Hazard Mitigation Assistance

Hazard Mitigation Assistance (HMA)

The Federal Emergency Management Agency's (FEMA) HMA programs provide funds for projects that reduce the risk to individuals and property from natural hazards. These programs enable mitigation measures to be implemented before, during, and after disaster recovery.

Who is Eligible to Apply?

- State, Territorial, Tribal, and local governments
- Certain private nonprofit organizations
- Individuals and businesses may not apply directly to the State or FEMA, but eligible local governments may apply on behalf of a private entity

Hazard Mitigation Grant Program

The Hazard Mitigation Grant Program (HMGP) provides funding for long-term hazard mitigation measures following major disaster declarations. Funding is available to implement projects in accordance with State, Tribal, and local priorities.

Pre-Disaster Mitigation

The Pre-Disaster Mitigation (PDM) program provides funds on an annual basis for hazard mitigation planning and the implementation of mitigation projects. FEMA provides funding for measures to reduce or eliminate overall risk from natural hazards.

Flood Mitigation Assistance

The Flood Mitigation
Assistance(FMA) program
provides funds on an annual
basis so that measures can be
taken to reduce or eliminate
risk of flood damage to
buildings insured under the
National Flood Insurance

Program (NFIP). The FMA Program for FY 2013 and beyond includes provisions to mitigate Severe Repetitive Loss (SRL) and Repetitive Loss (RL) properties.

Cost Sharing

HMA grants are cost-shared. The total cost to implement approved mitigation activities is generally funded by a combination of Federal and non-Federal sources.

What are the Roles of Communities, Tribes, States, and FEMA?

Local jurisdictions develop projects that could reduce property damage from future disasters, and submit grant applications to the State.

The States and Tribes (acting as Applicants) establish their mitigation priorities, facilitate the development of applications, and submit applications to FEMA based on State or Tribal criteria and available funding. The State or Tribe is responsible for managing and administering these programs.

FEMA conducts a final eligibility review to ensure compliance with Federal regulations. Projects must comply with Federal environmental laws and regulations, be cost-effective, technically feasible, and meet additional program criteria.

FEMA encourages property and business owners interested in implementing mitigation activities to contact their local community planning, emergency management, or Hazard Mitigation office for more information.
