FOREWORD

2020-2023 Asset Preservation Plan

The Oklahoma Department of Transportation is pleased to provide the 2020-2023 Asset Preservation Plan. The plan encompasses asset preservation activities on our interstate, U.S. and state highways and bridges, referred to as "on-system." The projects in this plan are developed through a validation and consideration process led by our eight field division engineers with stakeholder input.

The 2020-2023 Asset Preservation Plan includes projects to improve the surface condition of existing on-system interstates and highways, rehabilitate bridges and provide accessibility improvements throughout the state. This plan serves to supplement the activities of the Eight-year Construction Work Plan and works to preserve our existing assets as ODOT strives for Oklahoma to become a "Top 10 State" in infrastructure. The plan includes the improvements to 2,500 lane miles of pavement and the rehabilitation of 85 bridges that are at risk of becoming structurally deficient. In totality, the plan includes nearly 400 projects statewide for a total value of more than \$480 million.

The Asset Preservation Plan has been a key component in reducing the amount of Oklahoma's on-system structurally deficient bridges from 17% down to less than 2% since 2004. Supplementing the focus and resources that we need to maintain bridges coupled with renewed investment in our pavement quality through the Eight-year Construction Work Plan and this Asset Preservation Plan, we will begin improving pavement conditions as well.

In recognizing the value and similarities of the Eight-year Construction Work Plan and the Asset Preservation Plan, we must also recognize the reactionary nature of preservation activities that sets the Asset Preservation Plan apart. The need for preventative maintenance is most directly influenced by the unpredictable forces of Mother Nature and our history of maintenance deferral. The condition of our pavements and bridge structures can change dramatically in short windows of time. The Asset Preservation Plan is presented as informational and should be considered to be flexible and subject to regular re-prioritization and adjustment as dictated by ever-changing conditions.

On behalf of ODOT, thank you for the opportunity to present this information and for your continued support in the construction, care and maintenance of Oklahoma's transportation infrastructure.

A handwritten signature in blue ink, appearing to read "Tim Gatz", is written over a light blue horizontal line.

Tim Gatz
Oklahoma Secretary of Transportation
Oklahoma Department of Transportation Executive Director

**BUDGETARY
PROJECTIONS**

Budgetary Projections

ASSET PRESERVATION PLAN - SFY 2020 through SFY 2023

The budgetary projections utilized for the basis of the fiscally responsible and financially balanced Asset Preservation Plan were established through a systematic evaluation of the Department's anticipated State and Federal revenues and expenditures. Projections were performed for State Fiscal Years 2020 - 2023 with the State Fiscal Year defined as beginning July 1st and ending on June 30th. The budgetary projections only address funding that has been historically and/or categorically committed to State asset preservation.

For the purposes of the initial projections, an estimated budgetary baseline amount of \$120 million was utilized as the benchmark for SFY 2020. This baseline amount provides \$75 million for roadway preservation, \$40 million for bridge preservation and engineering, and \$5 million for accessibility projects statewide.

A formula that includes consideration for conditions and that is influenced by the lane miles in each Field Division is applied to the roadway asset preservation baseline amount to insure an equitable geographic distribution of each Fiscal Year projection. Likewise, a formula that is focused on the square footage of bridge deck in each Field Division is applied to the bridge preservation baseline amount to achieve a similar distribution of the available bridge asset preservation funds. Lastly, a formula considering common demographic, physical and historical criteria, and yields a Divisional percentage that renders an equitable distribution of funds set aside for accessibility projects.

**BALANCING
PROCESS**

Balancing Process

The development of Asset Preservation Plan begins with our Field Division Engineers and is guided by their knowledge of the transportation needs and priorities in their respective Divisions. They and their staff work to maintain an understanding of the condition of the roads and bridges in their areas of responsibility.

Their daily experiences and knowledge of the transportation assets is then coupled with the careful consideration of the improvements anticipated to be delivered through the Eight Year Construction Work Plan (CWP). It is important to maintain a clear perspective of the project development schedule for the improvements encompassed by the CWP. The timing of preservation activities is paramount in order to avoid potential project conflicts and to maintain the transportation system in a serviceable and manageable condition until any planned larger scope improvements can be achieved.

The Asset Preservation Plan is a function of each Field Division's condition assessments of the highway network, the associated critical needs and the work to be accomplished in the CWP along with the anticipated preservation budgets. Annually, the Field Division Engineers review and validate the scheduled Asset Preservation Plan projects and target their needed preservation activities in accordance with the projected funding availability. The Asset Preservation Plan is crafted with foremost consideration for maintaining the integrity of the Field Division Engineer's transportation system management strategy and project priorities. In addition, the balancing process seeks to insure that each Field Division is allocated available funding in accordance with the aggregate budget projections.

ADDITIONAL CONSIDERATIONS

System preservation can be dramatically influenced by the unpredictable effects of weather, deterioration and ever changing traffic patterns. Therefore, asset preservation activities are somewhat more reactionary in nature than the calculated improvements encompassed in the Construction Work Plan. Some re-prioritization of the preservation activities depicted herein is acceptable and expected.

The Asset Management Plan is balanced within these guidelines and has been determined to be an equitable representation to the satisfaction of the Department and the Transportation Commission.

**SUMMARY
REPORT**

ASSET PRESERVATION PLAN SUMMARY REPORT

SFY	Available Funds	Division 1	Division 2	Division 3	Division 4	Division 5	Division 6	Division 7	Division 8	SFY Totals
