Table of Contents

Introduction.....	1
North American Industry Classification System and Titles.....	5
Section I: Annual Average Covered Employment by County..... (2003 – 2023)	7
Section II: QCEW Data 2023 by State and MSA.....	12
Section III: QCEW Data 2023 by County.....	16

Introduction

Data Available

QCEW produces a comprehensive tabulation of data on the number of establishments, monthly employment and quarterly wages for workers covered by State unemployment insurance (UI) laws and Federal workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. These data are aggregated to many different levels, starting at the 6-digit NAICS industry level, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (MSA, State, and national). At the national level, the QCEW program publishes establishment, employment and wage data for nearly every NAICS industry. At the State, county and MSA level, the QCEW program publishes establishment, employment, and wage data down to the 6-digit NAICS industry level, if disclosure restrictions are met. Establishment counts and wage data are available quarterly and annually. Employment data are available monthly and annually. In addition to richly detailed employment and wage data, the QCEW program produces data on establishments, employment, and wages stratified by size of establishment for the first quarter of each year.

BLS publishes data from the QCEW program every quarter in the [County Employment and Wages](#) press release, within 5 months after the end of each referenced quarter. About two weeks after this release is available, the QCEW program also publishes full quarterly industry detail data, at all geographic levels in several file formats, through our data [files](#). Additional QCEW data tools include [Open Data Access](#), the [QCEW Data Viewer](#), and the [QCEW State and County Map](#). More information about current and future news release and full data access can be found on our [release calendar](#). Historical data availability details, from these QCEW database tools, can be found on the [QCEW Data Availability](#) page.

In addition, QCEW publishes the annual bulletin [Employment and Wages, Annual Averages](#) about 8 months after the end of the referenced year. The 2002 edition was the first to appear on the internet in its entirety.

Establishments

An establishment is commonly understood as a single economic unit, such as a farm, a mine, a factory, or a store, that produces goods or services. Establishments are typically at one physical location and engaged in one, or predominantly one, type of economic activity for which a single industrial classification may be applied. A firm, or a company, is a business and may consist of one or more establishments, where each establishment may participate in different predominant economic activity.

QCEW conducts various activities to increase the amount of data reported at the establishment level; however, some firms with multiple establishment may choose to report as a single entity. The QCEW data that are available stratified by establishment size are discussed on our [size availability](#) page. QCEW uses standard establishment size strata for its tabulations. These size strata use codes and titles described in our documentation for [NAICS](#) coded data and [SIC](#) coded data. The size code standards were established by the Office of Management and Budget (OMB) in a 1982 directive, [The Comparability of Statistics on Business Size](#).

Coverage

Employment

QCEW monthly employment data represent the number of covered workers who worked during, or received pay for, the pay period that included the 12th day of the month. Covered employees in the private-sector and in the state and local government include most corporate officials, all executives, all supervisory personnel, all professionals, all clerical workers, many farmworkers, all wage earners, all piece workers, and all part-time workers. Workers on paid sick leave, paid holiday, paid vacation, and the like are also covered. Federal employment data are based on reports of monthly employment and reports of quarterly wages, both submitted quarterly to state agencies. Reports are submitted for all federal installations with employees covered by the act, except for certain national security agencies, which are excluded for security reasons.

Employment Exclusions

Besides excluding the aforementioned national security agencies, QCEW excludes proprietors, the unincorporated self-employed, unpaid family members, certain farm and domestic workers from having to report employment data, and railroad workers covered by the railroad unemployment insurance system. Excluded as well are workers who earned no wages during the entire applicable pay period because of work stoppages, temporary layoffs, illness, or unpaid vacations. Excluded from QCEW federal government employment are elected officials in the executive or legislative branch, members of the armed forces or the Commissioned Corps of the National Oceanic and Atmospheric Administration, individuals serving on a temporary basis in case of fire, storm, earthquake, or other similar emergency, and individuals employed under a Federal relief program to relieve them from unemployment. For a complete list of federal government exclusions, see Appendix A of the UCFE Instructions for Federal Agencies. Excluded from QCEW state and local government employment are elected officials, members of a legislative body or members of the judiciary, members of the state National Guard or Air National Guard, and employees serving on a temporary basis in case of fire, storm, snow, earthquake, flood or similar declared emergency.

Average Annual Employment

QCEW annual average employment is calculated by summing the twelve (12) months of employment (final) for a calendar year, and then dividing by 12. This is usually first published in June of the following year, with final annual average QCEW data available in September of that year. Please note that rounding may result in minor differences between hand calculations and the published annual average employment data from QCEW.

Wages

QCEW wages data represent the total compensation paid during the calendar quarter, regardless of when the services were performed. In most states, covered employers report total compensation paid during the calendar quarter, regardless of when the services were performed. A few state laws, however, specify that wages be reported for or be based on the period during which services are performed rather than the period during which compensation is paid. Under most state laws or regulations, wages include bonuses, stock options, severance pay, the cash value of meals and lodging, tips and other gratuities. In some states, wages also include employer contributions to certain deferred compensation plans, such as 401(k) plans.

Wage Exclusions

Covered employer contributions to old-age, survivors, and disability insurance; health insurance; UI; workers' compensation; and private pension and welfare funds are not reported as wages. Employee contributions for the same purposes, however, as well as money withheld for income taxes, union dues, and so forth, are reported, even though they are deducted from the worker's gross pay.

For more information about QCEW Coverage, see the [QCEW Handbook of Methods - Concepts](#).

Average Weekly Wages

The average weekly wages shown were computed by dividing the total wages for the year by the average employment to arrive at annual average wages. They in turn were divided by 52 weeks to determine average weekly wages.

Data Sources

QCEW microdata

For each state, the QCEW microdata are fundamentally a byproduct of the unemployment insurance (UI) accounting system in that state. The states receive a Quarterly Contributions Report (QCR) from all private sector employers, as well as from state and local governments covered under the UI program. Federal government employers provide statistical reports via the Report of Federal Employment and Wages; these reports contain only employment and wages data, for each employer's installations within each state.

Surveys

The QCEW conducts two surveys in addition to collecting administrative data. Approximately one-third of all private sector U.S. businesses with more than three employees are contacted annually to verify their main business activity and physical location address via the [Annual Refiling Survey](#) (ARS). Eligible multiple-establishment employers are required to report quarterly employment and wage data via the [Multiple Worksite Report](#) (MWR). Both surveys collect data via paper forms and electronically.

For more information about QCEW Data Sources, see the [QCEW Handbook of Methods - Data Sources](#).

For more information related to QCEW reports and employment counts by type and data source, go to our [QCEW Data Source Counts](#) page.

Industrial Divisions

Employment and wages for 2023 are reported by major industry division as defined in the 2022 *North American Industry Classification System Manual*. Industry detail shown in this handbook covers the following industry divisions:

Agriculture, Forestry, Fishing and Hunting
Mining, Quarrying, and Oil and Gas Extraction
Utilities
Construction
Manufacturing
Wholesale Trade
Retail Trade
Transportation and Warehousing
Information
Finance and Insurance
Real Estate and Rental and Leasing
Professional, Scientific, and Technical Services
Management of Companies and Enterprises
Administrative and Waste Services
Educational Services
Health Care and Social Assistance
Arts, Entertainment, and Recreation
Accommodation and Food Service
Other Services, except Public Administration
Public Administration
