

Schedule of Monthly Data Reports for CES and LAUS

The CES and LAUS data are available for Oklahoma (as well as other states) and subareas each month about six weeks after the survey reference week. For instance, "preliminary" data for November 2021 and "final" data for October 2021 will be released in a comprehensive state data report on December 18, 2021. Most states will release their state and area data on the report schedule below.

The annual release for the new benchmark data is effective with the preliminary January estimates yearly. The estimates are available in March. For more information, see
