### **Rapid Whole Genome Sequencing, Effective date: February 1, 2026, contingent upon CMS approval.**

The proposed State Plan amendment establishes coverage and reimbursement for rapid whole genome sequencing. Testing will be covered for members who are under 21 years of age, have an unknown complex or acute illness, and are receiving intensive care unit hospital services. This coverage will include testing for genetic changes that may help identify the member's condition. Rapid whole genome sequencing will be excluded from the Per Discharge Prospective Rate for hospitals and will be reimbursed separately based on the Ambulatory Payment Classification fee schedule. Reimbursement for testing provided in an ITU facility will be included in the Inpatient Hospital Per Diem Rate.
