in poor condition and functionally obsolete.

Supporting City of Clinton's Existing and Future Land Use

Access to and from I-40 at Exit 65 is important to preserve the ability to develop land in the future.

The City of Clinton is anticipating the area south of I-40 to develop with new homes and businesses. The anticipated growth is expected to generate future traffic volumes beyond the capacity of the existing interchange and adjacent intersections.

COMPARING THE TWO PLANS

Similarities

The presentation said both Alternatives 2D and 9B will include new pavement on I-40 and will replace all the bridges with the same extents.

Both will extend Gary Boulevard south under I-40 to connect with Chapman Road and reconfigure the intersection of Gary Boulevard, Lexington Avenue, Red Wheat Drive and Oliver Ave.

Business drives that pre-

COMPARISON: *Includes Alternative 9B safety concerns*

FROM PAGE 1

viously connected to Red Wheat Drive will be reconstructed to connect directly to Gary Boulevard.

Red Wheat Drive will be removed from Oliver Avenue south to Chapman Road, including the portion under I-40. Access to Chapman Road will be provided by the new extension of Gary Boulevard.

Differences

Alternative 2D will have indirect access to I-40 for Neptune Drive while the access for 9B is very similar to the existing configuration.

2D includes four direct ramps and will remove the two loop ramps at Neptune Drive. 9B includes eight direct ramps, including those at Neptune Drive.

2D includes a free flow protected turn around on the east side of Gary Boulevard under I-40 to provide access to Neptune Drive via the one-way frontage roads. Travel times for the ramp access to and from Neptune Drive are approximately one minute longer per trip for 2D when compared to the existing configuration and 9B.

Access to the old Kmart property will be different between the two alternatives.

2D will include two separate drives into the old Kmart property that connect directly to Gary Boulevard.

Because the loop ramp for 9B is using most of the space between the old Kmart and Gary Boulevard, under that plan the two drives will connect to a local road that will then intersect Gary Boulevard.

2D will include a connection from the one-way frontage road to the Boulevard of Champions just east of the on-ramp. 9B will reconnect the Boulevard of Champions to the new Gary Boulevard between the ramp intersections. No frontage roads are included as part of 9B.

2D has more area for potential future land development than 9B.

Safety Concerns for Alternative 9B

The report said that 9B has safety concerns – such as the potential for wrong way entries on the exit ramps since the exit ramps are located right next to the entrance ramps on both Gary Boulevard and Neptune Drive.

Also, traffic needs to slow way down to travel along the loop ramps. This puts slow moving traffic (25 -30 mph) right next to high-speed traffic (70 mph) traveling on I-40.

By keeping all eight ramps for 9B, there are still weave areas between the two interchanges for both directions on I-40.

The existing configuration has an estimated 19.5 collisions per year. 2D reduces the estimated future collisions to 16.2 collisions per year, while 9B is estimated to increase the number of collisions to 19.7 per year.

SUMMARY

According to the report, "ODOT evaluated the two alternatives in terms of their cost, future access, future safety, and impacts to the environment. Alternative 2D has lower construction and maintenance costs and better safety performance than Alternative 9B. In fact, the safety of Alternative 9B is anticipated to be worse than today's condition."

Evaluation of Alternatives

I-40 Exit 65/65A Project Summary Matrix

	Construction Cost	Right-of-Way Cost	Access with Direct I-40 Ramps	Estimated Future Collisions (per year)	Total Bridge Area (sq. ft.)	Floodplain Impacts (ac)	Wetland Impacts (ac)	Stream Impacts (ft.)
Alternative 2D	$ 46.83 M	$ 2.48 M	4 ramps (with turnaround)	16.2	85,845	4.043	0.105	352
Alternative 9B	$ 48.28 M	$ 2.08 M	8 ramps	19.7	98,638	5.268	0.105	393

ODOT seeks input for I-40 Exit 65/65A interchange

The Oklahoma Department of Transportation is inviting the public to view informational materials and submit feedback for the interchange project at Interstate 40 and Interstate 40 Business/Gary Boulevard and I-40 and Neptune Drive in Clinton in Custer County.

A virtual open house is live on ODOT's website and the public may submit comments via the website, email or mail through December 16.

The department is considering alternatives which will reconstruct the I-40 interchanges at I-40 Business/Gary Boulevard and at Neptune Drive to improve public safety as well as traffic efficiency.

This project also will address four bridges that are at-risk of becoming structurally deficient.

One option rebuilds the I-40 Business/Gary Boulevard interchange and provides access to Neptune Drive via a free-flowing turnaround and one-way frontage roads.

The second option rebuilds both the I-40 Business/Gary Boulevard and Neptune Drive interchanges.

These latest alternatives are based on feedback from the City of Clinton and previous public input.

The department is seeking comments to help develop a final design. The project is scheduled to go out for bid in 2024, based on funding availability.

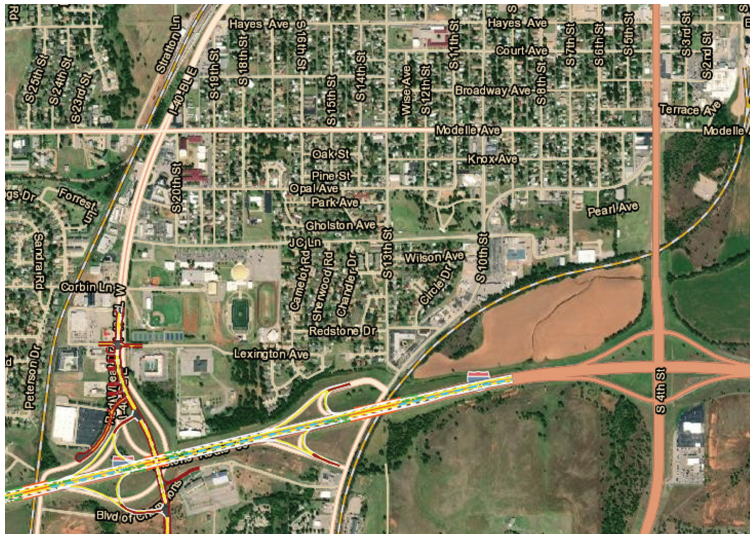

The virtual open house is available online December 2-16 by visiting www.odot.org/I40CusterExit65.

Members of the public can visit www.odot.org/I40CusterExit65 to view the presentation, video and other materials about the proposal and submit comments through December 16.

Due to COVID-19 precautions, this presentation will be a web-based public viewing format with no in-person meetings scheduled.

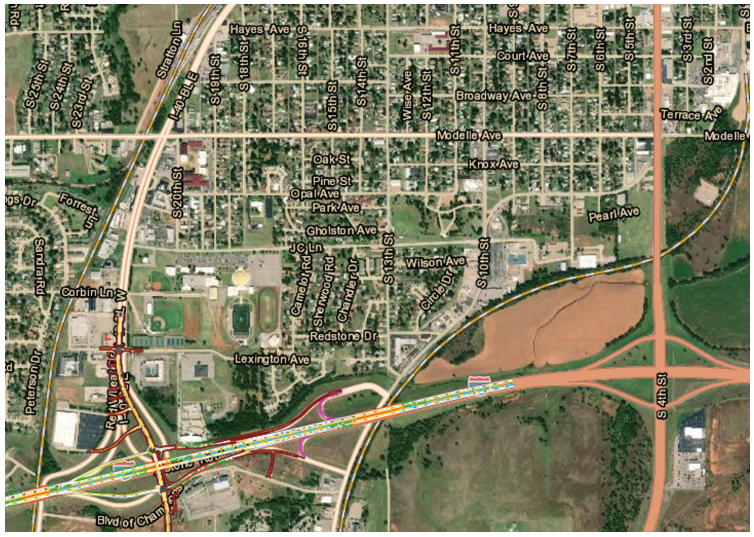

Those without Internet access may contact the ODOT Environmental Programs Division at 200 N.E. 21st St., Ste. 3-D2a, Oklahoma City, OK 73105 or by calling (405) 325-3269 and leave a detailed message.

The best way to leave a comment is to use the Submit a Comment page in the online presentation or email comments to environment@odot.org.

Provided

This map shows a possible allignment of Exit 65/65A. If this design is approved, the Oklahoma Department of Transportation will provide access to and from Interstate 40 and Gary Boulevard in all directions. The existing loop ramps at Neptune Drive will remain. Frontage roads will not be constructed.

Provided

If this design is approved, the Oklahoma Department of Transportation will remove the existing loop ramps at Neptune Drive and traffic wanting to access Neptune Drive from Interstate 40 or vice versa will use the interchange at Gary Boulevard and new frontage roads.

High praise for ODOT

CLINTON DAILY NEWS EDITORIAL

Since improving Exit 65 was put on Oklahoma Department of Transportation's eight-year plan, we have talked often with Brent Almquist, ODOT's District Engineer for District 5 in Clinton, about speeding up construction on the project. Each time, his response was the same – "our number one goal is to do it right."

We learned that getting it right doesn't always mean getting exactly what we want – but that doesn't mean it isn't good.

We had the privilege of meeting with Oklahoma Secretary of Transportation and Executive Director Tim Gatz, ODOT Director of Engineering Tim Tegeler, Chief Engineer Brian Taylor, Caleb Austin, Division Engineer for the ODOT's Roadway Design Division, Almquist, District 5 Construction Engineer Will Snipes, and design engineers from Garver as they worked to come up with plans that are safer and more functional than what we currently have.

We have confidence that ODOT will do what is best.

We support Plan 2D for Clinton because, as it pointed out in its presentation, it has lower construction and maintenance costs and is safer than the alternative. In fact, experts at ODOT and Garver say Alternative 9B is projected to be more dangerous than what we currently have.

We encourage you to go to www.odot.org/I40CusterExit65 to compare the two plans and decide for yourself. Then let ODOT know which you think is best.

Working with the Oklahoma Department of Transportation has restored our faith in Oklahoma government. From its headquarters in Oklahoma City to District 5 in Clinton, they have demonstrated that they truly work for and listen to the people.

Legislators facing tough decisions

December is going to be a busy month at the Capitol.

We started filing bills on Nov. 16 and have until Friday, Dec. 11 to request bills.

Our legislative staff will be working nonstop until the end of January researching bill requests, cross referencing them to see what's in current law to avoid duplication, and finally drafting the bills.

While I have many ideas and have already requested some bills, only one has been filed.

State Sen. Brent Howard

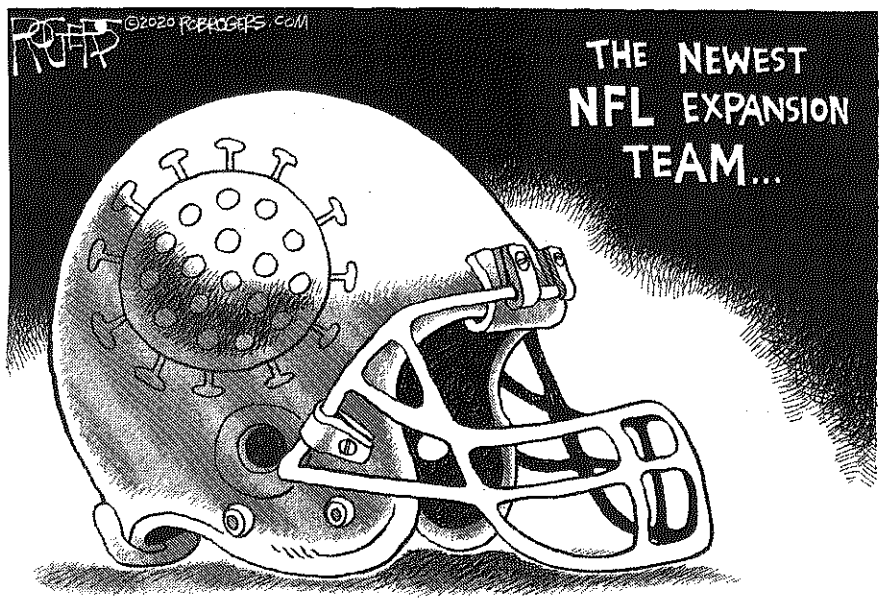

Senate Bill 50 would establish confidentiality requirements for cases assigned to mental health court programs. I filed this same legislation this past session, but it was among the many that weren't heard when the session was cut short.

The State Board of Equalization will meet Dec. 22 to certify revenues for the upcoming fiscal year.

The governor will use this total for his executive budget that will be presented on the first day of session – Monday, Feb. 1. The board will then meet again in mid-February to provide a more accurate revenue amount that the legislature must use when crafting the budget.

We're anticipating around a $1 billion revenue gap from the current budget year. Among the financial issues we'll be facing are continuing low energy prices and the impacts of COVID-19 on our state's economy and revenues.

We also must secure funding for the estimated 200,000 additional Oklahomans who will

Goodbye to peace through strength?

President-elect Joe Biden named his national security team last week. Antony Blinken will be nominated for secretary of state; Jake Sullivan for national security adviser; Avril Haines for director of national intelligence; and Alejandro Mayorkas for secretary of homeland security. All but Sullivan will require Senate confirmation.

Byron York

How that goes depends on how the two runoffs in Georgia go; if Republicans, led by Sen. Mitch McConnell, win control of the Senate, all of Biden's nominees will face more scrutiny than they would from a Democratic Senate headed by Sen. Charles Schumer.

But there was something missing from Biden's big national security rollout: a nominee for secretary of defense. That's a pretty important job on the national security team, isn't it? There was talk that Biden "source close to Biden" told Axios that leaving the defense secretary out of the national security team announcement was intended to send a specific message.

"So having DOD rollout front-and-center sends one message," Axios quoted the source saying. "Not doing so sends another message. There has always been the intent to signal from day one that this is not an administration that is going to put the Pentagon at the center of things."

But the fact is, a strong military is an instrument of national power. Along with economic strength, it is what puts the United States in a powerful position in diplomacy. When the United States manages to shape diplomatic affairs, it is not because the rest of the world thinks we're so nice. It is because the United States is a military and economic superpower.

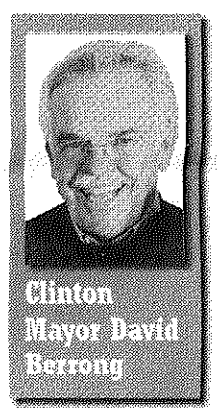

A strong military deters challenges to U.S. authority and to order in the world. The idea of peace through strength has been an important concept in U.S. foreign relations since the

Mayor thinks 2D is best for Clinton

We have all looked at the dessert menu at some point and said "Oh, it all looks so good, I just can't decide."

The two ODOT design plans for I-40 and Exit 65 that we have been asked to review and comment on are not the dessert of our economic future but instead the main course and it is so important we choose the right plan!

In February 2019, the Clinton City Council asked ODOT to return to the drawing board and come back with a highway design that *would better* focus on the modernization of I-40 at Exit 65. This would open the door for Clinton to experience the positives of new interstate businesses and the accompanying flow of many more travelers stopping, eating and shopping in Clinton.

Clinton Mayor David Berrong

We also asked for the design to allow continual I-40 access to Neptune Drive at Exit 65A.

This week they presented two plans for our consideration.

Janice and I recently returned from a road trip to see our daughter and son-in-law in Palo Alto, Calif., and to get there required planning and choosing between competing travel plans. Each plan could get us to the destination but both plans weren't equal when we analyzed what we valued about the trip like time and road conditions.

We discovered not all plans were equally valuable to our goals, and so it is with the two plans presented by ODOT.

I believe Plan 2D is of greater value to Clinton than the other

Senate Bill 50 would establish confidentiality requirements for cases assigned to mental health court programs. I filed this same legislation this past session, but it was among the many that weren't heard when the session was cut short.

The State Board of Equalization will meet Dec. 22 to certify revenues for the upcoming fiscal year.

The governor will use this total for his executive budget that will be presented on the first day of session – Monday, Feb. 1. The board will then meet again in mid-February to provide a more accurate revenue amount that the legislature must use when crafting the budget.

We're anticipating around a $1 billion revenue gap from the current budget year. Among the financial issues we'll be facing are continuing low energy prices and the impacts of COVID-19 on our state's economy and revenues.

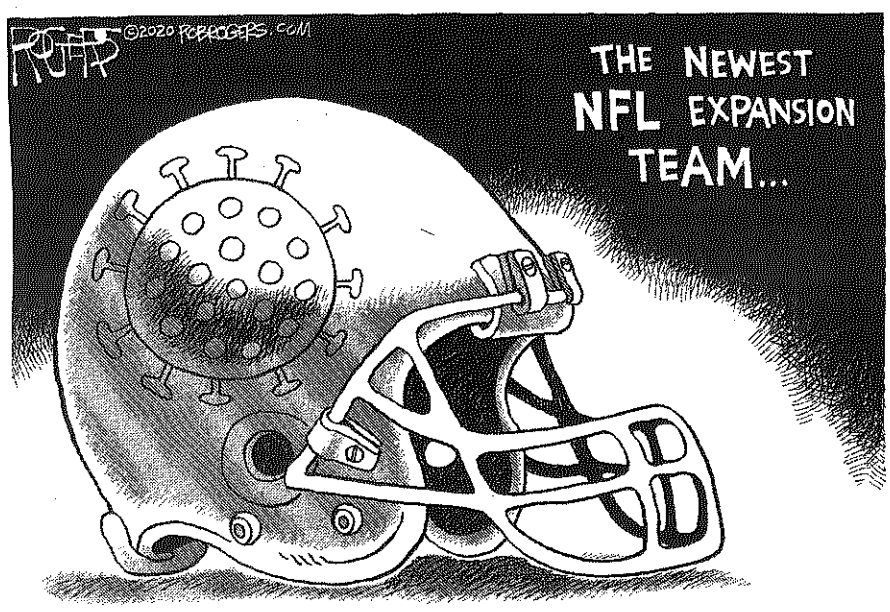

We also must secure funding for the estimated 200,000 additional Oklahomans who will become eligible for SoonerCare next year as approved by voters this summer. This change alone has an estimated annual cost to the state of between $164 million to $256 million. This will be the state's responsibility, and the federal government will cover the remaining cost of expanding Medicaid in Oklahoma.

Tough choices will have to be made to bridge the massive revenue gap. We always strive to protect our state agencies, but we also must fulfill obligations like the Medicaid expansion before finalizing agency budgets.

Unfortunately, our state hasn't seen the worst of this COVID-19 pandemic. It's imperative that Oklahomans heed medical professionals' warnings to social distance, wash your hands and wear a mask in public.

As human beings, we should all have the decency to protect our fellow man regardless of how inconvenient it may be.

As we move through the holiday season, I hope you can focus on the blessings in your life and find good in these difficult times.

Goodbye to peace through strength?

President-elect Joe Biden named his national security team last week. Antony Blinken will be nominated for secretary of state; Jake Sullivan for national security adviser; Avril Haines for director of national intelligence; and Alejandro Mayorkas for secretary of homeland security. All but Sullivan will require Senate confirmation.

Byron York

How that goes depends on how the two runoffs in Georgia go; if Republicans, led by Sen. Mitch McConnell, win control of the Senate, all of Biden's nominees will face more scrutiny than they would from a Democratic Senate headed by Sen. Charles Schumer.

But there was something missing from Biden's big national security rollout: a nominee for secretary of defense. That's a pretty important job on the national security team, isn't it? There was talk that Biden wasn't completely sold on the person thought to be his leading candidate, former Obama defense official Michele Flournoy.

The delay is more than just a personnel issue. Biden is reportedly re-thinking the role of the military in the way the U.S. deals with the world.

The president-elect wants to "de-emphasize the military as an instrument of national power," Axios reported recently. But being an instrument of national power is what the military does. It is why the Army, Navy, Air Force and Marines – and the new Space Force – exist.

Beyond Flournoy, Biden is reportedly considering Lloyd Austin, a retired Army four-star general who was commander of U.S. Central Command from 2013 to 2016. Austin now serves on several corporate boards, among them the defense contractor Raytheon.

It is unclear whether Austin, who served 41 years in the Army, will be more amenable to Biden's plans than Flournoy or other candidates. But a "source close to Biden" told Axios that leaving the defense secretary out of the national security team announcement was intended to send a specific message.

"So having DOD rollout front-and-center sends one message," Axios quoted the source saying. "Not doing so sends another message. There has always been the intent to signal from day one that this is not an administration that is going to put the Pentagon at the center of things."

But the fact is, a strong military is an instrument of national power. Along with economic strength, it is what puts the United States in a powerful position in diplomacy. When the United States manages to shape diplomatic affairs, it is not because the rest of the world thinks we're so nice. It is because the United States is a military and economic superpower.

A strong military deters challenges to U.S. authority and to order in the world. The idea of peace through strength has been an important concept in U.S. foreign relations since the country's founding. Its most famous recent adherent was President Ronald Reagan. Today, President Trump has built his approach to diplomacy on the idea, with impressive results most recently in the Middle East. "America is fulfilling our destiny as a peacemaker, but it is peace through strength," Trump told the United Nations in September.

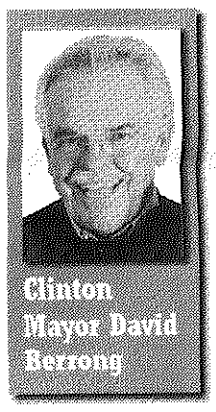

Biden has other ideas, although what they are is not yet clear. Yes, he has other considerations, like race and diversity, in choosing a secretary of Defense. Axios reported that Biden's top advisers "feel pressure to announce an African American to a prominent Cabinet role." Gen. Austin is Black, while Flournoy is White. But there is something much more fundamental going on in Biden's search for a defense chief. The president-elect wants to downplay the greatest instrument of U.S. power in the world. When people say elections have consequences, this is what they mean.

Mayor thinks 2D is best for Clinton

We have all looked at the dessert menu at some point and said "Oh, it all looks so good, I just can't decide."

The two ODOT design plans for I-40 and Exit 65 that we have been asked to review and comment on are not the dessert of our economic future but instead the main course and it is so important we choose the right plan!

In February 2019, the Clinton City Council asked ODOT to return to the drawing board and come back with a highway design that would better focus on the modernization of I-40 at Exit 65. This would open the door for Clinton to experience the positives of new interstate businesses and the accompanying flow of many more travelers stopping, eating and shopping in Clinton.

Clinton Mayor David Berrong

We also asked for the design to allow continual I-40 access to Neptune Drive at Exit 65A.

This week they presented two plans for our consideration.

Janice and I recently returned from a road trip to see our daughter and son-in-law in Palo Alto, Calif., and to get there required planning and choosing between competing travel plans. Each plan could get us to the destination but both plans weren't equal when we analyzed what we valued about the trip like time and road conditions.

We discovered not all plans were equally valuable to our goals, and so it is with the two plans presented by ODOT.

I believe Plan 2D is of greater value to Clinton than the other because it checks more of our goal boxes.

According to ODOT, plan 2D will provide more land for commercial development north and south of I-40 on Gary Boulevard.

Design 2D will be safer for interstate travelers traveling by and exiting into Clinton.

The 2D plan will provide continual access to Neptune Drive.

Exit 65A and the 2D plan will cost less than the other design, thus costing the City of Clinton less as we will be expected to pay for a percentage of the project.

As you go online and view the ODOT presentation, just remember to check the goal boxes of greater north/south commercial development for Clinton, safer design for highway traffic coming into and leaving Clinton, continued access to Neptune Drive Exit 65A from I-40 and a project less expensive to build.

I am excited about ODOT's Plan 2D because I believe it is the plan of greater value to reach this truly historic economic development milestone in Clinton!

Virtual Open House: December 2 – December 21, 2020

Due to concerns about the spread of COVID-19, this open house will be a web-based format (no in-person meeting). The information will be available beginning December 2, 2020 and comments are requested by December 21, 2020. **Due to the disruption caused by inclement weather and the overwhelming response we are continuing to receive, we are extending the Virtual Public Open House and comment period to December 21st.**

Phone Number

This best way to leave a comment or ask a question is to submit a written comment at the Submit a Comment page, or email environment@odot.org. If you would like more information on the

project, you may call (405) 325-3269.

Special Accommodations

The Oklahoma Department of Transportation (ODOT) ensures that no person or groups of persons shall, on the grounds of race, color, sex, religion, national origin, age, disability, retaliation or genetic information, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any and all programs, services, or activities administered by ODOT, its recipients, sub-recipients, and contractors. To request an accommodation please contact the ADA Coordinator at 405-521-4140 or the Oklahoma Relay Service at 1-800-722-0353. If you have any ADA or Title VI questions email ODOT-ada-titlevi@odot.org.

Project History

Existing I-40 Exit 65 is a somewhat unconventional interchange configuration with three direct ramp connections. However, the existing interchange does not allow access to eastbound I-40. Exit 65A provides both eastbound and westbound on and off movements. Exits 65 and 65A are currently in close proximity with merge distances between the ramps that are shorter than desired. There are twin bridges over Red Wheat Drive and Neptune Drive as well as the adjacent railroads, all of which have insufficient vertical clearances. Existing Gary Boulevard provides access to Exit 65, and the existing layout creates driver confusion. The existing intersection with Lexington/Oliver Avenues is also unconventional, with very little spacing between Gary Boulevard and Red Wheat Drive.

There were 246 documented collisions within the project area between 2007 and 2017, including five fatalities. Almost one quarter of the collisions occurred at the Gary Blvd/Red Wheat Dr./I-40 Ramp intersection. The purpose of the project is to improve safety and mobility on I-40 and at Exit 65/65A.

The I-40 Exit 65/65A project began in 2015 with a Preliminary Engineering Study. At that time ODOT developed six alternatives (Alternatives 1-6, including the No Build alternative) to reconstruct the I-40/Exit 65 interchange:

1. Alternative 1: No Build
2. Alternative 2: Standard Diamond
3. Alternative 3: Diverging Diamond
4. Alternative 4: Single Point Urban Interchange
5. Alternative 5: Diamond with Roundabouts
6. Alternative 6: Rotary Oval

ODOT presented these alternatives to the public in May of 2016. Public feedback indicated concern with alternatives that did not accommodate ramp access to I-40 at both Exits 65 and 65A. Given that feedback, ODOT developed two new alternatives (Alternatives 7 & 8) that included a combined interchange design that kept full access to both interchanges utilizing frontage roads and roundabouts. These alternatives were documented in an addendum to the Preliminary Engineering Study completed in December 2018 and presented to the public in February 2019. Following the February 2019 meeting, ODOT received feedback from the City of Clinton and others with concerns about the out of direction travel required by these alternatives, and the potential for driver confusion with a relatively unfamiliar layout. The City asked ODOT to revisit some of the original six alternatives to determine if any would be viable and could leave access at both Exit 65 and 65A.

Since the 2019 public meeting, ODOT has revised Alternative 2 which proposes a standard diamond interchange at Exit 65, known as Alternative 2D. Alternative 2D maintains all direct ramp access at Exit 65 and maintains indirect access to Neptune Drive via a free-flow turnaround at Gary Blvd. In addition to Alternative 2D, ODOT developed Alternative 9B, a folded diamond interchange, which maintains all direct ramp connections at both Exit 65 and 65A. These two alternatives have been carried forward into the virtual public open house.

WELCOME

OKLAHOMA Transportation

Virtual Public Open House

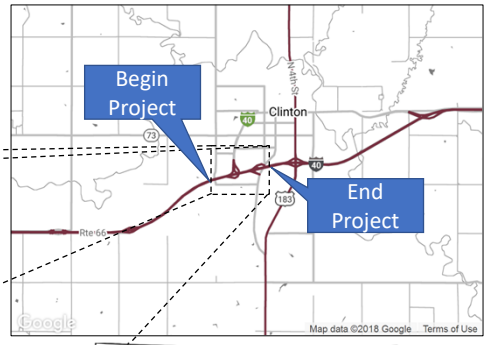

I-40 Exit 65/65A Interchange
Custer County
December 2-16, 2020

Welcome to the virtual public open house for the I-40 Interchanges at Exit 65 and 65A in Clinton, Oklahoma in Custer County. This Open House will be available from December 2 through December 16.

Purpose of the Open House

1. **Update the Public on the Status of the I-40 Exit 65/65A Interchange Project**

OKLAHOMA Transportation

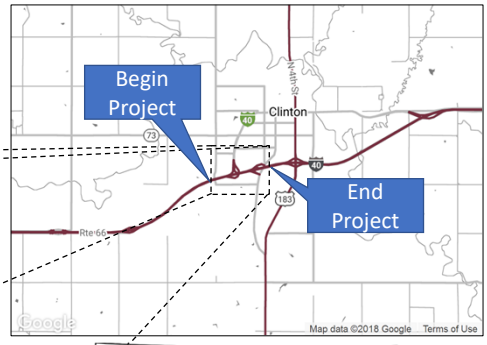

GARVER

The purpose of this open house is to update the public on the status of project. As shown on the map, the project is located on I-40 beginning at 28th Street and extending east to approximately 1/3 mile east of Neptune Drive. This includes the interchanges at Gary Boulevard (Exit 65), and Neptune Drive (Exit 65A).

Purpose of the Open House

2. Present the Current Alternatives Under Consideration and Obtain Public Input

OKLAHOMA Transportation

GARVER

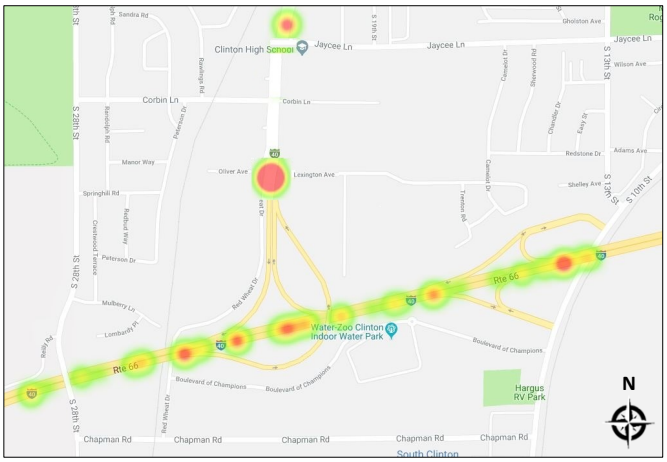

Since the last public meeting in February of 2019, ODOT has developed new alternatives for the I-40 Exit 65 and 65A interchanges. We will present these alternatives and provide a comparison of how they meet the purpose and need for the project, and what impacts they have. ODOT would like your input on the current alternatives.

Purpose of the Project

Improve Safety

Collision Data

- Total: 246 Documented Collisions (2007-2017)
  - -5 Fatalities
  - -12 Serious Injury
- Most Common Type of Collision (>50%)
  - -Fixed Object
  - -Rear-End
- Gary Blvd./Red Wheat Dr./Ramps Intersection Included 22% of the Collisions

OKLAHOMA Transportation

GARVER

The purpose of the project is to improve safety and traffic operations at Exit 65 and 65A. As shown on this slide, there were 246 documented collisions in the study area between 2007 and 2017. The graphic shown on this slide is a heat map with red areas indicating high number of collisions as reported to local law enforcement. Almost one-quarter of these occurred at the Gary Blvd./Red Wheat Drive/I-40 Ramp intersection, represented by the largest red dot on the map.

Purpose of the Project

Improve Traffic Operations and Mobility

- **Highway Deficiencies**
  - Interchange Spacing
  - Missing Ramp Movement
  - Ramp Departures
- **Local Road Deficiencies**
  - Intersection Confusion
  - Weave Area Traveling North
  - Driveway Proximity

OKLAHOMA Transportation

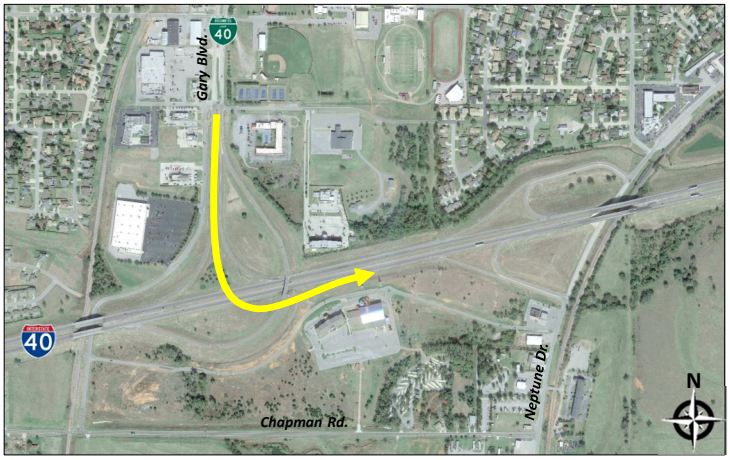

GARVER

The existing Exit 65 and 65A interchanges are spaced closely together, which means that traffic entering and exiting the interstate must weave together in a relatively short distance. The short weave distances do not meet today's design standards and are a safety concern.

Purpose of the Project

Improve Traffic Operations and Mobility

- **Highway Deficiencies**
  - Interchange Spacing
  - Missing Ramp Movement
  - Ramp Departures
- **Local Road Deficiencies**
  - Intersection Confusion
  - Weave Area Traveling North
  - Driveway Proximity

OKLAHOMA Transportation

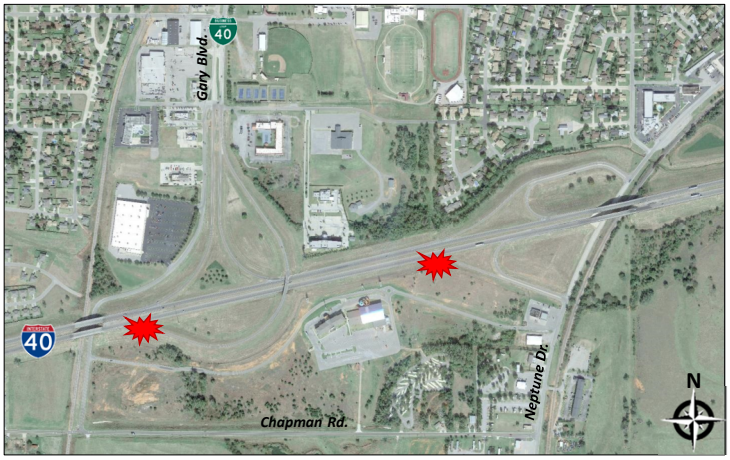

GARVER

Exit 65 is also lacking the southbound to eastbound entrance to I-40.

Purpose of the Project

Improve Traffic Operations and Mobility

- **Highway Deficiencies**
  - Interchange Spacing
  - Missing Ramp Movement
  - Ramp Departures
- **Local Road Deficiencies**
  - Intersection Confusion
  - Weave Area Traveling North
  - Driveway Proximity

OKLAHOMA Transportation

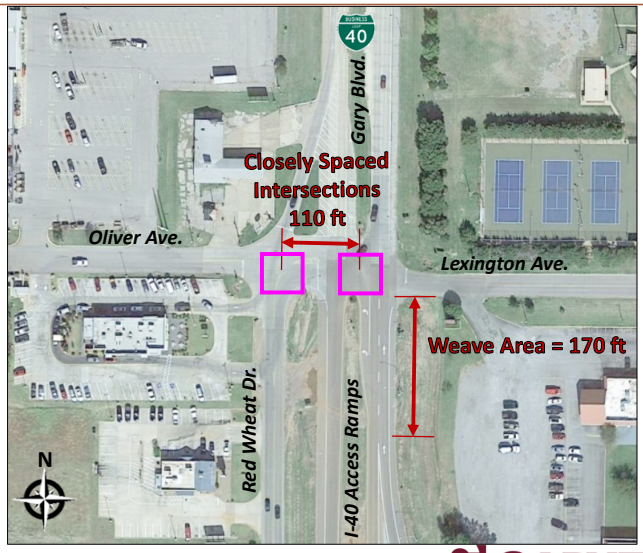

GARVER

Collision data shows high number of collisions at the exit ramps which indicates some problems with the geometry such as not enough distance to slow down.

Purpose of the Project

Improve Traffic Operations and Mobility

- **Highway Deficiencies**
  - Interchange Spacing
  - Missing Ramp Movement
  - Ramp Departures
- **Local Road Deficiencies**
  - Intersection Confusion
  - Weave Area Traveling North
  - Driveway Proximity

OKLAHOMA Transportation

GARVER

There are two closely spaced intersections located at the end of the I-40 ramps where they connect with Gary Boulevard and Lexington/Oliver Avenues. The intersection with Red Wheat Drive is located slightly to the west. These intersections are not typical and lead to driver confusion. In addition, there are several driveways near the intersections that cause conflicts with intersection traffic.

Purpose of the Project

Correct Bridge Deficiencies

- **Bridges Built in 1959**
- **All Functionally Obsolete (5)**
  - Shoulder Widths
  - Barrier Height
  - Vertical Clearance
- **Structurally At Risk (4)**
  - Poor Condition Rating
  - Needs Attention

OKLAHOMA Transportation

GARVER

The existing bridges on I-40 over Red Wheat Drive and Neptune Drive and the adjacent railroads are considered at risk for becoming structurally deficient. This means their condition is poor in one or more areas and they need attention. The bridges are also functionally obsolete, which means they do not have sufficient shoulder widths, barrier heights, or vertical clearance underneath.

Purpose of the Project

Support City of Clinton Existing and Future Land Use

- **Access to Existing and Future Development**
  - Residential
  - Commercial
  - Community
    - Schools
    - Churches
    - Parks
- **Preserve Land for Future Development**

OKLAHOMA Transportation

The land use surrounding Exits 65 and 65A is a mix of residential, commercial, and community land use. Residential areas are shown in blue, commercial in yellow, and community in red. Community facilities include schools, churches, and parks.

Purpose of the Project

Support City of Clinton Existing and Future Land Use

- **Access to Existing and Future Development**
  - Residential
  - Commercial
  - Community
    - Schools
    - Churches
- **Preserve Land for Future Development**

OKLAHOMA Transportation

GARVER

Access to and from I-40 at Exit 65 is important to preserve the ability to develop land in the future. In particular, the City of Clinton is anticipating the area south of I-40 to develop with new homes and businesses. The anticipated growth is expected to generate future traffic volumes beyond the capacity of the existing interchange and adjacent intersections.

Project History

May 2015 Study

- The Study evaluated the current functionality of the I-40 Exit 65 Interchange, and traffic at nearby intersections

OKLAHOMA Transportation

GARVER

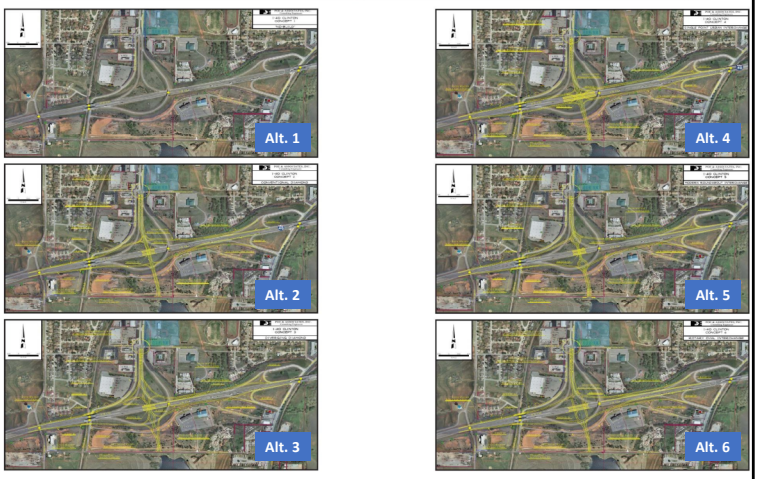

Next we will review the history of this project. ODOT initiated a study of the I-40/Gary Boulevard interchange in May 2015. The study looked at the current functionality of the interchange as well as traffic at nearby intersections.

Project History

May 24, 2016 Public Meeting

- **Six Alternatives Were Shown**
- **Comments at the Meeting Included:**
  - Desire for Eastbound and Westbound I-40 Access From Both Neptune Blvd. (Exit 65A) and Gary Blvd. (Exit 65)
  - Desire to Keep Both Exit 65 and 65A Open
  - Concerns Regarding Accessibility of Frontage Roads

I-40/I-40B (Gary Boulevard) Interchange at Exit 65 Modification Study Concepts

OKLAHOMA Transportation

GARVER

Six alternatives were developed as part of the 2015 study, which were presented at a public meeting on May 24, 2016 in Clinton. Public feedback from that meeting expressed a desire for eastbound and westbound access from both Gary Blvd. (Exit 65) and Neptune Dr. (Exit 65A), and to keep both interchanges open.

Project History

February 28, 2019 Public Meeting

- **Two New Alternatives Were Shown**
  - Kept Both Exit 65 and 65A
  - Utilized Two-Way Frontage Roads and Roundabouts
- **Comments at the Meeting Included:**
  - Concern about out-of-direction travel
  - Concern about business visibility and access
  - Not comfortable with non-traditional design
  - Desire to revisit the original, more traditional concepts

OKLAHOMA Transportation

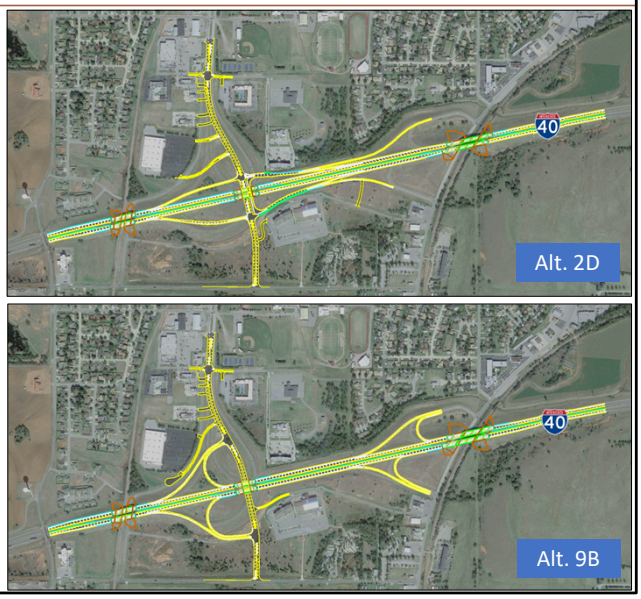

In response to that feedback, ODOT developed Alternatives 7 and 8 that achieved these goals with the use of frontage roads and roundabouts between the two interchanges. These alternatives were presented to the public at a meeting on February 28, 2019. Feedback from the public and the City of Clinton expressed concern with the out of direction travel that would be required, and the relatively new and unfamiliar roundabout configuration.

Project History

Current Alternatives

- **Alternative 2D**
  - ODOT revisited and refined the original Alternative 2
  - Standard diamond configuration
  - Keeps all ramps at Exit 65 (Gary Blvd.)
  - Includes free-flow turnaround at Gary Blvd. to provide access to Neptune Dr.
- **Alternative 9B**
  - ODOT developed a new alternative to maintain all ramps
  - Folded diamond configuration at Gary Blvd. and Neptune Dr.

OKLAHOMA Transportation

As a result of the concern over Alternatives 7 and 8, ODOT revisited the original six alternatives. This meeting presents Alternatives 2D and 9B, which are more traditional interchange designs that still achieve the majority of the City's and the public's stated goals.

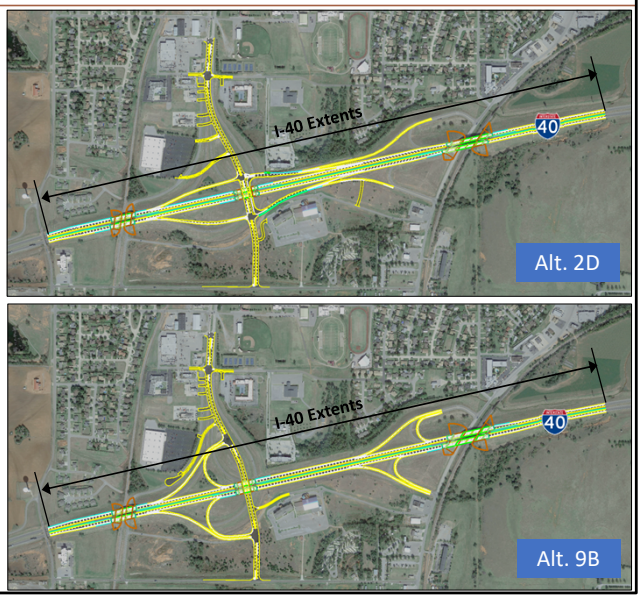

Alternative 2D is a standard diamond configuration with four ramps at Gary Boulevard (Exit 65). The design for Alternative 2D includes a free flow protected turnaround on the east side of Gary Boulevard, under I-40, along with one-way frontage roads to provide access to Neptune Drive.

Alternative 9B includes a folded diamond interchange at Gary Boulevard (Exit 65) and maintains the folded diamond configuration at Neptune Drive (Exit 65A). We will now describe these alternatives in more detail.

Alternatives Overview

Design Similarities

- I-40 Pavement Reconstruction Extents
- Gary Blvd. Alignment
- Intersection at Oliver/Lexington & Gary Blvd.
- Business Drives on North Half of Gary Blvd.
- Removal of Red Wheat Dr. under I-40

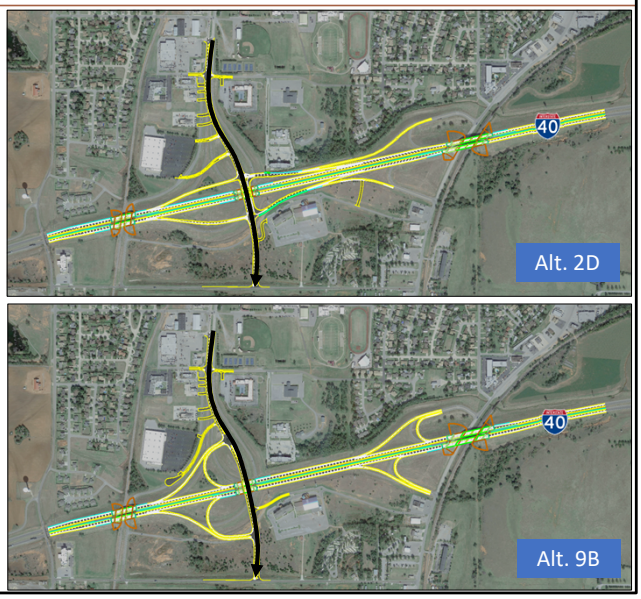

OKLAHOMA Transportation

First we are going to discuss how the two alternatives are similar. Both alternatives will include new pavement on I-40 and will replace all the bridges with the same extents.

Alternatives Overview

Design Similarities

- I-40 Pavement Reconstruction Extents
- Gary Blvd. Alignment
- Intersection at Oliver/Lexington & Gary Blvd.
- Business Drives on North Half of Gary Blvd.
- Removal of Red Wheat Dr. under I-40

OKLAHOMA Transportation

Also, both alternatives will extend Gary Boulevard south under I-40 to connect with Chapman Road.

Alternatives Overview

Design Similarities

- I-40 Pavement Reconstruction Extents
- Gary Blvd. Alignment
- Intersection at Oliver/Lexington & Gary Blvd.
- Business Drives on North Half of Gary Blvd.
- Removal of Red Wheat Dr. under I-40

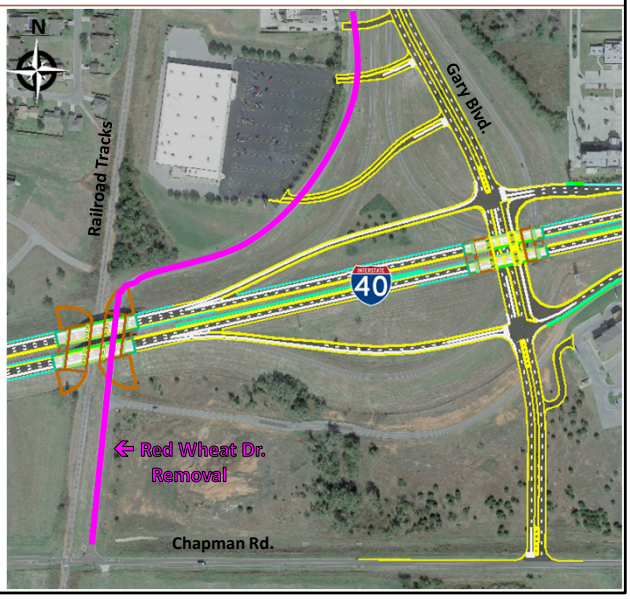

OKLAHOMA Transportation

Another similarity is the reconfiguration of the intersection of Gary Boulevard and Lexington Ave./Oliver Ave. Both alternatives will simplify this intersection to a four-leg intersection. Business drives that previously connected to Red Wheat Drive will be reconstructed to connect directly to Gary Boulevard.

Alternatives Overview

Design Similarities

- I-40 Pavement Reconstruction Extents
- Gary Blvd. Alignment
- Intersection at Oliver/Lexington & Gary Blvd.
- Business Drives on North Half of Gary Blvd.
- Removal of Red Wheat Dr. under I-40

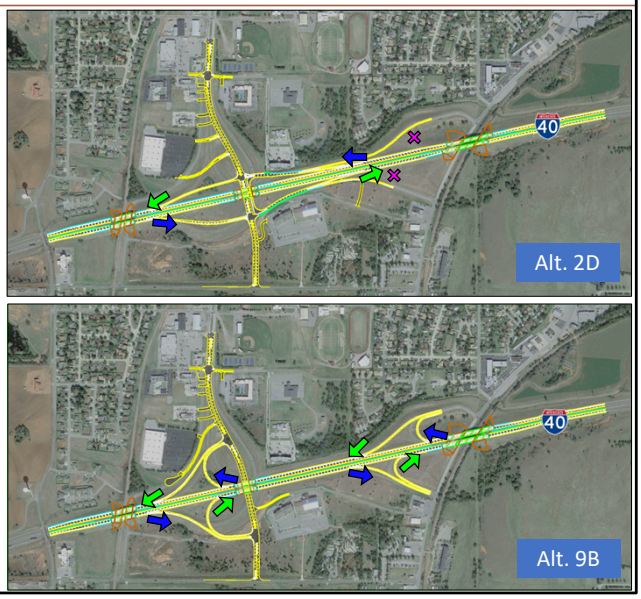

OKLAHOMA Transportation

Red Wheat Drive will be removed from Oliver Avenue south to Chapman Road, including the portion under I-40. Access to Chapman Road will be provided by the new extension of Gary Boulevard.

Alternatives Overview

Design Differences

- Number of I-40 Direct Ramps (4 vs. 8)
  Indirect Access Provided for Neptune Dr.
- Free Flow Protected Turnaround
- Old Kmart Access
- Blvd. of Champions Connection
- Future Land Development

Exit Ramp
Entrance Ramp
Ramp Removal

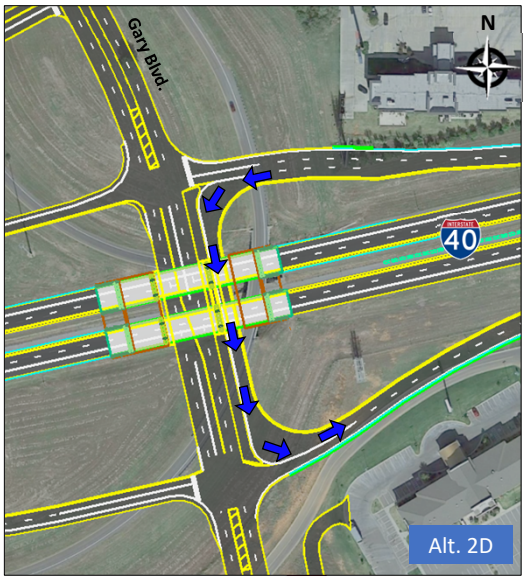

OKLAHOMA Transportation

Next we will highlight the differences between the two alternatives. The biggest difference is the number of direct ramps that connect to I-40. Alternative 2D includes four direct ramps and will remove the two loop ramps at Neptune Drive and Alternative 9B includes eight direct ramps.

Alternatives Overview

Design Differences

- Number of I-40 Direct Ramps (4 vs. 8)
  Indirect Access Provided for Neptune Dr.
- Free Flow Protected Turnaround
- Old Kmart Access
- Blvd. of Champions Connection
- Future Land Development

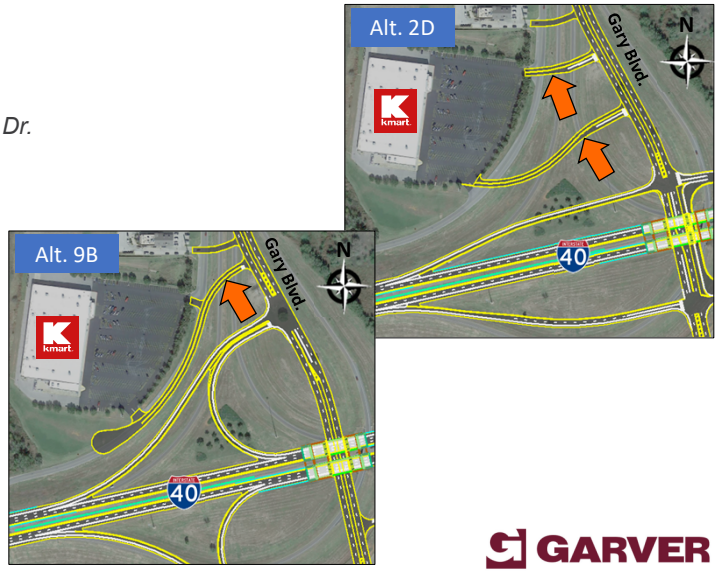

OKLAHOMA Transportation

Alternative 2D includes a free flow protected turn around on the east side of Gary Boulevard under I-40 to provide access to Neptune Drive via the one-way frontage roads.

Alternatives Overview

Design Differences

- Number of I-40 Direct Ramps (4 vs. 8)
  Indirect Access Provided for Neptune Dr.
- Free Flow Protected Turnaround
- Old Kmart Access
- Blvd. of Champions Connection
- Future Land Development

OKLAHOMA Transportation

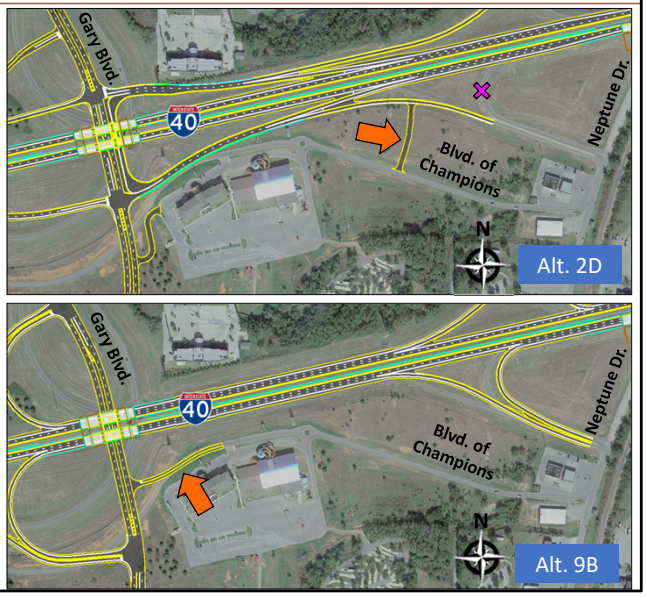

GARVER

Access to the old K-Mart property will be different between the two alternatives. Alternative 2D will include two separate drives from the parking lot that connect directly to Gary Boulevard. For Alternative 9B, the two drives will connect to a local road that will then intersect Gary Boulevard. This is because the loop ramp for Alternative 9B is using most of the space between the old K-mart and Gary Boulevard.

Alternatives Overview

Design Differences

- Number of I-40 Direct Ramps (4 vs. 8)
  Indirect Access Provided for Neptune Dr.
- Free Flow Protected Turnaround
- Old Kmart Access
- Blvd. of Champions Connection
- Future Land Development

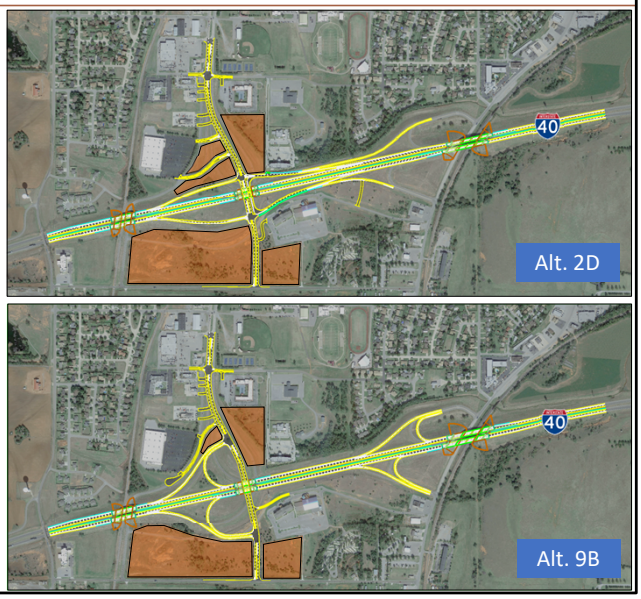

OKLAHOMA Transportation

Alternative 2D will include a connection from the one-way frontage road to the Boulevard of Champions just east of the on-ramp. Alternative 9B will reconnect the Boulevard of Champions to the new Gary Boulevard between the ramp intersections. No frontage roads are included as part of Alternative 9B.

Alternatives Overview

Design Differences

- Number of I-40 Direct Ramps (4 vs. 8)
  Indirect Access Provided for Neptune Dr.
- Free Flow Protected Turnaround
- Old Kmart Access
- Blvd. of Champions Connection
- Future Land Development

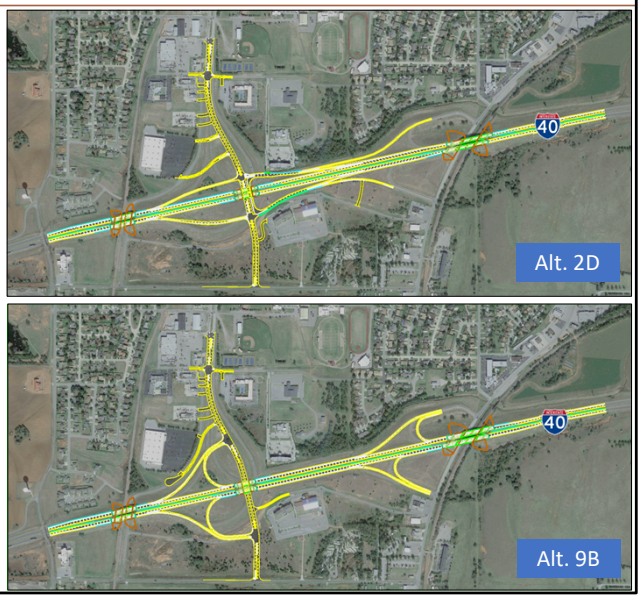

OKLAHOMA Transportation

The City of Clinton wanted to extend Gary Boulevard south of I-40 to open this area for future economic growth. Both alternatives achieve this goal. Alternative 2D has more area for potential future land development than Alternative 9B.

Alternatives Comparison

I-40 Access Changes for Neptune Drive

- Alternative 2D – Indirect Access to I-40
- Alternative 9B – Very Similar to Existing

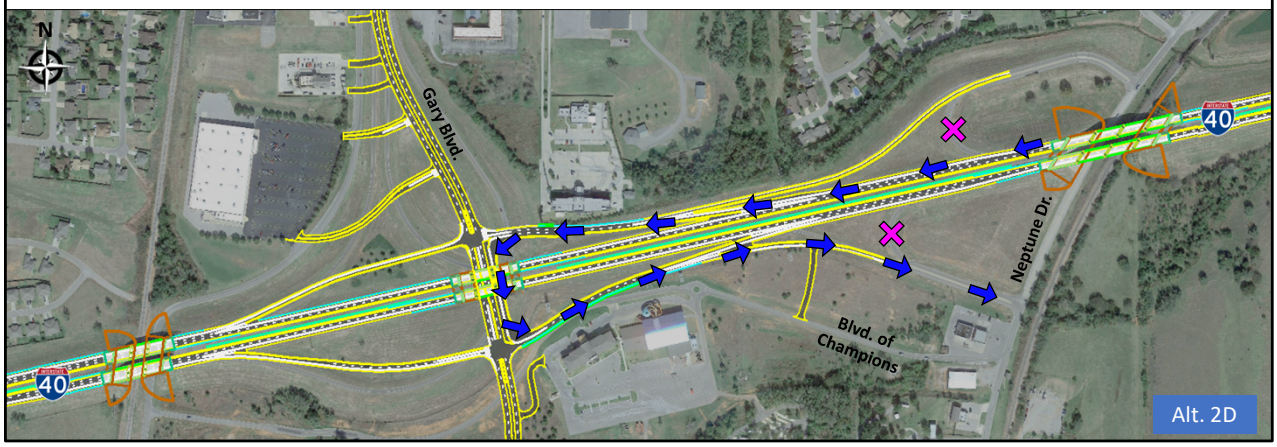

OKLAHOMA Transportation

Next, we are going to compare the access changes to Neptune Drive for the two alternatives. Alternative 2D will have indirect access to I-40 for Neptune Drive while the access for Alternative 9B is very similar to the existing because is has the same configuration. The next several slides will show how drivers can access Neptune Drive for Alternative 2D.

Alternatives Comparison

I-40 Access Changes for Neptune Dr.

- Alt. 2D ➔ I-40 WB to Neptune Dr.

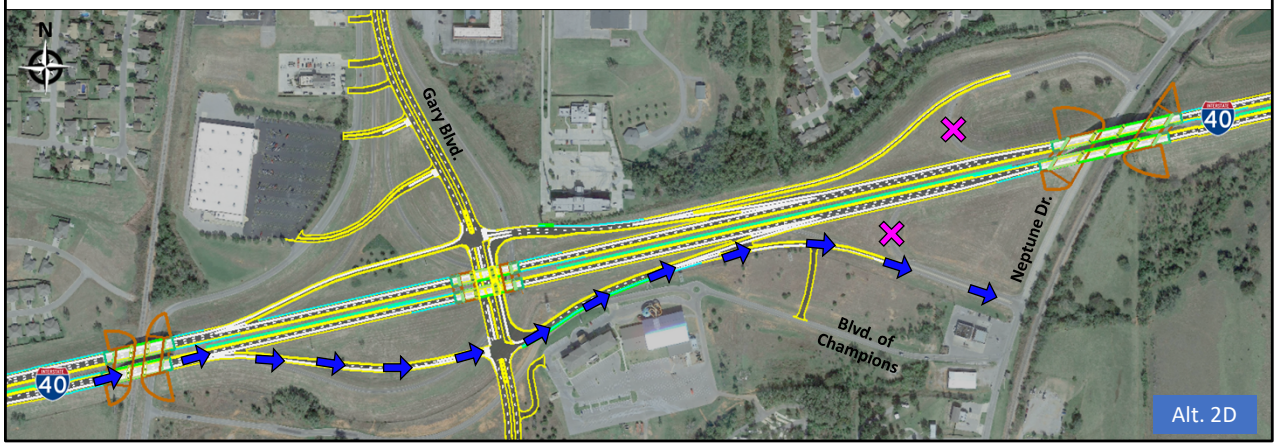

For drivers traveling west bound on I-40 wanting to go to Neptune Drive, they will exit after passing over Neptune Drive. Then they will join the one-way frontage road and use the free flow protected turn around to the one-way frontage road on the south side of I-40 until it intersects Neptune Drive.

Alternatives Comparison

I-40 Access Changes for Neptune Dr.

- Alt. 2D ➔ I-40 EB to Neptune Dr.

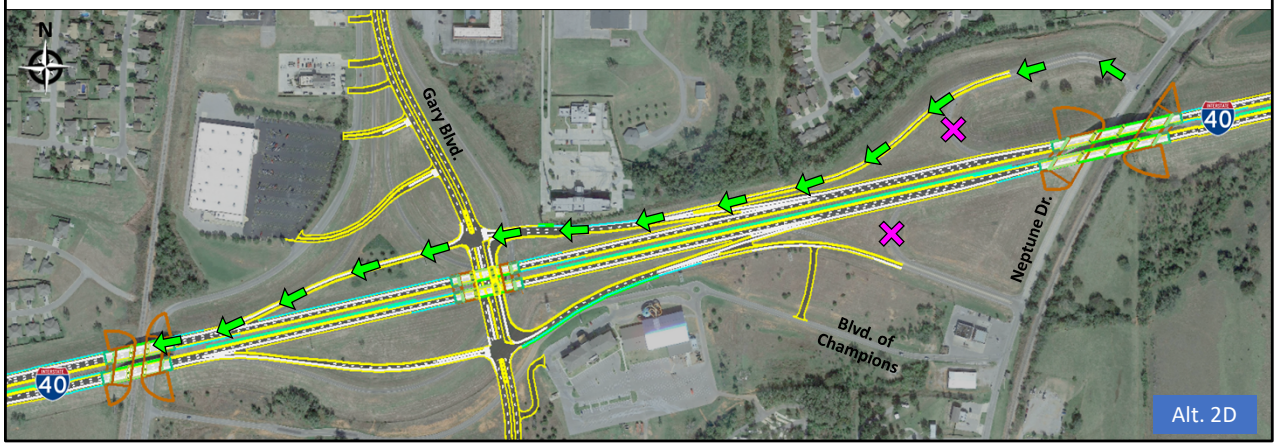

For drivers traveling east bound on I-40 wanting to go to Neptune drive they will exit at Gary Boulevard. Then they will cross Gary Boulevard and join the one-way frontage road on the south side of I-40 until it intersects Neptune Drive.

Alternatives Comparison

I-40 Access Changes for Neptune Dr.

- Alt. 2D ➔ Neptune Dr. to I-40 WB

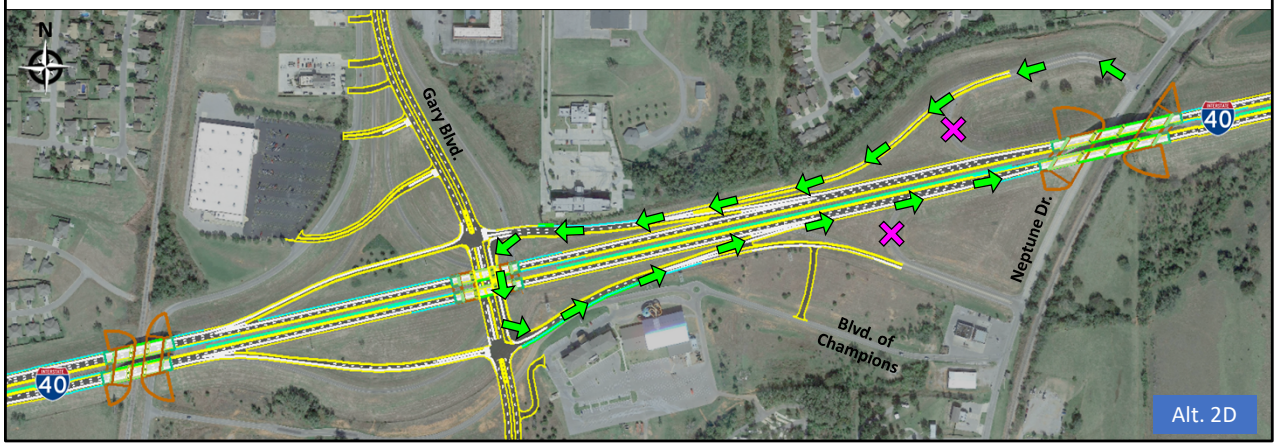

For drivers traveling along Neptune Drive and wanting to go west on I-40, they will turn on to the one-way frontage road on the north side of I-40. Then they will cross Gary Boulevard and join the on-ramp from Gary Boulevard to I-40.

Alternatives Comparison

I-40 Access Changes for Neptune Dr.

- Alt. 2D ➔ Neptune Dr. to I-40 EB

Finally, for drivers traveling along Neptune Drive and wanting to go east on I-40, they will turn on to the one-way frontage road on the north side of I-40. Then they will use the free flow protected turn around to the one-way frontage road on the south side of I-40 and take the on-ramp to I-40.

Alternatives Comparison

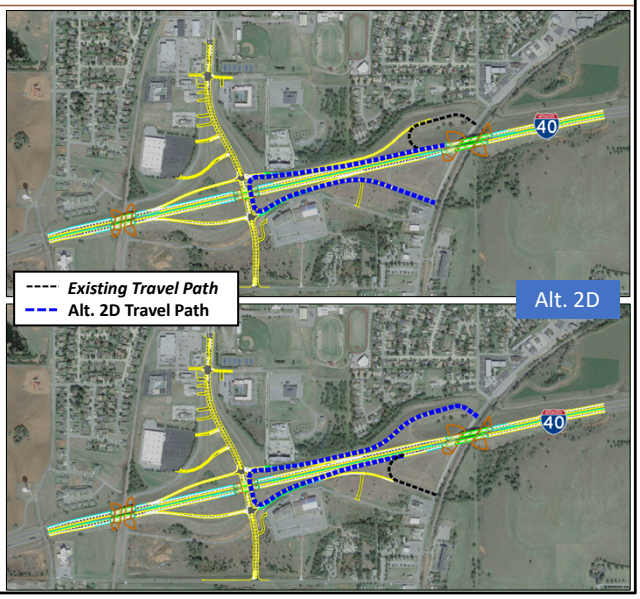

Travel Times Comparison

- (+) Additional Time Compared to Existing
- (-) Less Time Compared to Existing

GARY BOULEVARD				
TRAVEL PATH		TRAVEL TIME COMPARISON		
FROM	*TO*	*EXISTING*	*ALT 2D*	*ALT 9B*
I-40 WB	*GARY*	0:00:45	+ 0:00:10	+ 0:00:22
I-40 EB	*GARY*	0:00:55	+ 0:00:10	+ 0:00:22
GARY	*I-40 WB*	0:00:34	+ 0:00:09	+ 0:00:06
GARY	*I-40 EB*	0:03:34	- 0:02:24	- 0:02:05

NEPTUNE DRIVE				
TRAVEL PATH		TRAVEL TIME COMPARISON		
FROM	*TO*	*EXISTING*	*ALT 2D*	*ALT 9B*
I-40 WB	*NEPTUNE*	0:00:36	+ 0:00:48	- 0:00:04

NEPTUNE	*I-40 WB*	0:01:05	+ 0:00:27	- 0:00:00
NEPTUNE	*I-40 EB*	0:00:27	+ 0:01:15	- 0:00:03

OKLAHOMA Transportation

Travel times were calculated for all movements of the two alternatives at both Gary Boulevard and Neptune Drive. The tables shown on this slide list the travel times for the existing ramps. The tables also show an increase or decrease of travel time compared to the existing for the proposed ramps for Alternatives 2D and 9B. As expected, the travel times for the ramp access to and from Neptune Drive are longer for Alternative 2D as compared to the existing and Alternative 9B. However, this increase in travel time is an average of approximately one minute per trip.

Alternatives Comparison

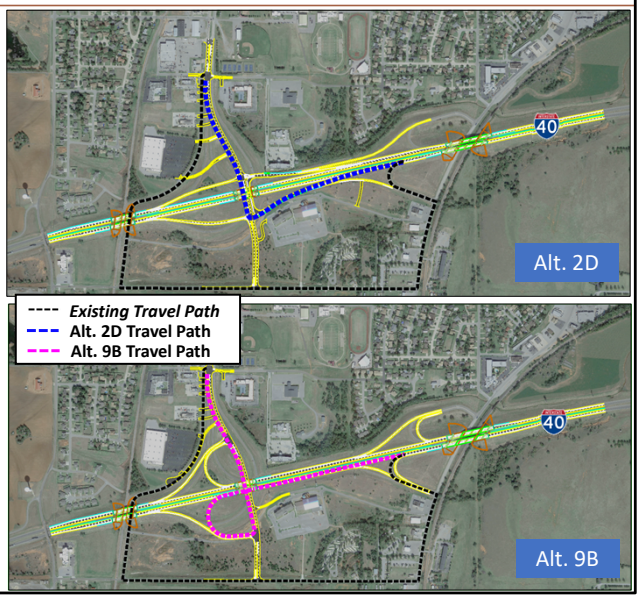

Travel Times Comparison

- (+) Additional Time Compared to Existing
- (-) Less Time Compared to Existing

GARY BOULEVARD				
TRAVEL PATH		TRAVEL TIME COMPARISON		
FROM	*TO*	*EXISTING*	*ALT 2D*	*ALT 9B*
I-40 WB	*GARY*	0:00:45	+ 0:00:10	+ 0:00:22
I-40 EB	*GARY*	0:00:55	+ 0:00:10	+ 0:00:22
GARY	*I-40 WB*	0:00:34	+ 0:00:09	+ 0:00:06
GARY	*I-40 EB*	0:03:34	- 0:02:24	- 0:02:05

NEPTUNE DRIVE				
TRAVEL PATH		TRAVEL TIME COMPARISON		
FROM	*TO*	*EXISTING*	*ALT 2D*	*ALT 9B*
I-40 WB	*NEPTUNE*	0:00:36	+ 0:00:48	- 0:00:04
I-40 EB	*NEPTUNE*	0:00:54	+ 0:00:17	- 0:00:04
NEPTUNE	*I-40 WB*	0:01:05	+ 0:00:27	- 0:00:00
NEPTUNE	*I-40 EB*	0:00:27	+ 0:01:15	- 0:00:03

OKLAHOMA Transportation

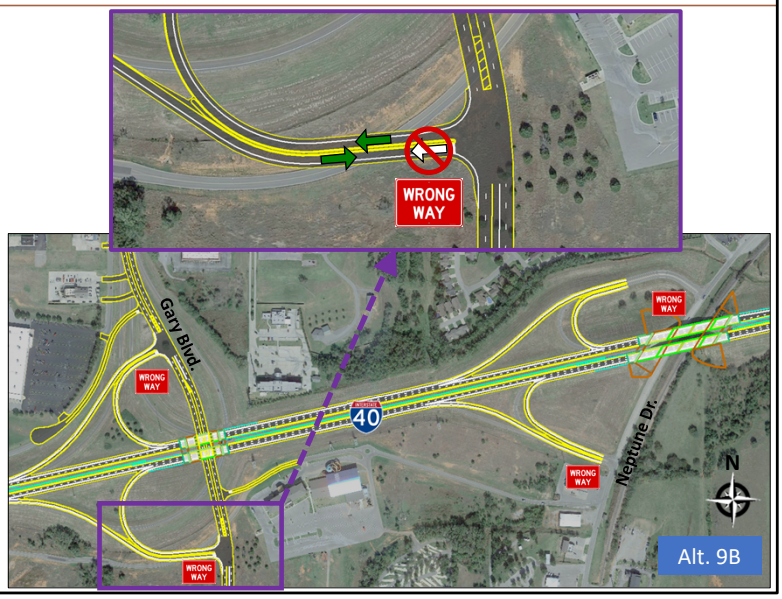

Both alternatives showed great improvement for the travel time from Gary Boulevard to I-40 east bound compared to the existing. This improvement is also expected since there is not a direct access ramp for this movement today.

Alternatives Comparison

Safety Concerns for Alt. 9B

- Wrong Way Ramp Entries
- Speed Differential
- Weave Between Interchanges
- Estimated I-40 Future Collisions

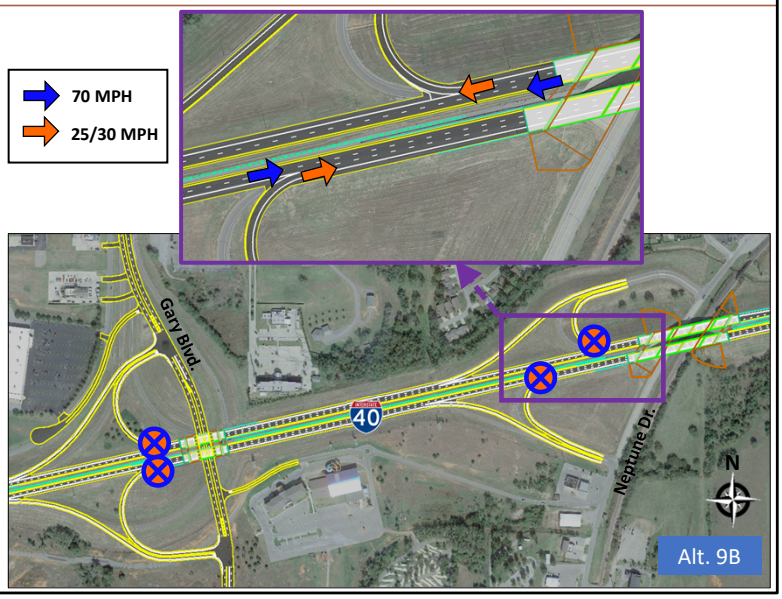

OKLAHOMA Transportation

With the direct access and better travel times for Alternative 9B some may be asking why ODOT and the City of Clinton are considering Alternative 2D. One of the stated purposes of the project is to improve safety. Alternative 9B does have some safety concerns that are not ideal such as the potential for wrong way entries on the exit ramps. This is more likely with Alternative 9B since the exit ramps are located right next to the entrance ramps on both Gary Boulevard and Neptune Drive.

Alternatives Comparison

Safety Concerns for Alt. 9B

- Wrong Way Ramp Entries
- Speed Differential
- Weave Between Interchanges
- Estimated I-40 Future Collisions

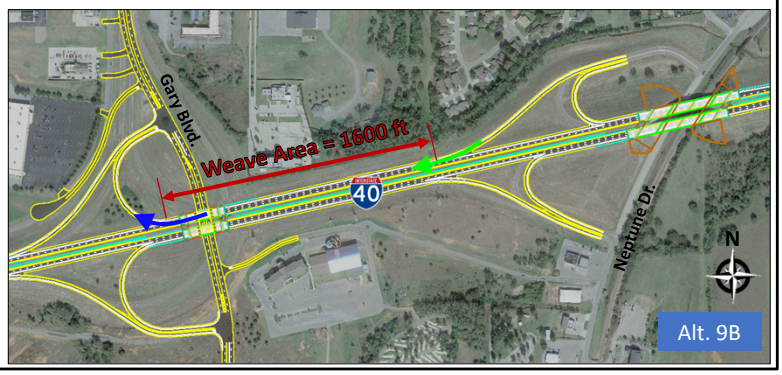

OKLAHOMA Transportation

Also, traffic needs to slow way down to travel along the loop ramps. This puts slow moving traffic right next to high-speed traffic traveling through on I-40.

Alternatives Comparison

Safety Concerns for Alt. 9B

- Wrong Way Ramp Entries
- Speed Differential
- Weave Between Interchanges
- Estimated I-40 Future Collisions

OKLAHOMA Transportation

By keeping all eight ramps for Alternative 9B, there are still weave areas between the two interchanges for both directions on I-40. The distance provided meets the MINIMUM federal criteria.

Alternatives Comparison

Safety Concerns for Alt. 9B

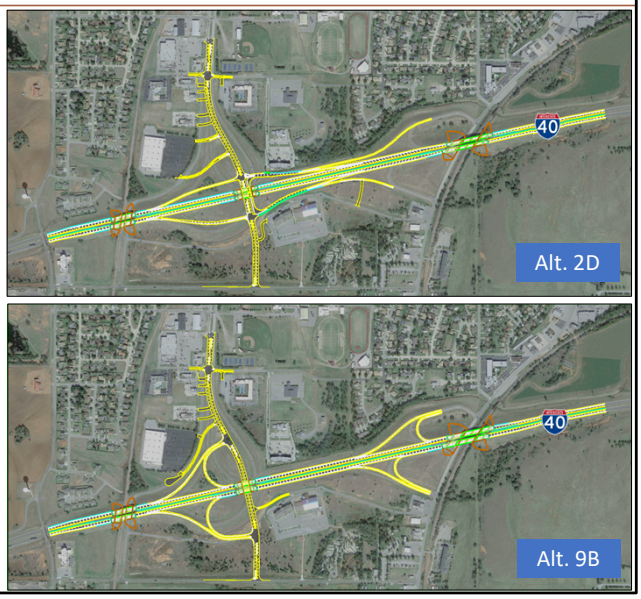

- Wrong Way Ramp Entries
- Speed Differential
- Weave Between Interchanges
- Estimated I-40 Future Collisions

Existing → 19.5 Collisions/Year

Alt. 2D → **16.2** Collisions/Year

Alt. 9B → **19.7** Collisions/Year

OKLAHOMA Transportation

Finally we estimated future collisions along I-40 for the existing configuration and both alternatives. The existing configuration has an estimated 19.5 collisions/year. Alternative 2D reduces the estimated future collisions to 16.2 collisions/year but Alternative 9B has a slight increase in estimated future collisions to 19.7 collisions/year. The predictive model is largely based on the numbers of ramps to the interstate and since Alternative 9B has the most ramps it is expected that it would have the highest number of estimated future collisions.

Evaluation of Alternatives

I-40 Exit 65/65A Project Summary Matrix

	Construction Cost	Right-of-Way Cost	Access with Direct I-40 Ramps	Estimated Future Collisions (per year)	Total Bridge Area (sq. ft.)	Floodplain Impacts (ac)	Wetland Impacts (ac)	Stream Impacts (ft.)
Alternative 2D	$ 46.83 M	$ 2.48 M	4 ramps (with turnaround)	16.2	85,845	4.043	0.105	352
Alternative 9B	$ 48.28 M	$ 2.08 M	8 ramps	19.7	98,638	5.268	0.105	393

OKLAHOMA Transportation

lower cost / less impact
higher cost / more impact

GARVER

ODOT evaluated the two alternatives in terms of their cost, future access, future safety, and impacts to the environment. In the table on the slide you can see how each alternative performed. The green cells indicate a lower cost or fewer impacts, and the orange indicates higher cost or more impacts. Overall, Alternative 2D had lower cost, better safety performance, and fewer impacts than Alternative 9B.

Evaluation of Alternatives

Alternative 2D

- Lower Construction and Maintenance Cost
- Better Safety Performance
- Increased Travel Times of Approximately 1 Minute for Neptune Drive

Alternative 9B

- Higher Construction and Maintenance Cost
- Worse Safety Performance
- Similar Travel Times as Today for Neptune Drive

This slide shows a summary of the key differences between Alternatives 2D and 9B. As shown on the previous slide, Alternative 2D has lower construction and maintenance costs and better safety performance than Alternative 9B. In fact, the safety of Alternative 9B is anticipated to be worse than today's condition. Alternative 2D will increase travel times slightly for traffic to and from Neptune Drive, but these increases are expected to be approximately one minute on average per trip.

Next Steps Environmental Studies

- **ODOT will complete detailed studies of:**
  - Right-of-Way and Utility Relocations
  - Land Use and Business Impacts
  - Waters and Wetlands
  - Threatened and Endangered Species
  - Cultural Resources (Historic and Archeological)
  - Hazardous Materials
  - Noise
- **ODOT will complete an Access Justification Report (AJR)**
- **Environmental studies and AJR will be compiled for Federal Highway Administration approval**

OKLAHOMA Transportation

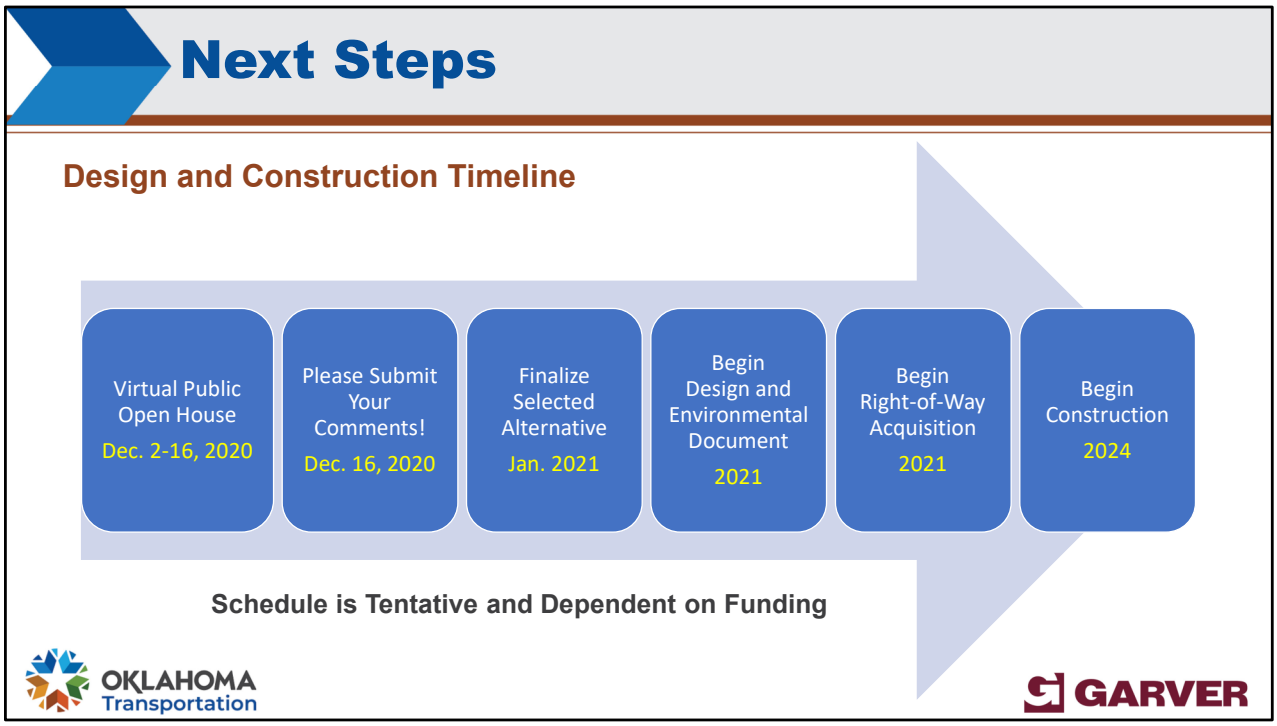

As part of the next steps for the project, ODOT will complete detailed environmental studies. Studies of waters and wetlands, threatened and endangered species, cultural resources, and hazardous materials will be completed. Because the project includes reconfiguration of an interchange, ODOT will also complete a detailed study of traffic noise. If necessary, additional commitments to avoid and/or minimize impacts will be added to the project.

ODOT will also complete a study called an Access Justification Report that will document how and why access to the interstate will be changed. The Federal Highway Administration must approve the environmental document and the access justification report before the project can proceed.

This slide shows the next steps for the project. We ask that you submit your comments by December 16th so that we may incorporate your feedback and identify which alternative will be selected for the project. Project design and the detailed environmental studies will start in 2021. ODOT anticipates beginning right-of-way acquisition in 2021, with construction expected to start in 2024. The schedule for right-of-way acquisition and construction is dependent on funding and may change.

Thank You!

Thank you for participating in our Virtual Public Open House!

Thank you for participating! Please visit the other areas of this website for more information. This concludes the meeting presentation.

PROPERTY RIGHTS BROCHURE

The Constitution of the United States and the Constitution of the State of Oklahoma ensure that private property shall not be taken or damaged for public use without just compensation.

It is with these provisions in mind that the Oklahoma Department of Transportation (ODOT) pursues the acquisition of right-of-way. This brochure provides the property owner(s)/authorized agent(s) with general information as to how this process works. A right-of-way agent will provide the property owner(s)/authorized agent(s) with additional specific information as it relates to the owner's legal and property rights.

APPRAISAL

Before the initiation of negotiations for the purchase of real property, an amount is established by ODOT which is reasonably believed to be just compensation for the value of the part taken and the damages to the remaining property, if any. In cases involving the purchase of real property by ODOT with a fair market value of $10,000 or less, no approved appraisal report will be required. Generally, real property is first appraised by a State-licensed or certified appraiser, and the property owner(s), or their designated representative(s), are given the opportunity to accompany the appraiser during the physical inspection of the subject property. The completed appraisal report is then reviewed by a separate review appraiser to ensure accuracy, completion and the proper use and full compliance with recognized appraisal principles and standards. Finally, an authorized amount is established by ODOT based upon the appraisal review for presentation to the property owner(s)/designated representative(s).

NEGOTIATION

A right-of-way agent presents the property owner(s)/designated representative(s) with a written offer letter containing the amount established as just compensation for the subject property to be acquired with the amount for damages, if any, separately set out. The option to waive the appraisal process and donate the subject property to ODOT is available if the property owner(s)/designated representative(s) wish to do so. A right-of-way agent will present the property owner(s)/designated representative(s) with an available set of plans for the project and will explain how much property must be acquired and what effect the acquisition will have on the remainder of the property, if any. The right-of-way agent is not authorized to alter the amount established as just compensation. No current abstract of the subject property will be requested or required from the subject

property owner(s)/designated representative(s). The right-of-way agent will periodically request that the property owner(s) or their designated representative(s) confirm the current surface ownership of the property regarding individual owners of record, liens, mortgages and tenants, if any. If a current mortgage exist on any property acquired the right-of-way agent will request a mortgage release from the mortgage company. A mortgage release must be obtained to complete the acquisition process. The property owner(s)/designated representative(s) are encouraged to advise the right-of-way agent when and if any actual or pending surface title changes occur.

Upon written notice, property owners may elect to retain the ground water rights, if any, that are attached to the property to be acquired. If the property owner elects to retain the ground water rights, the acquisition will be for surface rights only and will exclude any ground water rights. A property owner that chooses to retain the ground water rights shall have no right to use or occupy the surface rights to the property nor will the property owner have any right to construct, maintain or operate any water well, drilling equipment or lines on or under the surface without the express written permission of the Oklahoma Department of Transportation.

ACCEPTANCE OF OFFER

If the property owner(s)/designated representative(s) agree to accept the offer presented, the right-of-way agent will prepare the deed(s) or easement(s), claim form(s) and other documentation necessary to transfer ownership of the subject property. No formal closing is required as the property owner(s)/designated representative(s) will simply be asked to execute and convey to the right-of-way agent the aforementioned documentation. After these documents have been properly executed, they will be forwarded to ODOT's Oklahoma City office for review, processing and the issuance of a State warrant (check). After the required processing period, normally 25 to 30 business days, the check will be mailed to the property owner(s)/designated representative(s). If there is a mortgage on the subject property, the check may take longer to be processed due to the mortgage holder agreeing to and executing a partial mortgage release or discharge of the mortgage. In the event the negotiation is contingent on the basis of the property owner(s)/designated representative(s) retaining and removing improvements from the right-of-way limits, a specific date will be established for the property owner(s)/designated representative(s) to remove the improvements. On projects where the lead time permits, the Department may be able to lease the improvement(s) to the property owner(s)/designated representative(s) on a month-to-month basis, until such time as the right-of-way must be cleared for utility relocations and/or construction.

EMINENT DOMAIN

Should the property owner(s)/designated representative(s) decline to accept ODOT's offer of compensation, or should the title to the subject property be defective, it will be necessary for ODOT to acquire property for public use upon the payment of just compensation. The legal process by which the power of eminent domain is exercised is known as "condemnation".

Condemnation proceedings are commenced by filing a Petition in the District Court for the county in which the subject property is located. The property owner(s) will be served with a copy of the Petition. The first step taken in the condemnation process is for a District Judge to appoint three unbiased, disinterested freeholders, or "commissioners", to decide the amount of compensation that they believe the property owner(s) should receive.

The commissioners will be appointed at a hearing which will be held at the county courthouse, and the property owner(s) will be provided written notice at least ten (10) days prior to the aforementioned hearing. By law, the District Judge has the authority to select all three commissioners, however, in some instances the District Judge may ask the affected parties for suggestions as to whom to appoint. The property owners have the right to attend the hearing, but are not required to do so.

Three court-appointed commissioners will then inspect the subject property and assess the amount of compensation they believe ODOT should pay. Compensation awarded by the commissioners (known as the commissioners' award) will include the value of the property actually acquired as well as damages, if any, by way of reduction in value to the remaining portion of the property not acquired.

Any special and direct benefits to the part of the property not acquired may be offset against any injury (damage) to the property not acquired. The commissioners will then file a written Report of Commissioners with the Court Clerk detailing their findings.

Subsequent to the filing of the Report of Commissioners, ODOT will deposit the amount awarded by the commissioners with the Court Clerk. State law provides that upon such deposit, ODOT acquires the right to take possession of the subject property. If the property owner(s) wishes to do so, an application may be made to the Court for disbursement of the commissioners' award to the owner(s) (or at least a portion of the award to which they are entitled). The withdrawal of the commissioners' award in no way affects the property owner(s) right to pursue further legal action as detailed below.

If either party believes there has been an error or omission in the Report of Commissioners, or if the property owner(s) wish to challenge ODOT's legal power to take possession of the subject property, a **written exception** to the Report of Commissioners must be filed within thirty (30) days of the filing of the Report of Commissioners. The written exception must be filed with the Court Clerk and the Court may then accept or reject the written exception. If the Court accepts the written exception, it may order a new appraisal. In that event, ODOT will have a continuing right of possession acquired via the first Report of Commissioners, unless and until the Court rules that ODOT does not have the power to condemn the subject property.

If either party desires to challenge only the amount awarded by the commissioners, it must do so by filing a Demand for Jury Trial with the Court Clerk within sixty (60) days of the filing of the Report of Commissioners.

In the event of a jury trial and a jury verdict which exceeds the amount awarded by the court-appointed commissioners, ODOT would then have to deposit an amount equal to the difference between the jury verdict and the commissioners' award with the Court Clerk. Similarly, should the jury verdict be for an amount less than the commissioners' award, the property owner(s) would be required to return that portion of the commissioners' award which exceeds the amount of the jury verdict. Should the amount of the jury's verdict exceed the amount of the commissioners' award by ten percent (10%) or more, then ODOT must reimburse the property owner(s) for their reasonable attorney, appraisal and engineering fees, that were incurred in connection with the condemnation proceedings. Either party may appeal the action taken by the District Court to the Oklahoma Supreme Court.

INCIDENTAL EXPENSES

A real property owner may qualify for the reimbursement of expenses incurred for items such as recording fees, transfer taxes and similar expense incidental to conveying such real property to ODOT. The extent of reimbursement must be incurred by the property owner(s) and shall be determined and pre-approved by ODOT. Penalties for prepayment of any existing recorded mortgages are also included. If the property owner(s) is/are refused an incidental expense payment or believes the payment offered is not adequate to cover incurred expenses, they have the right file a written appeal to:

Chairman, Board of Appeals
Oklahoma Department of Transportation, Office of the General Counsel
200 N.E. 21st Street, Oklahoma City, Oklahoma 73105

The appeal must be filed within sixty (60) days of the date ODOT assumes legal possession of the subject property being acquired. This appeal procedure is provided in relation to incidental expenses only. If the property owner(s) are not satisfied with the fair market value offer for the subject property, they can consult the right-of-way agent for information regarding their rights to court proceedings. The "fair market value offer" to buy is a separate offer and is not subject to review by the Board of Appeals.

If the property owner(s) wish to review the plans on the project, or if they decide to accept ODOT's offer after the right-of-way agent has completed their attempts to negotiate, they are asked to contact:

Oklahoma Department of Transportation
Right-of-Way and Utilities Division
200 N.E. 21st Street
Oklahoma City, Oklahoma 73105
(405) 521-2651

It is the sincere desire and hope of the Oklahoma Department of Transportation (ODOT) to be fair and to successfully negotiate with each property owner. ODOT complies with Title VI of the Civil Rights Act of 1964, which requires that no person in the United States shall, on the basis of race, color, religion, sex, disability, age or national origin, be excluded from the participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity for which ODOT received Federal Financial Assistance.

If a property owner(s) believes that they have been discriminated against, they have the right to file a Title VI complaint with the Oklahoma Department of Transportation's Title VI Coordinator at (405) 521-3379 or email kfire@odot.org.

The Oklahoma Department of Transportation {ODOT) ensures that no person or groups of persons shall, on the grounds of race, color, sex, religion, national origin, age, disability, retaliation or genetic information, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any and all programs, services, or activities administered by ODOT, its recipients, sub-recipients and contractors. Re: Virtual Public Open House for I-40 Exit 65/65A Interchange Modification, Custer County, ODOT JP No. 31842(04) (35.497466, -98.955947)

Dear Ms. Russell:

The Oklahoma Department of Transportation (ODOT), in cooperation with the Federal Highway Administration (FHWA), is proposing improvements to I-40 between S. 28th Street and Neptune Drive, including the I-40 Exit 65/65A interchange in the City of Clinton, Custer County, Oklahoma. The existing interchange includes closely spaced on- and off-ramps, and the existing Exit 65 interchange at Gary Boulevard lacks eastbound access to I-40. The current ramp configuration is contributing to confusion at the Gary Blvd./Lexington Ave./Oliver Ave. intersection. In addition, the City of Clinton is continuing to experience commercial growth and the city needs more direct access to the south side of I-40. The anticipated growth is expected to generate future traffic volumes beyond the capacity of the existing interchange and adjacent intersections.

The purpose of this project is to improve safety and traffic operations and improve mobility in the I-40 corridor. ODOT completed a study of six initial alternatives and held a public meeting on May 24, 2016. In response to public feedback, ODOT tasked a consultant to look at additional alternatives for improving I-40 and the Exit 65 interchange while also maintaining access to Exit 65A at Neptune Drive. These alternatives considered construction costs, right-of-way and utility costs, and environmental constraints. Alternatives 7 and 8 were presented at a public meeting on February 28, 2019. Feedback at that meeting from the City of Clinton and the public resulted in ODOT revisiting and refining some of the original project alternatives. In response, Alternatives 2D and 9B were developed.

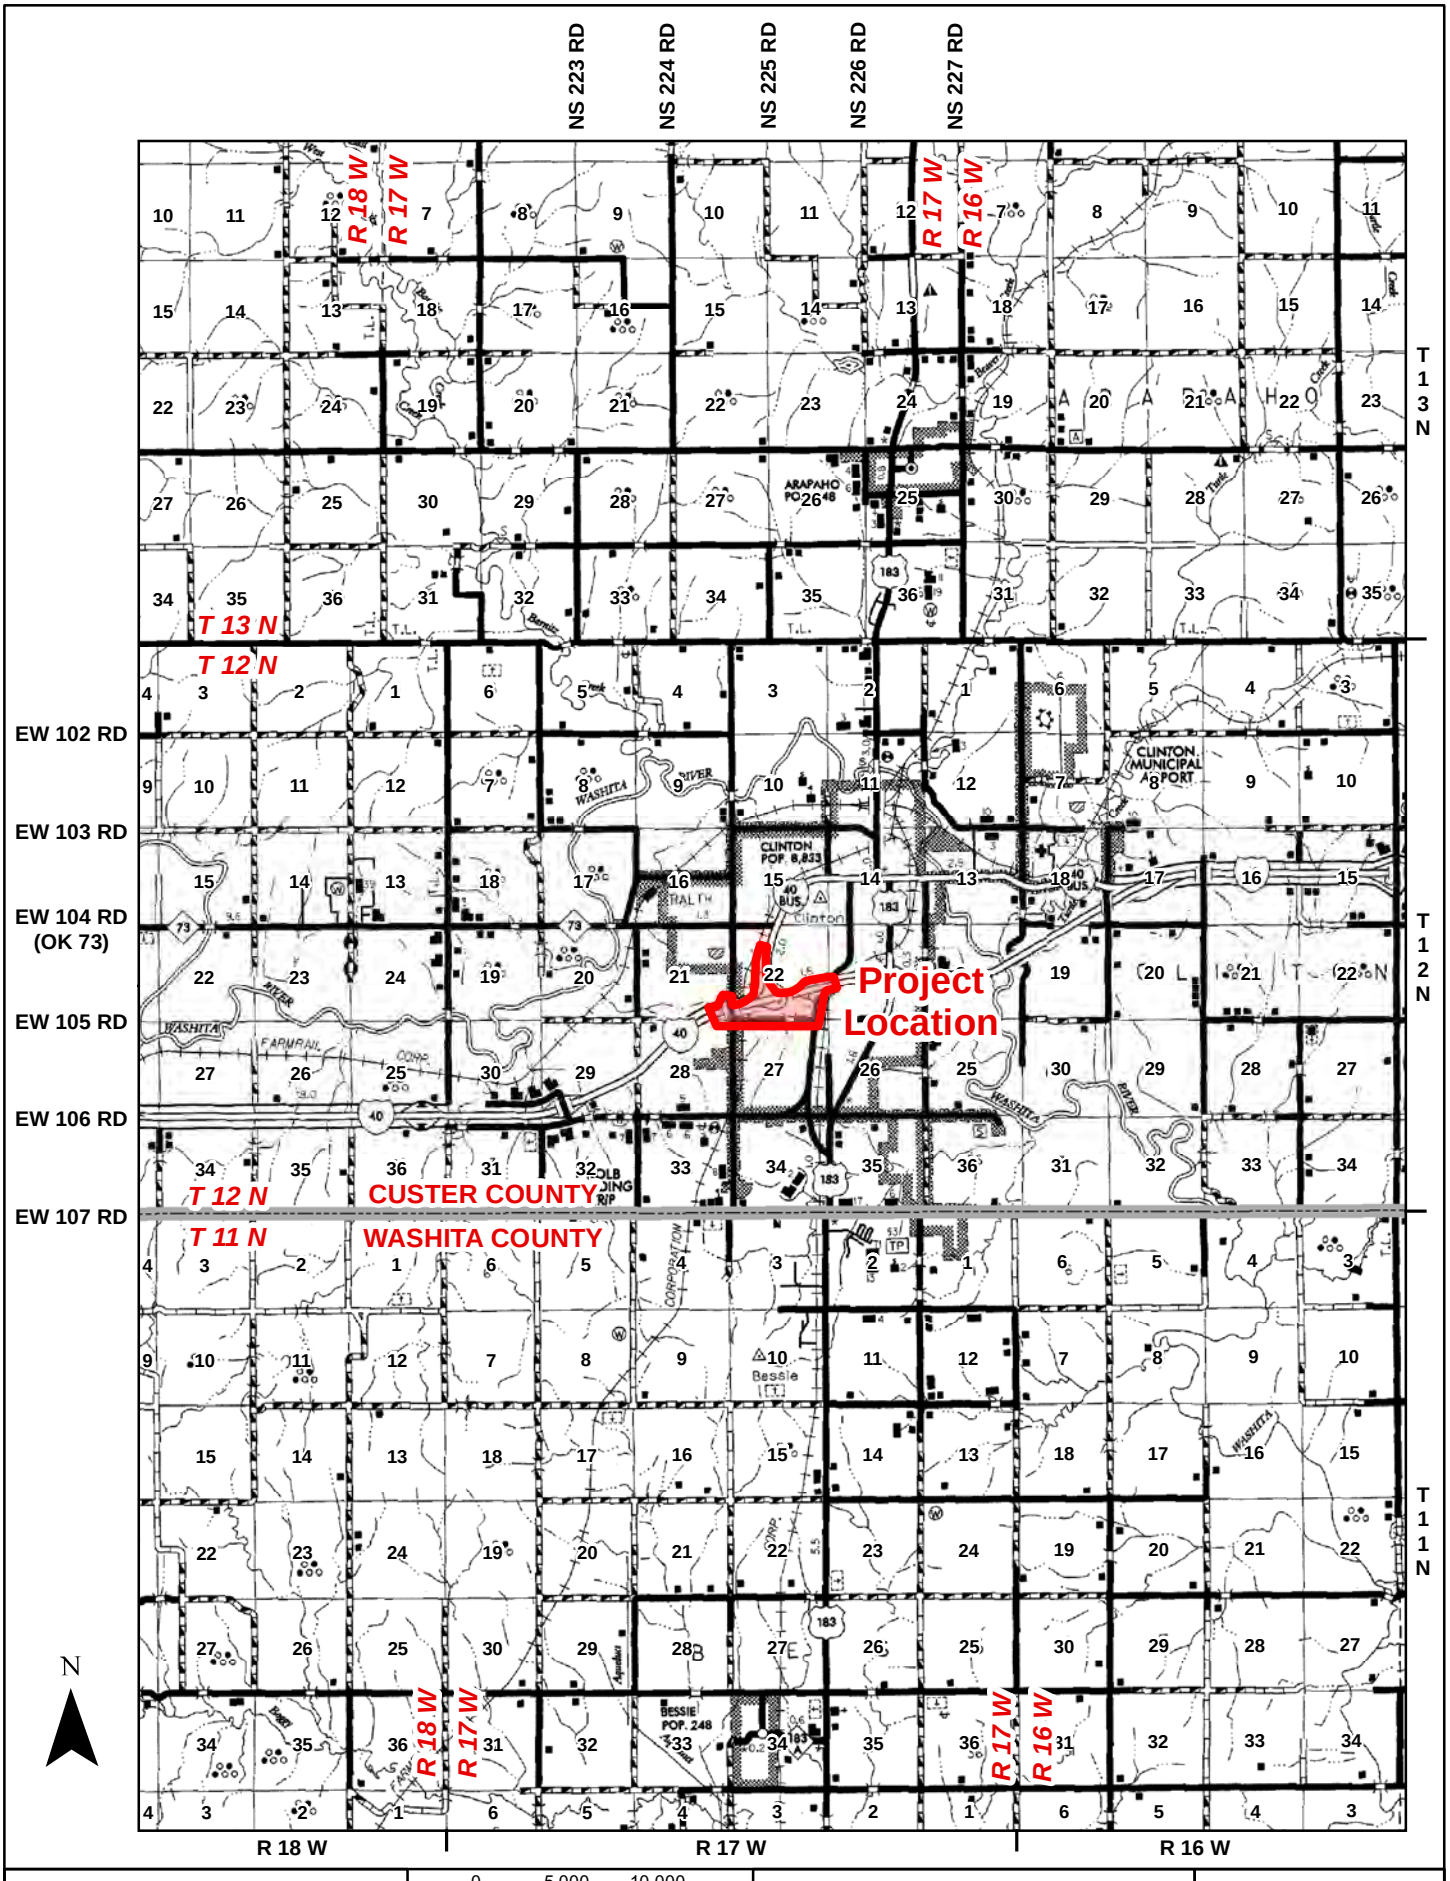

Due to ongoing concerns about COVID-19, a Virtual Public Open House will be held from **December 2 – 16, 2020** at www.odot.org/I40CusterExit65. The Virtual Public Open House will present the alternatives under consideration. The public will be provided opportunity to submit their input. To allow adequate time for evaluation of your comments, we would appreciate receiving your response by December 16, 2020. Your written comments may be submitted on the Virtual Public Open House website or in writing to the Environmental Programs Division Engineer, Oklahoma Department of Transportation, 200 NE 21st Street, Oklahoma City, OK 73105, or email to environment@odot.org.

Should you have any questions regarding this project, please contact our consultant Kirsten McCullough, Garver, (918) 858-3799 or kjmccullough@garverusa.com, or Brent Almquist, ODOT District 5 Engineer, (580) 323-1431 or balmquist@odot.org.

Respectfully,
Sivaraja S Sundaram

Interactive Map Comments

ALTERNATIVE 2D

- 1. Jerry Koscheski; jerryclintontag@cableone.net: Dear Sirs, this option looks like it closes the ramps at Neptune Dr. That would close 2 hotels and a gas station at the minimum. Clinton cannot afford this option.
- 2. Donna Newsome; DMNEWSOME@HOTMAIL.COM: I do not feel the Neptune exit/entry needs to be closed, but we need a new exit/entry points to enhance the access to all Clinton points of interest and 10th street has valuable businesses that would be harder to excess.
- 3. Donna Newsome; DMNEWSOME@HOTMAIL.COM: Why do we need to close off an existing entrance/exit to create a new one? Makes not sense for the additional expense. Just add the new points of entry and exit.
- 4. Michael Ryburn; mlryburn@yahoo.com: If this piece of the service road could be closer to the interstate it would allow a better opportunity for economic development of commercial space on the North side of the road. The City might be more accepting to losing the exits that way.
- 5. Michael Ryburn; mlryburn@yahoo.com: Same as north side could the service road be straightened a bit to allow for development to draw traffic down the service road to Neptune.
- 6. Michael Ryburn; mlryburn@yahoo.com: I don't know if this is a city street or private drive. If it was accessible from the service road it appears it would add convenience.
- 7. Michael Ryburn; mlryburn@yahoo.com: I believe this potential development space. This short section of road might be valuable to keep instead of people using the Kmart parking lot as an access to the other side (N or S) of the property or having to return to Gary Blvd to access.
- 8. Debra Colston; Debra.colston@ycoemail.com: Businesses on south 10th Street would be adversely affected without in and off
- 9. Roushimca6@yahoo.com:
- 10. Tracy Roush; Knitting_chick_2@yahoo.com: I think this would hurt more businesses. It would elevate neptune exit. And route only to walts businesses. . Who not leave things as they are and add a ramp going east at kmart exit. Then no businesses are hurt. Truckers need that exit.
- 11. Tracy Roush; Knitting_chick_2@yahoo.com: My business would lose a direct access to our shop on neptune. I don't agree with this map. Squash it
- 12. Daniel Dulcich; dbdulcich@aol.com: Alternative 2D provides the safest option for controlling traffic at the intersections of the on and off ramps.
- 13. Darla Gray: Keep 10th St / Neptune Dr open. Businesses depend on it to stay alive. Don’t kill off more of
- 14. Juan Garcia; Juan.garcialaw@gmail.com: Closing exit 65A should not be an option, this will destroy our businesses located on 10th and again hurt any chance for redevelopment in that area
- 15. Erika Ringer: This will only cause more confusion and close more businesses! Please don't do
- 16. Mike Ousley; Mike_ousley@icloud.com: I do not like the 2D plan as it would close the Neptune exits. I think Clinton needs all its exits to remain.
- 17. Angela Arney; arney_angela: Please don’t take away this exit. It will hurt the business’ that depend on the I-40 traffic and our town is hurting enough already.
- 18. Sarah Lau; sarahlau86@gmail.com: Please do not take out this exit!! There is many business on this exit that it would be had to get to without it. Please keep it!
- 19. Brad Thompson; cmptrdr1@gmail.com: From a safety standpoint, this is the only option that makes any
- 20. Brandie Bond; Brandie.bond@yahoo.com: Do not close the exit. I use it
- 21. Alan Burgtorf; burgalan@yahoo.com: Do the D2 interchange highway project. It is the most feasible and whole lot workable. Lot easier for truck traffic .
- 22. Andrew Ringer; Andrewringer2011@live.com: I feel removing exit 65A will have negative consequences
- 23. Phyllis Martin; Phyllis.martin1956@gmail.com: I do not want to loose the 10th st/Neptune dr. Exit/entrance. It would hurt the businesses in that part of town!
- 24. Jessica Purser; Jessica.a.purser@gmail.com: The Neptune exits are essential for Clinton business. I-40 traffic feeds numerous hotels, restaurants, gas stations and more in the area. There seems to be no reason to close this exit/on-ramp. Neptune is essential.
- 25. Joel Paden; Jgp70@yahoo.com: I have had a business on 10th Street for 20 years. This would detrimental to our business. There are more than one person involved in this decision and I will make sure this works for everyone. Closing the Neptune exit is absolutely idiotic.
- 26. Crystal Robinson; babybleu_28@yahoo.com: Do NOT close down the on and off ramps at Neptune. They are essential for businesses on that road that rely on the I-40 traffic. Closing these ramps down may cost people their jobs and businesses to shut down
- 27. Jerry G. Douglas; jsdouglas@sbcglobal.net: do not close exit/on ramps at old
- 28. Jerry G. Douglas; jsdouglas@sbcglobal.net: a dedicated right turn lane should be added along all of the businesses on the West side, this will add a safety measure to access the businesses there

- 1. Jordan Mosby; Jordan_mosby86@yahoo.com:
- 2. Kenneth Smith; SIDEWINDER517@GMAIL.COM:
- 3. Sidewinder517@gmail.com: The 9b is in my opinion a much better option. Im afraid
- 4. Cathy Carter; Cathyd61@hotmail.com: 10th street exit and on ramps need to stay open so that the businesses left in Clinton won't be shut down. The exit definitely needs to be redone because coming off of I-40 onto the 10th street is dangerous
- 5. Mike Ousley; Mike_ousley@icloud.com: I believe 9B is the best option for Clinton, however I do not think all of the entrances and exits from the businesses along redwheat dr is a good idea. Why not feed them to "malfunction junction" and place a stop light there.
- 6. Ladyhammster@yahoo.com: Please don't close Neptune drive exit. That is the exit needed to our
- 7. Crystal Robinson; babybleu_28@yahoo.com: This design will make it MUCH easier for the Semi trucks to gain access to the highway without having to drive through my neighborhood(Where trucks aren't allowed) to find an onramp to their destination
- 8. Jerry G. Douglas; jsdouglas@sbcglobal.net: a dedicated right turn lane should be added to access the businesses on the West to ensure a safe turn into those businesses
- 9. Jerry G. Douglas; jsdouglas@sbcglobal.net: do not close access to or from old
- 10. Randy Jones; randy@theedge.church: Everybody wins with this plan! Keep both exits open. Millions of dollars have been invested recently in buildings that NEED the 65A exit.
- 11. DECV; cifuentesefrain@gmail.com: Delete this round, and Keep the Red Wheat Dr as
- 12. Danilo Cifuentes; cifuentesefrain@gmail.com: Add a 5exit
- 13. Danilo Cifuentes; cifuentesefrain@gmail.com: Delete all this entrances and keep using Red Wheat Dr as is helped with the
- 14. Eric Schumacher; EricSchumacher1@gmail.com: Closing Red Wheat under I-40 reduces connectivity, especially those who live south of I-40 and use Red Wheat to access businesses along Red Wheat. Without Red Wheat, motorists would need to travel further and pass through four major intersections.
- 15. Eric Schumacher; EricSchumacher1@gmail.com: This extended accel/decel lane (compared to existing) will provide sufficient distance for vehicles entering and exiting the highway.
- 16. Eric Schumacher; EricSchumacher1@gmail.com: If this intersection were moved south and west and changed to a roundabout, Blvd of Champions could intersect at the roundabout and reduce the intersection count by one.
- 17. Eric Schumacher; EricSchumacher1@gmail.com: Nice, long acceleration
- 18. Eric Schumacher; EricSchumacher1@gmail.com: Will Red Wheat drive be eliminated? If so, access from these businesses returning north will be tough. A road behind those businesses that gives access to Oliver would be a huge plus.
- 19. Nick Barton; nick2719@gmail.com: Why not connect this road to Mulberry Lane? Years ago, Lexington was extended in to the eastern neighborhood and has done well.
- 20. Nick Barton; nick2719@gmail.com: Is this a dedicated turnlane in to Blvd of Champions? It should be considered so not to slow traffic going southbound.
- 21. Nick Barton; nick2719@gmail.com: This intersection does seem confusing, however a similar intersection located on Czech Hall Road in Yukon, OK exists and seems to operate just fine.

Subject: Environmental Impact Review

Dear Ms. Sundaram:

In response to your request, we have completed a general environmental impact review for the project listed below.

Project
Letter dated December 3, 2020 â€" I-40 Exit 65/65A Interchange Modification, Job Piece No. 31842(04), Custer County, OK [35.497, -98.956]

Comments
No adverse environmental impacts under DEQ jurisdiction are anticipated; however, please be aware of the following regulatory requirements.

A. Prior to beginning any construction activity disturbing more than one acre, you must submit an NOI and obtain authorization under OKR10, construction stormwater. If you need assistance, please contact DEQ's Stormwater Unit at (405) 702-6100.

B. It is unclear if water or wastewater utilities will need to be relocated as part of this project. If so, please note that water and wastewater infrastructure projects that will require a construction permit from DEQâ€™s Water Quality Division include the following:

- Construction of new water and wastewater treatment facilities;
- Modifications and upgrades to existing facilities;
- Construction of new water distribution and wastewater collection lines;
- Relocation of existing water distribution and wastewater collection lines.

Projects that do not require a construction permit include:

- Replacement of existing equipment with same type and size equipment;
- Replacement of existing water and wastewater lines with the same size line in the same location.

Please contact DEQâ€™s Water Quality Division (Construction Permitting Section) if you have specific questions about these projects or need further clarification. Rocky Chen is the Manager of this section and can be reached at (405) 702-8140 or rocky.chen@deq.ok.gov.

Additional recommendations to consider may be found at https://go.usa.gov/xf96W.

Thank you for the opportunity to provide our comments. If you have any questions or need clarification, please contact me.

Regards,

_____

Re: Virtual Public Open House for I-40 Exit 65/65A Interchange Modification, Custer County, ODOT JP No. 31842(04) (35.497466, -98.955947)

Dear Ms. Sundaram,

This is in reference to your December 3, 2020 letter concerning the I-40 Exit 65/65A Interchange Modification. The Commission would like to draw your attention to the CFR Title 14 Part 77.9, which states that any person/organization who intends to sponsor any of the following construction or alterations must notify the Administrator of the FAA:

- any construction or alteration exceeding 200 ft above ground level
- any construction or alteration:
  - within 20,000 ft of a public use or military airport which exceeds a 100:1 surface from any point on the runway of each airport with at least one runway more than 3,200 ft
  - within 10,000 ft of a public use or military airport which exceeds a 50:1 surface from any point on the runway of each airport with its longest runway no more than 3,200 ft
  - within 5,000 ft of a public use heliport which exceeds a 25:1 surface
- any highway, railroad or other traverse way whose prescribed adjusted height would exceed the above noted standards
- when requested by the FAA
- any construction or alteration located on a public use airport or heliport regardless of height or location

Based on the limited information provided in your letter and our cursory review, the potential project **does not** appear to pose a hazard to the safe and efficient use of navigable airspace. However, sometimes the most critical items affecting navigable airspace can be construction equipment (cranes, etc.), light poles and fixtures. Because of this, the Commission recommends that you use FAA's notice criteria tool (at the web address given below) to determine if a 7460-1 form needs to be filed with the FAA.

https://oeaaa.faa.gov/oeaaa/external/gisTools/gisAction.jsp?action=showNoNoticeRequiredToolForm

If a 7460-1 form is required for any permanent structure with this project please inform the Commission as soon as possible. You could be required to file a tall structure permit, under the rules of the Aircraft Pilot and Passenger Protection Act, with the Commission. Should you have any questions in the matter, please do not hesitate to contact me at tgalloway@oac.ok.gov or (405) 604-6904.

Sincerely,

Thomas Galloway, C.M.
Aviation Program Manager
Oklahoma Aeronautics Commission

To whom it may concern:

It appears that Alt. 2D is the best for the Tennis Courts which are on the NE corner of Gary Blvd and Lexington Ave.

The tennis courts are an LWCF project. I have sent in a response before during the reconnaissance. They appear to remain unaltered with the new alternative 2D.

If you need more information from me, let me know

"I have the following comment(s) or question(s) about the proposed Exit 65/65A interchange modification project in Custer County, OK."

After carefully reviewing both options presented, Alternative 2D is the best available under present circumstances (existing structures, etc).

"I have the following comment(s) or question(s) about the proposed "I-40 Exit 65/65A in Clinton" Project:" I absolutely favor the 2D design! It is the right answer for the future interstate business development for Clinton. It is also good that it allows for continued Interstate access to exit 65A. I like that it is safer and allows for more commercial development on the North and South of I40. It you have a way to clear up with people that it will not close 65A, it would probably help. It is easy for people to oppose 2D if they are led to believe it closes 65A and that is what the opposition is incorrectly saying. I hope you will build 2D design for the betterment of all of Clinton! Thank you!

"I have the following comment(s) or question(s) about the proposed Exit 65/65A interchange modification project in Custer County, OK."

MY SELECTION FOR I-40 EXIT 65 & 65A IS: ALTERNATIVE 2D. ALT. 2D, TEXAS TURN-AROUND, WOULD BE MUCH SAFER FOR THE TRAVELLING PUBLIC TO EXIT AND ENTER I-40.

ALT. 9B, FOLDED INTERCHANGE, CAN BE ESPECIALLY DIFFICULT FOR VEHICLES EXITING I-40 DUE TO VEHICLE SPEED AND THE SHARPNESS OF THE CURVE OF THE OFF-RAMP. ALSO, VEHICLES/DRIVERS SOMETIMES GET CONFUSED AT THE BOTTOM OF THE RAMPS WHERE THE OFF AND ON RAMPS COME TOGETHER. THIS CONFUSION AT THE BOTTOM OF THE RAMPS CAUSES SOME DRIVERS TO GO UP THE WRONG RAMP AND POTIENTLY BEING INVOLVED IN AN ACCIDENT WITH AN ON-COMING VEHICLE. MC

"I have the following comment(s) or question(s) about the proposed Exit 65/65A interchange modification project in Custer County, OK."

We have personally been involved in an accident 20+ years ago at the intersection of Olive and Gary Blvd. where the other driver got confused and changed lanes at the last minute because of the confusion at that spot. My husband was broad-sided. This intersection is dangerous. Either plan would be good but we think Alt. 2D ~~looks~~ looks less complicated.

Subject: [EXTERNAL] I-40 Exit 65/65A modification comment JP31842(04)

I much prefer option 2D as it:

is much safer.
contributes to cross-town travel via the service roads.
improves options for future development.
is less expensive.
and does not perpetuate the mistakes of the past.

That hairpin west-bound exit at 65A is dangerous now and the alternate option would just replace it with one like it. I counseled my grandchildren to avoid it and sometimes do myself. There is little room to slowdown from highway speeds to 25 mph, which really is the maximum safe exit speed.

People now sometimes travel cross-town by getting on I-40 at 65A and getting off at 65. The service roads in 2D offers a better option.

The service roads in option 2D offer more room for development, which Clinton could well use. With sufficient signage, the existing businesses at 65A could continue to do well as the two current interchanges are very close together and would be a minute or two apart via service road.

With the best intentions, area leaders pushed for one-way interchanges at the edges of towns along I-40 decades ago when it was built. As a result, development was stunted in three towns along the interstate. Clinton is the last of the three to be getting I-40 improvements, but economic growth has blossomed at the new or improved interchanges in both Elk City and Weatherford. Civic leaders tried to save then-existing businesses when the weird interchange at 65A was built. Those businesses failed anyway long ago.

The idea of spending less for the better option appeals to me.

Thank you.

"I have the following comment(s) or question(s) about the proposed "I-40 Exit 65/65A in Clinton" Project:" The proposal 2D appears to be the smartest choice with maximum opportunity for future businesses to locate in Clinton with easy access from I-40. 2D also appears the safest choice, as well as for other reasons outlined by ODOT in the presentation. Thank you ODOT for the virtual town hall for this project and for making this Clinton interchange a priority, we need this!

"I have the following comment(s) or question(s) about the proposed "I-40 Exit 65/65A in Clinton" Project:" I support Plan 2D for Clinton because, as pointed out in your presentation, it is much safer and has lower construction and maintenance costs that Plan 9B. During my many meetings with ODOT and Garver over the past year-and-a-half, safety was always a priority - as it should be. Based on what I learned from ODOT and Garver, spending millions of dollars on something that is more dangerous than what we are trying to fix doesn't seem prudent. In the last meeting with ODOT and Garver, we were told that 2D was far superior than 9B. I trust that you will honor what you said and select Plan 2D.

"I have the following comment(s) or question(s) about the proposed Exit 65/65A interchange modification project in Custer County, OK."

I am thankfull for your time and commitment to this project. I believe the 2D project would be the best way to go. Also are you going to fix the egress off of Lexington Bringing the road bed up. It is such a steep incline which makes visability an issue I hope also the removal of all the trees in the rights of ways (on I 40) to make the exit more attractive and visible

Thanks,

Comments in Support of Alternative 9B

1. Shutting down 65A would be devastating and fundamentally unfair to the business owners on Neptune Drive. These businesses invested millions of dollars depending on the 65A exit.

2. The Alternative 9B is a win/win for businesses located on both exits. Closing 65A will negatively affect the businesses located North and South of I-40 on Neptune drive.

3. Exit 65A supports 5 hotels, the only convenience store in Clinton located off an exit on I-40, Largest Church in Clinton (The Edge) whose congregation is made up of people from Clinton and the surrounding communities, numerous industrial and service businesses located north and south of I-40, 2 RV parks

4. Tax revenues would be negatively affected with the closure of 65A.

To: ODOTWeb-environment <environment@odot.org>
Subject: [EXTERNAL] Hoping you will support Plan9B for the Clinton I40 project, from Brad Berrong

I am emailing to ask your support of Plan 9B to retain exit 65A in Clinton OK. In the frontier days of the settling of the West, commerce was transported by river, and so businesses and settlements came into being at critical river junctions. In the New West, those rivers were replaced by highways, and exit 65A's years of existence has created a "settlement" of businesses through time. As a resident of Weatherford, I use 65A 90% of the time when I visit Clinton because that is the easiest way for me to access the businesses I patronize in Clinton. I hope you will consider keeping exit 65A open for the future. Thank you! Brad Berrong

Email address: kristin@drblakeburn.com
"I have the following comment(s) or question(s) about the proposed "I-40 Exit 65/65A in Clinton" Project:" I support 9B as the best option for the interchanges in Clinton, OK. It keeps both exits 65 and 65A open allowing access to Gary Blvd and also 10th St/Neptune Drive. I do believe it would be a positive if a frontage road could be added to the 9B proposal on both sides of I-40 as this would allow for additional business expansion in our community. This would also allow a free flow turn around at both exits. Business expansion and easy access on and off of I-40 are critical points to allow growth in our dynamic hub-city. I hope that the City of Clinton and the State of Oklahoma will consider these options. Thank you for your consideration.

McCullough, Kirsten J.

Business/Organization: Residential
Address, City, State, Zip Code: 1000 Chandler Drive
Phone number: (580) 445-8592
Email address: dorisbritttain@hotmail.com
"I have the following comment(s) or question(s) about the proposed "I-40 Exit 65/65A in Clinton" Project:" Plan 9D: Going back to the very first meeting regarding this Project..... I stated that closing the Off-Ramp at Exit 65A, coming from the East, "cuts-off" access to the South/mid-section residential areas of Clinton. One must now exit at Fourth Street/Hwy 183 and drive to the Chandler and Gholston Additions etc., or exit at Gary Blvd/21st Street and drive to the Chandler and Gholston Additions etc.. The South end of 13th meets 10th St/Neptune Drive and has two restaurants, a grocery store, liquor store and near direct access to the local swimming pool. With either of the Plans, please contruct sound walls/barriers from 4th street to Gary Blvd to allow all residents from I-40 to the McLain Rogers park to "SLEEP" at night.

"I have the following comment(s) or question(s) about the proposed Exit 65/65A interchange modification project in Custer County, OK."

Having grown up in Clinton and in the Neptune Park area on Route 66 prior to and after I-40 was built, I am very familiar with the exits and entrances (2-D and 9-B) that are being discussed. In addition, I own several properties on Neptune Drive, Industrial Road, and Chapman Road.

I strongly believe 9-B is the best option. Having 8 entrances and Exits to I-40 is better overall for Clinton especially since 4 (65A) of them are already in existence. It is imperative that we keep 65-A intact because it more conveniently serves over

Comments Continued

Continued

4 hotels, 6 resturants, 1 liquor store, 2 churches, JTs Wrecker Service, a diesel mechanic shop, OCT Equipment Company, Hinz Refrigation, Bolters Used Cars, Lock Supply as well several other business in the "Hole."

although proponets of Plan 2-D contend there will still be access to 10th St + Neptune Drive, the process of using access roads to circle to and from Exit 65 will be more confusing, especially to Interstate Travelers, because the access roads are in conjunction with the entrance and exit rams to Exit 65. It appears to me that it would be easy to end up back on I-40. Merging traffic at these 2 access points could very likely cause more accidents.

Also one the main focuses of this project is to correct "Malfunction Junction" (Gary, Lexington, Oliver + Red Wheat) which is accomplished nicely with both alternatives. Will there be stop signs or a traffic light here? Feel free to call me if you would like to discuss any of this.

Sincerely yours,

GW Fowler Jr

"I have the following comment(s) or question(s) about the proposed Exit 65/65A interchange modification project in Custer County, OK."

After too many years of waiting for a working Exit 65 to be built, we are being told that a very necessary, well working Exit 65A should be closed. Nothing about this makes sense for Clinton business, churches, and citizens.

KEEP ALL THE RAMPS OPEN AT EXIT 65A

GO WITH PLAN 9B AT CLINTON

Clinton has waited and watched while multiple new I-40 exits have been completed for other cities around us. None have had to sacrifice a well working, necessary Exit in return.

Think about the long term for business in Clinton.

KEEP AT THE RAMPS INTACT AT EXIT 65A

RT 66 COMES THROUGH CLINTON AT EXIT 65A

Think about The Real Route 66. Think about losing an essential Exit to have a malfunctioning one replaced.

"I have the following comment(s) or question(s) about the proposed "I-40 Exit 65/65A in Clinton" Project:" Alternative 9B is the better option. Moving all traffic to one exit with the addition of so many business entrances added will cause confusion for most drivers. Additionally, the complete removal of an exit would then require all visitors to town to travel on residential streets. This is a dangerous situation for residents of town, particularly those students who attend Clinton High School, as that is a road that many will want to use to get across to 10th. Increased traffic there is a terrible idea.

"I have the following comment(s) or question(s) about the proposed Exit 65/65A interchange modification project in Custer County, OK."

We have enough businesses closing and leaving town to other places; If we close the ramp, it will hurt all bussinesses close by and we will lose them.

KEEP ALL THE RAMPS OPEN AT EXIT 65A

GO WITH PLAN 9B AT CLINTON

"I have the following comment(s) or question(s) about the proposed "I-40 Exit 65/65A in Clinton" Project:" I fully support the Alternative 9B plan for reworking the Exit 65 and 65A interchange. If alternative 2D is approved, it will be a huge disservice to any business or future business located on Neptune Drive from Commerce to the South and North all the way into Clinton. The increase in cost of 9B over 2D and the possible increase of accidents of 9B over 2D are so incremental that they should carry little weight in the decision. What is best for Clinton, Ok? ALTERNATIVE 9B!!!!

"I have the following comment(s) or question(s) about the proposed Exit 65/65A interchange modification project in Custer County, OK."

I fully support Alternative 9B plan for reworking exits 65 & 65A. If Alternative 2D is approved, it will be a disservice to any business currently located on Neptune Dr from Commerce St. on the South & going N into Clinton all the way to Modelle. ON a projet of this size, the higher cost to build 9B is negligible, as are the possibilities for more accidents. Both should carry little weight in your decision. Do WHAT IS BEST FOR CLINTON OK! Choose ALTENATIVE 9B

"I have the following comment(s) or question(s) about the proposed "I-40 Exit 65/65A in Clinton" Project:" I STRONGLY support Alternative 9B which maintains exit 65A !!!! Several businesses in the southeast section of Clinton are able to function due to the traffic generated by exit 65A. These businesses provide not only services to the citizens of Clinton and visitors but also JOBS. Historically western Oklahoma has struggled to attract businesses that created jobs for our citizenry. Exit 65A will continue generating jobs and funds for individuals, city, county and state especially during this difficult economic period. Alternative 9B will provide a greater positive economic impact than Alternative 2D. Keep exit 65A in your construction plans !!!!!!!

"I have the following comment(s) or question(s) about the proposed "I-40 Exit 65/65A in Clinton" Project:" After viewing the projected alternatives for proposed I-40 exits, I feel it is only fair to the businesses in south Clinton to go with the project alternative 9B. We have too many successful businesses and housing areas in this part of Clinton to eliminate the 65A exit. I know this is the more expensive choice, but lets do it right in beginning and strive for continued growth in our city.

"I have the following comment(s) or question(s) about the proposed "I-40 Exit 65/65A in Clinton" Project:" I think 9b is the most driver friendly plan. I used to drive near 100,000miles a year and always looked for easy to understand exit/reentry towns as I drove. I think looking from what is planned for 9b would be less confusing and easier to navigate to both streets As a local, I think having to go along service road to get to Tenth street or to enter I40 to the west from Tenth st would be inconvenient.

McCullough, Kirsten J.

Subject: FW: INPUT - I-40 EXIT 65/65A INTERCHANGE

From: Steve Weichel <Steve.Weichel@okfb.com>
Sent: Tuesday, December 15, 2020 8:28 AM
To: ODOTWeb-environment <environment@odot.org>
Subject: [EXTERNAL] INPUT - I-40 EXIT 65/65A INTERCHANGE

After studying the presentation of the alternatives 2D and 9B, I honestly can see the advantages to the possibly safer and less costly 2D alternative. However, I honestly see that this alternative provides an absolute disservice to those businesses, churches, and residents that have relied on the present 65A access for decades. I believe that the 2D alternative will dissolve the easy access from I-40 to these businesses, churches, and residents located on and near Neptune Drive. Yes, there is still access to Neptune Drive with the 2D design alternative. However, it truly diminishes easy and quick access.

These businesses, made up of hotels, restaurants, retail, and others, I feel, are at a clear disadvantage if we restrict clear I-40 access to Neptune Drive. These businesses are owned by people like you and me, not large corporations or chains. These businesses are made up of hard working Clintonites that are the back bone to the success of Clinton. These citizens that own property and businesses have spent many hours and many dollars building their businesses. Why would we want any alternative that would be a disservice to the proverbial mom and pop businesses that contribute not only the success of Clinton, but to the sales tax revenue needs that Clinton so desperately needs today.

As a businessman that was born in Clinton, has businesses in Clinton, and has been a clear supporter of Clinton and Clinton businesses for decades, I truly feel that we must not provide any hurdles or obstacles for businesses in our fine city in this day and time of economic down turn, Covid 19, and simply the desire to be in business in small town Oklahoma. We must not be responsible for providing a negative financial impact to my fellow Clintonites by negating the easy access to and from Neptune Drive.

I respectfully ask that we do not choose an alternative that will, in any way, negatively impact our citizens near Neptune Drive.

Sincerely,

Steve Weichel

"I have the following comment(s) or question(s) about the proposed Exit 65/65A interchange modification project in Custer County, OK."

Plan 9B makes more sense, being that this virus is outrageous... Why would the state close down access to what little businesses Clinton has. Business is already slowing down with 10th street exits open. Why is ODOT trying to put the ramp in anyway? It should have done it years ago when K-Mart & LJS were open.

"I have the following comment(s) or question(s) about the proposed Exit 65/65A interchange modification project in Custer County, OK."

65A NEEDS TO STAY A FULL 4 RAMP INTERCHANGE

It will make directing clients to businesses on Neptune Rd much more difficult & confusing.

PETITION TO KEEP EXIT 65A OPEN IN CLINTON, OK UNDER ODOT ALTERNATIVE PROPOSAL 9B

Petition Summary:
Clinton, Oklahoma is a prospering town, but the plans to close Exit 65A will interfere with that prosperity by limiting access from I-40 to the heart of Clinton and historic Route 66.

Action Petitioned for: We the undersigned are concerned citizens who urge our leaders and state government to keep Exit 65A open as a full interchange under ODOT Alternative Proposal 9B. ODOT Alternative Proposal 2D will interfere with economic development by restricting highway access to Clinton, Oklahoma.

PETITION TO KEEP EXIT 65A OPEN IN CLINTON, OK UNDER ODOT ALTERNATIVE PROPOSAL 9B

Petition Summary:
Clinton, Oklahoma is a prospering town, but the plans to close Exit 65A will interfere with that prosperity by limiting access from I-40 to the heart of Clinton and historic Route 66.

Action Petitioned for: We the undersigned are concerned citizens who urge our leaders and state government to keep Exit 65A open as a full interchange under ODOT Alternative Proposal 9B. ODOT Alternative Proposal 2D will interfere with economic development by restricting highway access to Clinton, Oklahoma.

PETITION TO KEEP EXIT 65A OPEN IN CLINTON, OK UNDER ODOT ALTERNATIVE PROPOSAL 9B

Petition Summary:
Clinton, Oklahoma is a prospering town, but the plans to close Exit 65A will interfere with that prosperity by limiting access from I-40 to the heart of Clinton and historic Route 66.

Action Petitioned for: We the undersigned are concerned citizens who urge our leaders and state government to keep Exit 65A open as a full interchange under ODOT Alternative Proposal 9B. ODOT Alternative Proposal 2D will interfere with economic development by restricting highway access to Clinton, Oklahoma.

"I have the following comment(s) or question(s) about the proposed Exit 65/65A interchange modification project in Custer County, OK."

Hi! My name Stanley Chapman my concern is that if we don't keep Exit 65A (Neptune Dr) is that we take business away from, or easy access to several business like Winks Trailer Park which people travelin, has used 65A for years to get to Winks Trailer Park, plus the Service Station, and several motels and Restaraats on 10th Street. Neptune Dr and that Exit is a direct access to part of OLD Route 66. If you take the ~~Henry~~ Blvd Exit 65 area and take Exit 65A area on and off and combined them you have a plan that helps all businesses.

Comments Continued

Using both plans makes it easy access and a better route to all Motels and Restaurants.

Please see my picture of the Plans. Thank You.

Stanley Chapman

"I have the following comment(s) or question(s) about the proposed Exit 65/65A interchange modification project in Custer County, OK."

Stopping the exit is going to hurt most of the businesses around the area, and going to make customers who are traveling, travel further.

"I have the following comment(s) or question(s) about the proposed "I-40 Exit 65/65A in Clinton" Project:" I am the lead pastor of TheEdge.Church that has about 1000 people who attend in the Jaycee Lane Shopping Center every weekend. Our church also owns the shopping center where the church and United Supermarket is currently located and we have invested millions to renovate this facility in the past couple of years. I also own a physical therapy clinic in Clinton on South 30th Street. There has been recent renovation and reconstruction costing millions for multiple businesses that need 65A in order to survive. Multiple businesses will fail without 65A. It is in the best interest of most of our citizens to have two full interchanges. I know that studies anticipate a few more accidents with keeping 65A open but I doubt it takes into account the additional traffic to those areas being forced to flow more through residential areas. This creates more hazards of traffic for schools and family homes in those areas through which this additional traffic will be flowing.

"I have the following comment(s) or question(s) about the proposed "I-40 Exit 65/65A in Clinton" Project:" This will shut off access to many businesses, restaurants, hotels, and gas station. It is a horrible idea for the town of clinton and will close many said businesses from lack of access to the interstate. I do agree the exit and layout of red wheat drive and Gary needs to be addressed as it is dangerous, but shutting another exit down to do it will not work. I believe both can be open and fixed to made safer. There is room for improvement but closing an exit isn't a good choice.

I really hate to see the Neptune Drive exit go away . I use it quite frequently and have never had any trouble. I cant imagine going the proposed route. And, to think what it will do the businesses there seems so unfair. I feel 10th street is cleaning up especially with the Edge church---and, no I do not attend that church. But they have spent a lot of time and money making it more presentable. I use the quick shop at 10th and I40. It is a clean neat business. I hope we dont go this way.

Thank you,
Nancy L Roper

"I have the following comment(s) or question(s) about the proposed "I-40 Exit 65/65A in Clinton" Project:" March 15, 2019 I sent an email which included the statement "I definitely approve of this plan" after your presentation at that time. The Modern Roundabout. Based on my personal experience driving in various locations around the world, it made sense. Since that time the Clinton Mayor and City Manager contacted ODOT and disagreed. You have worked to create these two new designs. If I only have these two designs to choose from I prefer the 9B.. The Neptune Drive area would still have on and off ramps both east and west bound. I use this exit regularly. The area in front of the old Kmart would still have a road for future development rather than an extremely long drive to a specific business location. It also appears the elevation of the road will not be changed. The merging onto Gary from I-40 appears to be safer. Thank you for your patience, and hard work. Betty

"I have the following comment(s) or question(s) about the proposed Exit 65/65A interchange modification project in Custer County, OK."

We believe this change should be as simple as possible as we know older people in our town have diffaculty with this intersection & often go all the way across town to avoid this intersection completly.

Subject: [EXTERNAL] Exit 65 & 65-a

I live right against I-40 & only use exit 65. Or the one on Hwy 183. I feel that Exit 65-a is dangerous to get on & off. So I'm for closing 65-a down. There is a road in front of the Waterzoo that can take traffic to those businesses that is on 10th street. Please close that exit. It's just too dangerous.

Thank you
Donna Miller

"I have the

I would like to bring something to the committees attention that you are probably not aware of.

A, When the Double roundabout plan was unveiled about 1 year ago the mayor of Clinton Mr David Berrong was able to get the City Council to denounce the plan on behalf of the City with a vote of 5 to 0 voting against the plan The City Manager at the time Mark Skiles was also on record of opposing that plan.

B. When the first plans from Garver were presented about 6 months ago, whereby exit 65 had a full diamond and half the exit ramps at exit 65A were eliminated the mayor of Clinton again held a city council meeting and got a resolution passed 5-0 in favor of the plan that favored exit 65 and closed 2 of the ramps at 65A. Again the City Manager was also on record as favoring he exit 65plan.

C This time the Mayor is still in favor of plan 2D **WHICH WILL CLOSE HALF THE RAMPS** at exit 65A. The difference this time is that the mayor has tried to get the same 5-0 consensus of the city council for plan 2D. But he cannot get that this go around. The best he would be able to get would be a 3-2 vote in favor and it might even turn out to be 3-2 in favor of plan 9B. One councilmember is an unknown vote. And since he cannot get a 5-0 vote he will not be taking a resolution to the council. **AND THAT SPEAKS VOLUMES. And this time the new city manager is silent on the issue.**

Clinton is a community of 9,000 people and more than 1000 and perhaps as many as 2000 have spoken in the survey results in favor of plan 9B. Please take into consideration that the mayor has not been able to get a 5-0 vote in favor of exit 65.

Full disclosure. I have already sent in my personal form with comments. So this is not A comment form voting for 9B. Its simply the best way I can bring to the committee the feelings of the council because there will not be any 5-0 resolution coming out and not even a 4-1 and in fact there will not be any resolution coming from the Council.

Thank you for your consideration.

1.0 EXECUTIVE SUMMARY

This document summarizes the public meeting conducted for the I-40/I-40B interchange (Exit 65) within the City of Clinton. These improvements will likely affect and include the intersection at Gary Boulevard and Lexington/Oliver Avenue, Red Wheat Drive, Boulevard of Champions, and Chapman Road. The purpose of the study was to investigate ways to improve the function and operation of the I-40/I-40B interchange as well as the intersection at Gary Boulevard and Lexington/Oliver Avenue. The purpose of the meeting was to obtain information from the public to further assist in the identification of critical social, economic and environmental effects that may result from potential improvements in the future. ODOT was also seeking public input on the potential changes to access onto I-40 and the local road system. The public meeting was held at 6:00 PM on May 24, 2016 at Frisco Conference Center, located 101 South 4th Street in Clinton, Oklahoma.

Thirty (30) public attendees signed in for the meeting. The meeting included a presentation on the project from the Oklahoma Department of Transportation's (ODOT) consultants, Poe and Associates and Able Consulting, and the Field Division Engineer. Representatives from ODOT, Poe and Associates, and Able Consulting were available for discussion before and after the presentation. The comment period was open until June 7, 2016 with a total of seven (7) written comments received, including five (5) from agencies and two (2) from members of the public.

Agency solicitation letters were mailed out for the project April 22, 2016. The five (5) responses received from the agencies are summarized in Table 1.

Table 1: Agency Comment Summary

Agency	Comment
U.S. Department of Interior - Bureau of Land Management	No BLM interests would be affected by the project.
Oklahoma Conservation Commission	They indicated hydric soils are not indicated on the Custer County Soil Survey map. The project should not significantly impact wetland resources in the area.
Oklahoma Department of Commerce	Supportive of solution to the issues concerning the I-40 interchange (Exit 65) that permit safe access to I-40 and Clinton to maximize the transportation potential of I-40 in Clinton.
Oklahoma Aeronautics Commission	Commented that the project does not appear to pose a hazard to the safe and efficient use of navigable airspace. The Federal Aviation Administration (FAA)'s notice criteria tool to determine if a 7460-1 form needs to be filed with the FAA.

Oklahoma Tourism and Recreation Department	The tennis courts are part of a federally funded outdoor recreation project. The alternatives we prefer are Concept A with signal or Concept B with a traffic circle.

There was a general concern about Exit 65A and how it would affect Exit 65. There were two separate comments received expressing concern about noise levels and noise walls. Also, similar comments were expressed for desire to see the modern roundabout at the intersection. Table 2 summarizes both the written public comments received and the verbal comments/questions from the public meeting.

Table 2: Public Comment Summary both Written and Verbal Comments Combined

Questions and statements regarding Exit 65A and Exit 65 how access will be modified.	**2**
Request for overhead signs as an interim improvement.	**1**
Statement regarding accidents at Gary Blvd/Oliver.	**1**
In favor of modern roundabout at the intersection at Gary Blvd and Lexington.	**2**
Comments regarding traffic noise at Hampton Inn and overpass of 65A and a request for noise walls.	**2**
In favor of direct access to each of the four businesses on Red Wheat Drive.	**1**

2.0 INTRODUCTION

This document summarizes the public meeting conducted for the I-40/I-40B interchange (Exit 65) within the City of Clinton. These improvements will likely affect and include the intersection at Gary Boulevard and Lexington/Oliver Avenue, Red Wheat Drive, Boulevard of Champions, and Chapman Road. Currently, the I-40/I-40B interchange has no east bound access to I-40, and the northbound exit ramps end at the intersection of Gary Boulevard and Lexington/Oliver Avenue creating traffic flow issues. The intersection of Gary Boulevard and Lexington/Oliver Avenue is being studied due to accident history, intersection layout, and proximity to the I-40/I-40B interchange. The purpose of the study is to investigate ways to improve the function and operation of the I-40/I-40B interchange as well as the intersection at Gary Boulevard and Lexington/Oliver Avenue.

ODOT and the City of Clinton have tasked a Consultant to examine concepts for improving the I-40/I-40B interchange and the intersection at Gary Boulevard and Lexington/Oliver Avenue while taking into consideration operation and geometrics, construction cost, right-of-way and

utility impacts, drainage, constructability, and environmental constraints. The preliminary engineering study examines six concepts as potential improvements to the I-40/I-40B interchange. The concepts seek to increase safety and provide improved traffic access to the interstate and local systems. The potential improvements include reconstruction as necessary for the I-40/I-40B interchange as well as the intersection at Gary Boulevard and Lexington/Oliver Avenue. Improved access to I-40 will be investigated which may result in local access changes.

The purpose of the meeting was to obtain information from the public to further assist in the identification of critical social, economic and environmental effects that may result from potential improvements in the future. ODOT was also seeking public input on the potential changes to access onto I-40 and the local road system.

The public meeting was held at 6:00 PM on May 24, 2016 at Frisco Conference Center, located 101 South 4th Street in Clinton, Oklahoma. The meeting included a presentation about the concepts being considered for improvements to the I-40/I-40B interchange as well as the intersection at Gary Boulevard and Lexington/Oliver Avenue. This included why the improvements are needed, the type of improvements under consideration, and the potential impacts to motorists and the surrounding community for each of the concepts.

3.0 AGENCY SOLICITATION

Agency solicitation letters were mailed on May 6, 2016. These letters provided a short project description, brief history of the study area with an enclosed project location map and alternative concept maps. The letter requested recipients provide input by June 7, 2016 and included an invitation to the public meeting. This letter was sent to thirty-one (31) State and Federal agencies along with Cheyenne-Arapaho Tribes, Oklahoma Route 66 Association, and Southwestern Oklahoma Development Association. A copy of the solicitation letter and the mailing list is included in **Appendix A**.

3.1 AGENCY COMMENTS AND ODOT RESPONSES

The agency letters received are summarized below along with an ODOT response.

1) The **U.S. Department of Interior - Bureau of Land Management (BLM) stated** no BLM interests would be affected by the project. Thanked ODOT for the opportunity to review.

   ODOT Response: These comments are noted.

2) The **Oklahoma Conservation Commission** indicated hydric soils are not indicated on the Custer County Soil Survey map. The project should not significantly impact wetland

resources in the area. If an on-site investigation is needed they indicated the US Army Corps of Engineers should be consulted.

ODOT Response: These comments are noted.

3) The **Oklahoma Department of Commerce** is supportive of a solution to the issues concerning the I-40 interchange (Exit 65) that permit safe access to I-40 and Clinton to maximize the transportation potential of I-40 in Clinton. Safe and accessible transportation corridors are essential to economic and community growth.

ODOT Response: These comments are noted.

4) The **Oklahoma Aeronautics Commission** stated that the project does not appear to pose a hazard to the safe and efficient use of navigable airspace; however, the potential for construction equipment to impact airspace necessitates a review via the Federal Aviation Administration (FAA)'s notice criteria tool to determine if a 7460-1 form needs to be filed with the FAA.

ODOT Response: A commitment in the NEPA document will include notifying the FAA of proposed construction via FAA Form 7460-1 prior to construction.

5) The **Oklahoma Tourism and Recreation Department** stated the tennis courts at the corner of Gary Blvd. and Lexington Avenue are part of a federally funded outdoor recreation project. The alternatives we prefer are Concept A with signal or Concept B with a traffic circle. Those alternatives appear to promote safety and traffic flow, yet preserve the use of the tennis courts in their existing location.

ODOT Response: This information was previously provided by the Department and the tennis courts and high school will be avoided with all alternatives.

4.0 PUBLIC MEETING

4.1 MEETING NOTIFICATION

In addition to the notification provided via the agency solicitation letters (see above), notice of the public meeting was sent by letter to the Governor's office, elected officials (federal and state), Federal Highway Administration, Oklahoma Transportation Commissioner, Custer County Commissioners, the City of Clinton, Clinton Chamber of Commerce, Route 66 Museum, local school districts, emergency service providers, post offices, medical facilities and airports in

the project area. The letter provided a brief description of the purpose and need for the project, the project history, and an invitation to the public meeting. The letter was accompanied by a project location map. Thirty-one (31) letters were mailed on May 6, 2016. A copy of the letter and the mailing list is included in **Appendix B**.

Notice of the public meeting was also sent by postcard to all property owners and utility owners in the study area. Fifty-seven (57) postcards were mailed on May 10, 2016. A copy of the postcard and the mailing list is included in **Appendix C**.

4.2 MEETING INFORMATION AND FORMAT

The public meeting was held at 6:00 PM on May 24, 2016 at Frisco Conference Center, located 101 South 4th Street in Clinton, Oklahoma.

Forty-four (44) attendees signed in to the meeting thirty (30) of which were members of the public and 14 (fourteen) were either ODOT or consultant personnel. Public meeting attendees signed in for the meeting included Clinton Chamber of Commerce, City of Clinton Mayor and all City Councilors; thus creating a quorum and a council meeting was held. Also the Clinton Daily News and representatives from La Quinta, OHP, SWODA, Western Oklahoma Wellness Initiative and County Commissioner were in attendance. A copy of the sign-in sheets is included in **Appendix D**.

Brent Almquist ODOT Division 5 Engineer opened the meeting and discussed the project and current interchange. David Streb with Poe and Associates provided the existing conditions of the project area and traffic volumes. Jennifer Koscelny with Able Consulting provided the project constraints. Matt Brown with Poe and Associates presented the conceptual alternatives and project timeline.

A question and answer period followed. ODOT, Poe and Associates and Able Consulting staffs were then available for one-on-one and small group discussions. Alignment maps of each conceptual alternative were provided for public viewing at exhibit tables within the facility. A copy of the presentation is included in **Appendix E** and copies of the meeting handout and strip maps are included in **Appendix F**. The presentation covered:

- Meeting and Project Purpose
- Existing Conditions
- Highway Traffic Volumes
- Project Constraints
- Conceptual Alternatives
- Project Timeline
- General Questions and Comments

4.3 SUMMARY OF PUBLIC MEETING COMMENTS

The public meeting comments during the meeting were relatively few, but the one-on-one conversation with staff that followed was extensive. There was a general concern about Exit 65A and how it would affect Exit 65.

Table 3: Public Meeting Questions/Comments from Meeting

Comment	# of Comments
Exit 65A and Exit 65 comments	**2**
What happens to Exit 65A and how the two interchanges will work? What will happen to the frontage roads?	
I live in Chandler addition and exit at 65A what will happen? If I need to go to Walmart, how do I get there?	
What will happen to the frontage roads?	
Request for overhead signs in the interim	**1**
People do not know how to find eastbound. Like how to get to Atwood's, if we put up a sign, they can prepare. Overhead signs would be great for right now.	
Accidents at Gary Blvd/Oliver	**1**
At Lexington going east/west drivers have trouble deciding where to go and create accidents. Drivers stop in middle of road.	

4.4 WRITTEN PUBLIC COMMENTS

There were two written comments received as a result of the public meeting that can be found in Appendix H. The first comment received was a four page letter with five major points as summarized below. Both comments received expressed concerns about noise levels and noise walls. Also, both expressed a desire to see the modern roundabout at the intersection.

Table 4: Written Comments Received Matrix

Comment	# of Comments
Concerns: 1) The exit 65A eastbound ramp being moved back to 28th Street and commercial business being impacted. A recommendation was provided to solve the issue. 2) The exit 65A westbound ramp and recommendations for improvement. 3) noise (see below) 4) In favor of the traffic circle plans at Gary Blvd and Lexington. 5) Provided comments on all	**1**

concepts (refer to letter)	
ODOT Response:	
First choice for intersection is a modern roundabout and direct access to each of the four businesses on Red wheat drive.	**1**
ODOT Response:	
Noise level increase at the Hampton Inn and a request for both retaining wall and a noise wall (20 feet high) since noise is the biggest complaint.	**2**
Please consider a noise wall at the overpass of 65A exit.	
ODOT Response: **A noise study will be completed for this project. The ODOT Noise Policy and approved Federal Highway Administration (FHWA) noise modeling will be completed for the existing and future traffic levels to determine impacted receivers. If there are noise impacts, noise abatement will be considered. The FHWA procedures can be found at http://www.fhwa.dot.gov/environment/noise/, and the ODOT Noise Policy can be obtained by request from the ODOT Environmental Programs Division.**

1.0 Introduction

This document summarizes the public meeting conducted for the I-40 & Gary Blvd. (Exit 65) interchange project in Custer County [JP 31482(04)]. ODOT completed a study of six initial alternatives in 2016 (Alternatives 1-6) and held a public meeting on May 24, 2016. In response to public feedback, ODOT tasked Garver to develop two additional alternatives to provide improved mobility on I-40 and improved access for both interstate and local traffic (Alternatives 7 and 8). These two additional alternatives were evaluated taking into consideration construction costs, right-of-way and utility costs, and environmental constraints, which resulted in the selection of an alternative for the corridor (Alternative 7). The purpose of this meeting was to inform the public of the selected design and receive public input. The purpose of this project is to improve safety and traffic operations and improve mobility in the I-40 corridor and on adjacent city streets and intersections.

Alternative 7 consolidates the interchanges at Exits 65 and 65A (Gary Boulevard and Neptune Drive) into a single interchange by utilizing frontage roads and modern roundabouts located near the midpoint, between the two interchanges (**Figure 1**). I-40 would be reconstructed and raised to accommodate the new bridges over the railroad west of Gary Boulevard and over Neptune Drive. Alternative 7 also consolidates Red Wheat Drive and Gary Boulevard into one through street with a connection south under I-40 to Chapman Road.

Figure 1: Alternative 7 Overview

2.0 Agency Solicitation

Initial agency solicitation letters were mailed on January 24, 2019. These letters provided a short project description, the purpose of the project, and a brief description of the design selection process along with an enclosed project location map and selected alternative map. The letter requested recipients provide input by March 14, 2019 and included an invitation to the public meeting to be held on February 28, 2019. This letter was sent to federal and state resource agencies and Indian Tribes. A copy of the agency solicitation letter and the mailing list is included in **Appendix A**.

3.0 Public Meeting

3.1 Public Involvement Plan

A Public Involvement Plan (PIP) was prepared for this project to ensure effective community engagement, particularly of traditionally underserved populations (low-income and minority populations) and those with limited English proficiency. The PIP identified the locations of these populations and included methods specifically intended to reach these groups. A copy of the Public Involvement Plan is included in **Appendix B**.

3.2 Meeting Notification

In addition to the notification provided via the agency solicitation letters (see above), notice of the public meeting was sent by letter to the Governor's office, elected officials (federal and state), Custer County Commissioners, officials of the city of Clinton, local school districts, emergency service providers, and medical facilities in the study area. The letter provided a brief description of the purpose and need for the project and an invitation to the public meeting. The letter was accompanied by a project location map. Letters were mailed on January 24, 2019. A copy of the letter and the mailing list is included in **Appendix C**.

Notice of the public meeting was also sent by letter to all property and utility owners in the study area on January 24, 2019. A flyer announcing the meeting was hand-delivered to all homes and businesses within the study area on February 12, 2019. A copy of the letter, mailing list, flyer, and flyer distribution map is included in **Appendix D**.

3.3 Meeting Information and Format

The public meeting was held on February 28, 2019, at 6:00 PM at the Frisco Conference Center at 101 South 4th Street, Clinton, OK. Eighty-six (86) people signed in for the meeting, including Senator Brent Howard, Clinton Mayor David Berrong, representatives from the Cheyenne & Arapahoe Tribes, City of Clinton, Town of Arapahoe, Custer County, Southwestern Oklahoma Development Authority, Clinton Economic Development Authority, ODOT, Garver, area businesses, local media, and members of the public. A copy of the sign-in sheets is included in **Appendix E**.

Brent Almquist, ODOT Division 5 Engineer, opened the meeting and welcomed the attendees. Mr. Almquist briefly described the project. Garver then gave a presentation about the project, followed by an open question and answer period facilitated by Mr. Almquist. The presentation covered:

- Purpose of the Meeting
- Purpose of the Project
- Project History
- Project Area Information
- Proposed Design
- Benefits and Impacts
- Next Steps

ODOT and Garver staff were available both before and after the formal presentation for one-on-one and small group discussions with the public. Display boards showing the proposed design were available for public viewing in two locations. A three-dimensional video presentation of the proposed design ran on continuous loop, and a roundabout walk-through station was set up for the attendees to simulate maneuvering through a model roundabout on foot. A handout including a description of the study, the purpose of the study, and showing the proposed design for the project was available in English and Spanish. Copies of the FHWA handout *Roundabouts: A Safer Choice* were also available in English and Spanish. A copy of the presentation is included in **Appendix F**. A copy of the display boards and meeting handouts is included in **Appendix G**. All materials, including the video, were posted to the ODOT website on March 1, 2019 (*https://www.ok.gov/odot/Programs_and_Projects/Public_Meetings_and_Hearings/20190228.html*). The public and agency comment period was open until March 14, 2019.

3.4 Questions/Comments Received at Meeting

Comments and questions from the meeting were primarily related to how the roundabouts would be signed, truck use of the roundabouts, access and visibility to businesses on Gary Boulevard, travel times, and construction duration. The questions and comments posed after the presentation are presented below with ODOT/Garver responses in italics. An additional list of comments heard during one-on-one discussions is also presented.

Comments During Open Q&A Session:

- How will the project be let? One project or separate for road and bridges? *If funding permits ODOT would prefer to let the whole project as one contract.*
- Will the roadway be asphalt or concrete? *Still looking into it.*
- The roundabouts will need signage to direct people.
- What will be the speed limits on the ramps and in the roundabout? *Speed limit in the roundabouts will be 15 mph. The ramps are designed to be longer than normal to allow more time for acceleration and deceleration.*
- What are the dimensions of the roundabouts? *They have a radius of 55-60 feet (120 feet inside diameter, 150 feet outside diameter). They were designed to accommodate a double semi-trailer.*
- What is the distance between Gary Blvd. or Neptune Dr. and the roundabout? *Approximately 2000 feet (less than ½ mile).*
- Thank you for keeping Exits 65 and 65A. Will this affect the use of businesses on Gary Blvd. or travel times to residences near Neptune because of increased distances/out of direction travel? *This solution is the result of much study by several groups to try and keep both interchanges*

open. Currently they are too close together and it is difficult to design something that meets federal standards.

- Is this the only option? What about the diverging diamond? *This is the best option to keep both interchanges open.*
- How will this help traffic at the Gary/Lexington/Oliver intersection? *It will become a more traditional four-leg intersection and less confusing for drivers. It eliminates multiple roadways in same direction (e.g. WB ramps, Red Wheat Drive).*
- This is a great idea and concept.
- How long will construction take? *Estimate about 450 days.*
- Will Gary Blvd. have a center turn lane? *Yes*
- Thank you for getting this project in Clinton, it needs to be fixed.
- Thank you for coming. Not crazy about the concept but need to think about it.
- What will happen to my property value? *Improved access may increase property value.*
- I am the director of transportation for the Cheyenne & Arapahoe Tribes – what can you do about Exit 69? We would like to see it on ODOT's 8 year plan. *Let's discuss after the Q&A session.*
- What will be the elevation change on I-40? *Estimate about 7-8 foot raise on I-40 to accommodate new bridges. There will be excavation under I-40 for the new Gary Blvd.*
- Will this provide local jobs? *It will be put out to bid, but yes it could.*

Comments During One-on-One Discussions:

- Specific property concerns with right-of-way, noise, loss of trees, utilities
- Creek on the north side of I-40 is full of debris and needs to be cleaned out
- You should have considered a cloverleaf interchange
- Desire to keep Blvd of Champions in current location near Neptune Dr. intersection
- Concern that (EB) I-40 traffic will bypass Gary Blvd because they will have to exit and turn back
- Like the extension of Gary Blvd south to Chapman Road.

3.5 Summary of Written Comments

Thirteen (13) written comments from agencies and local governments, and nine (9) written comments from members of the public were received both during and after the public meeting. Copies of the written comments are included in **Appendix H**. ODOT responses to the comments are shown in italics after each comment.

3.5.1 Agency Comments

The **Bureau of Land Management (BLM)** found no BLM surface lands or Federal minerals within or near the project area. The BLM has no concerns or objections to the proposal. *Response: Thank you for your comment.*

The **National Park Service** has no comment at this time. *Response: Thank you for your response.*

The **Bureau of Indian Affairs (BIA)** found that there are tribal or Individual Indian trust lands within the project area. The BIA is concerned about impacts to these properties and would like clarification and consultation on what improvements will be made once design is finalized. The BIA recommends ODOT

contact the Cheyenne and Arapaho Tribes as they have historic ties to the area and should be consulted. *Response: ODOT is aware of the Indian trust lands in the area and no impacts to these properties are currently anticipated. ODOT will continue to consult with the BIA as the project develops. ODOT notified the Cheyenne & Arapaho Tribes of the project and representatives from the tribe attended the public meeting. Formal consultation regarding sites of traditional religious or cultural importance will take place in the next phase of the project.*

The **Cheyenne and Arapaho Tribes** have reviewed the project and determined it will have no adverse effect. However, the Tribes request notification if additional studies indicate the presence of traditional cultural properties or other cultural materials. The Tribes also state that ODOT would be required to assess any cultural materials discovered during construction. *Response: Thank you for your comment. Additional consultation with the Cheyenne and Arapaho and other interested Tribes will continue throughout the project development process.*

The **Oklahoma Corporation Commission** found no active or plugged oil and gas wells located in the project area. *Response: Thank you for the information.*

The **Oklahoma Department of Tourism and Recreation, State Parks** found a Land and Water Conservation park in the study area that would be adversely affected by decreasing the buffer and landscape on the margins of the tennis courts on the Clinton High School property. The existing trees provide a pleasant landscape and add a sense of established settlement and place to Clinton. Damage to these trees would be a cost to replace and rebuild. Use of the tennis courts would be diminished by increased noise from the decrease of the buffer. If any land not currently owned by the City is acquired in this area, it must be replaced and costs absorbed by the City. The City would be required to notify State Parks of any conversion of use and work with State Parks to resolve the differences. This is a complicated and costly process and limits opportunities for other recreational projects to make progress. Information is available on the National Park Service website under the Land and Water Conservation Fund program. State Parks provided a photograph and map indicating the relevant area. *Response: There may be temporary impacts to the Clinton High School property during construction in order to construct the new Gary Blvd/Lexington Ave. intersection. However, these impacts will not affect the tennis courts or the landscape trees adjacent to Lexington Avenue or Gary Boulevard. ODOT will continue to coordinate with the City of Clinton, Clinton High School, and the Oklahoma Department of Tourism and Recreation as design progresses.*

The **Oklahoma Department of Environmental Quality (ODEQ)** stated that prior to beginning any construction activity disturbing more than one acre, a Notice of Intent (NOI) must be submitted and authorization under OKR10, construction stormwater, must be obtained. *Response: Once a construction project is defined, ODOT and its contractors will follow all requirements of OKR10.*

The **Oklahoma Aeronautics Commission (OAC)** reviewed the project and noted that it does not appear to pose a hazard to the safe and efficient use of navigable air space. The OAC recommends that ODOT use the Federal Aviation Administration (FAA) notice criteria tool to determine if a 7460-1 form needs to be filed with FAA. *Response: Once a construction project is defined, ODOT will determine the need for the 7460-1 form and file with the FAA if required.*

The **Oklahoma Historical Society, State Historic Preservation Office (SHPO)** found that the roadbed for Route 66 has been documented along Gary Boulevard, Exit 65, and Neptune Drive. The SHPO provided links to the Route 66 thematic study and references to the discussion of Route 66 in Clinton. The SHPO understands that ODOT will initiate formal consultation under Section 106 of the National Historic Preservation Act if and when required. *Response: Thank you for the information on Route 66 in the project area. ODOT will initiate formal consultation under Section 106 in the next phase of the project.*

The **Oklahoma Archeological Survey (OAS)** found that there are no known archeological sites listed in the project area, but that based on topographic and hydrological setting, archeological materials are likely to be encountered. The OAS considers a field inspection necessary prior to project construction. The OAS also indicated that ODOT must have a letter from the SHPO's office to document consultation pursuant to Section 106 of the National Historic Preservation Act. The OAS also stated that ODOT is responsible for consultation with the appropriate Native American tribe/groups to identify any concerns regarding properties of traditional and/or ceremonial value. *Response: Thank you for the information. ODOT will perform an archeological evaluation pursuant to Section 106 in the next phase of the project, and will continue to consult with the OAS and well as the SHPO and Native American tribes.*

The **City of Clinton** passed a resolution of dissent on March 14, 2019 stating that the alternative presented at the February 28, 2019 public meeting was not in the best interest of the citizens of Clinton. The City recognized the need for improvements, and the City would prefer that one of the options presented in 2016 be selected, keeping both Exit 65 and Exit 65A open. *Response: ODOT will reconsider two of the alternatives from the previous study: Alternative 2 Conventional Diamond and Alternative 5 Modern Roundabout (Dumbbell). ODOT will further investigate the feasibility of these alternatives and present a comparison of the benefits and impacts of all three alternatives (Alternatives 2, 5, and 7) at a future public meeting. ODOT will continue to work with the City of Clinton and area stakeholders to understand local concerns and address these as completely as possible in the design.*

David Berrong, **Mayor of Clinton**, submitted two separate written comments. Mayor Berrong requested that ODOT consider an alternative to Alternative 7 presented at the public meeting. Keeping both Exit 65 and 65A open is important. He is concerned that commerce on Gary Blvd. might suffer with the roundabouts between the two exits. He states that commercial development experts have questioned the impacts that the proposed plan would have on Gary Blvd properties south. In a letter to ODOT Chief Engineer Brian Taylor, Mayor Berrong expressed a desire to work with ODOT to modernize the Exit 65/65A interchanges and that the impression of the city and the public following the 2016 public meeting was that the final design would be selected from one of the options presented at that time. The Mayor asks that ODOT refocus on the 2016 alternatives and keep both Exit 65 and 65A open. *Response: ODOT will reconsider two of the alternatives from the previous study: Alternative 2 Conventional Diamond and Alternative 5 Modern Roundabout (Dumbbell). ODOT will further investigate the feasibility of these alternatives and present a comparison of the benefits and impacts of all three alternatives (Alternatives 2, 5, and 7) at a future public meeting. ODOT will continue to work with the City of Clinton and area stakeholders to understand local concerns and address these as completely as possible in the design.*

Lyle Miller, **Custer County Commissioner,** likes the plan. He was impressed by the recently constructed roundabout in Oklahoma County. He would like to see an entrance from Gary Blvd. added

between Braums and Long John Silvers to help development. Selling unused ODOT property south of Kmart would also help development. Thank you for the project – it is badly needed. *Response: Thank you for your comments.*

3.5.2 Public Comments

Nine (9) written comment forms/letters from the public were received. Some letters included more than one comment. Comments from the public are summarized in Table 1 and in the paragraphs below:

Table 1: Public Comment Summary

Comments in Support of Alternative 7	**5**
It is needed and will solve problems	
Like the roundabouts	
Like the long accel/decel lanes	
Provides easy access to Gary and Neptune	
Works well to keep both exits open	
Please follow through with this important plan	
Supports future growth	
Like the Gary Blvd. improvements	
Comments with Concerns about Alternative 7	**2**
Does not help traffic flow	
Does not support development south of I-40	
Plan will reduce traffic on Gary Blvd. and hurt businesses	
Go back to previous plan that maximized traffic on Gary Blvd. and kept interchange in current location	
This plan only benefits the businesses adjacent to I-40 (same owner)	
General Comments/Questions	**3**
Specific concerns about access	
Keep both Exit numbers on highway signs	
Would like additional exit to north on north roundabout	
Would like additional roundabouts at frontage road/Gary Blvd intersections	
Keep Red Wheat Drive as business access drive	
Ok if you have to close 65A/Neptune if it simplifies things	
Allow local businesses to bid/subcontract	
Proposed new interchange at 28th Street	
Concerns about noise	
Concerns about property values	
Consider naming frontage road Red Wheat Drive	
Will you place signs at exits for food/shopping?	

Comment 1:

- Happy to see comments from 2016 were incorporated into new design.
- Roundabouts are unusual but well thought out and workable
- Much of the plan will be on our land and will affect our businesses (businesses owned by commenter were listed in the letter).
- Information provided regarding status of underground storage tanks on various properties and well/water line location

- Concern about internal parking lot access at Water Zoo for campers/RVs
- Don't need driveway to Water Zoo maintenance door
- Request for exit off north roundabout for proposed new development to the north
- Keep both exit numbers on signs

Comment 2:

- This is a unique concept. I like the long acceleration and deceleration lanes. Also like having eastbound access to I-40 from Gary Blvd. Provides easy access to Gary Blvd. and Neptune Dr. which we don't have today.
- Request for additional roundabouts at Gary Blvd/frontage road intersections to address accidents from left turning vehicles. Allow access to roundabout to/from the west for future development.
- Limit access to Gary Blvd and keep Red Wheat Drive for business access. Allows for travel between businesses without having to use Gary Blvd.

Comment 3:

- I like the idea and works well to keep both exits open.
- I am not opposed to keeping only Gary Blvd. open to simplify things.
- Would like to see opportunity for local businesses to be able to bid or be subcontractors.

Comment 4:

- I approve of the plan, please follow through on this important improvement
- The plan presented will solve many existing problems

Comment 5:

- City has two major concerns: 1) facilitate growth, 2) provide safe traffic flow. The proposed plan does provide some assistance to commercial, industrial, recreational, and residential growth.
- The plan has shortcomings related to traffic flow.
- The plan will limit city growth to the south including industrial areas, brick plant park area, on west, southwest, and southeast sides of the city. These areas need easy direct access to I-40.
- Exit 65/65A interchange location provides only limited access to potential growth areas.
- Like the proposed Gary Blvd. improvements – suggest also improving Chapman Road and extend east to US-183.
- Provide new interchange at I-40/28th Street

Comment 6:

- Pizza Hut has been in business in Clinton for over 40 years. It was originally on 10th Street because it had on and off-ramp access to I-40 for customers and deliveries. Over time that part of town declined and Pizza Hut began looking for a new location. Relocated to Gary Blvd/Jacee Ln. across from High School. We got visibility from Gary Blvd. and traffic from Route 66. Our business has doubled since the move due to the location on Gary Blvd.
- The current plan will reduce traffic on Gary Blvd. and destroy my business and other businesses on Gary Blvd.
- Against this plan. Want an alternate plan that provides access to I-40 eastbound from Exit 64 (typo? Exit 65?).

- Encourage you to scrap the current design and go back to a previous design that maximized traffic flow on Gary Blvd. and keeps Exit 64 (65?) in its current location.
- Under current plan, traffic will skip the new exit and will take exits to the east or skip Clinton.
- Current plan appears to benefit the businesses adjacent to I-40 with provide entrances – these are all owned by the same individual. Looks like this owner influenced the plan. You should not change traffic to benefit one owner at the expense of others on Gary Blvd.

Comment 7:

- Build a wall to reduce noise on the north side of the project behind the neighborhood and/or behind Hampton Inn.
- How will home values be affected?

Comment 8:

- Concern about noise impacts – Concord Avenue is very close to the project. Please notify us if the study determines a noise wall is warranted.
- Consider naming the frontage road Red Wheat Drive – this is a culturally significant name in Cheyenne and Arapaho tribal territory.

Comment 9:

- As a business owner on Gary Blvd – will you be placing signs at the exits for food/shopping?

3.5.3 Responses to Public Comments

Response to Comments in Support of Alternative 7: ODOT thanks you for your comments and appreciates your input. ODOT believes that improvements to the interchange(s) are needed to resolve safety and access concerns.

Response to Comments with Concerns about Alternative 7: ODOT will reconsider two of the alternatives from the previous study: Alternative 2 Conventional Diamond and Alternative 5 Modern Roundabout (Dumbbell). ODOT will further investigate the feasibility of these alternatives and present a comparison of the benefits and impacts of all three alternatives (Alternatives 2, 5, and 7) at a future public meeting. ODOT will continue to work with the City of Clinton and area stakeholders to understand local concerns and address these as completely as possible in the design.

Responses to General Questions: ODOT understands the concerns about access and signage, and the importance of signing the new interchange appropriately to clearly direct travelers to their intended destination. We appreciate the input on signage for the interchange, local streets, and area businesses. As the project progresses, ODOT will study impacts to properties in more detail, including a detailed noise study.

RE: Solicitation for Input for I-40 Interchange Improvements and Intersection Modification at Exit 65, I-40B West Jct. in Clinton, Custer County, Oklahoma, JP 31842(04)

Dear Mr. Ledbetter,

The Oklahoma Department of Transportation (ODOT) is soliciting comments on proposed improvements to I-40 between S. 28th Street and Neptune Drive, including the I-40 & Gary Boulevard interchange (Exit 65) in the City of Clinton, Custer County, Oklahoma. The existing interchange includes on- and off-ramps in close proximity, and the current ramp configuration is contributing to traffic flow issues at the Gary Blvd./Lexington/Oliver intersection. The existing interchange also lacks eastbound access to I-40. In addition, the City of Clinton is continuing to experience commercial growth, which is anticipated to generate future traffic volumes beyond the capacity of the existing interchange and adjacent intersections. Please see the enclosed figures which depict the areas associated with the improvements to I-40.

The purpose of this project is to improve safety and traffic operations and improve mobility in the I-40 corridor. ODOT completed a study of six initial alternatives and held a public meeting on May 24, 2016. In response to public feedback, ODOT tasked a new consultant to develop two additional alternatives to provide improved mobility on I-40 and improved access for both interstate and local traffic. These alternatives were evaluated taking into consideration construction costs, right-of-way and utility costs, and environmental constraints, which resulted in the selection of an alternative for the corridor. Details of these alternatives are available upon request from ODOT.

A second public meeting to inform the public of the selected alternative and receive public input will be held at **6:00 PM on February 28, 2019** at the Frisco Conference Center, 101 S. 4th Street, Clinton, OK 73601. This project is still in the developmental stages and any comments relative to the social, economic, or environmental effects of this proposal will be appreciated. To allow adequate time for evaluation of your comments, we would appreciate receiving a response by March 14, 2019. Your written comments should be directed to the Environmental Programs Division Engineer, Oklahoma Department of Transportation, 200 NE 21st St., Oklahoma City, Oklahoma 73105, or email to environment@odot.org. We appreciate your cooperation in this matter. For further information or if you have any questions, please contact Brent Almquist, ODOT Division 5 Engineer, at (580) 323-1431 or balmquist@odot.org, or Kirsten McCullough, Environmental Project Manager, Garver at (918) 250-5922 or kjmccullough@garverusa.com.

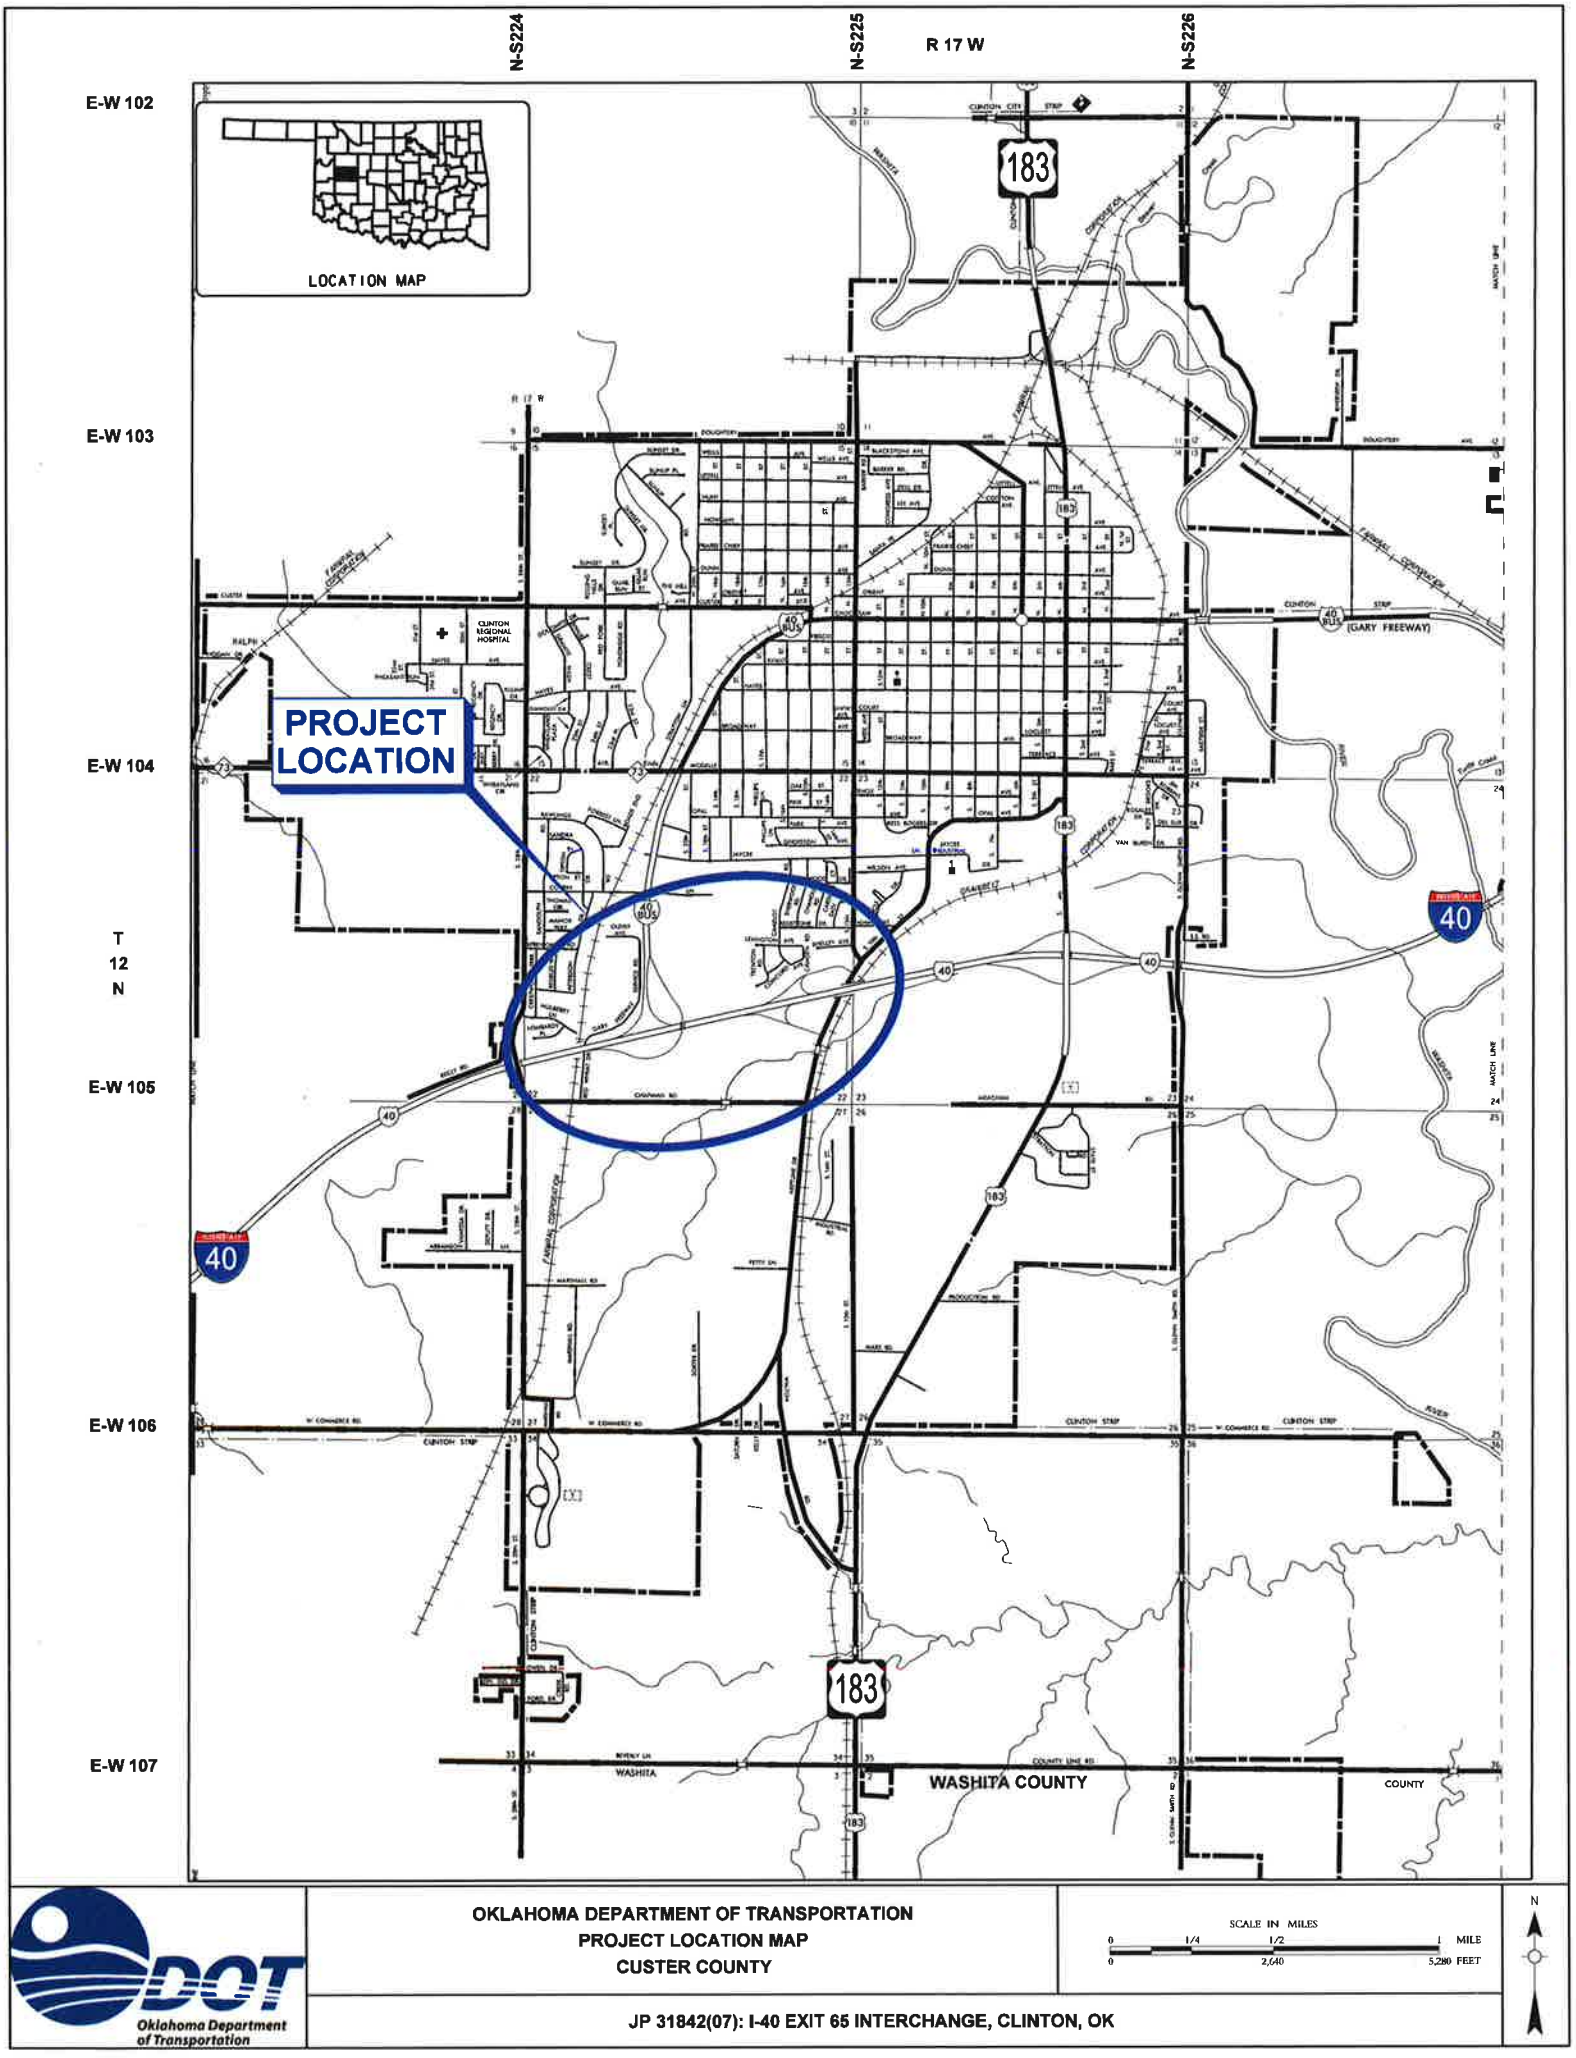

Sincerely,

Siv Sundaram, P.E.
Environmental Programs Division Engineer

Public Involvement Plan

I-40 Exit 65

Public Involvement Plan

JP 31842(04) EC-1962

Custer County

Prepared for:

Oklahoma Department of Transportation

Prepared by:

GARVER

January 10, 2019

Introduction

This document provides a Public Involvement Plan for the I-40 Exit 65 Study in the City of Clinton, Custer County, Oklahoma [JP 31842(04)]. This plan specifically addresses the outreach methods proposed to ensure effective community engagement, particularly of traditionally underrepresented populations (i.e. low-income and minority populations) to meet the principles and requirements of Executive Order 12898 on Environmental Justice, Title VI of the Civil Rights Act of 1964, and the implementing regulations of the Federal Highway Administration (FHWA) in regards to these programs.

The US Department of Transportation (USDOT) Environmental Justice (EJ) Strategy identifies three fundamental principles of EJ that guide USDOT actions:

1. To avoid, minimize, or mitigate disproportionately high and adverse human health and environmental effects, including social and economic effects, on minority and low-income populations.
2. To ensure the full and fair participation by all potentially affected communities in the transportation decision-making process.
3. To prevent the denial of, reduction in, or significant delay in the receipt of benefits by minority and low-income populations.

This plan is developed to address the second goal and provide maximum opportunity for all communities to participate in the study. Encouraging the participation of traditionally underrepresented communities in the transportation planning process allows communities to identify the benefits and burdens associated with the proposed activity, and suggest alternatives to mitigate impacts based on their concerns. This input helps transportation agencies comply with another core EJ principle-avoid, minimize, or mitigate disproportionately high and adverse impacts.

Minority and low-income communities are often underrepresented in the transportation decision-making process due to economic, social, and cultural factors, such as language barriers or factors that prevent these populations from attending traditional public meetings such as non-traditional work schedules, lack of transportation, or lack of child care. Notification of meetings can also be challenging, as renters are difficult to identify and are typically not captured in property owner databases.

This plan describes the corridor under consideration, the studies done to date and their findings, the communities represented in the project area, and the proposed plan to notify and engage these communities.

Study Introduction and Background

The Oklahoma Department of Transportation (ODOT), in cooperation with the FHWA is studying improvements to I-40 between 28th Street and Neptune Road, including the Exit 65 and 65A interchanges (at Gary Boulevard/I-40 BUS and at Neptune Road/10th Street) in the City of Clinton, Custer County, Oklahoma (**Figure 1**). The purpose of the study is to identify the need for transportation improvements in the corridor, examine potential alternatives, and determine a preferred concept to guide future project planning and programming. The need for improvements is primarily related to improving safety, mobility, and access.

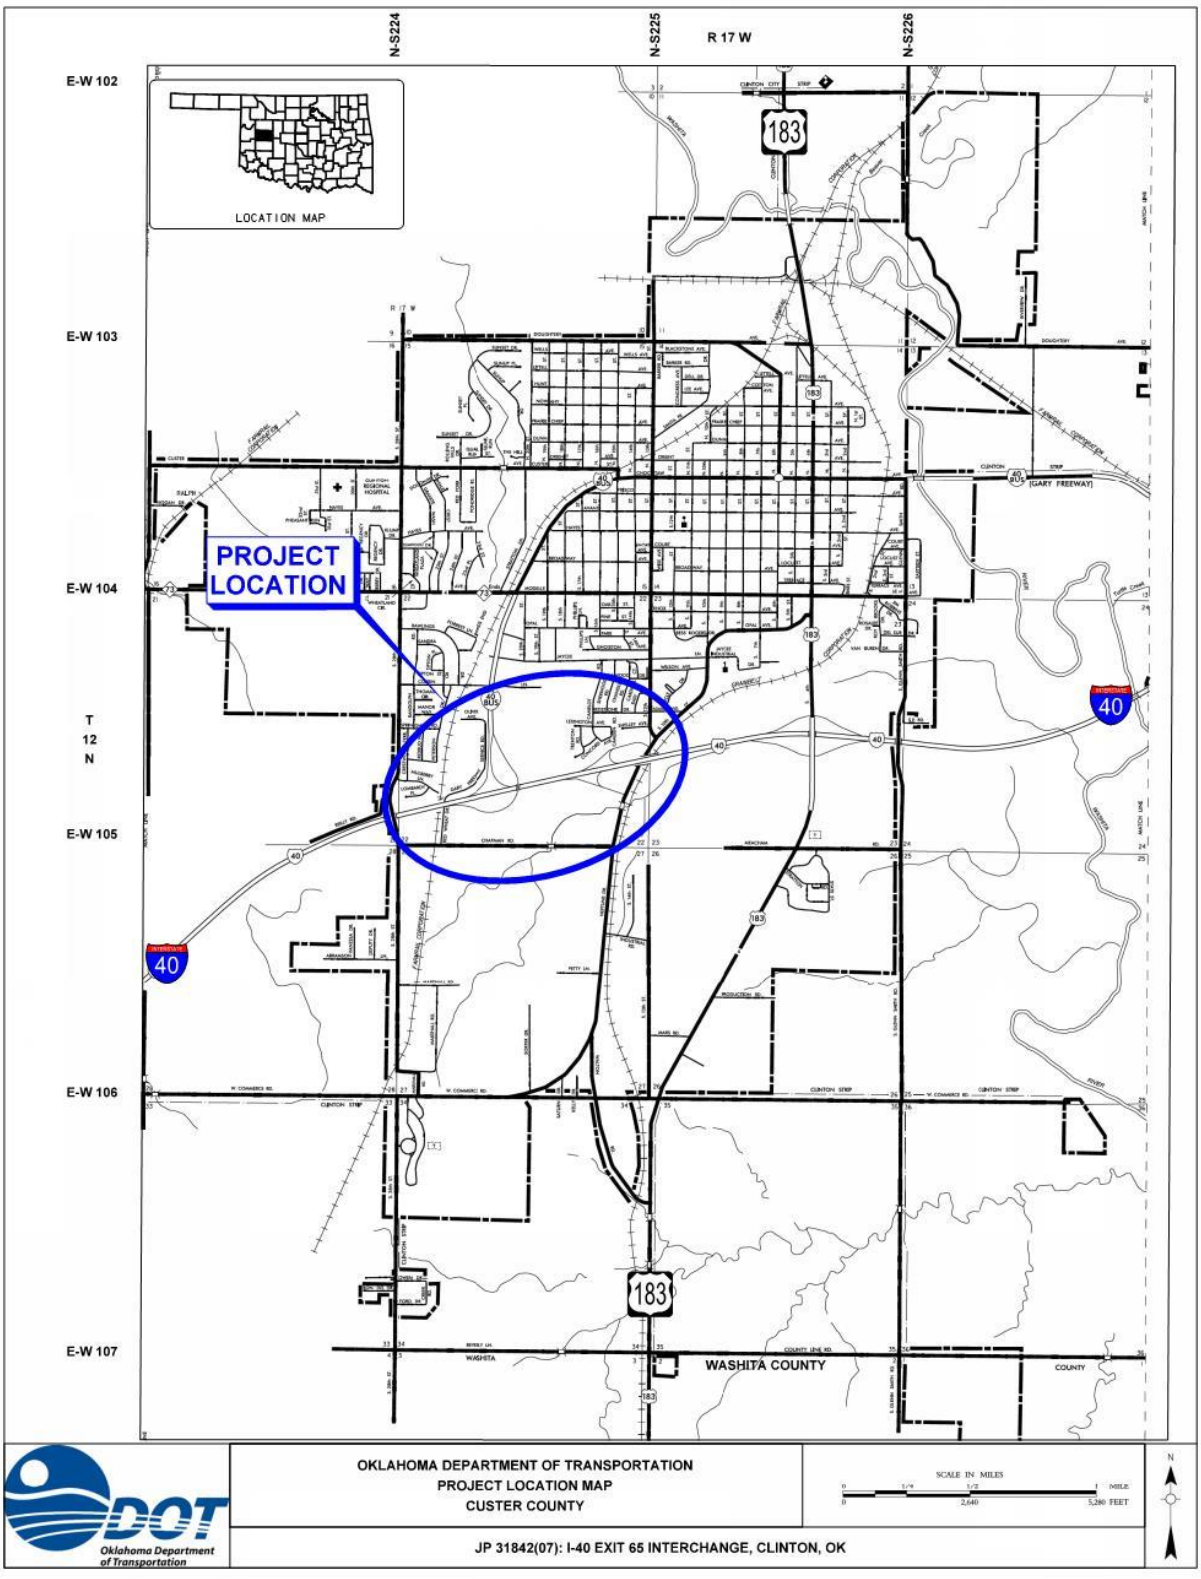

Figure 1: I-40 Exit 65 Project Location Map

I-40 is an important local, regional, and interstate connection for passenger and freight traffic. I-40 currently carries approximately 22,000 vehicles per day through this area, 45% of which are trucks. By the year 2050, traffic volumes are expected to grow to 30,700 vehicles per day. The existing configuration of the Exit 65 and 65A interchanges, combined with the high volume of truck traffic, contributes to safety and mobility issues through the interchanges and at adjacent intersections. The intersection of the I-40 Ramps/Gary Boulevard and Red Wheat Drive/Lexington Avenue is particularly problematic.

Analysis of crash data showed that total crash rates on I-40 between 2007-2017 were nearly 1.4 times the rates for similar statewide facilities, and injury crash rates were nearly 2.0 times the rates for similar statewide facilities. The crashes are especially concentrated near the on and off ramps at the interchanges. At the 10th Street/Neptune Drive interchange, the short acceleration length in the eastbound direction and the short deceleration length in the westbound direction contributed to the number of crashes in that area. At the Gary Boulevard interchange, vehicles driving too fast at the eastbound off-ramp led to 6 rollover crashes near the gore and 1 rollover crash on the ramp itself.

Fifty-four (54) crashes, or 22% of the crashes for the entire study area, occurred at the intersection of Gary Boulevard/I-40 Ramps and Red Wheat Drive/Lexington Avenue. The most common types of crashes at this intersection were right angle followed by angle turning. The complexity of the intersection and close proximity to the Oliver Avenue and Red Wheat Drive intersection were contributing factors to these crashes; drivers were often confused and did not realize who had the right-of-way.

ODOT completed an initial Preliminary Engineering (PE) Study for the Exit 65 interchange in 2017. The initial study included six alternatives to improve the interchange. ODOT presented these alternatives to the public at a public meeting on May 24, 2016 in Clinton. In response to public feedback, ODOT removed the initial six alternatives from consideration and developed two additional alternatives to provide improved mobility on I-40 and improved access for both interstate and local traffic. These two alternatives were evaluated taking into consideration construction costs, right-of-way and utility costs, and environmental constraints, which resulted in the selection of a preferred alternative for the corridor. The preferred alternative includes:

- Reconstruction of I-40 from 28th Street to Neptune Boulevard
- Replace the existing bridges over the railroad and over Neptune Drive to address vertical clearance deficiencies and provide adequate width for the reconstructed I-40
- Add access to eastbound I-40 from Gary Boulevard
- Extend Gary Boulevard to the south under I-40 to Chapman Road
- Remove Red Wheat Drive and provide business access to Gary Boulevard
- Construct 2-way frontage roads with modern roundabouts between Exits 65 and 65A
- Consolidates two interchanges into one with access to both Gary Boulevard and Neptune Boulevard

Communities in the Study Area

Providing adequate opportunity for all communities to engage in the study requires identification of the different communities present in the general study area. Identification of these communities comes from a number of sources, primarily the US Census, which provides data on low-income and minority communities as well as limited English proficiency. Additional information is available from other federal, state, and local sources such as the USDA Food and Nutrition Service, the Department of Housing and Urban Development, the Oklahoma Department of Education, and the City of Clinton.

Demographic data from the 2016 American Community Survey was collected from Census Tract 9604, Block Group 4 in Custer County to assess the presence of minority, low-income, and limited-English proficient populations. This block group includes the entire project study area (**Figure 2**).

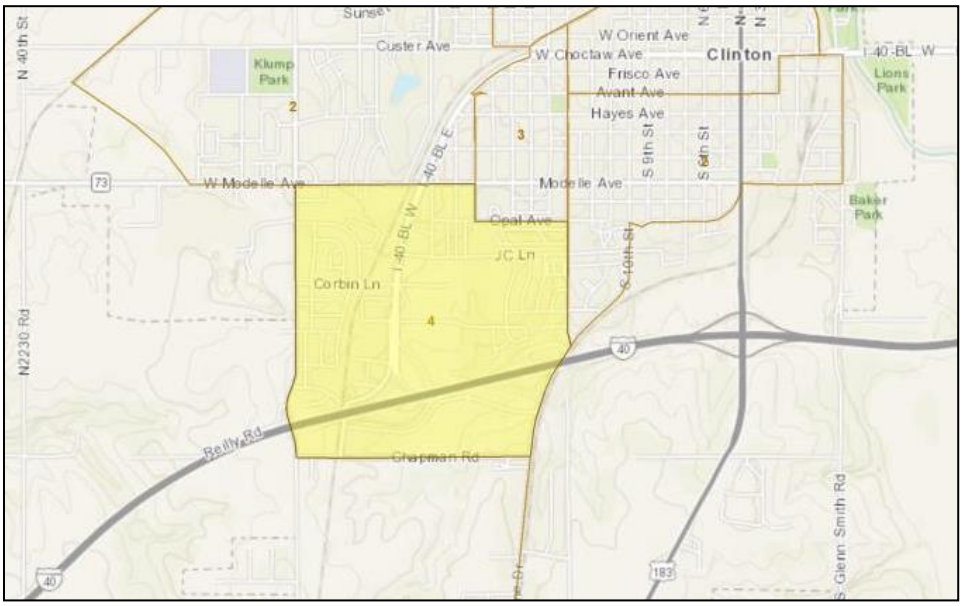

Figure 2: Census Tract 9604, Block Group 4, Custer County, Oklahoma

Table 1, **Table 2,** and **Table 3** summarize the data, along with data from the state of Oklahoma, Custer County, and the City of Clinton for comparison.

Data suggest that the study area contains relatively high percentages of Hispanic individuals. Also compared to the City of Clinton, Custer County, and the state overall, the study area has relatively high percentages of Asian individuals. However, when looking at the English proficiency of the study area population, only about 2% speak English "Not Well" or "Not at All". This suggests that while there may be Environmental Justice considerations when assessing impacts of the project, in terms of public involvement it is not likely that non-English notifications or meeting materials will be needed.

Review of information on low-income populations suggests that there is a very low percentage of low-income individuals in the study area. However, information from the Oklahoma State Department of Education suggests that between 77 and 85% of school-age children are considered low-income and qualify for free or reduced lunch programs. Additionally, according to information on the City of Clinton website, approximately 64.4% of the dwelling units in the city are owner-occupied, suggesting a rental rate of around 36%. While it is unknown exactly where in the city rental units tend to be concentrated,

providing a public meeting flyer door-to-door in addition to mail would potentially increase the visibility of the public meeting among renters.

I-40 Exit 65 Public Involvement Plan

The public involvement plan for the I-44 Corridor Study will include traditional outreach methods such as written letters and a public meeting, as well as methods more specifically targeted to the low-income in the study area. Traditional outreach will include written letters to federal and state agencies, and written public meeting invitations to local and elected officials, utility owners, and all property owners within the corridor study area. There will be a media release and all information about the meeting will be posted on the ODOT website.

Methods to reach environmental justice populations will include hand delivery of meeting notices door to door (to capture renters), and posting of notices in community facilities such as churches, the local library, and local community center. While there is a relatively large Hispanic population in the study area, data do not suggest that English proficiency is limited. Therefore, only English meeting materials are proposed.

The following is a list of area churches, schools, and community facilities where meeting information could be posted:

<u>Study Area Churches:</u>

First Church of God - 1900 Lexington Ave., Clinton, OK 73601
First Mennonite Church – 700 S. 19th Street, Clinton, OK 73601
Tabernacle Baptist Church – 1410 Shelley Ave., Clinton, OK 73601 (closed?)

<u>Schools:</u>

Southwest Elementary School - 1903 Opal Ave., Clinton, OK 73601
Clinton High School - 2130 W. Gary Blvd., Clinton, OK 73601

Other:

Clinton Public Library – 721 Frisco, Clinton, OK 73601
Clinton Activity Center – 600 S. 28th Street, Clinton, OK 73601

District V
Oklahoma Transportation Commissioner
P.O. Box 348
Snyder, Oklahoma 73566

RE: Public Meeting for I-40 Interchange Improvements and Intersection Modification at Exit 65, I-40B West Jct. in Clinton, Custer County, Oklahoma, JP 31842(04)

Dear Commissioner Huckabay,

The Oklahoma Department of Transportation (ODOT), in cooperation with the Federal Highway Administration (FHWA), is proposing improvements to I-40 between S. 28th Street and Neptune Drive, including the I-40 & Gary Boulevard interchange (Exit 65) in the City of Clinton, Custer County, Oklahoma (see attached map). The existing interchange includes on- and off-ramps in close proximity, and the current ramp configuration is contributing to traffic flow issues at the Gary Blvd./Lexington/Oliver intersection. The existing interchange also lacks eastbound access to I-40. In addition, the City of Clinton is continuing to experience commercial growth, which is anticipated to generate future traffic volumes beyond the capacity of the existing interchange and adjacent intersections.

The purpose of this project is to improve safety and traffic operations and improve mobility in the I-40 corridor. ODOT completed a study of six initial alternatives and held a public meeting on May 24, 2016. In response to public feedback, ODOT has tasked a new consultant to look at additional alternatives for improving I-40 and the Gary Boulevard interchange while taking into consideration construction costs, right-of-way and utility costs, and environmental constraints. These alternatives were evaluated, which resulted in the selection of an alternative for the corridor.

As part of our efforts to keep the public informed of this study, a second public meeting has been scheduled for **February 28, 2019 at 6:00 PM** at the Frisco Conference Center, 101 S. 4th Street, Clinton, OK 73601. The purpose of this meeting is to present the selected design alternative along with additional information about the project and obtain information from the public to further assist in the identification of critical social, economic, and environmental effects that may result from the project.

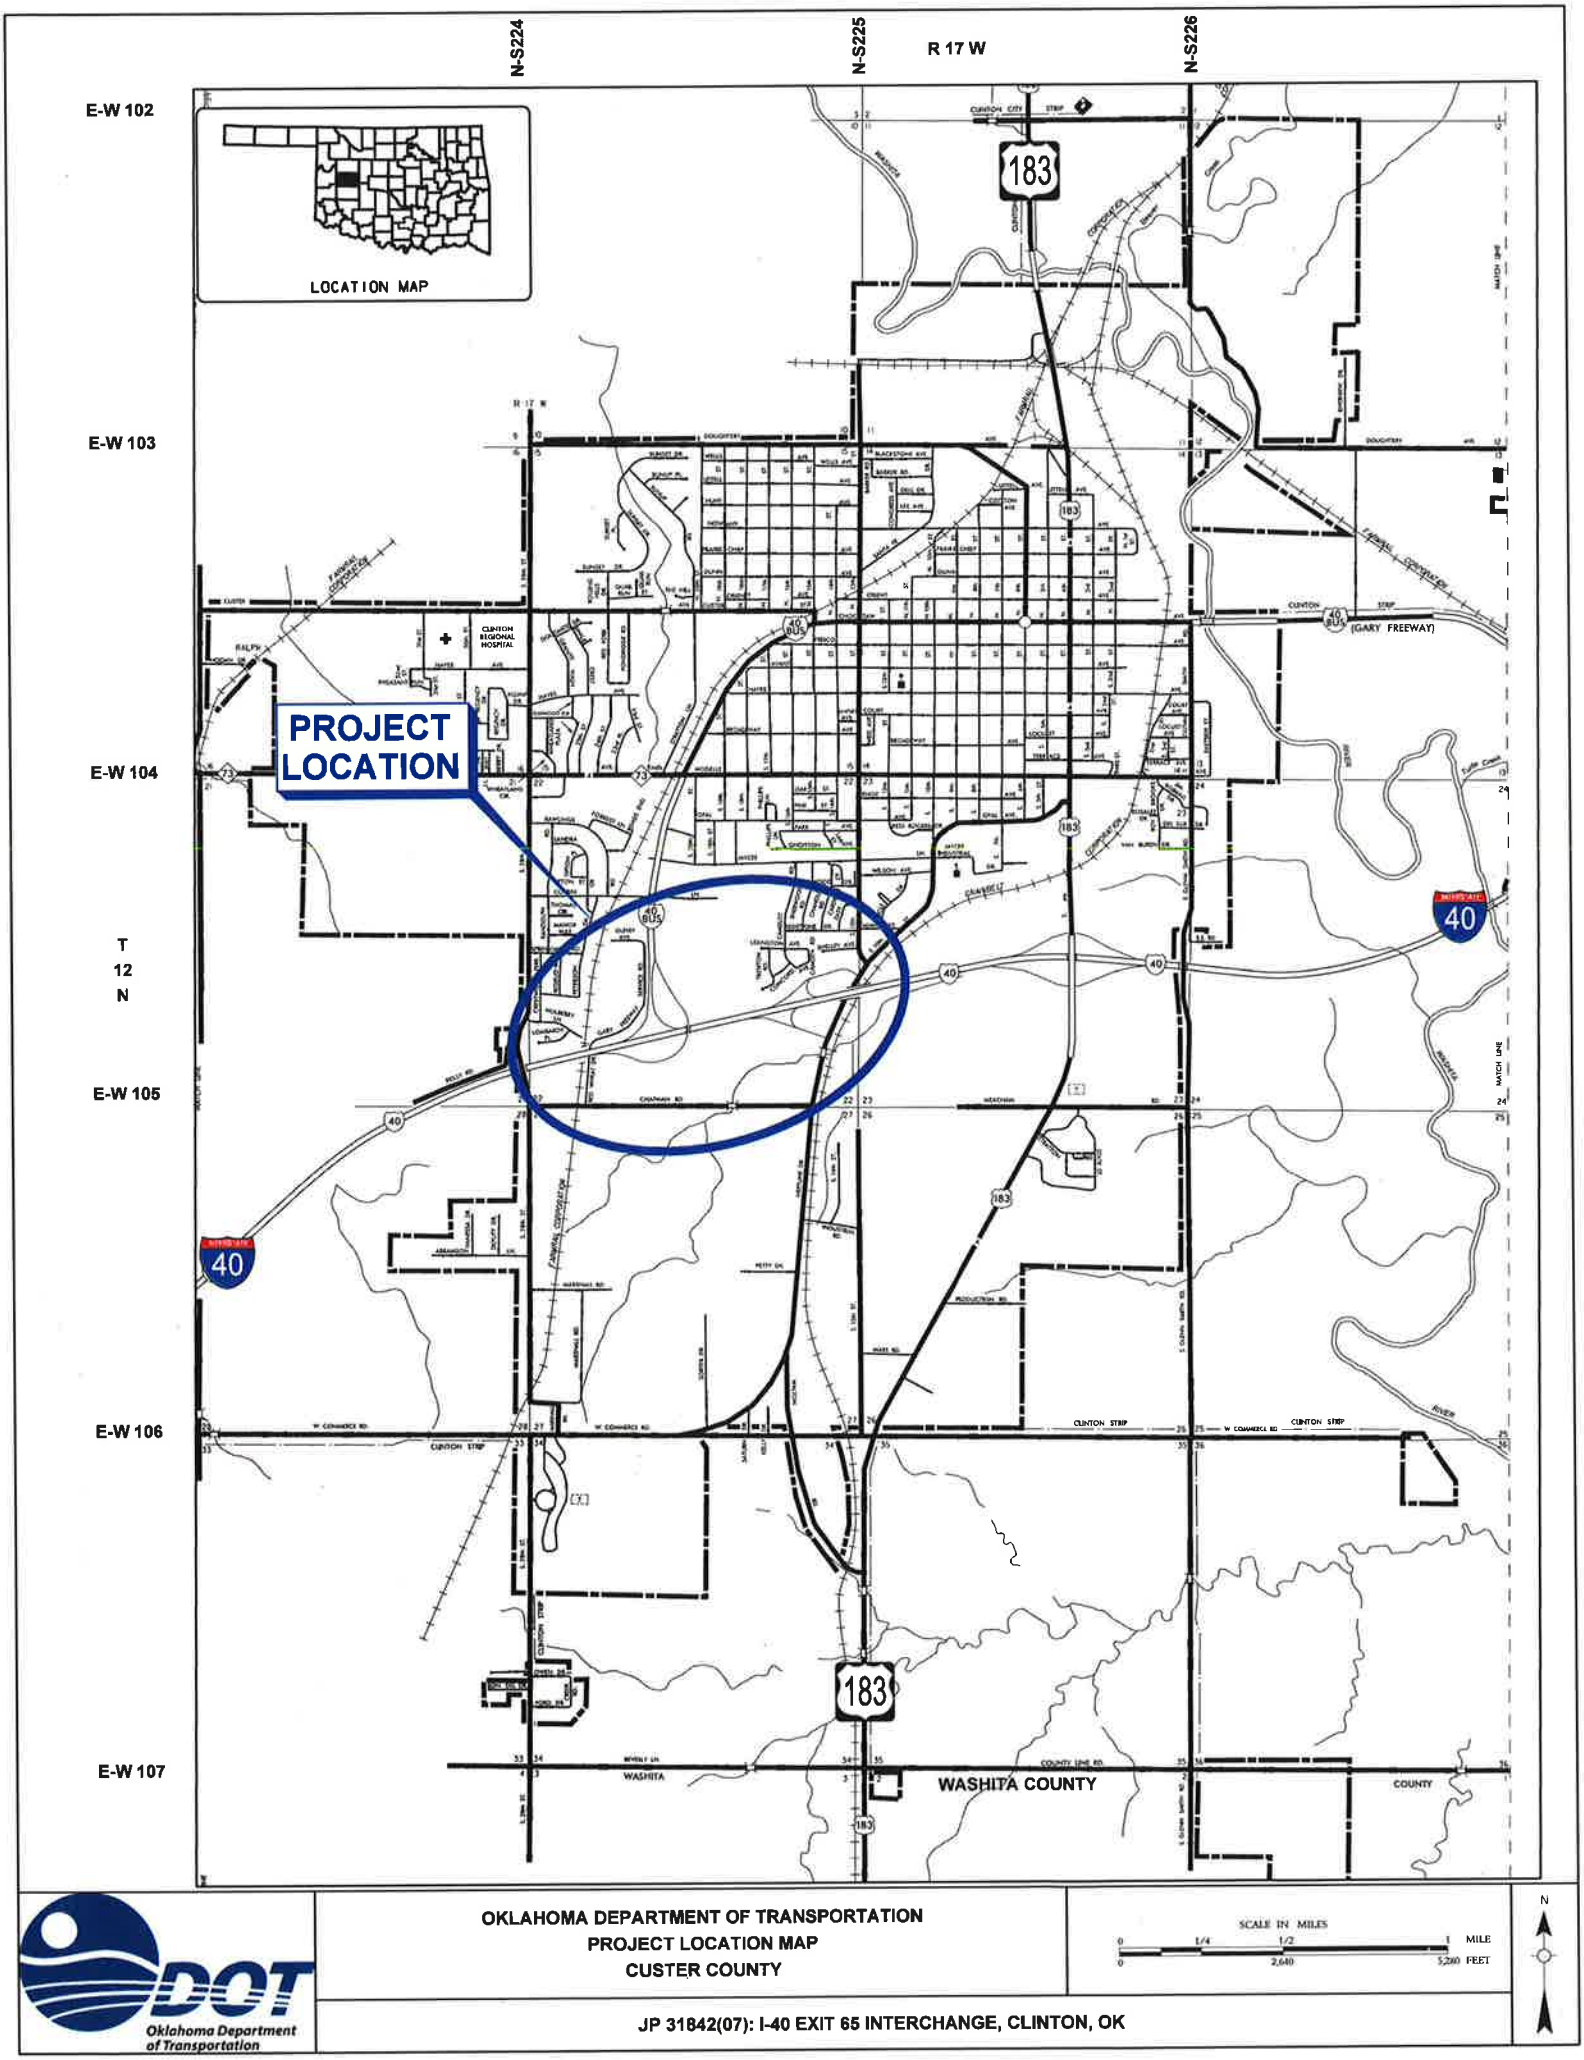

For further information or if you have any questions, please contact Brent Almquist, ODOT Division 5 Engineer, at (580) 323-1431 or balmquist@odot.org, or Kirsten McCullough, Environmental Project Manager, Garver at (918) 250-5922 or kjmccullough@garverusa.com.

Sincerely,

Siv Sundaram, P.E.
Environmental Programs Division Engineer

RE: Public Meeting for I-40 Interchange Improvements and Intersection Modification at Exit 65, I-40B West Jct. in Clinton, Custer County, Oklahoma, JP 31842(04)

Dear Property Owner/Utility Owner,

The Oklahoma Department of Transportation (ODOT), in cooperation with the Federal Highway Administration (FHWA), is proposing improvements to I-40 between S. 28th Street and Neptune Drive, including the I-40 & Gary Boulevard interchange (Exit 65) in the City of Clinton, Custer County, Oklahoma (see attached map). The existing interchange includes on- and off-ramps in close proximity, and the current ramp configuration is contributing to traffic flow issues at the Gary Blvd./Lexington/Oliver intersection. The existing interchange also lacks eastbound access to I-40. In addition, the City of Clinton is continuing to experience commercial growth, which is anticipated to generate future traffic volumes beyond the capacity of the existing interchange and adjacent intersections.

The purpose of this project is to improve safety and traffic operations and improve mobility in the I-40 corridor. ODOT completed a study of six initial alternatives and held a public meeting on May 24, 2016. In response to public feedback, ODOT has tasked a new consultant to look at additional alternatives for improving I-40 and the Gary Boulevard interchange while taking into consideration construction costs, right-of-way and utility costs, and environmental constraints. These alternatives were evaluated, which resulted in the selection of an alternative for the corridor.

As part of our efforts to keep the public informed of this study, a second public meeting has been scheduled for **February 28, 2019 at 6:00 PM** at the Frisco Conference Center, 101 S. 4th St., Clinton, OK 73601. The purpose of this meeting is to present the selected design alternative along with additional information about the project and obtain information from the public to further assist in the identification of critical social, economic, and environmental effects that may result from the project.

If you are leasing your property, please inform your lessee of the project and the public meeting.

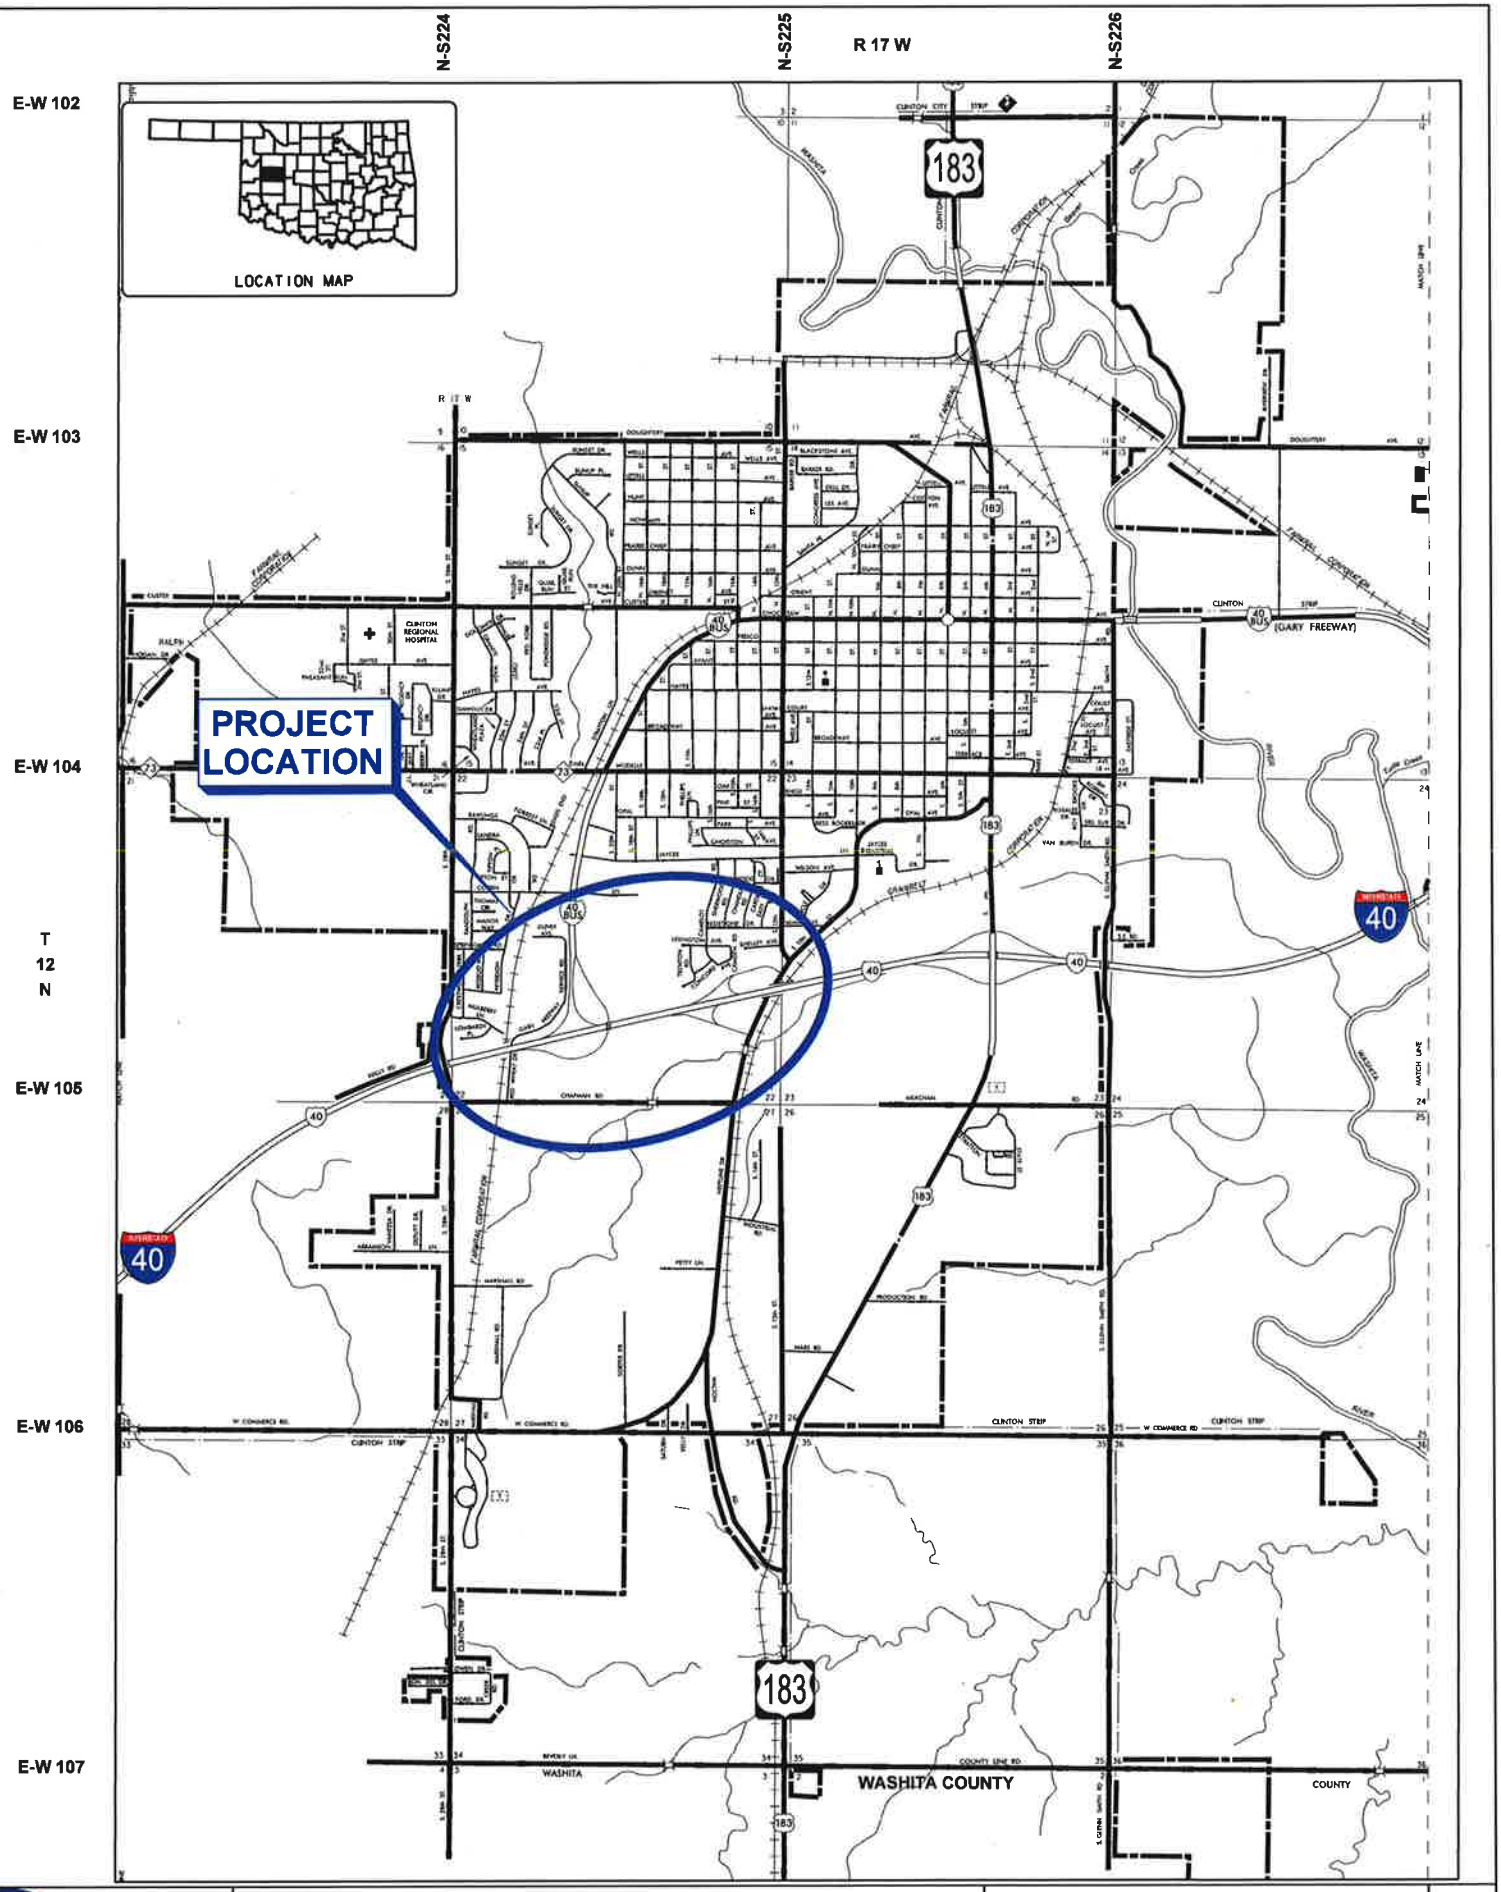

For further information or if you have any questions, please contact Brent Almquist, ODOT Division 5 Engineer, at (580) 323-1431 or balmquist@odot.org, or Kirsten McCullough, Environmental Project Manager, Garver at (918) 250-5922 or kjmccullough@garverusa.com.

Sincerely,

Siv Sundaram, P.E.
Environmental Programs Division Engineer

The Oklahoma Department of Transportation invites you to a

PUBLIC MEETING

for I-40 Exit 65 (Gary Boulevard) Clinton, Oklahoma

February 28, 2019 at 6:00 PM

Frisco Conference Center

101 South 4th Street, Clinton, OK 73601

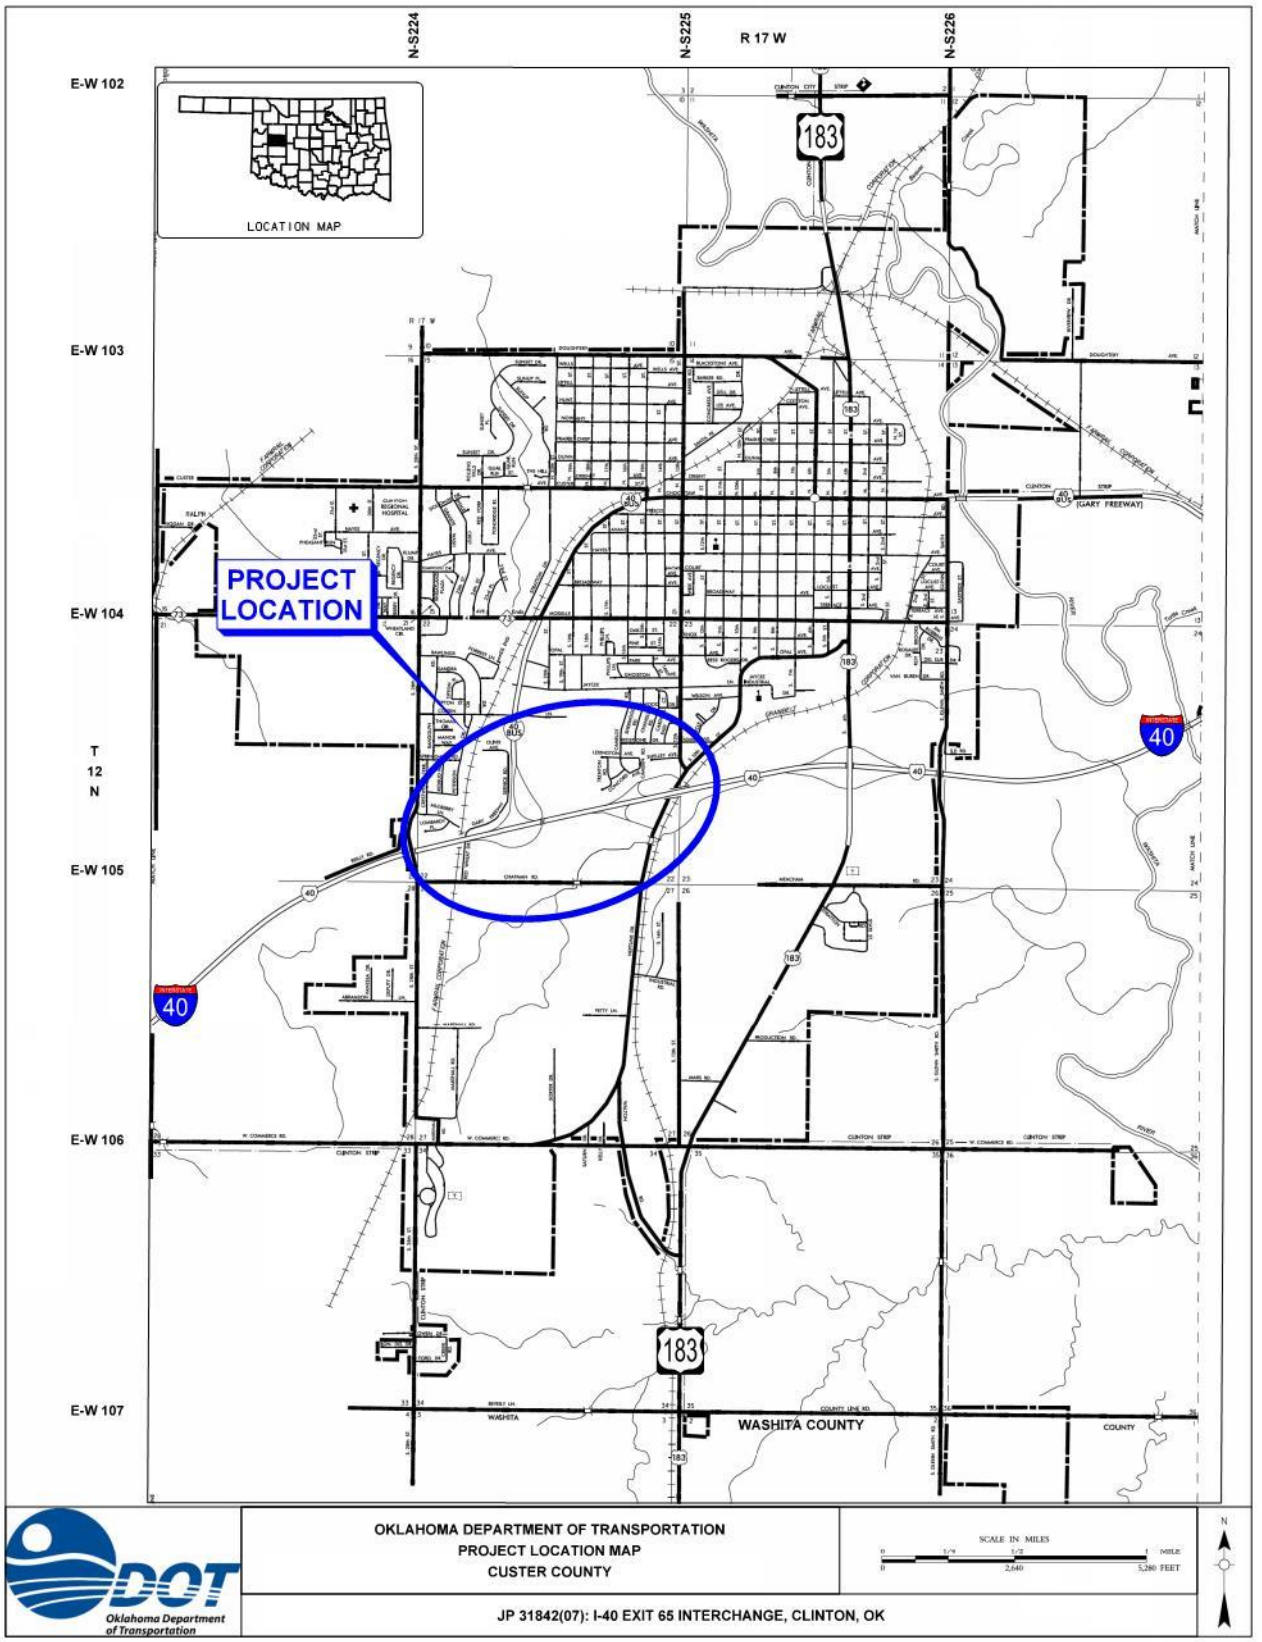

The purpose of this meeting is to inform the public and receive input on the selected design for the I-40 Exit 65 (Gary Boulevard) interchange in the City of Clinton, Oklahoma. In response to feedback received at the first public meeting on May 24, 2016, ODOT has developed new alternatives that provide improved access for both I-40 and local traffic. These alternatives were evaluated taking into consideration construction costs, right-of-way and utility costs, and environmental constraints, which resulted in the selection of an alternative for the corridor. ODOT will present the selected alternative for additional comment at this upcoming public meeting.

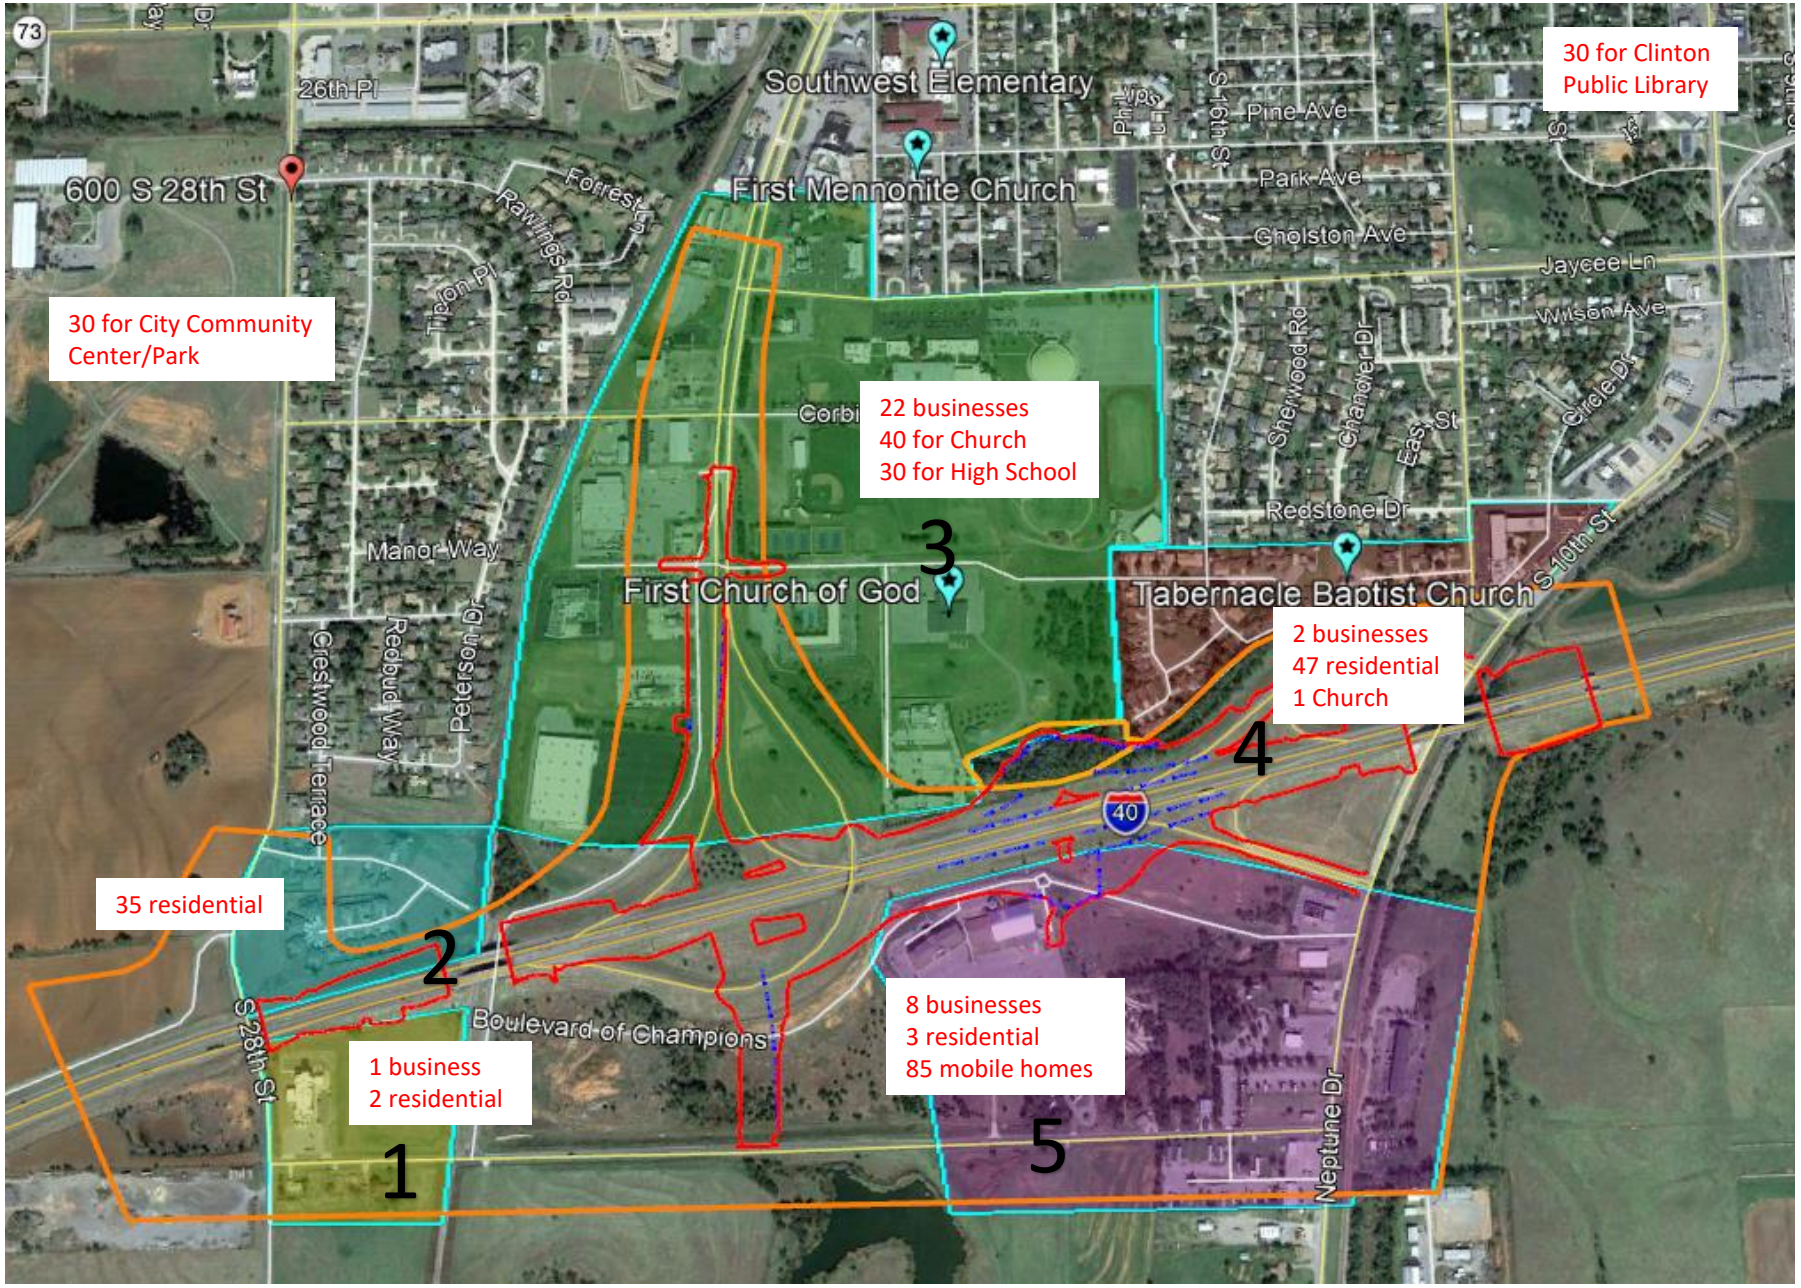

The purpose of this project is to improve safety and traffic operations and improve mobility in the I-40 corridor. Topics to be presented at the meeting include:

- Purpose and Need for the Project
- Proposed Improvements
- Anticipated Impacts
- Next Steps

If you have any questions regarding the study, please contact Kirsten McCullough, Garver, at 918-250-5922 or kjmccullough@garverusa.com. We hope to see you there!

The Oklahoma Department of Transportation (ODOT) ensures that no person or groups of persons shall, on the grounds of race, color, sex, religion, national origin, age, disability, retaliation or genetic information, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any and all programs, services, or activities administered by ODOT, its recipients, sub-recipients, and contractors. To request an accommodation please contact the ADA Coordinator at 405-521-4140 or the Oklahoma Relay Service at 1-800-722-0353. If you have any ADA or Title VI questions email ODOT-ada-titlevi@odot.org.

Appendix F

Public Meeting Presentation

Oklahoma Department of Transportation

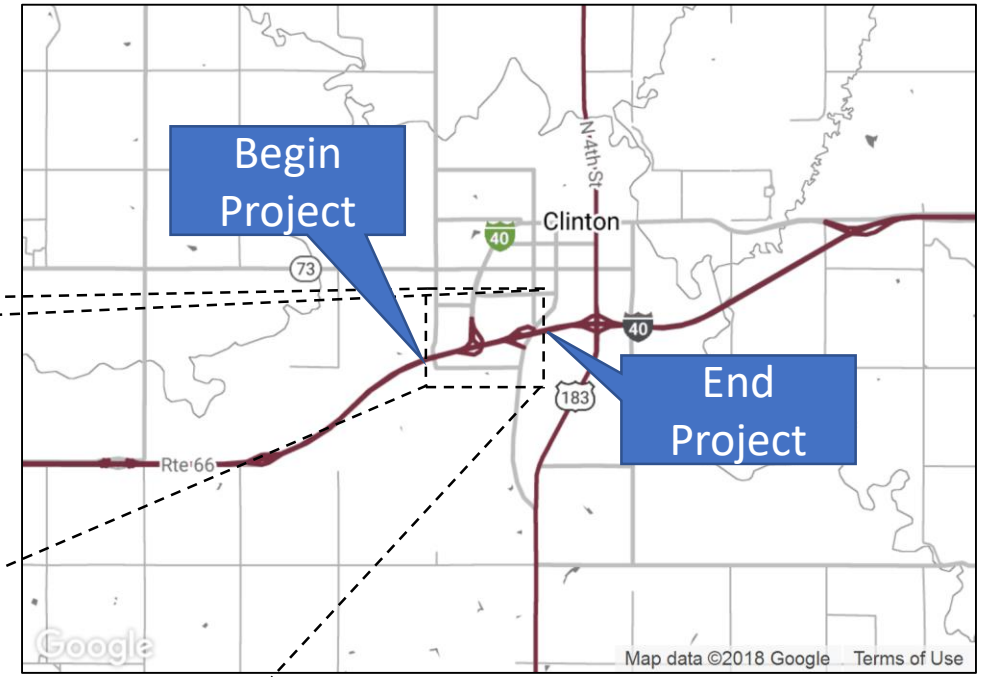

Public Meeting for I-40 & Gary Blvd. (Exit 65) Interchange

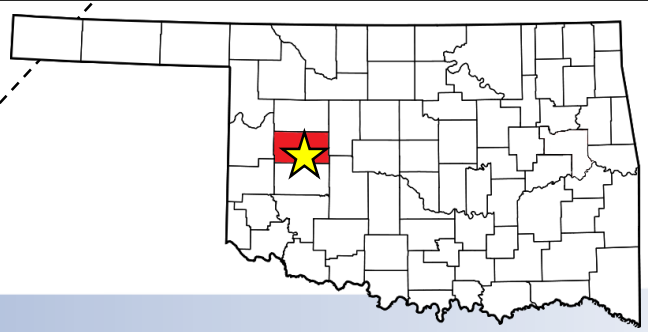

February 28, 2019

Purpose of the Meeting

- To Inform the Public and Present the Selected Alternative for I-40 Exit 65 in Clinton, OK

Oklahoma Department of Transportation

Purpose of the Project

- Improve Safety
- Improve Traffic Operations and Mobility
  - On I-40
  - On City Streets and Intersections
- Improve Access to Existing and Future Commercial and Residential Development

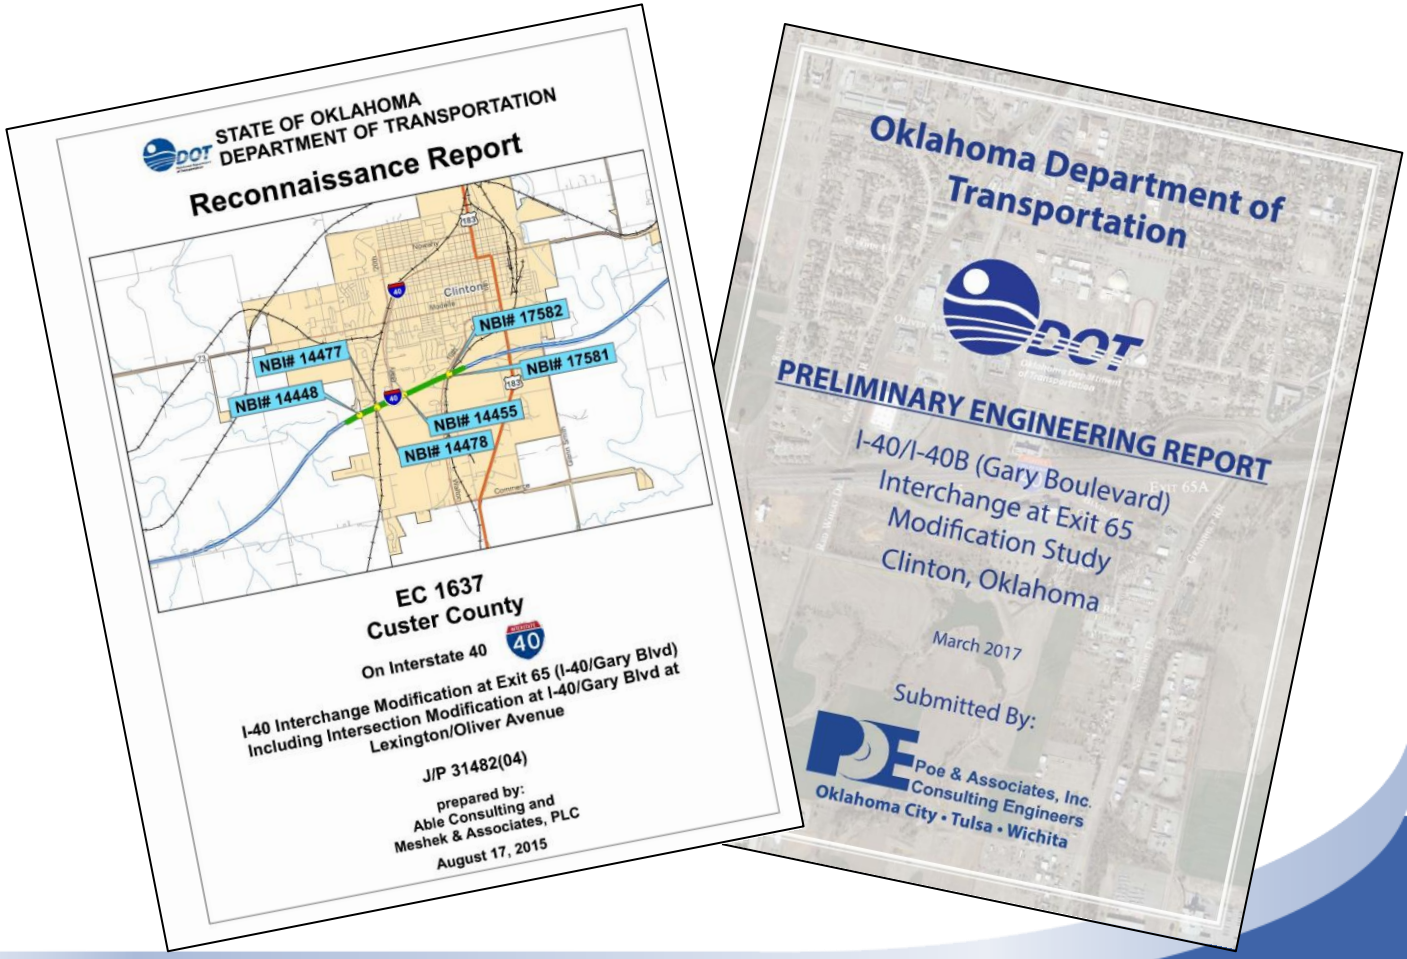

Oklahoma Department of Transportation

Project History

Project History

- In May 2015 ODOT Commissioned an Interchange Study for I-40/Gary Blvd
- The Study Evaluated the Current Functionality of the I-40 Exit 65 Interchange, and Traffic at Nearby Intersections

Oklahoma Department of Transportation

Project History

- A Public Meeting was Held May 24, 2016 in Clinton
- Six Alternatives Were Shown
- Comments at the Meeting Included:
  - Desire for Eastbound and Westbound I-40 Access From Both Neptune Blvd. (Exit 65A) and Gary Blvd. (Exit 65)
  - Desire to Keep Both Exit 65 and 65A Open
  - Concerns Regarding Accessibility of Frontage Roads

I-40/I-40B (Gary Boulevard) Interchange at Exit 65 Modification Study Concepts

Oklahoma Department of Transportation

Project History

- As a Response to Public Comments, ODOT Developed two Additional Alternatives to:
  - Keep Both Exit 65 and 65A
  - Provide Improved Frontage Road Access
  - Improve Local Access and Intersections
- Minor Differences Between the two Alternatives Consisting Mainly of the Alignment of Red Wheat Drive/Gary Blvd

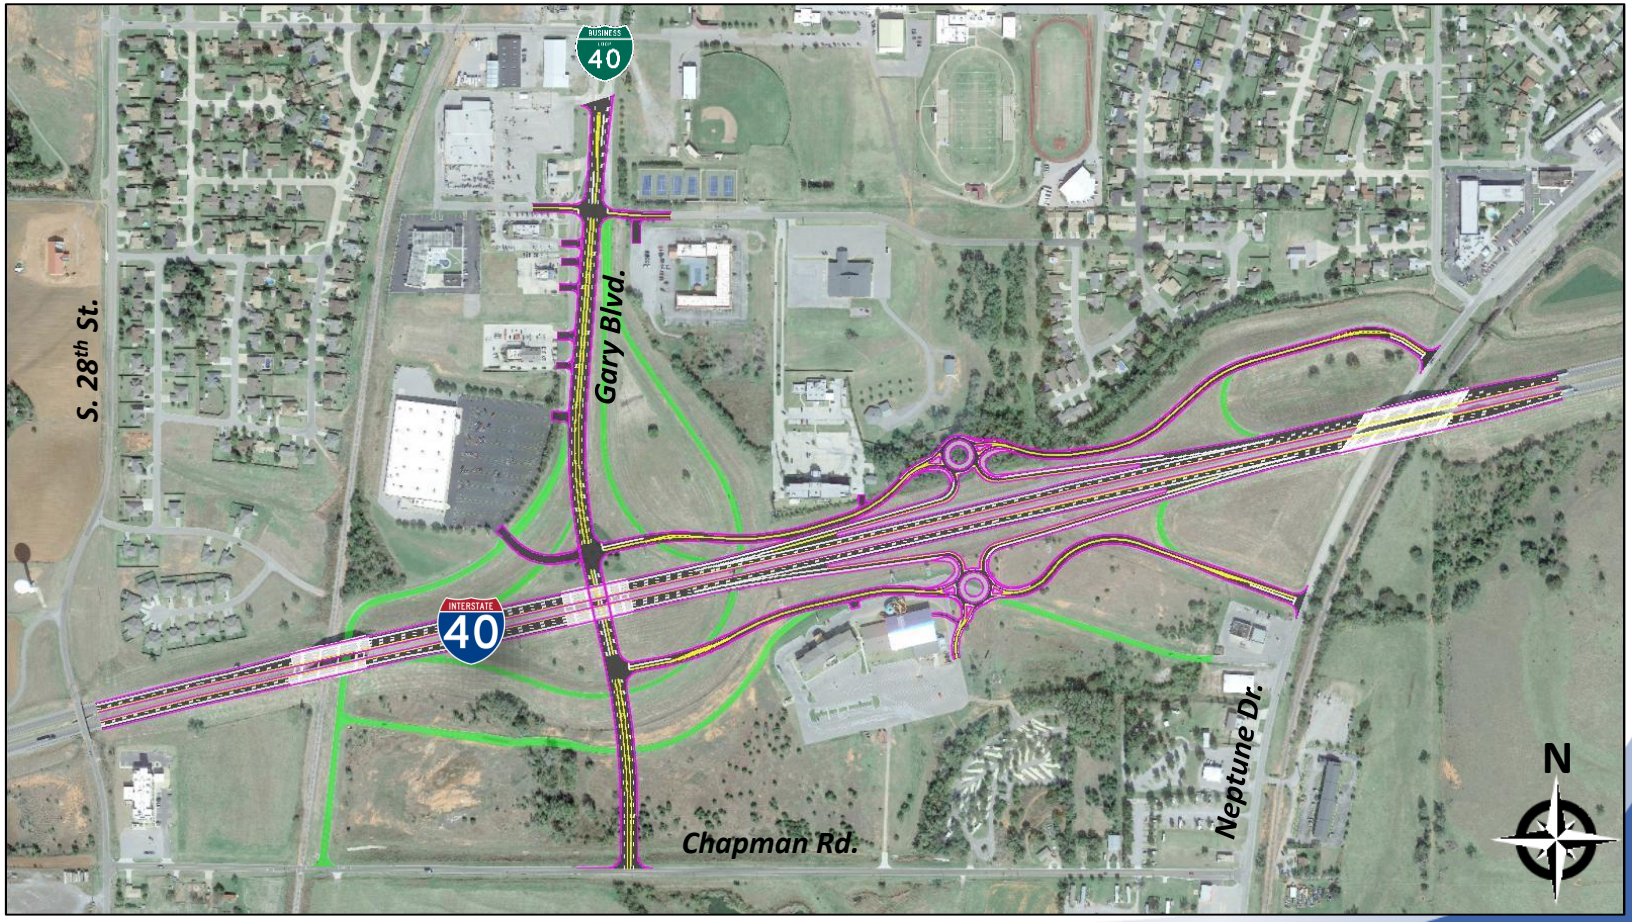

Oklahoma Department of Transportation

Project History

- Alternative 7 was Selected for the Following Reasons:
  - Provides Full Access to I-40 in all Directions from Both Gary Blvd. and Neptune Dr.
  - Shorter and More Direct Connection to I-40
  - Lower Environmental Impact
  - Lower Construction Cost
- Remainder of Presentation will Discuss Only Alternative 7

Oklahoma Department of Transportation

Project Area Information

Project Area Information

- I-40
  - 4-Lane Divided Highway With 10-ft Outside Shoulders, 4-ft Inside Shoulders and Grass Median
  - Twin Bridges Over Red Wheat Dr./Railroad and Neptune Dr. /Railroad
  - Posted Speed Limit is 70 mph
  - Projected Traffic (2050): **30,700** Vehicles/Day (**45%** Trucks)
- Two Interchanges

Oklahoma Department of Transportation

Project Area Information

- I-40
  - 4-Lane Divided Highway With 10-ft Outside Shoulders, 4-ft Inside Shoulders and Grass Median
  - Twin Bridges Over Red Wheat Dr./Railroad and Neptune Dr. /Railroad
  - Posted Speed Limit is 70 mph
  - Projected Traffic (2050): **30,700** Vehicles/Day (**45%** Trucks)
- Two Interchanges ☆

Oklahoma Department of Transportation

Project Area Information

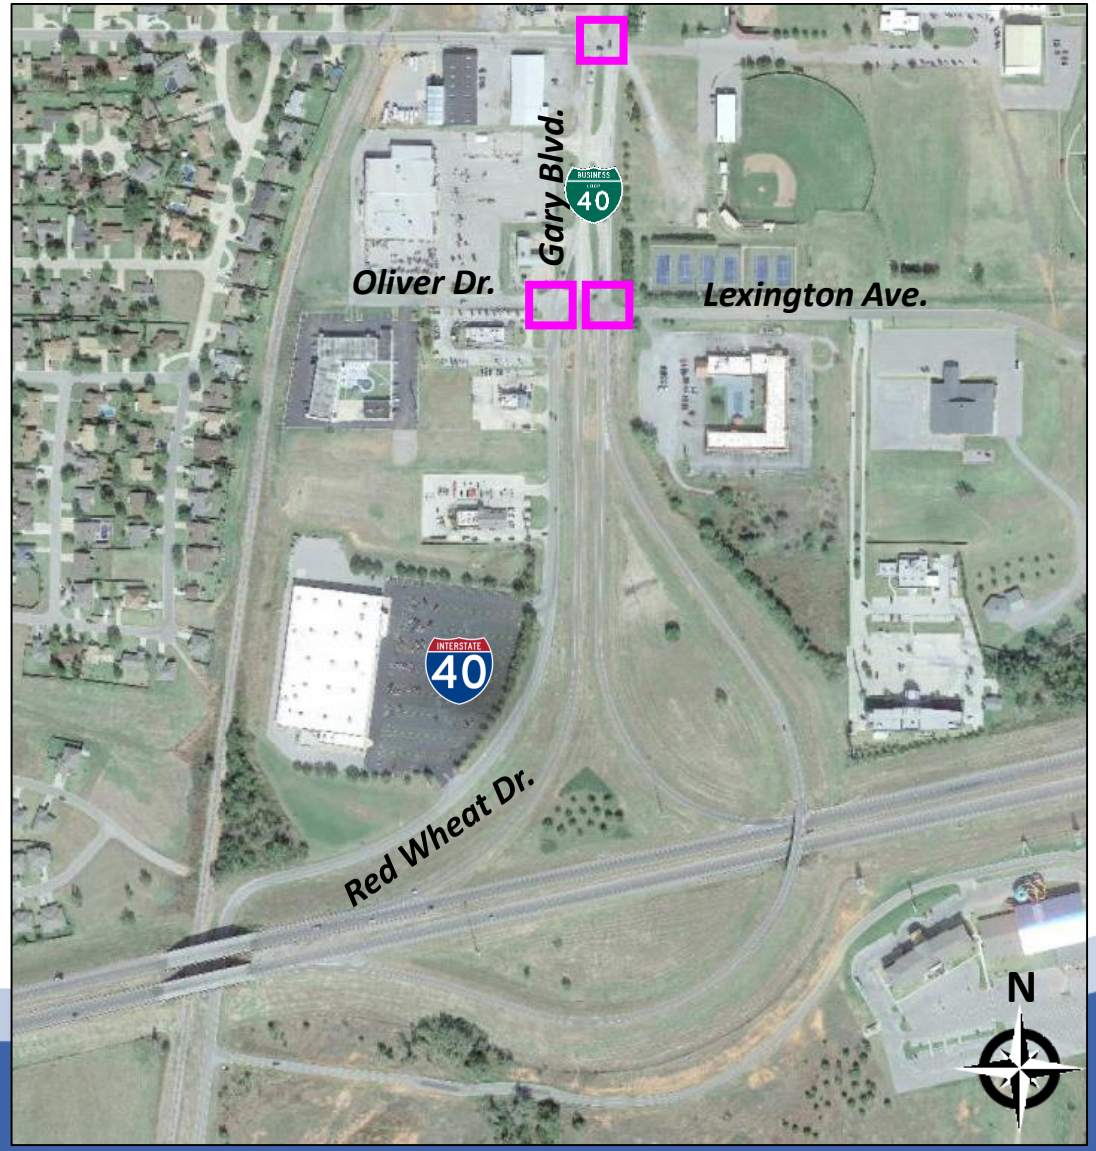

- Gary Boulevard
  - 4-Lane Divided Roadway With 10-ft Outside Shoulders, no Inside Shoulders and Grass Median
  - Left Turn Lanes
  - Posted Speed Limit of 40 mph
  - Project Traffic (2050): **9,600** Vehicles/Day (**7%** Trucks)
- Intersections
- Drives

Oklahoma Department of Transportation

Project Area Information

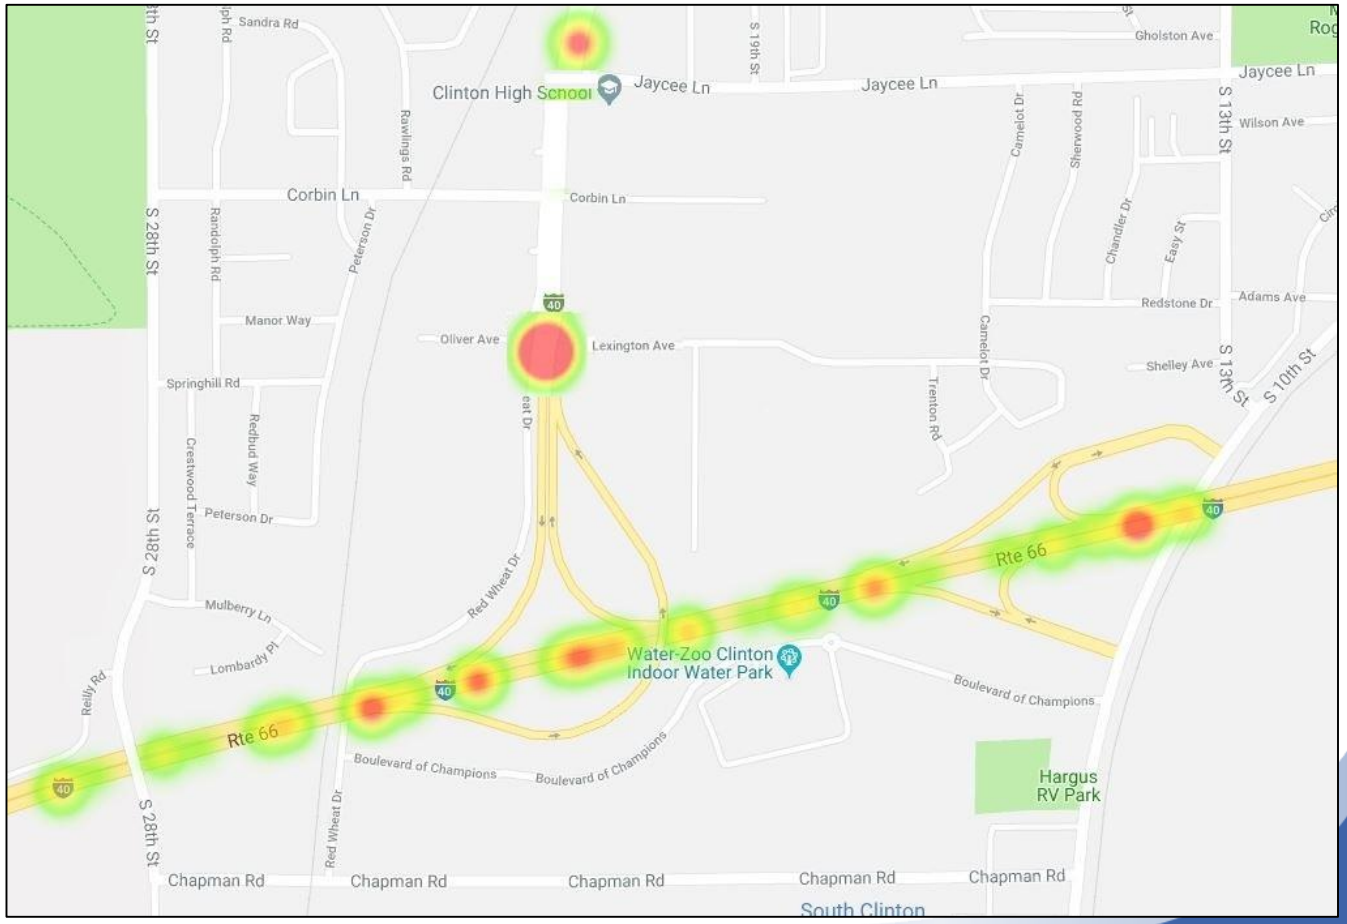

- Gary Boulevard
  - 4-Lane Divided Roadway With 10-ft Outside Shoulders, no Inside Shoulders and Grass Median
  - Left Turn Lanes
  - Posted Speed Limit of 40 mph
  - Project Traffic (2050): **9,600** Vehicles/Day (**7%** Trucks)
- Intersections ☐
- Drives

ODOT Oklahoma Department of Transportation

Project Area Information

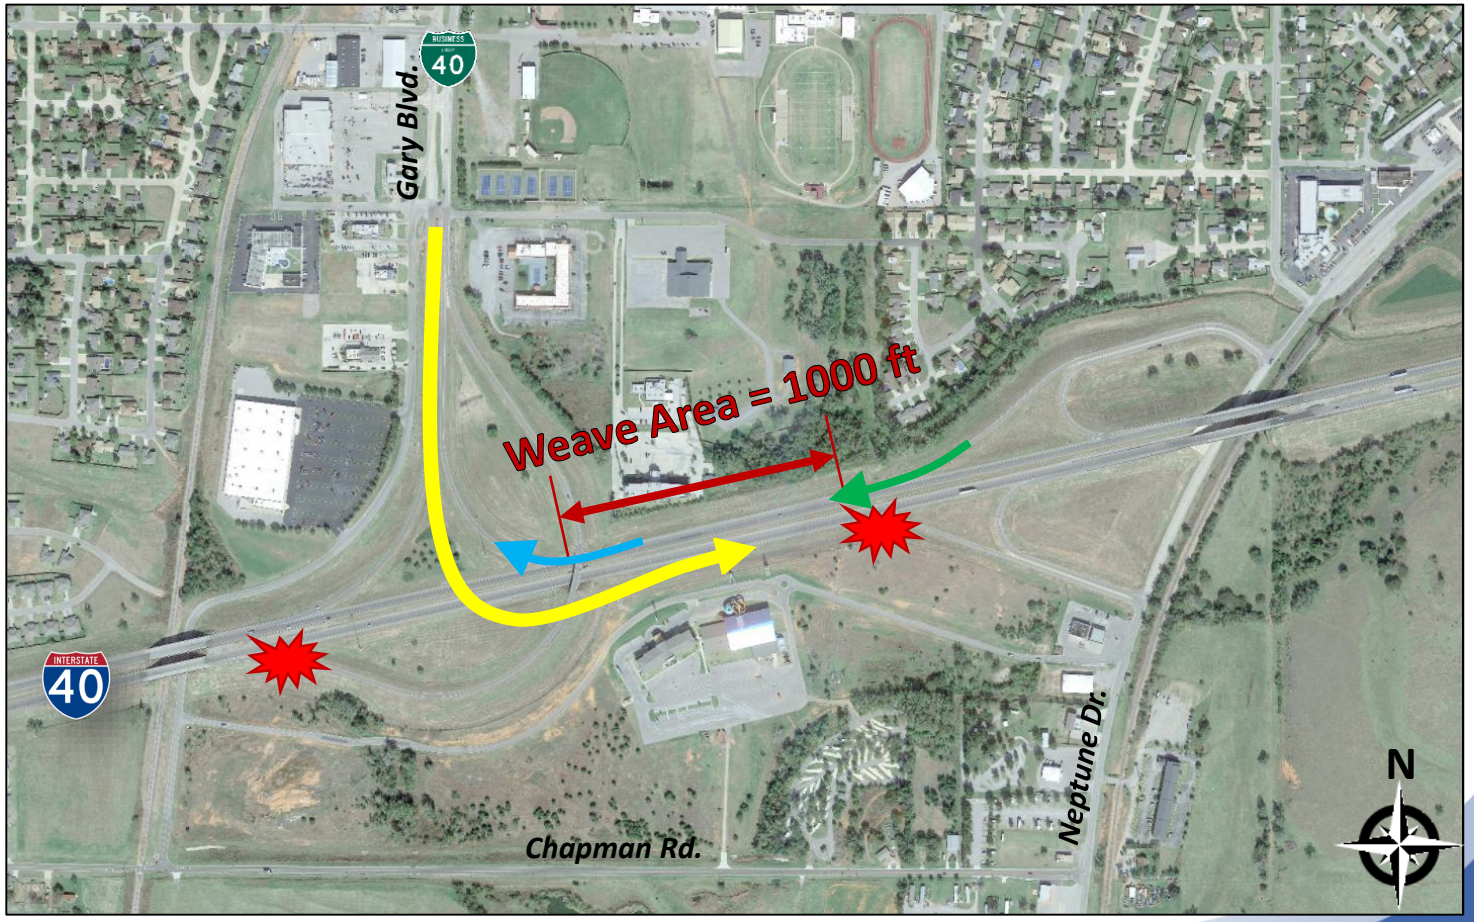

- Collision Data
  - Total: 246 Documented Collisions (2007-2017)
    - 5 Fatalities
    - 12 Serious Injury
  - Most Common Type of Collision (>50%)
    - Fixed Object
    - Rear-End
  - Gary Blvd./Red Wheat Dr./Ramps Intersection Included 22% of the Collisions

Oklahoma Department of Transportation

Existing Roadway Conditions Warrant Improvement

- Highway Deficiencies
  - Interchange Spacing
  - Missing Ramp Movement
  - Ramp Departures
- Local Road Deficiencies
  - Intersection Confusion
  - Weave Area Traveling North
  - Driveway Proximity

Oklahoma Department of Transportation

Existing Roadway Conditions Warrant Improvement

- Highway Deficiencies
  - Interchange Spacing
  - Missing Ramp Movement
  - Ramp Departures
- Local Road Deficiencies
  - Intersection Confusion
  - Weave Area Traveling North
  - Driveway Proximity

Oklahoma Department of Transportation

Existing Bridge Conditions Warrant Improvement

- Built in 1959
- Functionally Obsolete (4)
  - Shoulder Widths
  - Parapet Height
  - Vertical Clearance
- Structurally Deficient (1)
  - Poor Condition Rating
  - Needs Attention

Oklahoma Department of Transportation

Existing Bridge Conditions Warrant Improvement

- Built in 1959
- Functionally Obsolete (4)
  - Shoulder Widths
  - Parapet Height
  - Vertical Clearance
- Structurally Deficient (1)
  - Poor Condition Rating
  - Needs Attention

Oklahoma Department of Transportation

Existing Bridge Conditions Warrant Improvement

- Built in 1959
- Functionally Obsolete (4)
  - Shoulder Widths
  - Parapet Height
  - Vertical Clearance
- Structurally Deficient (1)
  - Poor Condition Rating
  - Needs Attention

Oklahoma Department of Transportation

Land Use and Environment

- Land Use is Mostly Commercial With a few Residential Areas
- South of I-40 Commercial and Church Properties are Under Development
- Important Community Facilities Include:
  - Schools
  - Churches
  - Recreational Facility

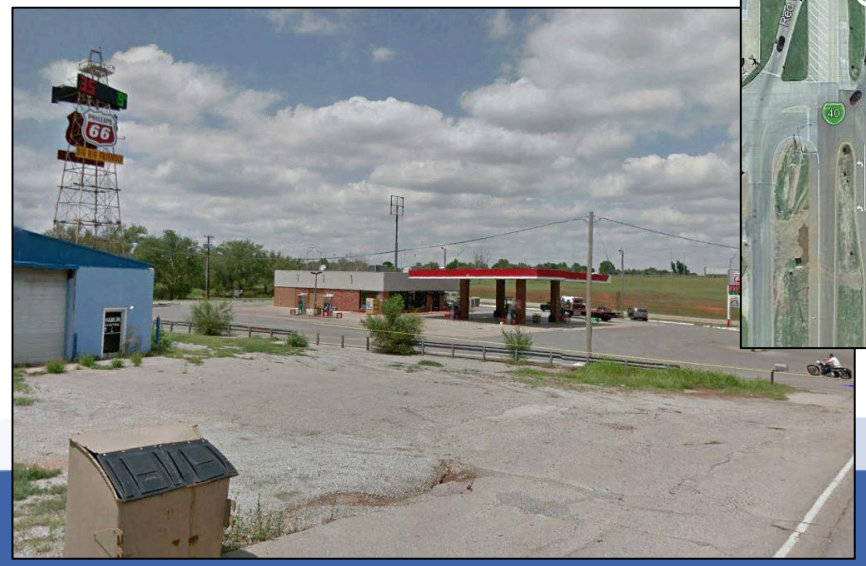

Oklahoma Department of Transportation

Land Use and Environment

- Environmental Resources Include:
  - Streams & Wetlands
  - Sites Containing Potentially Hazardous Materials (e.g. Gas Stations)
  - Portions of original Route 66 roadway along Gary Boulevard and Neptune Drive
  - Public Recreational Property (high school tennis courts and trees)

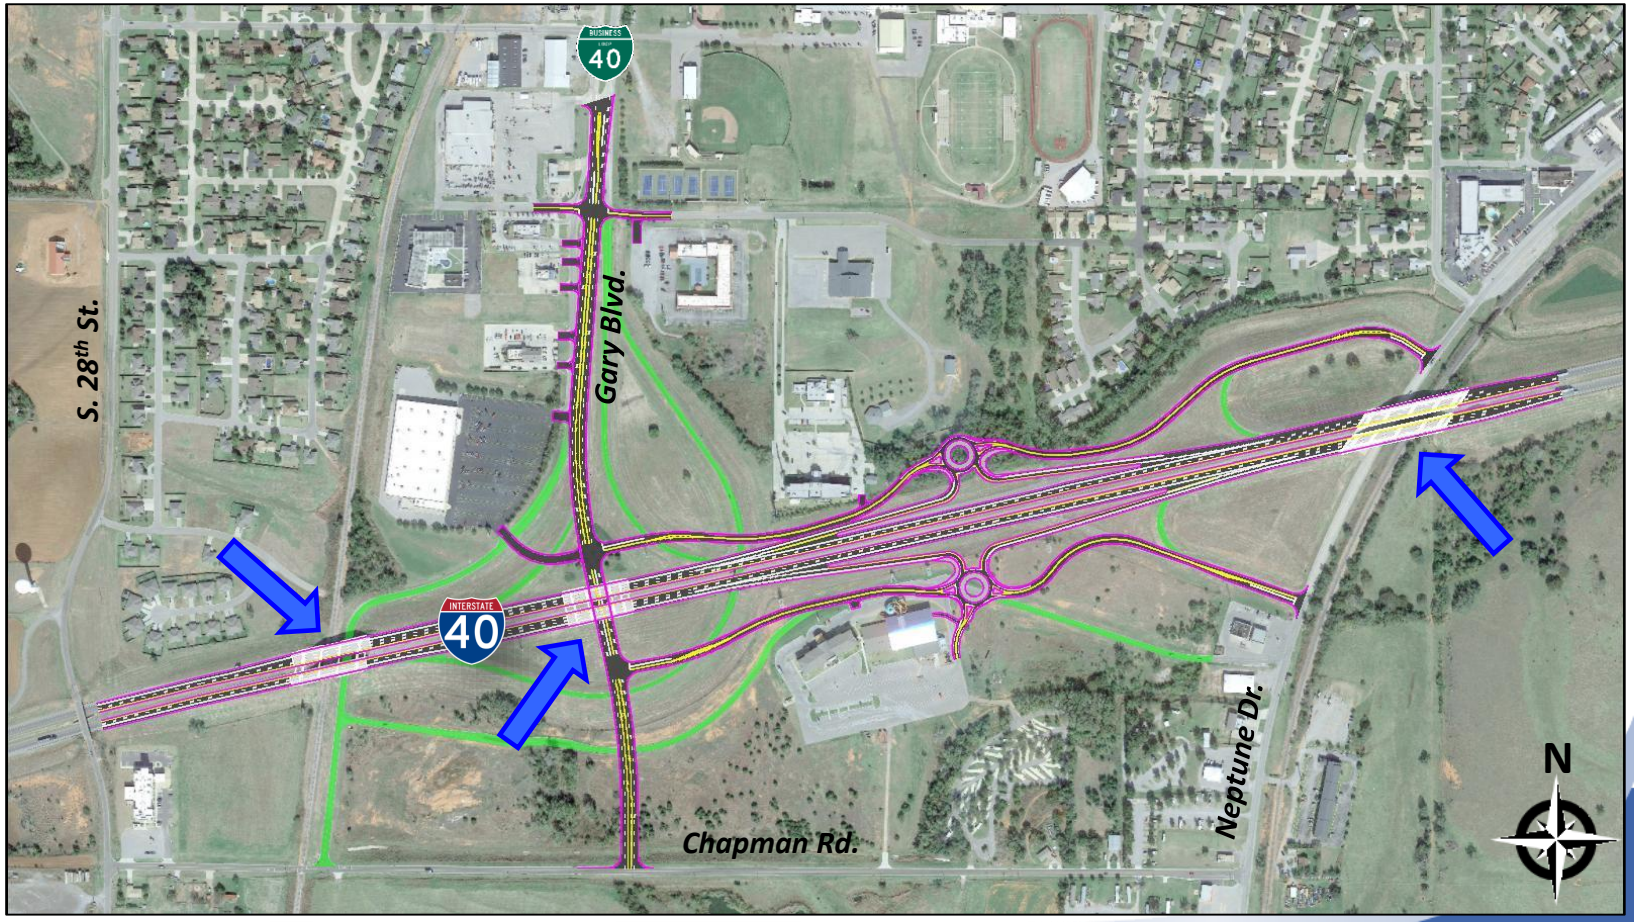

ODOT Oklahoma Department of Transportation

Proposed Design

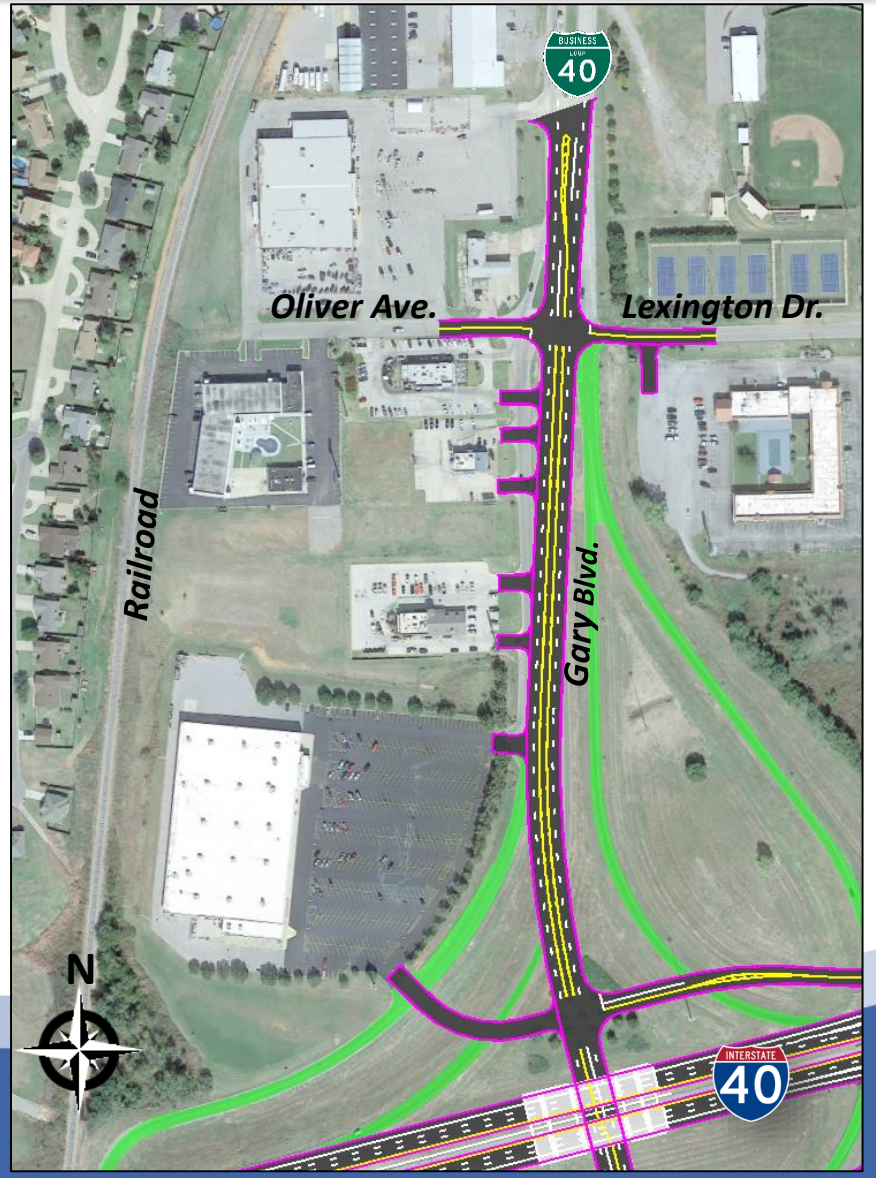

Proposed Design

- Reconstruct I-40 With New Bridges
- Green areas are potential pavement removal
- Gary Blvd. as Five-Lane South to Chapman

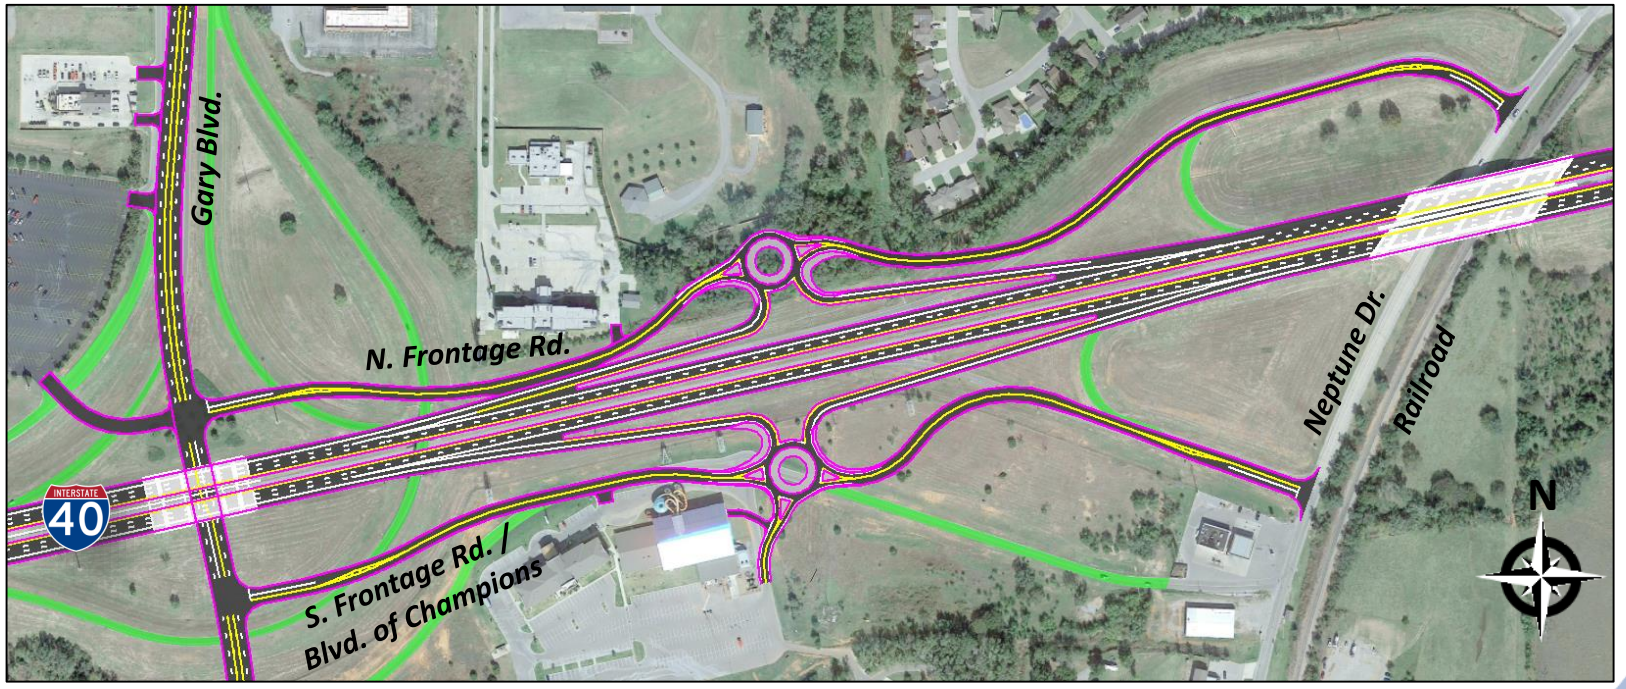

Proposed Design

- Gary Blvd. as Five-Lane South to Chapman
- Remove Red Wheat Dr.

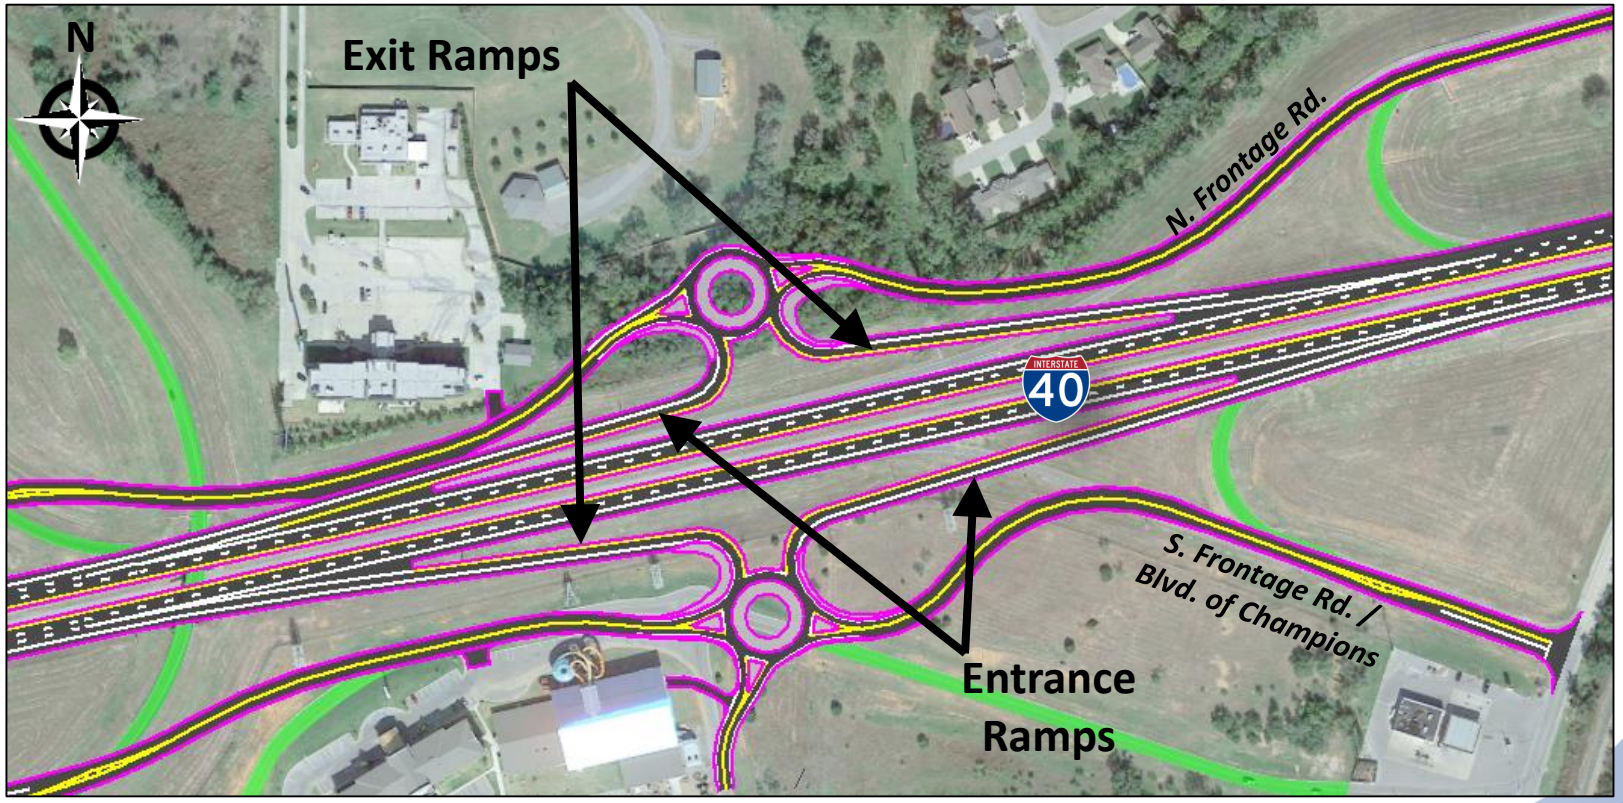

Proposed Design

- Two-Way Frontage Roads
  - North Frontage Rd.
  - Relocated Blvd. of Champions
- Consolidate Two Interchanges Into One
- Direct Access to Both Gary Blvd. & Neptune Dr.

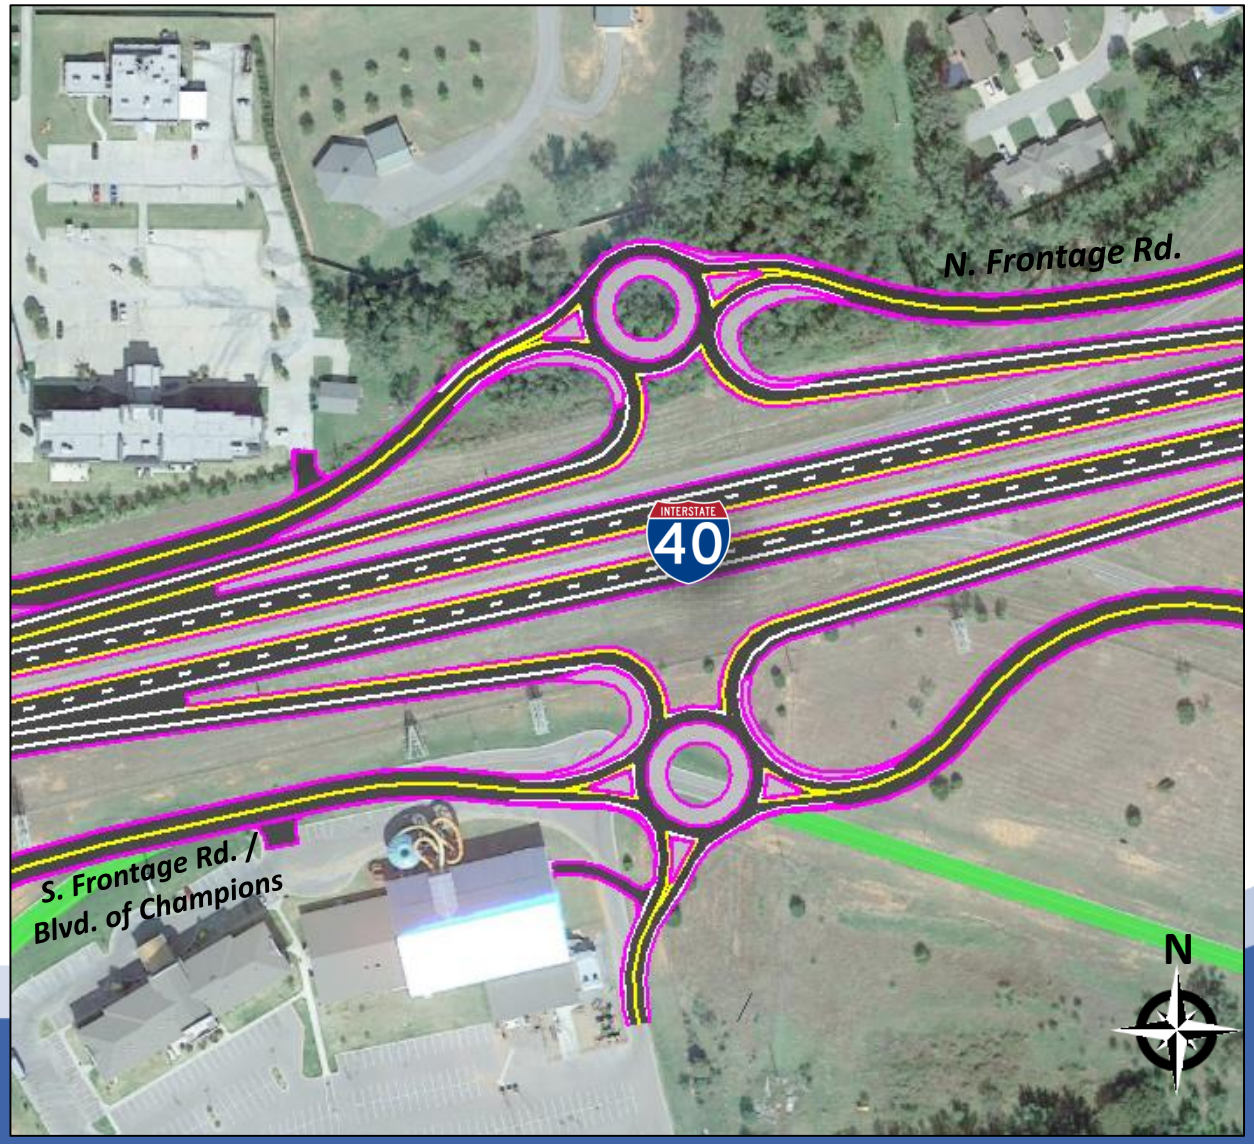

Proposed Design

- Exit Ramps off I-40
- Entrance Ramps onto I-40
- Longer Acceleration and Deceleration Lanes for Ramps

Proposed Design

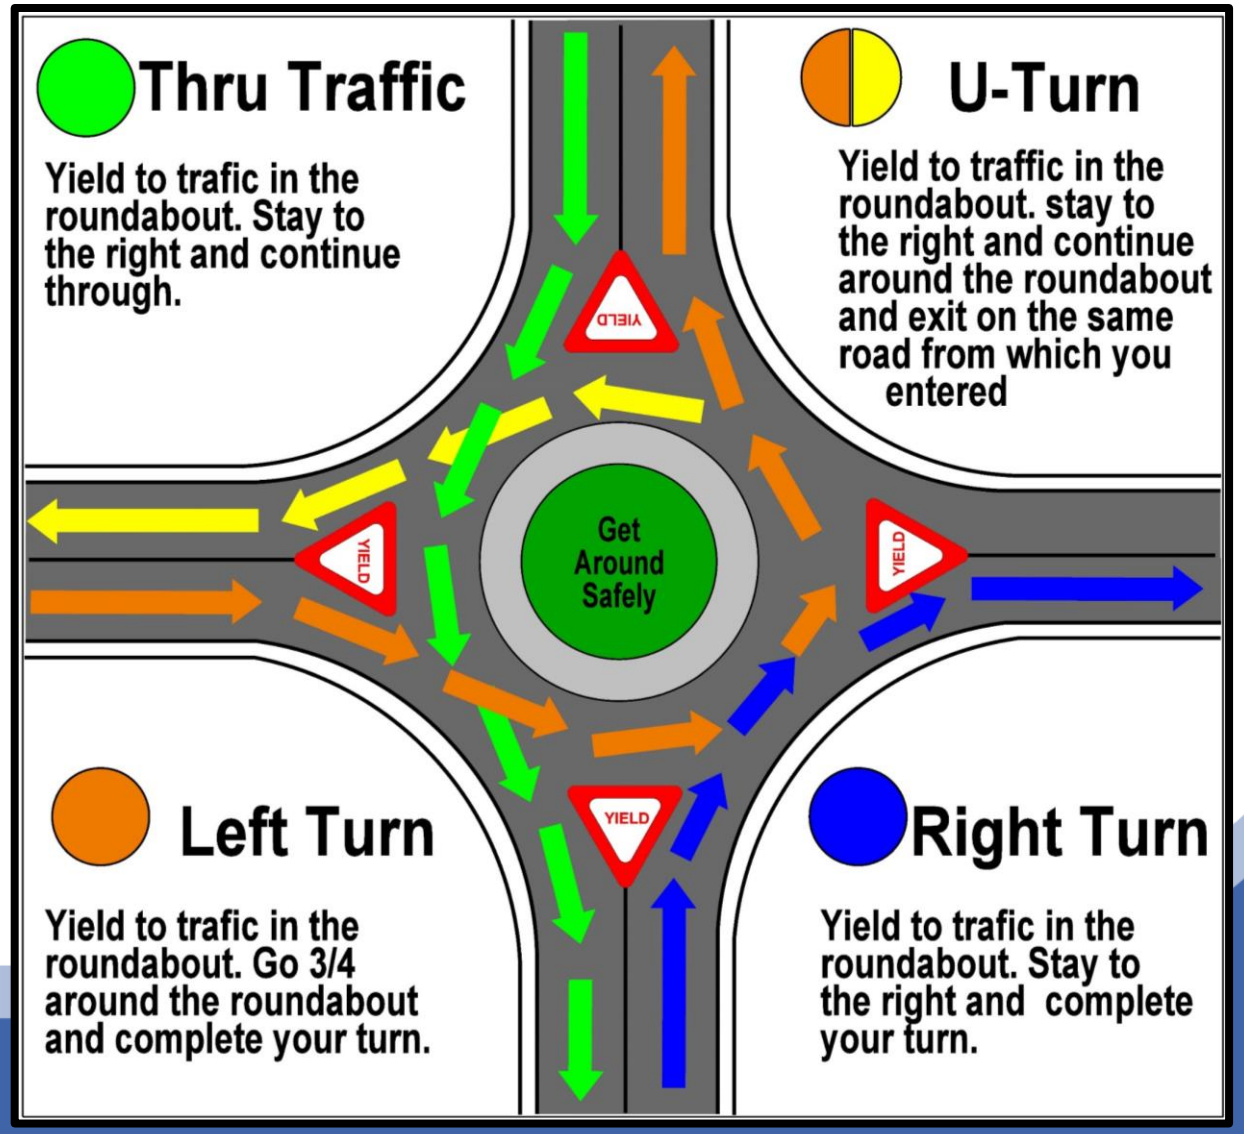

- Roundabouts
  - Designed for Semi Trucks
  - Utilizes Truck Aprons
  - No Signals
  - Fewer Collision Points

Roundabout: Rules of the Road

Vehicles Within the Roundabout Have the Right-of-Way

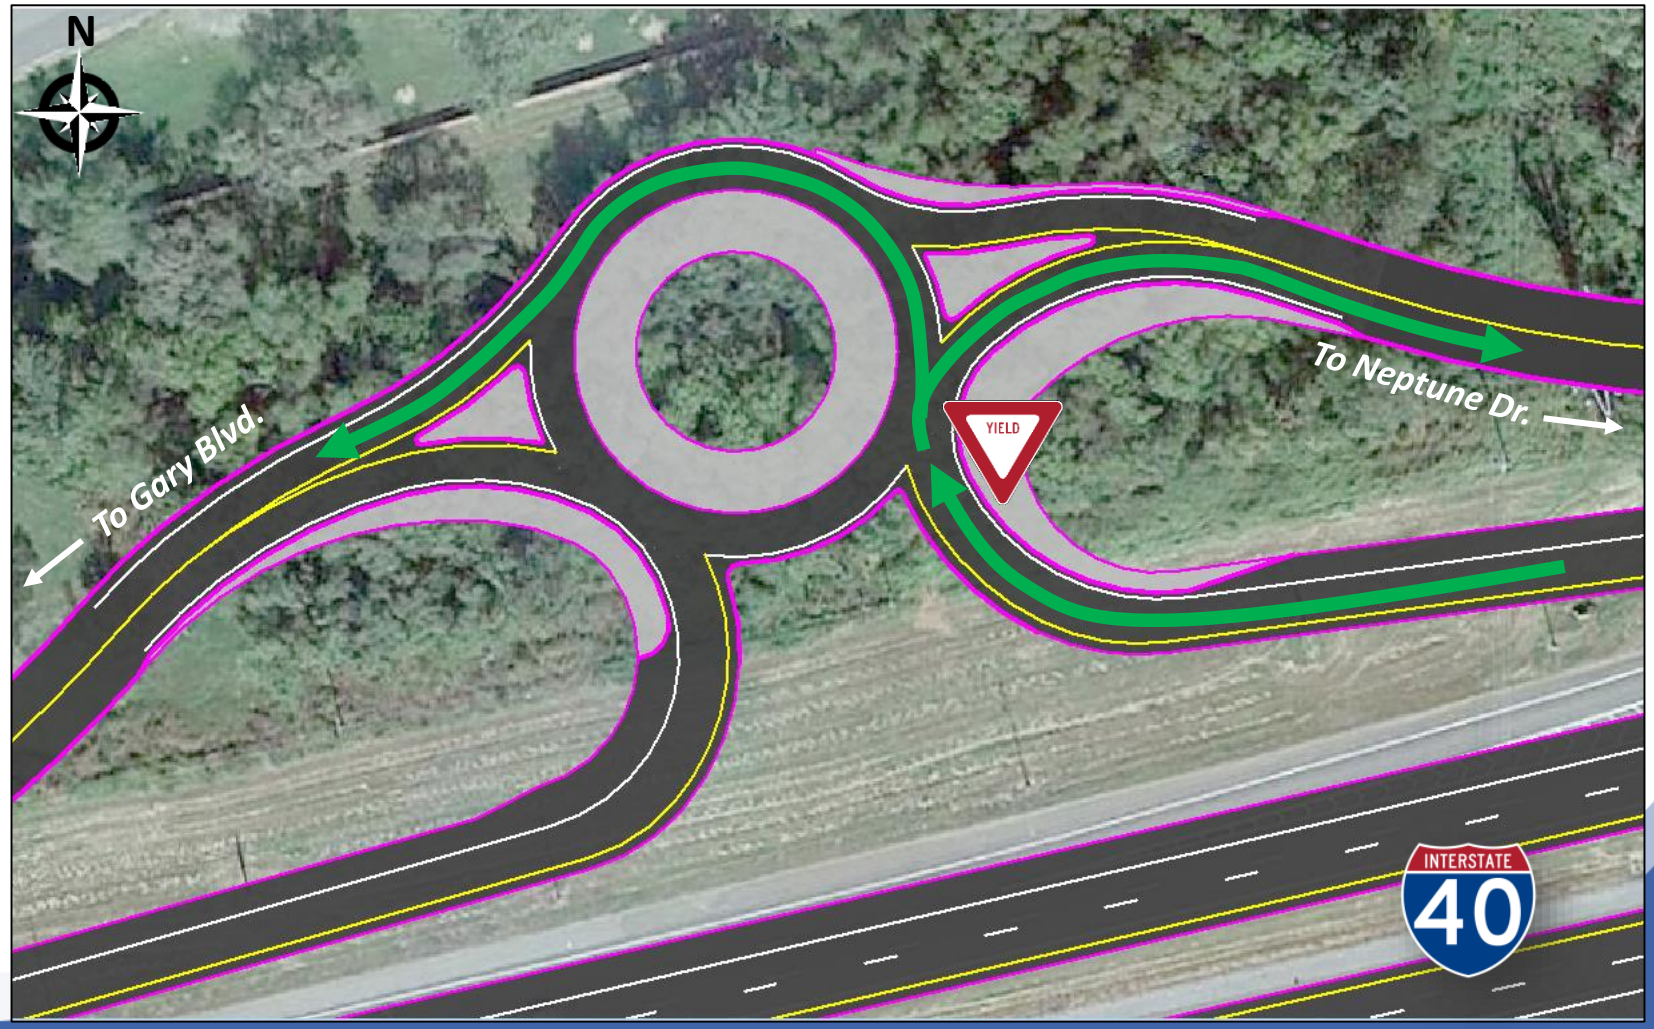

1. As you Approach, Look to the Left to see if any Drivers are Traveling in the Roundabout
2. Once There is an Adequate gap in Traffic, Enter the Roundabout
3. Use Your Turn Signal as you Approach Your Exit
4. If you Miss Your Exit, go Around Again

Maneuver Thru the Roundabout

What are the Impacts?

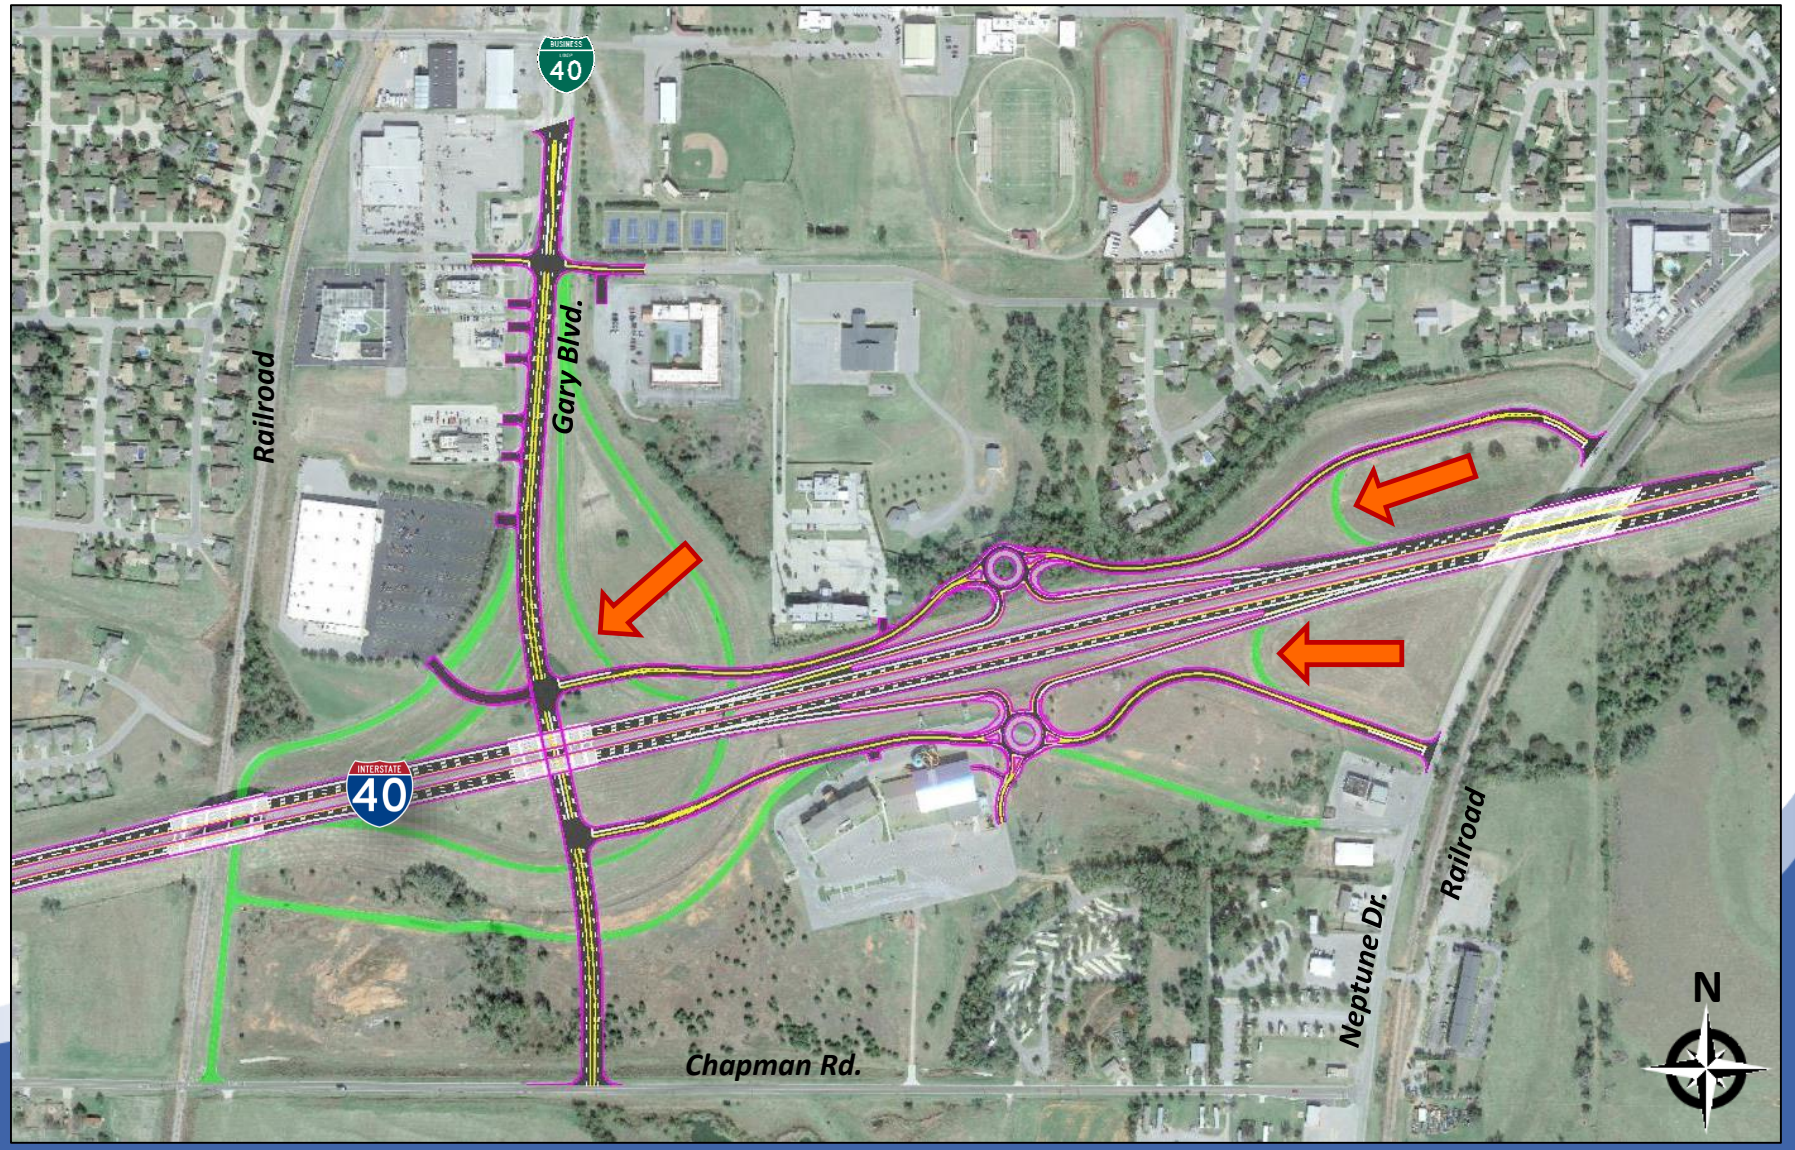

- Construction Cost Estimated at $37.9M
- Purchase of Land (no Relocations Anticipated)
- Potential to Sell Surplus Land

ODOT
Oklahoma Department of Transportation

Maintenance of Traffic During Construction

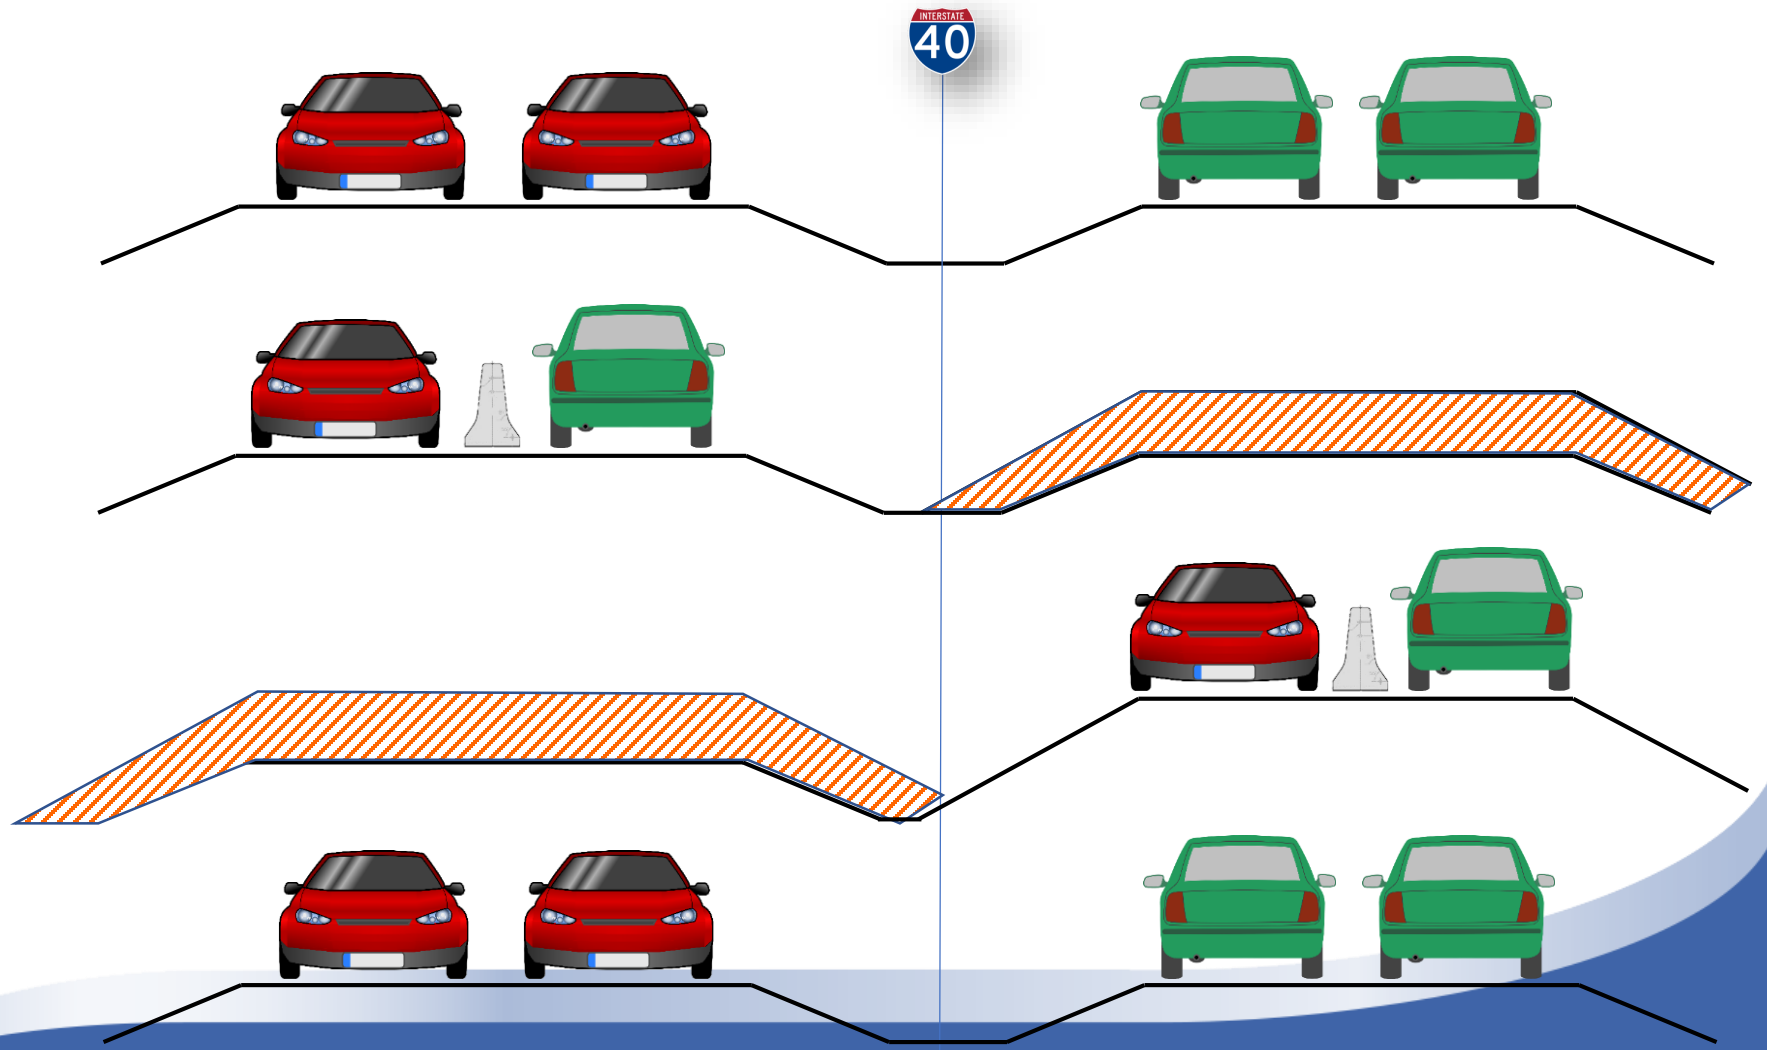

- One Ramp in Each Direction Will Remain Open at Either Gary Blvd. or Neptune Dr.
- A Temporary Ramp Will be Constructed and Used for Travelers Wanting to go East on I-40
- I-40 Traffic Will be Shifted to one Side With one Lane in Each Direction

ODOT
Oklahoma Department of Transportation

Maintenance of Traffic During Construction

- One Ramp in Each Direction Will Remain Open at Either Gary Blvd. or Neptune Dr.
- A Temporary Ramp Will be Constructed and Used for Travelers Wanting to go East on I-40
- I-40 Traffic Will be Shifted to one Side With one Lane in Each Direction

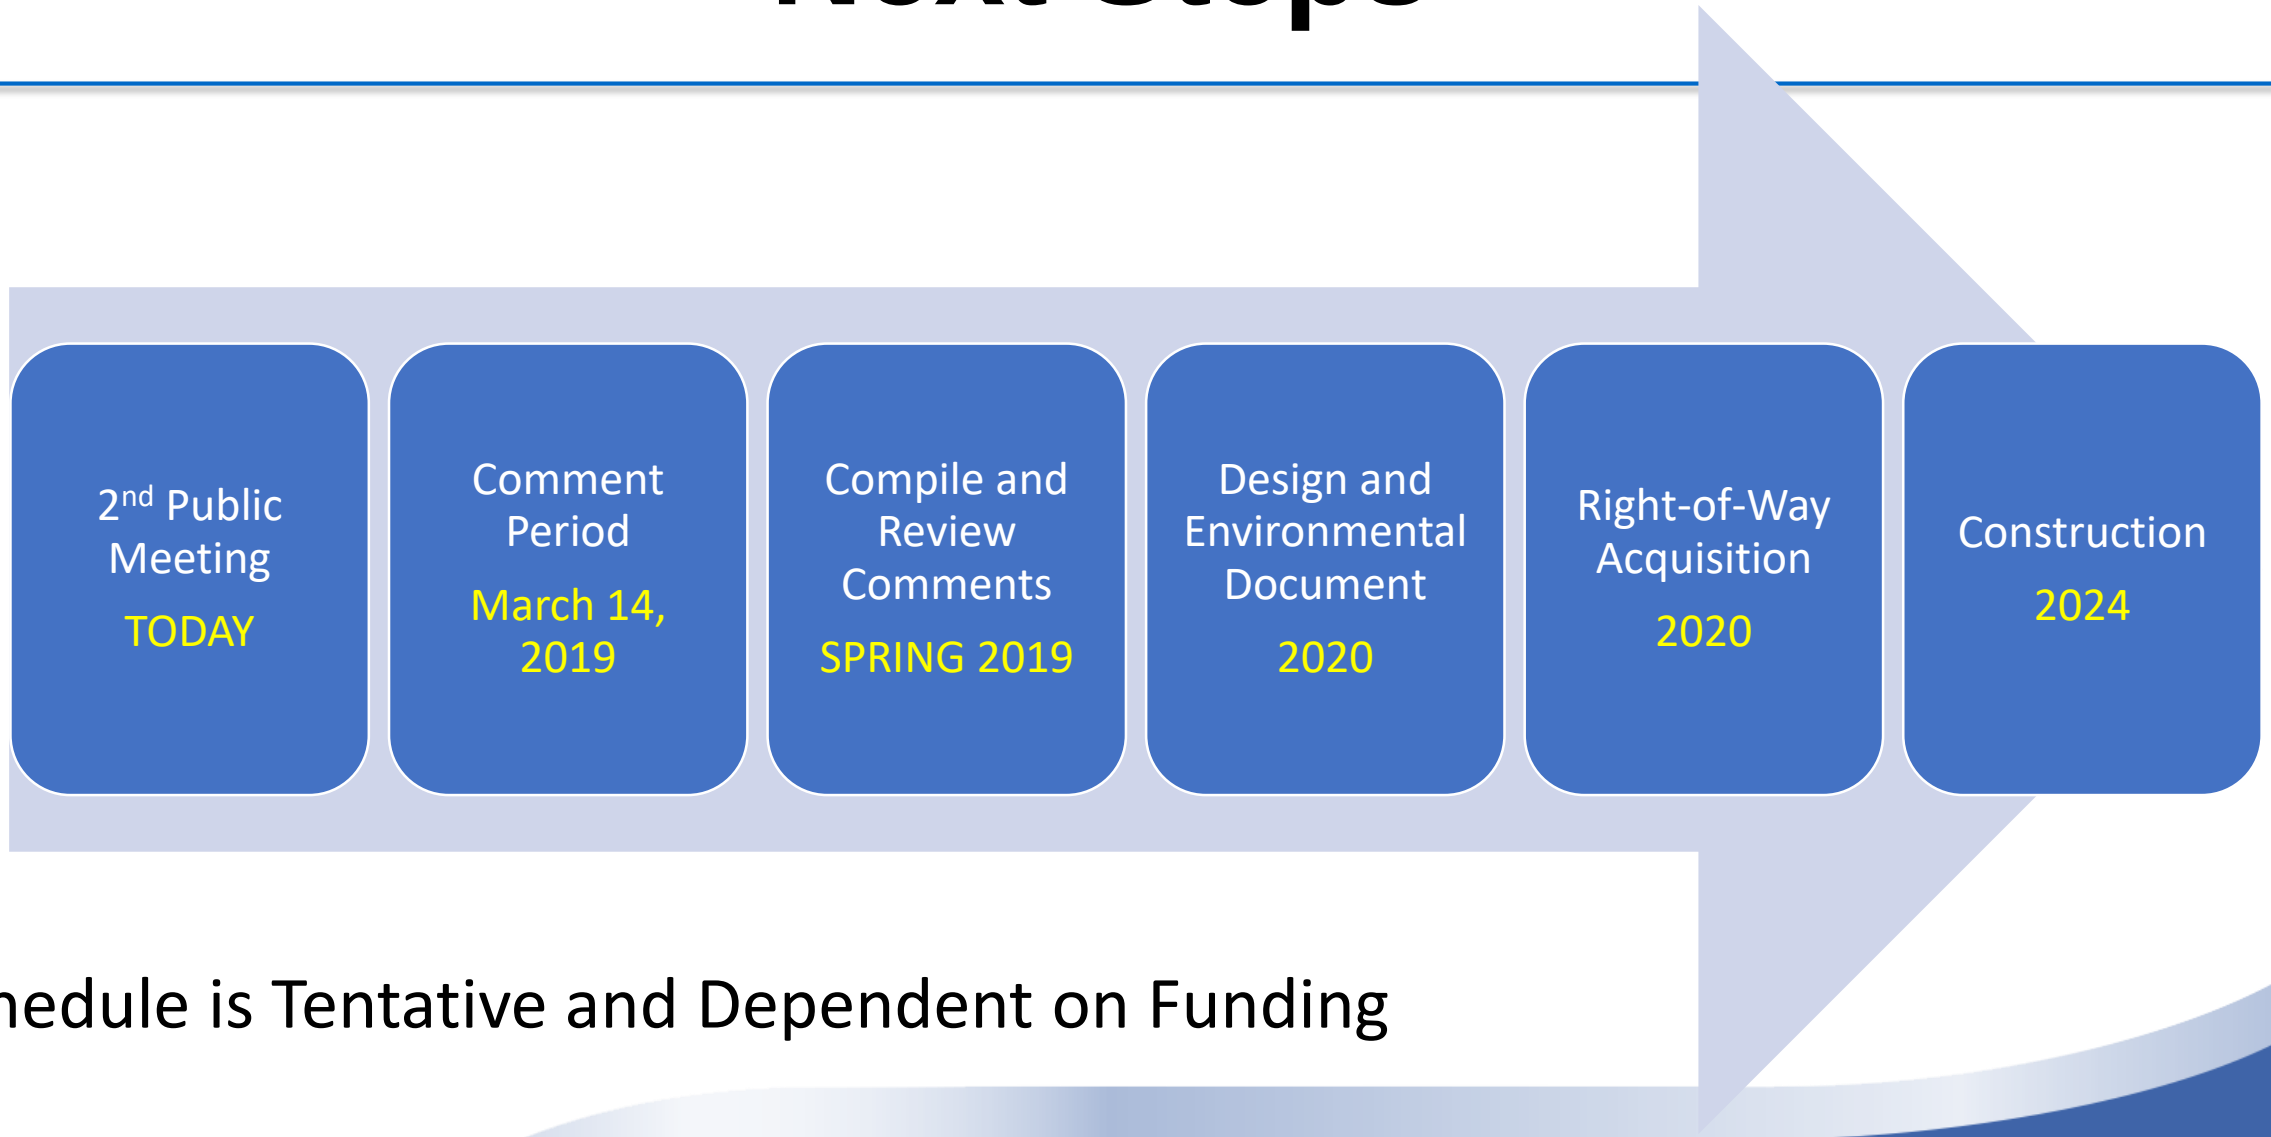

Oklahoma Department of Transportation

Impacts

- Environmental
  - Commercial Properties
    - Minor Changes in Access to Some Properties. No Relocations are Anticipated
  - Community Facilities
    - Some Land may be Required From Church Property
  - Route 66
    - Unlikely to be historically significant
  - Tennis Courts & Trees
    - Potential for Minor Temporary Impacts During Construction. Trees will be Avoided.
  - Small Portion of a Creek may Require Relocation
  - Noise
    - A Noise Study Will be Completed to Determine if There Will be Noise Impacts

Next Steps

Schedule is Tentative and Dependent on Funding

DOT PUBLIC MEETING

Oklahoma Department of Transportation

February 28th, 2019 @ 6:00 P.M

Frisco Conference Center | 101 South 4th Street | Clinton, OK 73601

I-40 Exit 65 (Gary Boulevard) • Custer County, OK • JP: 31482(04)
Presentation of the Selected Alternative

Purpose of Meeting:

To inform the public of the selected alternative for improvements to the I-40/Gary Boulevard and I-40/ Neptune Drive interchanges (Exits 65 and 65A).

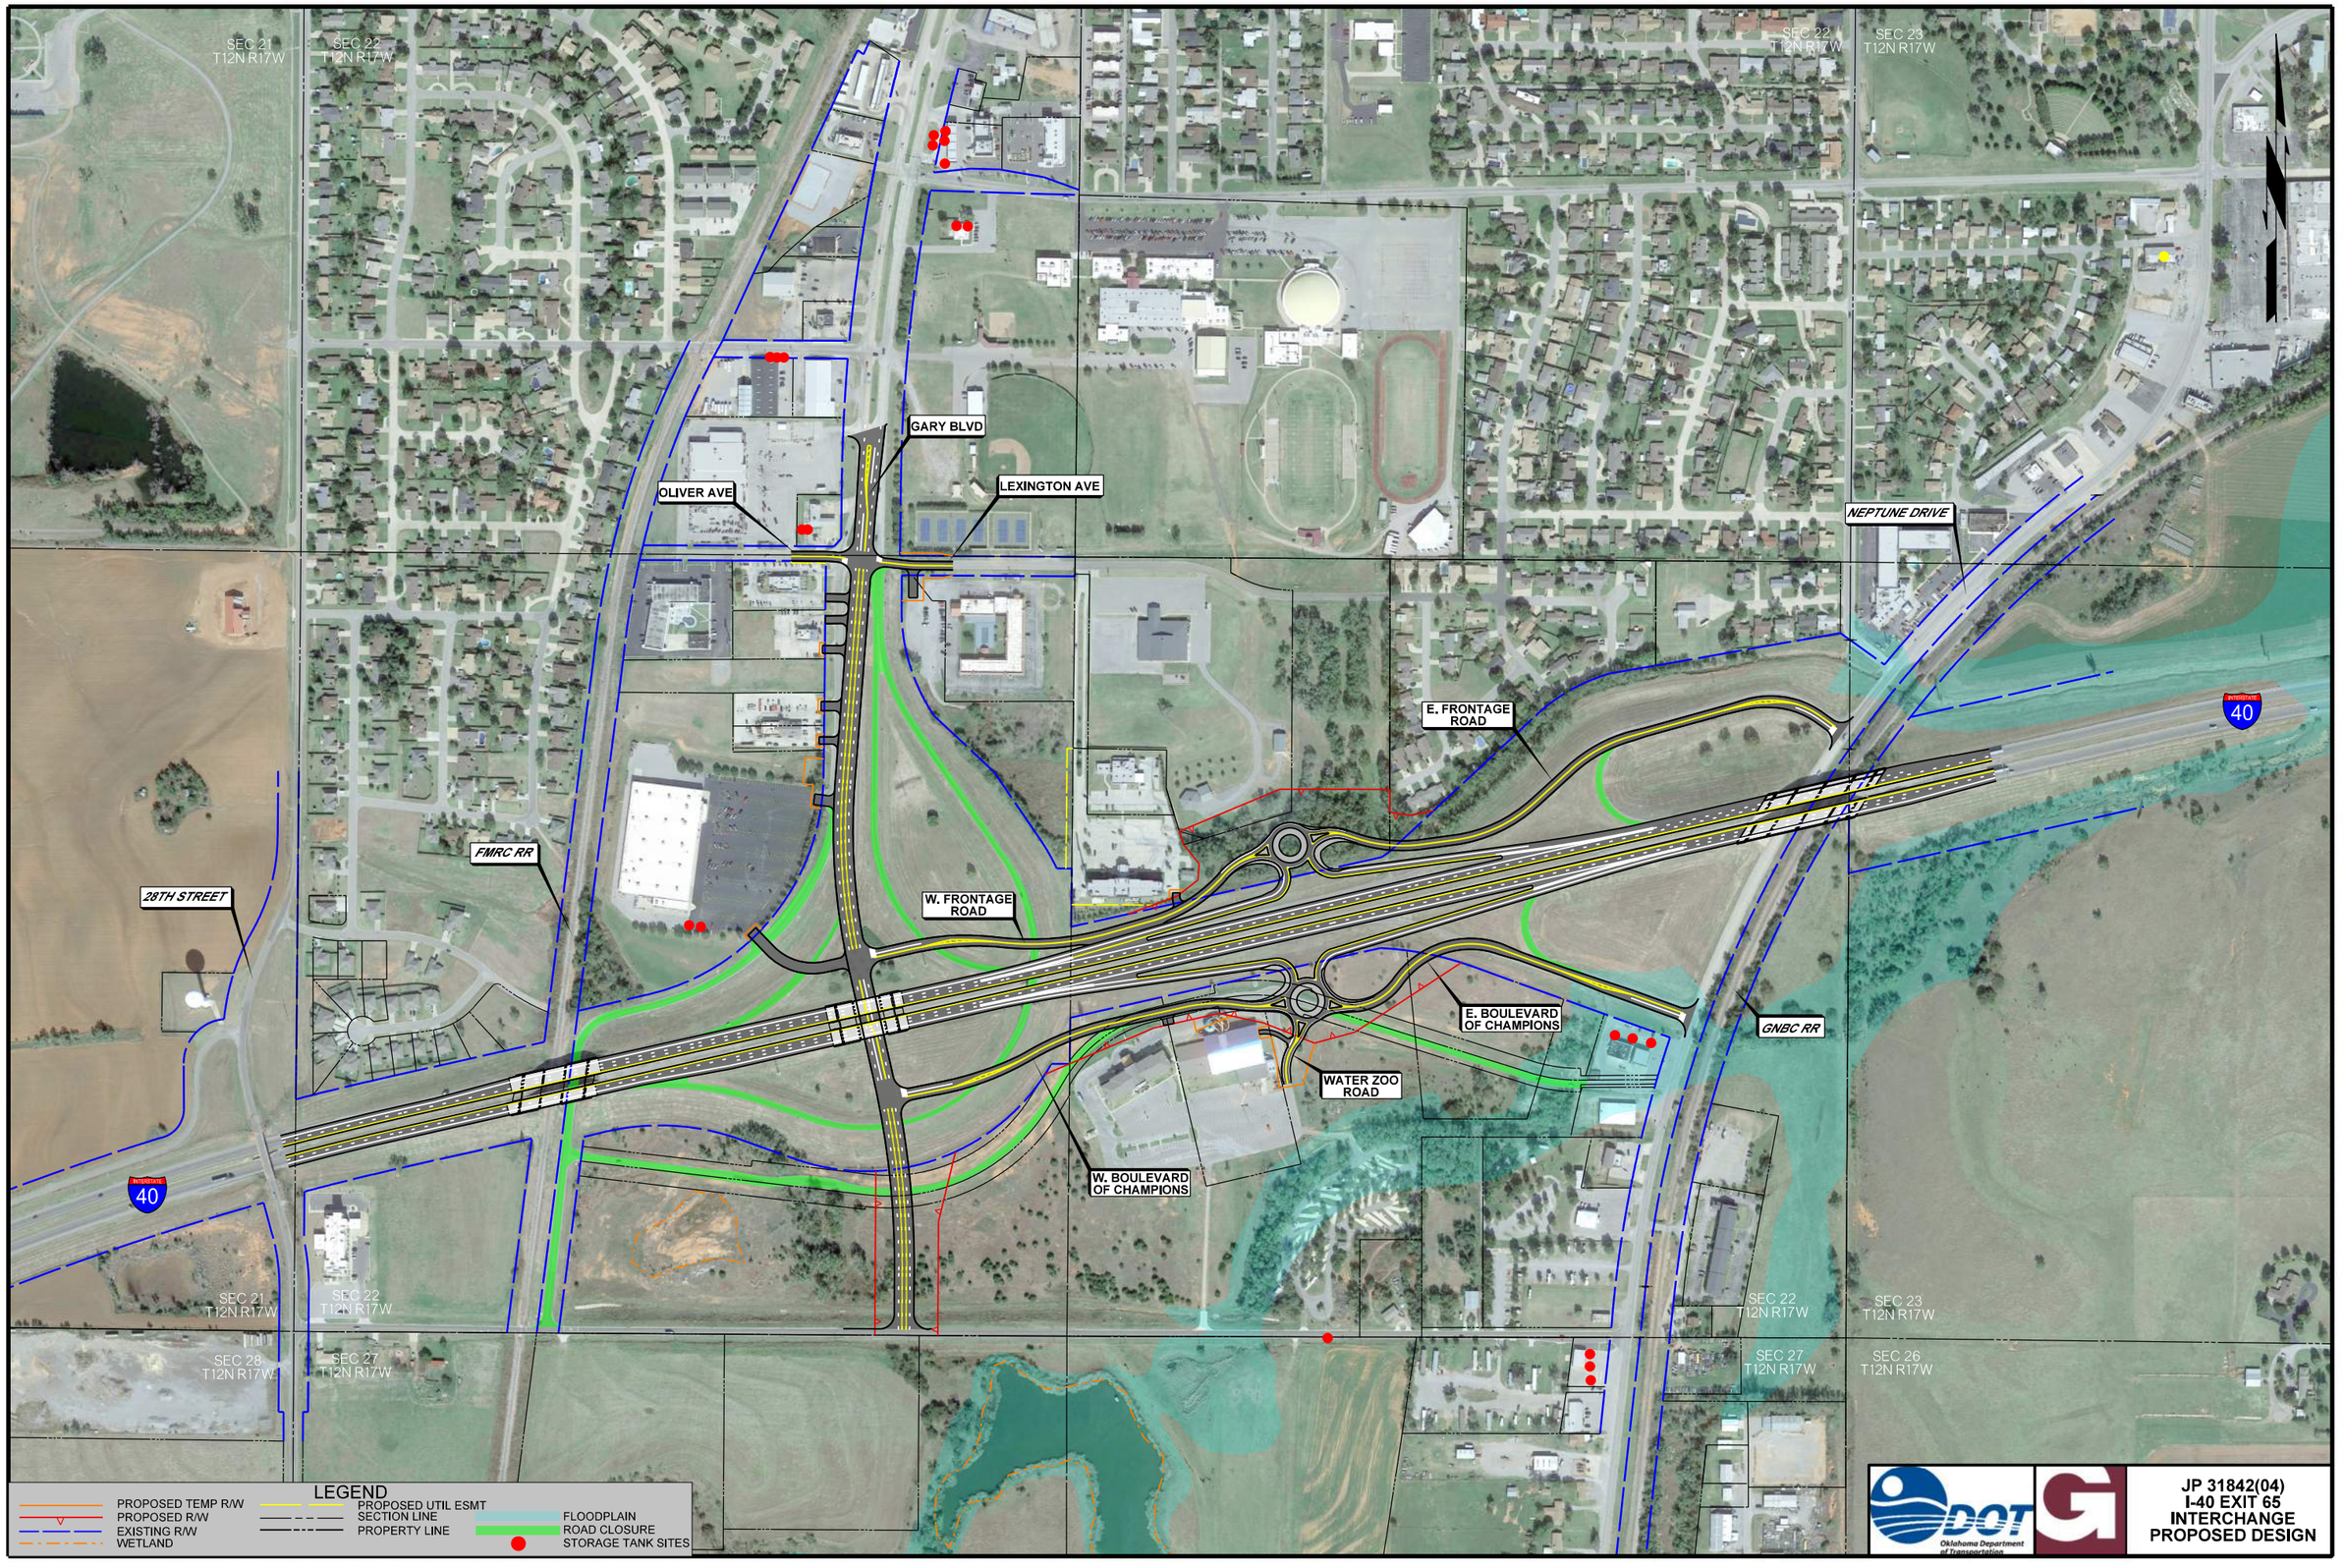

Project Background:

The Oklahoma Department of Transportation (ODOT) completed a study of six initial alternatives and held a public meeting on May 24, 2016 in Clinton to present these concepts and obtain comments. In response to public feedback, ODOT developed two additional alternatives to provide improved mobility on I-40 and improved access for both interstate and local traffic. These alternatives were evaluated taking into consideration construction costs, right-of-way and utility costs, and environmental constraints, which resulted in the selection of an alternative for the corridor. ODOT will present the selected alternative at this second public meeting.

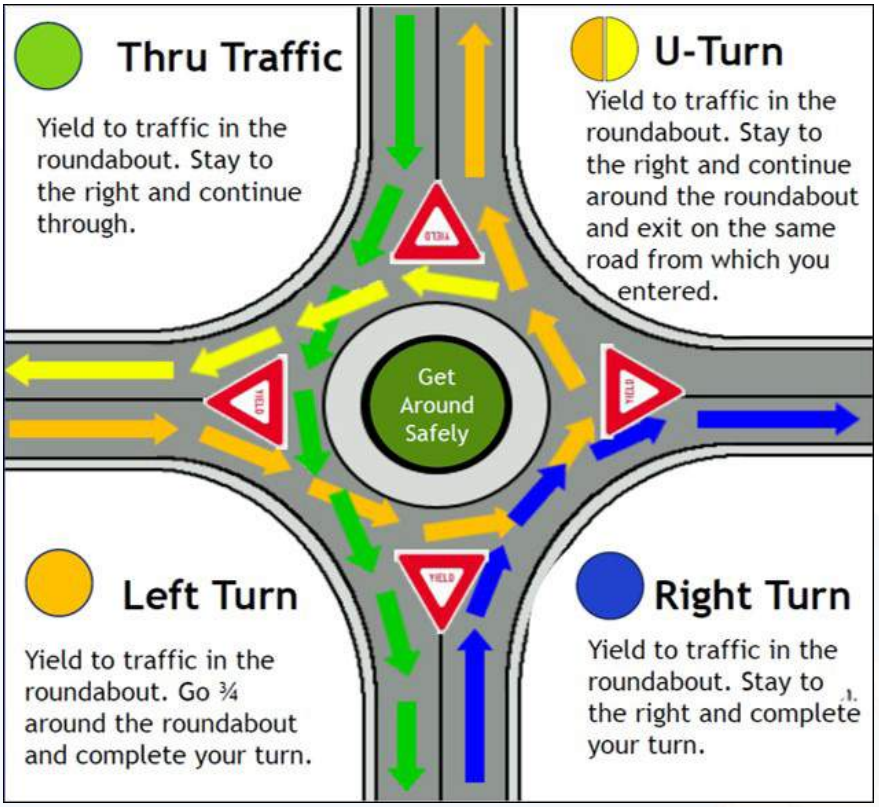

Purpose and Description of Current Project:

The purpose of this project is to improve safety, traffic operations, and improve mobility in the I-40 corridor and to make improvements to adjacent local streets and intersections. The current interchange ramps (Exit 65 – Gary Boulevard and Exit 65A – Neptune Dr.) are close in proximity, contributing to traffic flow issues along Gary Boulevard. Additionally, the City of Clinton is continuing to experience commercial growth, which is anticipated to generate future traffic volumes beyond the capacity of the existing interchange and adjacent intersections. The selected design alternative will consolidate Exit 65 and Exit 65A into one new interchange by utilizing two-way frontage roads with modern roundabouts at each frontage road midpoint. This design will provide access to both directions of I-40 from Gary Boulevard and Neptune Drive. The project will also improve local road traffic operations and access to current and future businesses by extending Gary Boulevard south to Chapman Road and providing businesses with direct access. Red Wheat Drive will no longer be needed and will be removed. The intersection of Gary Boulevard with Oliver Drive/Lexington Avenue will be improved to a more traditional four-leg intersection to reduce driver confusion.

Oklahoma Department of Transportation

DOT REUNIÓN PÚBLICA

28 de febrero de 2019 a las 6:00 p. m.
Frisco Conference Center | 101 South 4th Street | Clinton, OK 73601

I-40 Salida 65 (Gary Boulevard) • Condado de Custer, Oklahoma • JP: 31482(04)
Presentación de la alternativa seleccionada

Propósito de la reunión:

Informar al público sobre la alternativa seleccionada para las mejoras en las intersecciones I-40/Gary Boulevard y I-40/Neptune Drive (Salidas 65 y 65A).

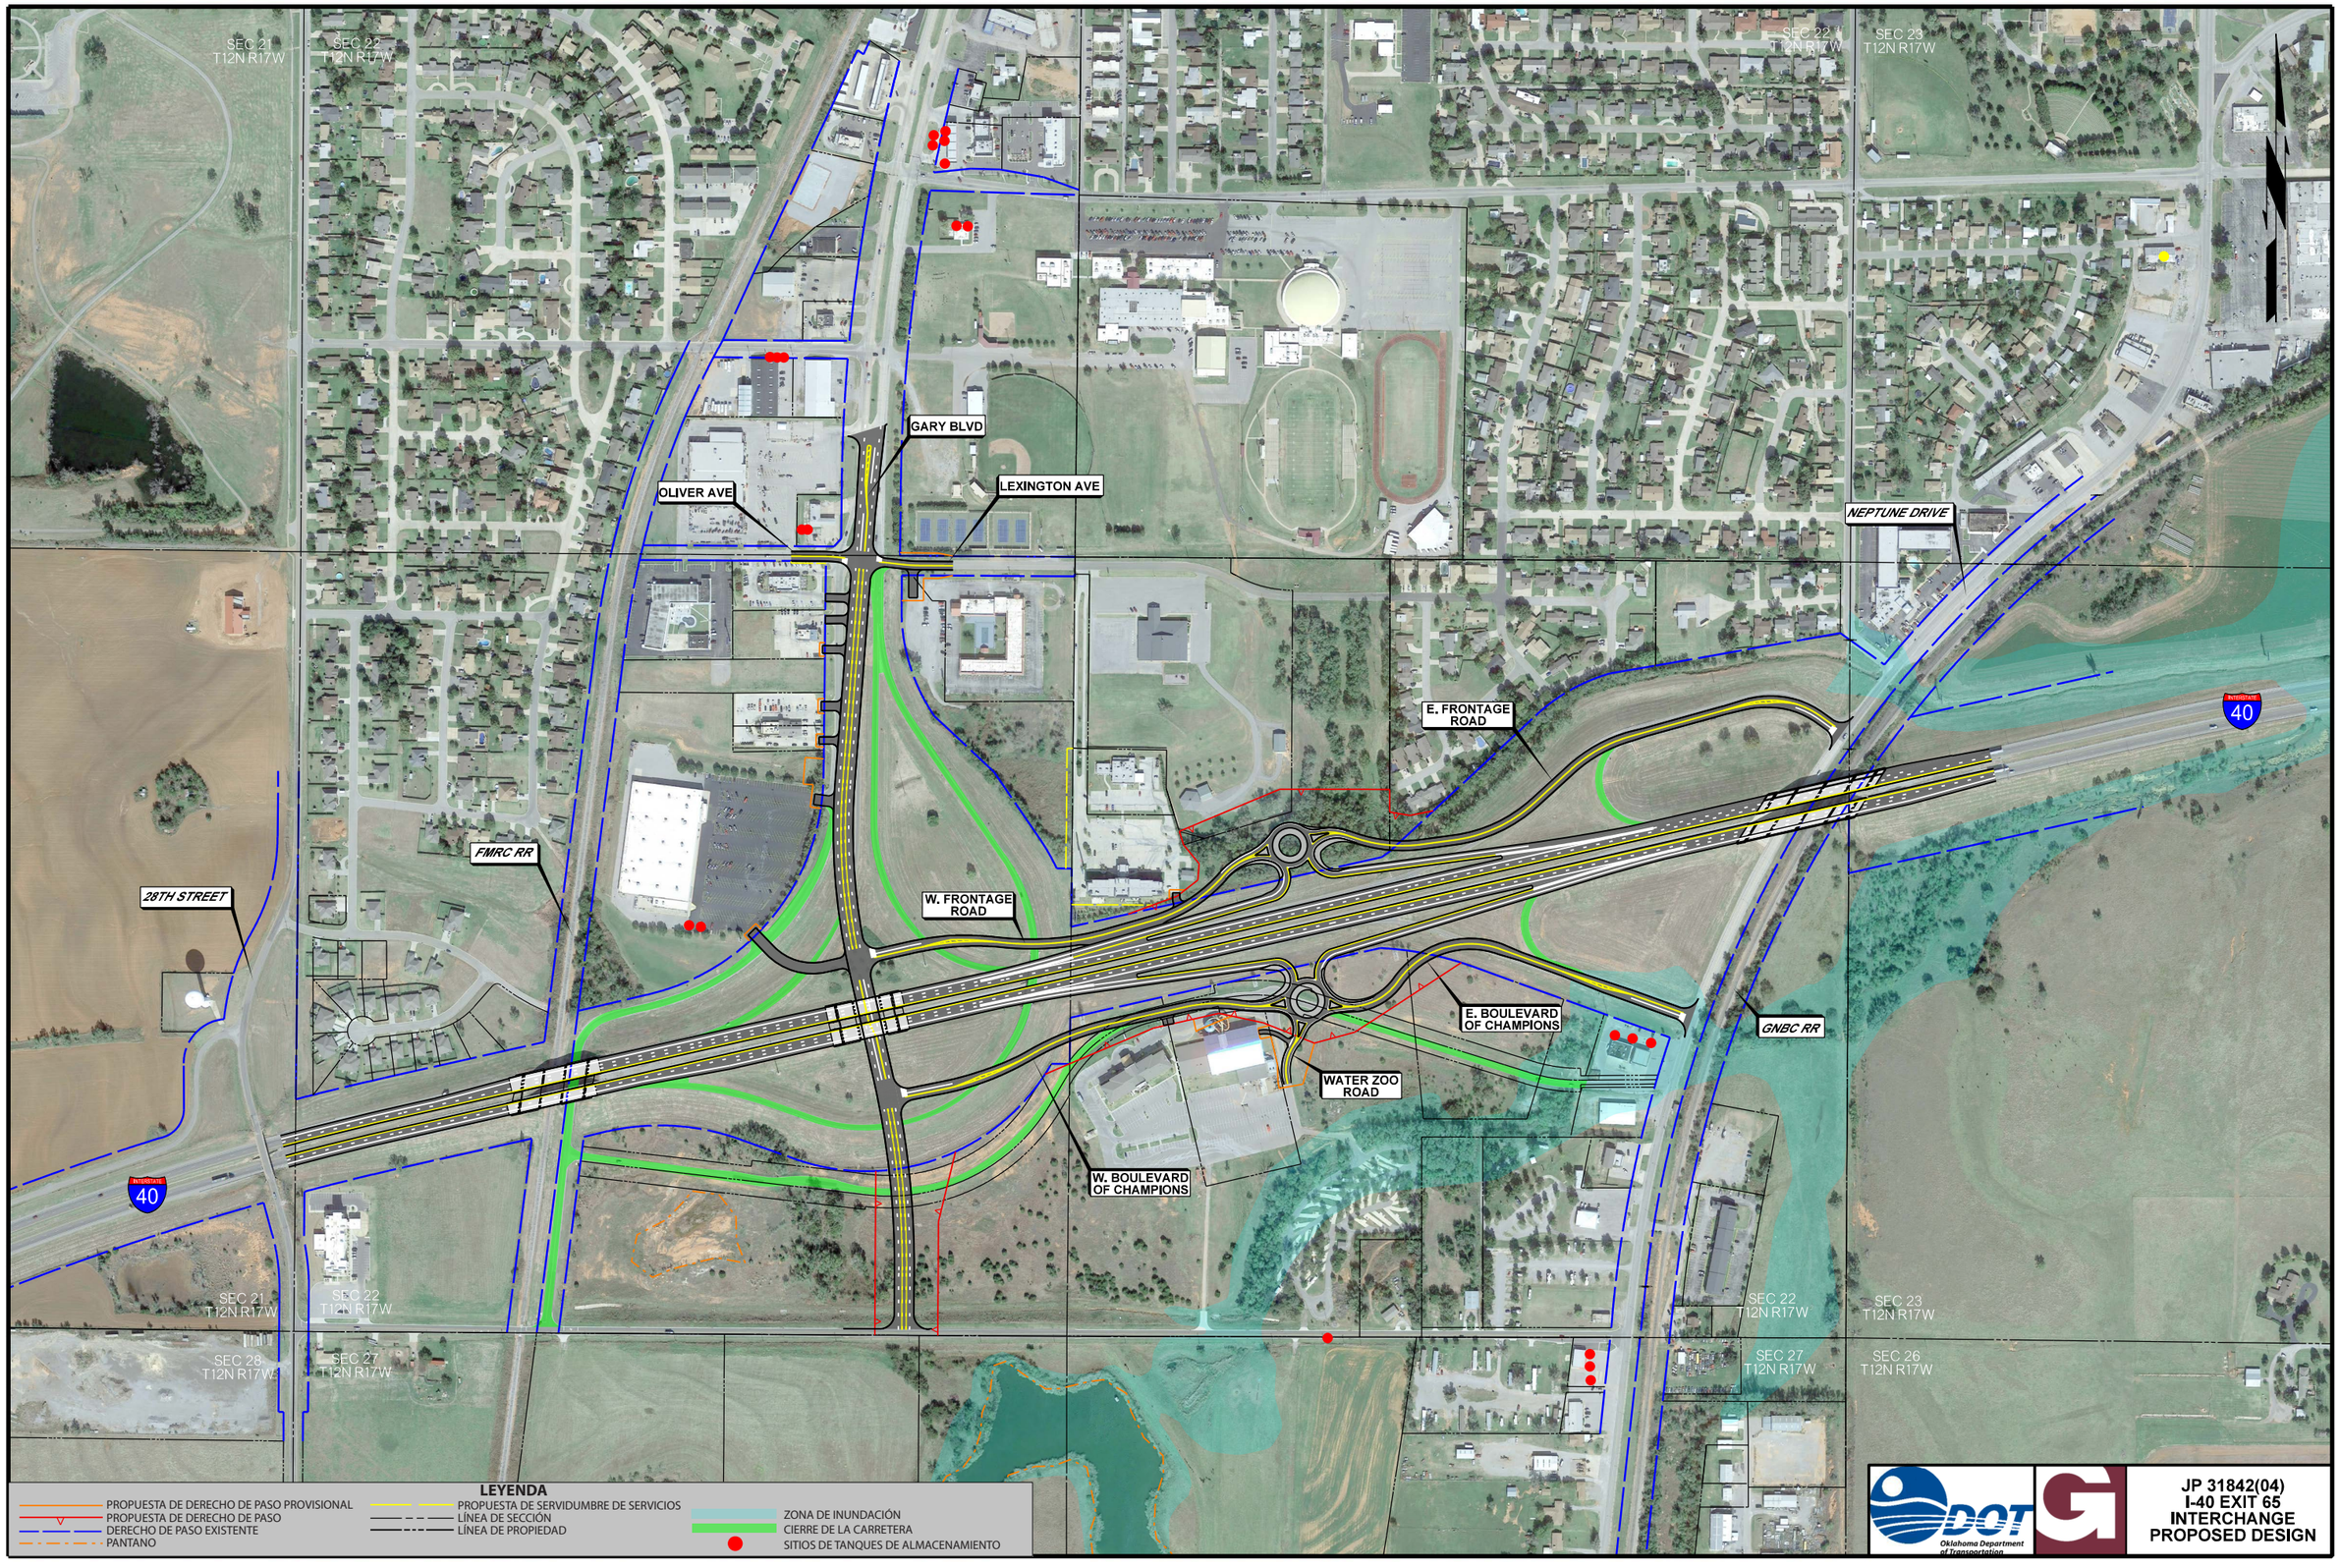

Antecedentes del proyecto:

El Departamento de Transporte de Oklahoma (Oklahoma Department of Transportation, ODOT) completó un estudio de seis alternativas iniciales y llevó a cabo una reunión pública el 24 de mayo de 2016 en Clinton para presentar estos planteamientos y obtener comentarios. En respuesta a los comentarios del público, el ODOT desarrolló dos alternativas adicionales para mayor movilidad en la I-40 y mejor acceso para el tráfico interestatal y local. Se evaluaron estas alternativas con base en los costos de construcción, de derecho de paso y de servicios públicos, así como en las restricciones ambientales, lo que dio como resultado la selección de una alternativa para el corredor. El ODOT presentará la alternativa seleccionada en esta segunda reunión pública.

Propósito y descripción del proyecto actual:

El propósito de este proyecto es mejorar la seguridad, las operaciones de tráfico y la movilidad en el corredor de la I-40 y hacer mejoras en las calles e intersecciones adyacentes. Las actuales rampas de intersección (salida 65 - Gary Boulevard y salida 65A - Neptune Dr.) están muy cerca, lo que se añade a los problemas de flujo de tráfico a lo largo de Gary Boulevard. Además, la ciudad de Clinton sigue experimentando un crecimiento comercial, que se anticipa que puede generar futuros volúmenes de tráfico más allá de la capacidad de la intersección existente y de las adyacentes. La alternativa seleccionada de diseño consolidará la salida 65 y la salida 65A en una nueva intersección mediante la utilización de vías laterales de doble sentido con modernas rotondas en el punto medio de cada vía. Este diseño proporcionará acceso a ambas direcciones de la I-40 desde Gary Boulevard y Neptune Drive. Además, mejorará las operaciones de tráfico local y el acceso a las empresas actuales y futuras mediante la ampliación de Gary Boulevard hacia el sur hasta Chapman Road y el acceso directo a las empresas. La Red Wheat Drive ya no será necesaria y será eliminada. Se mejorará la intersección de Gary Boulevard con Oliver Drive/Lexington Avenue a una intersección más tradicional de cuatro tramos para reducir la confusión del conductor.

November 8, 2007

Safe Roads for a Safer Future
Investment in roadway safety saves lives

Education is key.

Education is vital to the acceptance and success of a roundabout. Navigating a roundabout is easy. But because people can be apprehensive about new things, it's important to educate the public about roundabout use.

There are just a few simple guidelines to remember when driving through a roundabout:

1. Slow down.
2. If there's more than one lane, use the left lane to turn left, the right lane to turn right, and all lanes to go through, unless directed otherwise by signs and pavement markings.
3. Yield to pedestrians and bicyclists.
4. Yield at the entry to circulating traffic.
5. Stay in your lane within the roundabout and use your right-turn signal to indicate your intention to exit.
6. Always assume trucks need all available space — don't pass them!
7. Clear the roundabout to allow emergency vehicles to pass.

Visit **safety.fhwa.dot.gov** to learn more about roundabouts

U.S. Department of Transportation
Federal Highway Administration

Design standards for roundabouts continue to evolve, and not all features of existing roundabouts meet current recommended practice. Please refer to FHWA's web site for recommendations on current design practice.

Original source photo by Lee Rodegerdts. Photo has been altered to illustrate roundabout and updated signage.

Federal Highway Administration

Roundabouts

A Safer Choice

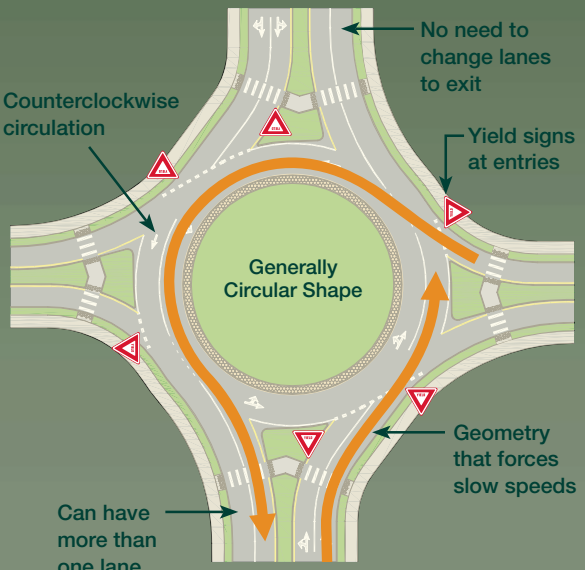

What is a roundabout?

A roundabout is a type of circular intersection with yield control of entering traffic, islands on the approaches, and appropriate roadway curvature to reduce vehicle speeds.

Modern roundabouts are different from rotaries and other traffic circles. For example, roundabouts are typically smaller than the large, high-speed rotaries still in use in some parts of the country. In addition, roundabouts are typically larger than neighborhood traffic circles used to calm traffic.

A roundabout has these characteristics:

Source: *Roundabouts: An Informational Guide*. Federal Highway Administration, Washington, D.C., latest version, except as noted.

Why consider a roundabout?

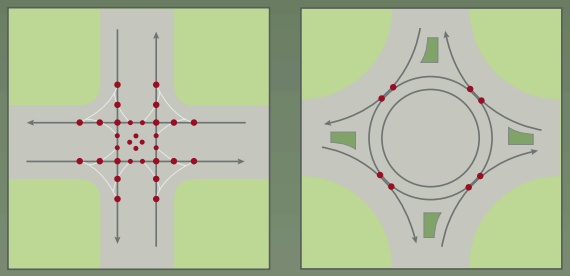

Compared to other types of intersections, roundabouts have demonstrated safety and other benefits.

Roundabouts:

> Improve safety

- More than 90% reduction in fatalities*
- 76% reduction in injuries**
- 35% reduction in all crashes**
- Slower speeds are generally safer for pedestrians

With roundabouts, head-on and high-speed right angle collisions are virtually eliminated.

[Traditional intersection] [Roundabout]

● Potential vehicle conflict point

* "Safety Effect of Roundabout Conversions in the United States: Empirical Bayes Observational Before-After Study." Transportation Research Record 1751, Transportation Research Board (TRB), National Academy of Sciences (NAS), Washington, D.C., 2001.

** NCHRP Report 572: Roundabouts in the United States. National Cooperative Highway Research Program, TRB, NAS, Washington, D.C., 2007.

> Reduce congestion

- Efficient during both peak hours and other times
- Typically less delay

> Reduce pollution and fuel use

- Fewer stops and hard accelerations, less time idling

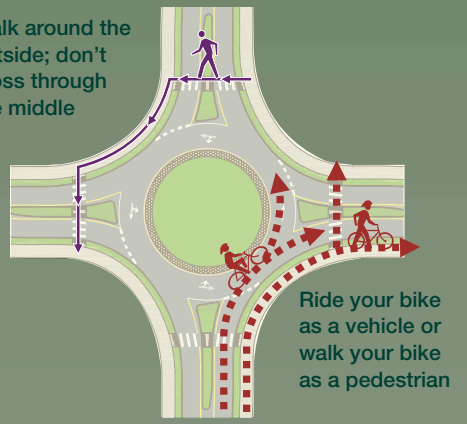

> Save money

- Often no signal equipment to install, power, and maintain
- Smaller roundabouts may require less right-of-way than traditional intersections
- Often less pavement needed

> Complement other common community values

- Quieter operation
- Functional and aesthetically pleasing

Tips for safely walking and biking through a roundabout

Research is ongoing on additional treatments and design considerations to address the needs of visually impaired pedestrians.

FHWA-SA-08-006

"En lo personal me encantan, y le diré por qué. Usted sólo debe hacer detener un carril de tráfico, luego pasar al carril central y esperar. Los vehículos no pueden andar más rápido de 20 millas por hora cuando transitan en la rotonda, de manera que en el aspecto del cruce de peatones es maravilloso."

Denise Haltom
Guardia de cruce escolar, Suamico, Wisconsin
Green Bay Press-Gazette
6 de febrero de 2001

"Muchas personas no se muestran muy contentas con la idea de las rotondas, pero cuando estas son construidas, por lo general sus temores desaparecen."

Brian Walsh
Departamento de Transporte del estado de Washington
Seattle Times
5 de junio de 2002

"Todos sabemos que las personas aceleran para pasar un semáforo en amarillo, pero en la rotonda, todos los vehículos deben disminuir la velocidad. Ahora contamos con aproximadamente 50 rotondas, y tenemos mucho menos lesiones personales y ocurren menos fatalidades."

James Brainard
Alcalde, Ciudad de Carmel, Indiana
www.nbc17.com
8 de noviembre de 2007

Safe Roads for a Safer Future
Investment in roadway safety saves lives

La educación es clave.

La educación es de vital importancia para la aceptación y el éxito de una rotonda. El transitar en una rotonda es fácil, pero debido a que algunas veces la gente puede sentir miedo ante las cosas nuevas es importante educar al público acerca del uso de las rotondas.

Los siguientes son algunos consejos sencillos para recordar cuando se conduce por una rotonda:

1. Desacelerar.
2. Si hay más de un carril, usar el carril izquierdo para girar a la izquierda; el carril derecho para girar a la derecha; y todos los carriles para continuar transitando, a menos que se indique de otro modo mediante señales y marcas en el pavimento.
3. Ceder el paso a los peatones y ciclistas.
4. Ceder el paso a la entrada al tránsito que ya está circulando dentro de la rotonda.
5. Mantenerse en su carril dentro de la rotonda y usar su señal de giro a la derecha para indicar su intención de salir.
6. Asumir siempre que los camiones necesitan todo el espacio disponible; no intente pasarlos.
7. Despejar la rotonda para permitir el paso de los vehículos de emergencia.

Visite el sitio safety.fhwa.dot.gov para obtener más información acerca de las rotondas.

U.S. Department of Transportation
Federal Highway Administration

Las normas de diseño para las rotondas siguen evolucionando, y no todas las características de las rotondas existentes cumplen con las normas recomendadas vigentes. La página de Internet de la FHWA proporciona las recomendaciones sobre las normas de diseño vigentes.

09-0876

Rotondas

Una elección más segura

¿Qué es una rotonda?

Una rotonda es una intersección de tipo circular con control de acceso del tránsito que ingresa a ella, con islas en las aproximaciones y curvaturas apropiadas en la vía para reducir la velocidad de los vehículos.

Las rotondas modernas son diferentes de las glorietas y otras intersecciones rotatorias de tránsito. Por ejemplo, las rotondas son normalmente más pequeñas que las glorietas grandes y de alta velocidad, que todavía se utilizan en algunas partes del país. Además, usualmente, las rotondas son más grandes que las intersecciones rotatorias de tránsito usadas en los vecindarios para disminuir el tránsito.

Una rotonda tiene las siguientes características:

Fuente: Roundabouts: An Informational Guide. Federal Highway Administration, Washington, D.C., última versión, excepto como se indica. Disponible en Inglés solamente.

¿Por qué considerar una rotonda?

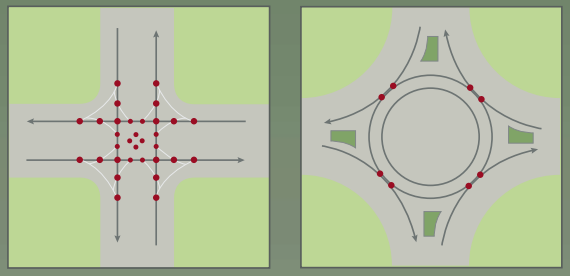

En comparación con otros tipos de intersecciones, las rotondas han demostrado ofrecer seguridad además de otros beneficios.

Las rotondas:

> Mejoran la seguridad

- Reducción de muertes en más del 90%*
- Reducción de lesiones del 76%**
- Reducción de todo tipo de colisión del 35%**
- Las velocidades más bajas generalmente son más seguras para los peatones

Las rotondas prácticamente eliminan las colisiones de frente y de ángulos rectos a gran velocidad.

[Intersección tradicional] [Rotonda]

● Punto potencial de conflicto de vehículos

* "Safety Effect of Roundabout Conversions in the United States: Empirical Bayes Observational Before-After Study." Transportation Research Record 1751, Transportation Research Board (TRB), National Academy of Sciences (NAS), Washington, D.C., 2001. Disponible en Inglés solamente.

** NCHRP Report 572: Roundabouts in the United States. National Cooperative Highway Research Program, TRB, NAS, Washington, D.C., 2007. Disponible en Inglés solamente.

> Reducen la congestión

- Eficacia durante horas de mayor afluencia vial, así como otras horas de menor tráfico
- Generalmente significan menos demoras

> Reducen la contaminación y el gasto de combustible

- Menos paradas y aceleraciones forzadas, menos tiempo en detenimiento

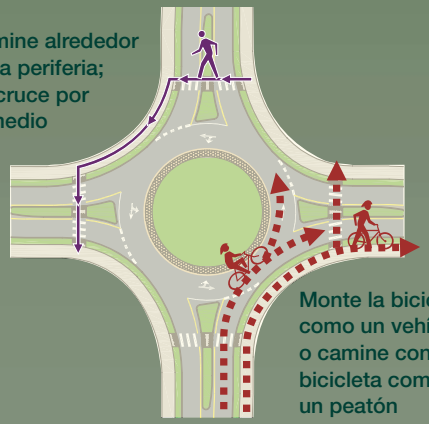

> Ahorran dinero

- Por lo general, no se requiere instalar, accionar y mantener ningún equipo de señalización
- Las rotondas más pequeñas pueden requerir menos situaciones de derechos de paso que las intersecciones tradicionales
- Suelen necesitar menos pavimento

> Complementan otros valores comunes de la comunidad

- Operación más silenciosa
- Son funcionales y estéticamente agradables

Consejos para caminar y andar en bicicleta de forma segura por una rotonda

Se están llevando a cabo investigaciones sobre tratamientos adicionales y consideraciones de diseño para atender las necesidades de los peatones con limitaciones visuales.

Oklahoma City, OK 73105-3204

Dear Mr. Sundaram:

Thank you for extending the opportunity to the Bureau of Land Management (BLM) Oklahoma Field Office to provide comments on the following proposed project:

Custer County
I-40 interchange improvements and intersection modification at Exit 65, I-40B West Jct. in Clinton. Job Piece No. 31842(04).

Our office has reviewed the information provided in your January 24, 2019, letter. A search of our files shows there are no BLM surface lands or Federal minerals within or near the project area. There are no BLM administered Indian mineral interests near or within the project area. Therefore, the BLM has no concerns or objection to the proposal.

Sincerely,

John Ledbetter

Siv Sundaram, P.E.
Environmental Programs Division Engineer
Oklahoma Department of Transportation
200 N. E. 21st Street
Oklahoma City, OK 73105-3204

Dear Ms. Sundaram:

Thank you for the opportunity to comment on the proposed improvements to I-40 between South 28th Street and Neptune Drive, including the I-40 & Gary Boulevard Interchange in the City of Clinton, Custer County, Oklahoma (Project Number: JP 31842[04]. Your description of the project indicates that it is in the early developmental stage and a final plan has yet to be determined.

A review of Bureau of Indian Affairs (BIA) maps of the planned project location indicates that there are tribal or Individual Indian trust lands within the project area. The BIA has jurisdiction within the project area and there are concerns that the proposed improvements will impact Indian trust lands within the jurisdiction of the Southern Plains Region. This office would like clarification and consultation as to what improvements will be made once the design is finalized.

It is recommended that you contact the Cheyenne and Arapaho Tribes as they have historic ties to the area and should be consulted to address concerns that they might have regarding the potential for this project to impact sites of importance to their respective histories or cultural traditions.

If any additional information is required, please contact David Anderson, Regional Environmental Scientist, Southern Plains Region, Bureau of Indian Affairs, at (405) 247-1532.

Sincerely,

Regional Director

RE: JP# 31842(04)

On behalf of the Tribal Historic Preservation Office of the Cheyenne and Arapaho Tribes, thank you for the notice of the referenced project. I have reviewed your Consultation request under Section 106 of the National Historic Preservation Act regarding the project proposal and have commented as follows.

At this time, it is determined to be categorized as **No Adverse Effect;** However, if at any time during the project implementation should any change orders occur which would affect the current APE, or if inadvertent discoveries are made that reflect **additional** evidence of traditional cultural properties (TCP) such as: ceremonial or celebration objects, stone rings, villages, burial mounds, battlefield artifacts, or human remains please cease work immediately, in area of discovery and notify the Cheyenne Arapaho THPO Office within 72 hours.

Also, if inadvertent discoveries are made; pursuant to Title 36 Code of Federal Regulation Part 800.13, as amended; you will also be required to make arrangements for a professional archaeologist to visit the site of discovery and assess the potential significance of any artifacts or features that were unearth. If human remains are discovered State and Tribal NAGPRA representatives will be contacted and protocols will be executed.

Please contact me with the THPO ID number at (405) 422-7482 or chrednose@c-a-tribes.org, if you have any questions or concerns. Thank you again for your notification!

Best Regards,

Christopher Rednose

>
> There is a Land and Water Conservation park that would be adversely impacted by widening and decreasing the buffer and landscape on the margin of the tennis courts at Gary Blvd. The grass and trees provide a pleasant landscape at this entrance to the school and the shopping and eating opportunities in Clinton Oklahoma. In general, western Oklahoma is an area of prairie landscape, with trees only along the creeks and rivers. However, the existing trees along Gary Boulevard add a sense of established settlement and sense of place to Clinton. If there was damage by a wildfire or ice storm, the area would be rebuilt, and landscaping would be counted as a damage. Therefore, road expansion causing damage and eventual replacement would be a cost to the sense of continuity. It would be a cost to replace and rebuild.
>
> With regard to the active recreation resource provided by the tennis courts, the cost to students' opportunities to participate in this sport, as well as adults in this sport would be diminished and there would be more noise from traffic if the buffer were decreased. If any school or city land not designated as highway or street right of way is taken, it must be replaced and the costs absorbed by the city. The City must notify us of their intentions to address the conversion of use and work with us to resolve the differences. The land used to replace any parkland taken cannot be currently designated as park land use. This process is complicated and costly. It diminishes opportunities for other recreational projects to make progress. Information is available on the web on the National Park Service website under the Land and Water Conservation Fund program. The following is a picture of the area in question as well as the area designated on the map included with your letter dated January 24, 2019.

Subject: Environmental Impact Review

Dear Ms. Sundaram:

In response to your request, we have completed an environmental review of air, land and water records for the project listed below. Additional recommendations to consider may be found at https://go.usa.gov/xnhCE.

Project
Letter dated January 24, 2019 – I-40 Exit 65 Interchange Improvements, Clinton, Custer County, OK

Comment
While no environmental concerns under DEQ jurisdiction are anticipated, please be aware of the following regulatory requirements.

Prior to beginning any construction activity disturbing more than one acre, you must submit an NOI and obtain authorization under OKR10, construction stormwater.

Future requests may be submitted electronically to EnvReviews@deq.ok.gov by attaching a single pdf file containing your request and any attachments.

Thank you for the opportunity to provide our comments. If you have any questions or need clarification, please contact me.

Regards,

Siv Sundaram, P.E.
Environmental Programs Division Engineer
Oklahoma Department of Transportation
200 Northeast 21st Street
Oklahoma City, OK 73105-3204

Re: Solicitation for Input Regarding I-40 Interchange Improvements and Intersection Modification at Exit 65, I-40B West Jct. in Clinton, Custer County, Oklahoma, JP 31842(04)

Dear Ms. Sundaram,

This is in reference to your January 24, 2019 letter concerning the changes to the I-40 interchange improvements, and intersection modification at Exit 65, in the town of Clinton. The Commission would like to draw your attention to the CFR Title 14 Part 77.13, which states that any person/organization who intends to sponsor any of the following construction or alterations must notify the Administrator of the FAA:

- any construction or alteration exceeding 200 ft above ground level
- any construction or alteration:
  - within 20,000 ft of a public use or military airport which exceeds a 100:1 surface from any point on the runway of each airport with at least one runway more than 3,200 ft
  - within 10,000 ft of a public use or military airport which exceeds a 50:1 surface from any point on the runway of each airport with its longest runway no more than 3,200 ft
  - within 5,000 ft of a public use heliport which exceeds a 25:1 surface
- any highway, railroad or other traverse way whose prescribed adjusted height would exceed the above noted standards
- when requested by the FAA
- any construction or alteration located on a public use airport or heliport regardless of height or location

Based on the limited information provided in your letter and our cursory review, the potential project **does not** appear to pose a hazard to the safe and efficient use of

110 N. Robinson Ave., Suite 200 • Oklahoma City, OK 73102 • (405) 604-6900 (405) 604-6919 Fax

navigable airspace. However, sometimes the most critical items affecting navigable airspace can be construction equipment (cranes, etc.), light poles and fixtures. Because of this, the Commission recommends that you use FAA's notice criteria tool (at the web address given below) to determine if a 7460-1 form needs to be filed with the FAA.

https://oeaaa.faa.gov/oeaaa/external/gisTools/gisAction.jsp?action=showNoNoticeRequiredToolForm

If a 7460-1 form is required for any permanent structure with this project please inform the Commission as soon as possible. You could be required to file a tall structure permit, under the rules of the Aircraft Pilot and Passenger Protection Act, with the Commission. Should you have any questions in the matter, please do not hesitate to contact me at ctaber@oac.ok.gov or (405) 604-6910.

Sincerely,

Catherine Taber

RE: File #0885-19; I-40 Interchange Proposed Improvements Project, #JP-31842(04), Clinton, Custer County, Oklahoma

Dear Ms. Sundaram:

On February 7, 2019, we received your solicitation for input concerning the referenced project with your letter dated January 24, 2019. It is our understanding that the project is in its design review stage and that the preferred alternative has not yet been formalized. Upon review of the documentation provided, the preferred alternative involves improvements to I-40 between South 28th Street and Neptune Drive, including the I-40 and Gary Boulevard interchange (Exit 65) in the City of Clinton.

According to our files, the roadbed for Route 66 has been documented along Gary Boulevard, exit 65 and Neptune Drive. Below is a link to the Route 66 Roadbed thematic study that is available online. Page 28, item numbers 89, 90, and 91 provide a description of the roadbed in Clinton, and on Pages 83 and 84 maps are provided that depict the roadbed location in relation to the proposed project area.

Oklahoma Route 66 Roadbed Documentation Project (1926-1970) and A Survey of Roadbed and Integral Structures (2001-2002): https://www.okhistory.org/shpo/thematic/rt66roadbed.pdf

You or your representative are welcome to review the hard copy files for the thematic study in our office, and you should contact Sara Werneke, Historic Preservation Specialist, at 405/522-4478 to schedule an appointment for this purpose.

Should consultation on your project pursuant to Section 106 of the National Historic Preservation Act become necessary, it is our understanding that the Oklahoma Department of Transportation as delegated by the U.S. Department of Transportation, Federal Highway Administration, will formally initiate that process with our office.

If you have any questions, please do not hesitate to contact Catharine M. Wood, Historical Archaeologist, at (405) 521-6381. Thank you.

Sincerely,

Lynda Ozan

RE: OAS FY19-0982 ODOT Proposes Improvements to I-40 Interchange, Intersection Modification at Exit 65, Clinton.
JP 31842(04).
Legal Description: S ½ of Section 22, T12N, R17W, Custer County, Oklahoma.

Dear Environmental Programs Division Engineer:

The Community Assistance Program staff of the Oklahoma Archeological Survey has received the above referenced project in order to identify area that may potentially contain prehistoric or historic archeological materials (historic properties). The location of your project has been crosschecked with the state site files containing approximately 26,500 archaeological sites, which are currently recorded for the state of Oklahoma. **No sites are listed in your project area, but based on the topographic and hydrologic setting of your project, archeological materials are likely to be encountered. An archaeological field inspection is considered necessary prior to project construction in order to identify significant archaeological resources that may exist in the project area.** This review has been conducted in cooperation with the Oklahoma SHPO. Please contact this office at (405) 325-7211 for additional information.

This environmental review and evaluation is done in cooperation with the State Historic Preservation Office, Oklahoma Historical Society. The responsible federal agency or their official delegate must also have a letter from that office to document consultation pursuant to Section 106 of the National Historic Preservation Act.

In addition to our review comments, under 36CFR Part 800.3 you are reminded of your responsibility to consult with the appropriate Native American tribe/groups to identify any concerns they may have pertaining to this undertaking and potential impacts to properties of traditional and/or ceremonial value.

Sincerely,

Alexandra S. Flores
Staff Archaeologist

RESOLUTION 889

A RESOLUTION OF DISSENT, REGARDING PLANS PROPOSED AT THE FEBRUARY 28, 2019 OKLAHOMA DEPARTMENT OF TRANSPORTATION PUBLIC MEETING FOR INTERCHANGE AND INTERSECTION MODIFICATION

WHEREAS, THE City of Clinton is in complete support and advocates for the modification and modernization of I-40 relating to Exit 65 and the work necessary to keep Exit 65A open and viable ("the Project");

WHEREAS, the staff of Division 5 of the Oklahoma Department of Transportation (ODOT) have diligently worked and considered options, which have been presented to the citizens of Clinton;

WHEREAS, on Thursday, May 24, 2016, the staff of Division 5 of ODOT presented the citizens of Clinton with five construction concepts to modernize Exit 65 as well as concepts to keep Exit 65A open;

WHEREAS, The citizens of Clinton were asked to make comments on the five concepts at the meeting, which would be evaluated by ODOT; and

WHEREAS, the Citizens were told that one of the five concepts would be chosen after consideration of the public comments;

WHEREAS, on Thursday, February 28, 2019 ODOT presented a Project proposal to the citizens of Clinton which differed from the five concepts presented to and commented on by Clinton citizens in 2016; and

WHEREAS, after discussion with the citizens and business owners the City of Clinton does not believe that the Project plans presented on February 28, 2019, resemble any of the five concepts presented in 2016 and is not in the best interest of the citizens of Clinton.

NOW, THEREFORE, be it resolved by the City Council of the City of Clinton:

1. The Council believes that the Project plans should be consistent with the concepts presented in 2016; and

2. The Council appreciates the ongoing work of the staff of Division 5 of ODOT and believes that the City and ODOT can work together in concert to identify the best plan among the original five concepts that adequately modernizes Exit 65 and keeps Exit 65A open.

Passed and approved the 14th day of March, 2019.

DAVID BERRONG, MAYOR

ATTEST:

LISA ANDERS, CITY CLERK

"I have the following comment(s) or question(s) about the proposed project to improve the I-40 Exit 65 Interchange at Gary Boulevard in Clinton, Custer County, OK."

Please consider any reasonable alternative to this option 7 that would keep 65 & 65A. I understand the safety issues with both exits but it is a concern that commerce might suffer on Gary Blvd because of this attempt to split the Gary "U" with turnabouts in middle of two exits. I have spoken to commercial development experts that have questioned economic impact on Gary Blvd properties south.

March 20, 2019

Brian,

Thank you for showing interest in our Exit 65/Gary Blvd I-40 design project. We are used to having excellent leadership at the head of Division 5 in Engineer Brent Almquist, and welcome your interest as Chief Engineer for ODOT.

Focusing on our latest phone conversation, we stand ready to work with ODOT where appropriate in developing the final design and project specs for our long awaited modernization of Exit 65/Gary Blvd I-40 along with continued access to Exit 65A/Neptune Park.

The presentation to Clinton citizens and business owners by ODOT in May of 2016, was received well with the general anticipation, based on ODOT communication, that the final project design would come from one of the Poe design concepts which was followed by the assumption that Poe and Associates would see the project through, working with ODOT.

Your stated commitment to re-examining the project after carefully reviewing citizen input from the private, business and governmental sector is positively noted; we stand ready to input from the governmental sector where helpful.

Our Resolution of Dissent was clear in praising the professionalism and intent of ODOT and our desire to refocus on the concepts developed by Poe and Associates which seemed to highlight the modernization of Exit 65/Gary Blvd while simultaneously keeping Exit 65A open and viable with service roads. We concluded, stating our belief that the final project product will reflect our working together with ODOT toward the common goal of an excellent project done as quickly as possible.

At your suggestion, we will wait and look forward to working with ODOT after the review of the comments on the project from Clinton citizens, business owners and governmental leaders, as well as ODOT's own reflection on the project.

I am confident in your professionalism and sincere interest in our project at the state level.

David D. Berrong

Good Morning Brent and others;

Re: I40 iNTERCHANGE DESIGN REVISED

Back on May 27, 2016 I wrote to you with my comments and suggestions about the 2016 plan. At that time I wondered how much attention my letter and suggestions would receive. But I am happy to see that our comments and suggestions did receive consideration in the new plans for the Interchange

The new revised plan for the Interchanges is an unusual, but a well thought out plan and I believe it will be a workable plan.

Much of the proposed plan will be on land we now own and will involve businesses we now own and operate. These include :

Holiday Inn Express & Suites
WATER ZOO.COM INDOOR WATER PARK CLINTON OK.
Neptune Station ROUTE 66
Hampton Inn by Hilton

1. The 66 station at the eastbound exit 65A where it meets Neptune Drive. Its the land with the 3 red dots. And those tanks are in place an in active use.
2. The Water Zoo Indoor Water Park just SW of the proposed South traffic circle
3. The Holiday Inn Express just west of the Water Park on Blvd of Champions
4. The Water Zoo campground just South of the traffic circle exit labelled Water Zoo Road
5. The Hampton Inn just west of the North Traffic circle
6. oUR corporate offices South of the 66 station(#1 above) also showing 3 red dots for tanks Please be advised that those 3 tanks have been removed years ago.
7. The former Jays Tire store at the corner of Gary Blvd and Oliver Avenue- with 1 red dot Those tanks were also removed many years ago

Overall I have no problem with the plan. But a couple of comments

1. The Water Zoo building handles the registration for the Water Zoo Campground. Units up to 65 feet and more drive in the driveway and park in the large paved area between the driveway and the large bowl slide in FRONT of the Water Zoo Building. THEY THEN EXIT to the East (by the existing circle because there is no room to make a U Turn for these large units and they proceed south to the campground entrance. It appears that the new circle and right of way red line is not taking into consideration that these units have to exit the east end of the water zoo front parking lot.
2. The South traffic circle- again- We do not need the pavement off the circle up to the water zoo building. There is an overhead door there but its only for maintenance.
3. The treed area NE of the North Traffic circle is planned for a duplex housing subdivision. May I ask for a North exit off the North traffic circle similar to the Tail you have going south off the South traffic circle(Water Zoo road).
4.

I saved my most important suggestion for last. But before I start let me preface my suggestion with this background information in the hopes it will give me more credibility with you. It seems like I've been involved with traffic safety most of my adult life. At the ripe age of 15 and before I even had a drivers license I observed a intersection near my parents home in New York City The intersection required a NYC traffic police officer standing in the intersection every morning. To be brief in my story let me say that I made a suggestion to the NYC Traffic Department and they adopted my suggestion and the officer was no longer needed and traffic flowed smoother and safer. That was in 1956 and that intersection is still that design today 63 years later.

Then in my next life I became a New York State Police Trooper and then promoted to Sergeant/station commander. In that position I was responsible for 10-55 men as well as being responsible for Criminal and Traffic conditions in my county. It was the equivalent of the Troop Commander in the OHP. In that position it was my responsibility to work closely with NYDOT on traffic conditions and traffic safety situationsin my area.

Many of my suggestions to NYDOT to improve safety were adopted by them. I'm not trying to impress you but I am trying to gain credibility with you for my suggestion.

Now to my biggest suggestion for this interchange design

At the present time you have full exits at 65A and with this plan will have a full exit at exit 65. As well There are 10 businesses at exit 65A and it is important that exit 65A remain an exit NUMBER after the project is completed. My point here is that the motels and station, campground (Hargus CG) all advertise as being at exit 65A. There are logo signs for Gas food Lodging on the main line for businesses at exit 65A. Equally important businesses at exit 65 also have logo signs, advertise in directories, Expedia etc. If the exit number is consolidated into just one exit number - Be it 65 or 65A - One set of businesses will get hurt .

Let me use one business as an example - The Days Inn at exit 65A (Full disclosure- I have no interest in the days Inn) The days Inn advertises in the Days Inn directory, it advertises on Expedia and numerous other web booking sites And if the 65A designation ceases to exit how does a motorist either East Bound or west bound on I-40 get off the new exit and find their way to the Days Inn from the traffic circle.?

There are TOO MANY business at both exits to list them all in the circle. And besides that would further congest the circle. My suggested solution to the problem is to maintain the exit 65 AND 65a signage and double number the Exit as "exit 65 65A". On the main line each direction. Now I do not know of an exit with a double number. But this is a new interesting design exit and I believe a case can be made for an application to the Federal Highway administration to number this exit as 65 65A.

Then when a motorist gets on the circle (eitherone) the circle signs on the circle can designate which ramp from the circle goes to 65 and which to 65A . It cleans up the signage, improves safety and is less confusing to the motorist as he tries to figure out how to find the Days Inn.

Now earlier I said that I was not aware of any Interstate exit that had double numbers. And thats true. But there are exits signed as for example exits 44A-B and they use the same signage on the main line (EXIT 44A- B 1 mile ahead.) and they use the same exit ramps as well. Many of these are in Florida and Georgia but they must comply in some manner with the Federal Highways traffic safety manual. I drove from Daytona beach to Orlando airport just 2 days ago and saw several of these. The only difference they have an 44A and a 44 B while we have a 65 and a 65A.

Thank you for your consideration of my comments and suggestion. Feel free to call me or e mail if anything needs further clarification or discussion. walt@clintonamerica.com or cell 580 445 3555

Good Morning Brent

In my letter of March 5 I neglected to mention that I have a well at the East end of the Hampton Inn and just east of where the concrete parking lot ends. And straight North of that little maintenance building we have there. I don't think the Garber folks know its there

That well feeds the Holiday Inn Express and soon the water zoo as well. It crosses I-40 just East of the maintenance building in the location where we bored I-40 a couple of years ago.

Just wanted to bring it to everyone's attention in case they do not know that the well and line is there.

Very truly yours

Walter Schumacher

Subject: Comments: I-40 Exit 65 at Gary Boulevard Concept (JP31482(04))

Dear ODOT,

I have the following comment(s) or question(s) about the proposed project to improve the I-40 Exit 65 Interchange at Gary Boulevard in Clinton, Custer County, OK.:

The concept is very unique. I like the long acceleration and deceleration lanes. Having east-bound access to I-40 from Gary Blvd will be appreciated by residents and the local businesses. This will also give easy access from Gary Blvd to Neptune Drive (which doesn't exist now).

I recommend making these changes to the design:
1) Include roundabouts where Gary Blvd intersects the frontage roads. We have many accidents in this area when vehicles are turning left. Your design keeps all the left turns onto Gary Blvd. Eliminate the entrances on the west side of Gary Blvd and require vehicles to travel to the roundabout are use it as a U-turn to return north. Also, drivers that are not used to the roundabouts at the end of the exit ramps will exit the roundabout toward Gary Blvd when they want to reach Neptune Drive. Roundabouts at the intersection with Gary Blvd. will allow them to make a U-turn at Gary Blvd to return to their destination.
2) Shift Gary Blvd to the east, keeping the existing road in front of these businesses. This will allow drivers to travel between the existing businesses (e.g. eating lunch at Braums after shopping at K-Mart), without entering Gary Blvd.
3) Build the south roundabout for connection to a future road that enters the roundabout from the west.

Please see my attached markup of your plan drawing.

"I have the following comment(s) or question(s) about the proposed project to improve the I-40 Exit 65 Interchange at Gary Boulevard in Clinton, Custer County, OK."

I like the idea and think it works well to keep both interchanges. I would not be opposed to having access to only Gary Blvd. to simplify things. I would also like to see the opportunity to have local businesses be able to bid or be subcontractors.

As a citizen of Clinton who uses the roads in this area regularly, please follow through on this very important improvement.

The plan that was submitted on February 28, 2019 at the Frisco Center in Clinton will solve many problems that exist.

I definitely approve of this plan.

I-40 EXIT 65 (GARY BOULEVARD) CUSTON COUNTY

DEAR SIR

IN REGARD TO THE PROPOSED LOCAL TRAFFIC AND INTERSTATE PLAN, I RATHER NOT CRITICIZE BUT RATHER FACILITATE RESOLUTIONS. THE CITY HAS TWO MAJOR CONCERNS. FIRST TO STIMULATE GROWTH. SECOND TO PROVIDE SAFE GOOD TRAFFIC FLOW. THE PLAN PRESENTED ON FEB 28TH, 2019 DOES PROVIDE LIMITED ASSISTANCE TO THE CITY IN THIS ASPECT! THESE ARE ELEMENTS SUCH AS COMMERICAL GROWTH, INDUSTRIAL GROWTH, RECREATIONAL/ NON-WORK ACTIVITY GROWTH, AND HOUSING DEVELOPMENT GROWTH.

THESE ISSUES ALSO RELATE TO TRAFFIC FLOW TO AND IN THE CITY AS WELL AS INTERSTATE TRAFFIC FLOW. THE PROPOSED I-40, CITY ACCESS HAS SEVERAL SHORT COMINGS WITH RESPECT TO CITY NEEDS.

THE PROPOSED I-40 CITY INTERCHANGE LOCATION WILL IMPEDE CITY GROWTH TO THE SOUTH, AND DOES LITTLE TO PROVIDE EASY ACCESS TO CITY GROWTH POTENTIAL AREAS, SUCH AS: THE INDUSTRIAL AREAS THE RECREATIONAL SPORT ACTIVITY PARK FACILITY, IE. THE BRICK PLANT PARK AREA. THESE AREAS ARE ON THE CITY OUTER WEST, SOUTHWEST, AND SOUTHEAST.

THE SOUTHWEST AND SOUTHEAST INDUSTRIAL AREAS HAVE A NEED FOR EASY DIRECT ACCESS TO THE INTERSTATE TRAFFIC SYSTEM (I.E.) I-40 INTERCHANGE. THE BRICK PLANT PARK FACILITY WOULD ALSO BENEFIT BY HAVING DIRECT ACCESS CLOSE TO I-40.

Received Time Mar. 12. 2019 5:00PM No. 0040

THE PROPOSED I-40 INTERCHANGE LOCATION PROVIDES VERY LIMITED AND RESTRICTED ACESS TO THESE POTENTIAL CITY GROWTH AREAS. THE INTERSTATE TRAFFIC NEEDS EASY ACCESS FOR TRUCK REFUELING AND REPAIR SOURCES, TOURIST TRAVELERS SERVICES AND A VARIETY OF OTHE RELATED FACILITIES. THESE WILL BE VERY LIMITED BY THE PROPOSED INTERCANGE LOCATION AS NOW PLANED. THE PROPOSED PLAN PROVIDES NO MAJOR LAND AREA TO GROW THOSE POTENTIALS. AMENITIES COULD BRING NEW JOBS AS WELL AS OTHER COMMUNITY IMPROVEMENT POTENTIAL.

I BELIVE THAT A MORE ADVANTAGES SOLUTION TO ADDRESS THE ABOVE STATED CONCERNS WOULD BE AS FOLLOWS:

FIRST RESOLVE GARY-BLVD SOUTHWEST TRAFFIC PROBLEMS BY FOLLOWING THE PROPOSED PLAN SOLUTION. HOWEVER IN ADDITION BUILD ON THAT SOLUTION BY RENOVATING CHAPMAN ROAD INTO A BLVD EQUIVALENT TO GARY-BLVD. THE WEST CHAPMAN ROAD/BLVD WOULD TERMINATE AREA OF SOUTH 28TH STREET (IE) AREA FOR NEW I-40 ON/OFF ACCESS. THE EXISTING S. 28TH STREET SHOULD BE IMPROVED TO PROVIDE INTERSTATE AND LOCAL ACCES TO THE BRICK PARK FACILITY TO THE NORTH OF I-40 AS WELL AS TO THE SOUTH TO THE EXISTING INDUSTRIAL AREA TIEING INTO OLD ROUTE 66.

THE IMPROVED CHAPMAN RD/BLVD SHOULD ALSO EXTEND EAST THE GARY/CHAPMAN INTERCHANGE (SUGGEST ROUND ABOUT) TO NEPTUNE DRIVE. I WOULD ALSO SUGGEST CHAPMAN RD/BLVD BE EXTENDED EAST TO PROVIDE FOR AN INTERCHANGE AT STATE HIGHWAY 183.

Received Time Mar. 12. 2019 5:00PM No. 0040

THESE SUGGESTED REVISIONS OF THE PRESENT PLAN WOULD ELIMINATE MANY CRITICAL CITY NEEDS TO A GREAT EXTENT AND WOULD OVER COME THE CITY PLIGHT OF BEING GROWTH LIMITED BY I-40 DOUBLE CIRCLE INTERCHANGE IN THE MID CITY AREA. THE CITY GROWTH GEOGRAPHICALLY HAS ALWAYS BEEN RESTRICTED BY THE WASHITA RIVER ON THE NORTH, NORTHWEST AND NORTHEAST. THE CITY IS IN RESPECT LIMITED TO AREAS OF GROWTH THESE LIMITS REQUIRE THAT A PLAN MUST BE IMPLEMENTED TO TAKE ADVANTAGE OF THE OPPORTUNITIES THAT ARE AVAILABLE. NOW IS THE TIME TO IMPROVE THE CITY AND I-40 RELATIONSHIP CONDITIONS.

THANK YOU FOR YOUR CONSIDERATION
REGARDING MY COMMENTS.

SINCERLY

Calvin Moore

"I have the following comment(s) or question(s) about the proposed project to improve the I-40 Exit 65 Interchange at Gary Boulevard in Clinton, Custer County, OK."

Pizza Hut has been doing business in Clinton, OK for over 40 years. Our original location was 1024 S 10th Street. We did business at this location for 35+ years. We located here because there was an on and off ramp heading both east and west bound on I-40 which gave us quick access to both sides of town for deliveries as well as gave through traffic on I-40 access to our restaurant with easy on and off from I-40. Over the years business in that part of town began to decline causing businesses to close and/or relocate to a different part of Clinton or a neighboring town. Business in this part of town got so bad we began to look for a new location in Clinton. We spent over 5 years looking for a new location while our business deteriorated. We felt a loyalty to Clinton to remain in town and continuing doing business but we were at a point when we were close to shutting the doors and leaving Clinton. Hutchinson Oil Company (HOC) then approached us that they would be building a new C-Store at the corner of Gary Blvd and Jaycee Ln and would be putting in a stripe mall behind and asked if we would be interested in anchoring this building. It was the perfect spot for us, to get out of the area we were currently located and move across from the High School and have visibility from Gary Blvd to get that traffic from old route 66. Our business has doubled since we have moved into this location at 2001 Jaycee Ln. We still sell the same pizza and we still have the same manager from our location at 1024 S 10th St. The magic wand or silver bullet is Gary Blvd. If you proceed with the current plans at exit 64 on I-40 you will destroy the traffic flow on Gary Blvd and old route 66.

COMMENT FORM

Comments Continued

By destroying this traffic flow you will take my business along with the other neighboring businesses and decrease sales and profits dramatically. There has to be an alternate plan that will allow traffic to have access to I-40 eastbound from exit 64. I understand that there have been multiple project drawings that allow for eastbound access. I strongly encourage you to scrap this current project design and go back to one of the other designs that allow traffic flow to remain high on Gary Blvd and old route 66. There is a reason they call the I-40 business loop through Clinton a tourist trap. It was originally designed to get folks traveling on I-40 to start at one end of town and go through to the other end of town in an effort to get those tax dollars and keep business viable. The only thing I see with this current project drawing is travelers will skip the proposed exit for the two other exits east of town or they will skip Clinton all together. It also appears to be a new tourist trap if you take this new proposed exit. It appears to benefit five businesses with access to each of these businesses with a private entrance into each. Holiday Inn Express, Comfort Inn, Water Zoo, Montana Mikes Steakhouse, and the Neptune C-Store. It is very ironic that all 5 of these businesses are owned by the same individual Walter Schumacher who is accussed of trafficing Filipino nationals to the US for cheap labor. It looks like when viewing these plans it is as if Walter Schumacher drew them up himself. You cannot change the traffic flow so that it benefits one business owner while destroying many business owners on and along Gary Blvd.

I am 110% against this current plan and I know that I am echoing the same opinion as many other business owners along Gary Blvd. DO NOT continue on with this plan and go back to one of the other plans that keeps exit 64 where it is currently located!

"I have the following comment(s) or question(s) about the proposed project to improve the I-40 Exit 65 Interchange at Gary Boulevard in Clinton, Custer County, OK."

Build a retaining wall on North side of project along the homes. Along Concord Ave. Back of Homes. Ok Border Wall and behind Hampton Inn. Too Release noise

How does it effect the value of Homes along this?

"I have the following comment(s) or question(s) about the proposed project to improve the I-40 Exit 65 Interchange at Gary Boulevard in Clinton, Custer County, OK."

I am concerned about the noise impact. Concord ave. is very close to proposed site. If results of study determine a sound proof wall is needed, please notify us in the neighborhood.

Thinking of signage and naming, if there is no uniform street naming other than Frontage Road, please consider changing Frontage Rd. to Red Wheat Drive. Red wheat is a culturally significant name and is in Cheyenne and Arapaho tribal territory.
