About the AIM Center

The AIM Center provides qualifying Oklahoma students with a comprehensive library of braille, large-print textbooks and novels and specialized learning materials. We also maintain the Federal Quota Registry. By registering eligible visually impaired children, we secure vital federal funding keeping classroom resources accessible and free to our schools and students.

MathBuilders-Fractions helps blind and low-vision students in grades kindergarten through third grade3 learn fractions, mixed numbers and decimals.

Who qualifies?

The program serves Oklahoma students from birth through 12th grade (including public, private and homeschooled children) who have an IEP or receive SoonerStart services.

Eligible participants must also meet at least one of the following criteria:

- Are blind or visually impaired.
- Have a physical disability that limits the use of standard print materials.

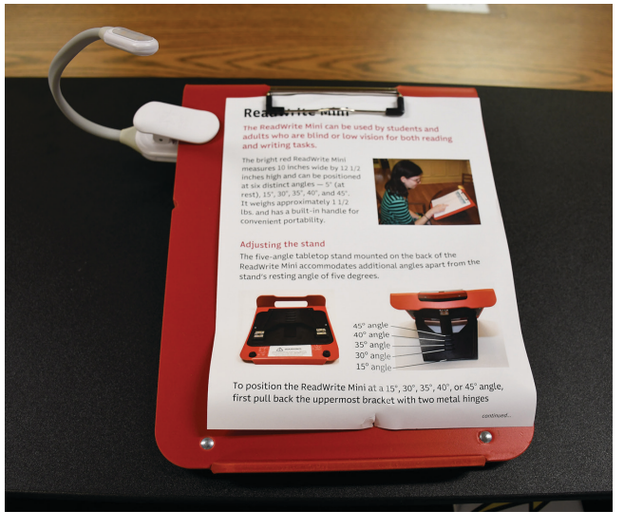

How we support blind and visually impaired learners

We provide a comprehensive range of specialized learning resources including:

- Accessible textbooks and novels: Available in braille and large print formats.
- Adapted classroom materials: Tactile graphics, charts and maps tailored for accessibility.
- Specialized educational aids: Tools designed to support classroom learning.
- Developmental toys and games: Interactive resources that build concepts and enhance learning.
- Braille and adaptive literacy tools: Materials for writing braille and developing independent skills.
- Shared reading books: Twin-vision (print and braille) books for parents and teachers to read alongside children.

This Power Select and Switch is an environmental control unit that lets individuals with limited vision and/or motor abilities plug in standard electrical appliances and operate them independently using adaptive switches.

ReadWrite Stand Mini is a device that can be used for both reading and writing tasks by individuals with visual impairments.

Program materials

Students receive instructional materials to use the entire school year. Borrowed items are returned at the end of the year, while single-use items are the students to keep. Please note the AIM Center provides unique support designed to complement, not duplicate, existing public services.

How to request materials

Getting the right resources for your child or student is simple. Contact the AIM Center via email or phone, and our team will guide you through the registration and ordering process.

Are you a SoonerStart provider?

Coordinators and consultants may contact our program directly to secure developmental products for blind or visually impaired children from infancy through age three.
